11th International Conference and Exhibition on Device Packaging 2015

Fountain Hills, Arizona, USA
16-19 March 2015

# TABLE OF CONTENTS

## KEYNOTES

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Die-Stacking is Finally Happening</td>
<td>1</td>
</tr>
<tr>
<td>Yuan Xie</td>
<td></td>
</tr>
<tr>
<td>Current and Future Technologies for High-End Applications</td>
<td>18</td>
</tr>
<tr>
<td>Rozalia Beica</td>
<td></td>
</tr>
<tr>
<td>2.5D &amp; 3D Integration - Where we have been, where we are now, where we need to go</td>
<td>38</td>
</tr>
<tr>
<td>Riko Radojcic</td>
<td></td>
</tr>
<tr>
<td>Package Trend Changes and Challenges for Mobile Devices: Is Thin Still In?</td>
<td>56</td>
</tr>
<tr>
<td>E. Jan Vardaman</td>
<td></td>
</tr>
</tbody>
</table>

## GBC

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Market Trends and Evolution of IoT</td>
<td>70</td>
</tr>
<tr>
<td>Rozalia Beica</td>
<td></td>
</tr>
<tr>
<td>IC Market Outlook in an Unstable Economy</td>
<td>90</td>
</tr>
<tr>
<td>Bill McClean</td>
<td></td>
</tr>
<tr>
<td>Sensor Packaging and Integration for IoT and Wearables</td>
<td>106</td>
</tr>
<tr>
<td>Brandon Prior</td>
<td></td>
</tr>
<tr>
<td>Addressing The Global Business Opportunities Fueled By The Internet of Things (IoT)</td>
<td>118</td>
</tr>
<tr>
<td>Michael O'Donoghue</td>
<td></td>
</tr>
<tr>
<td>Evolving Challenges for Sensor/MEMS Packaging</td>
<td>121</td>
</tr>
<tr>
<td>Mike Stanley</td>
<td></td>
</tr>
<tr>
<td>The Wearable Market and Packaging Requirements</td>
<td>134</td>
</tr>
<tr>
<td>E. Jan Vardaman</td>
<td></td>
</tr>
<tr>
<td>Internet of Things (IoT): Real World Value Propositions</td>
<td>145</td>
</tr>
<tr>
<td>Jim Walker</td>
<td></td>
</tr>
<tr>
<td>Maximizing the Internet of Everything by Mobilizing the MEMS/Sensors and Adjacent Ecosystems</td>
<td>163</td>
</tr>
<tr>
<td>Stephen Whalley</td>
<td></td>
</tr>
</tbody>
</table>

## SESSION TA1:

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Development of 2.5D and 3D IC Fabrication and Assembly Technologies</td>
<td>176</td>
</tr>
<tr>
<td>Guilian Gao</td>
<td></td>
</tr>
<tr>
<td>Advanced High Density Trench Capacitor Substrate Technology for 3D Heterogenous Stacks with Outstanding Performance</td>
<td>180</td>
</tr>
<tr>
<td>Catherine Bunel</td>
<td></td>
</tr>
<tr>
<td>SiPs in the Medical Domain and in the Defense and Industrial Domain produced with WDoD (TM) Technology</td>
<td>184</td>
</tr>
<tr>
<td>Pascal Couderc</td>
<td></td>
</tr>
</tbody>
</table>

## SESSION TA2:

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Embedded Solutions: Fan-out and Embedded Die Packages Market and Technology Trends</td>
<td>189</td>
</tr>
<tr>
<td>J. Azemar</td>
<td></td>
</tr>
<tr>
<td>Silicon Wafer Integrated Fan-Out Technology</td>
<td>192</td>
</tr>
<tr>
<td>Curtis Zwenger</td>
<td></td>
</tr>
<tr>
<td>Comparison of FOWLP vs QFN Package from Thermal Aspect</td>
<td>196</td>
</tr>
<tr>
<td>Eric Wan</td>
<td></td>
</tr>
<tr>
<td>Low Cost Chip Last Fanout Package Using Coreless Substrate</td>
<td>200</td>
</tr>
<tr>
<td>John Hunt</td>
<td></td>
</tr>
</tbody>
</table>
SESSION TA3:

3D Printed Multi-Functionality: Structures with Electronics
Eric MacDonald

An In Situ Atmospheric Probe for Real Time Weather Monitoring
Mark Adams

3D Microsensor Imaging Arrays Networks
Stanislav Ivanov

3D Printing Tools for Construction
Aubrey Beal

SESSION THA1:

The European 3D Heterogeneous Integration Platform (e-BRAINS) - A Particular Focus on
Reliability and Low-Temperature Processes for 3D Integrated Sensor Systems
Peter Ramn

Manufacturing Readiness of BVA (R) Technology for Fine-Pitch Package-on-Package
Guilian Gao

Development of TSV Reveal Process Using Very Fine Si/Cu Grinding and Metal Contamination
Removal
Naoya Watanabe

SESSION THA2:

SiP Technology for Wireless Module Miniaturization
Vincent K Liao

Shrinking Package Footprint by Embedding Top-Side Real Estate Using Core-to-Core Joining
Catherine Shearer

Advanced Electronic Packaging Options for Miniaturization of Complex Medical Devices
Susan Bagen

SESSION THA3:

Heterogeneous Integration and Micromachining Technologies for Terahertz Devices and Components
Robert Weikle

Design and Fabrication of MEMS-type Compliant Overhand Flip-Chip Interconnect for RF
Applications
Pingye Xu

Highly Tunable Mn-Doped PZT Thin Films for Integrated RF Devices
Warda Benhadjala

Integrated Localized MicroCooling Using High-Displacement Piezoelectric Actuators
Michael Kranz

SESSION TP1:

A Cost and Yield Analysis of Wafer-to-Wafer Bonding
Amy Palesko

Thin Wafer Handling Using Mechanical-or Laser-Debondable Temporary Adhesives
D. Fleming

Temporary Bonding of Wafers, Displays, and Components
John Moore

Cu Electroplating Chemistry and Process Enabling Rapid TSV Filling with Long Bath Life
Matthew Thorseth

Study of Chip Stack Process and Electrical Properties for 3D-IC
Toshiya Akamatsu
SESSION TP2:

Scanned Mask Imaging Ablative DPSS UV Laser Process for 2um L/S RDL ................................................................. 319
David Myles

Electroplating with Dielectric Bridges ............................................................................................................................. 323
Gene Stout

Next-Generation Copper, Nickel, and Lead-Free Metallization Products for Next-Generation Devices and Applications ........................................................... 326
Jonathan Prange

FEA Investigation of Package Structural Factors Affecting Bump Fatigue ................................................................. 330
Mingyi Wang

Next Generation Thin Film Polymers for WLP Applications and Their Mechanical Characterization ............................... 333
Markus Wöhrmann

Self Priming Low Stress Aqueous Developable Benzocyclobutene (AD-BCB) Photodielectric Materials for Advanced Wafer Level Packaging .................................................. 338
Hua Dong

SESSION TP3:

Technologies for Wafer Level MEMS Capping Based on Permanent and Temporary Wafer Bonding .............. 341
Kai Zoschke

Anaerobic Adhesive Jetting for Microelectronics Packaging Applications ................................................................. 345
Hanzhuang Liang

A Kinetic Monte Carlo Approach to Study Transport in Amorphous Silicon HIT Cells ............................................. 349
Pradyumna Muralidharan

Sapphire Micromachining: Promises and Challenges ................................................................................................. 352
Syed Ahmad

Flexible Hand-Free Microelectronics Assembly Line for the Chip and Wire Industry ............................................. 356
William Bolinger

Bend Testing of Micro-Scale Bulk Metal Specimens Using a Chip-Scale Test Instrument ............................................. 361
Li-Anne Liew

SESSION TP4:

Advanced Silicon Interposer for High Density and High Integration Electronic Packages .............................................. 365
Satoru Kuramochi

Embedded Power Modules – A new approach using Power Core and High Power PCB .............................................. 369
Lars Böttcher

2.5D and 3D Multi-Die Packages using Silicon-less Interposers ................................................................................... 374
Mike Kelly

Silicon-Embedded RF Micro-Inductors for Ultra-Compact RF Subsystems ................................................................. 381
Florian Herrault

SESSION TP5:

BGA Board Level Reliability Analysis & Optimization ................................................................. 385
Betty Yeung

Case Study for the Use of SiP Technology for a UAV Controller ................................................................................... 386
James Meyer

Enabling Requirements for TCB HVM Equipment ................................................................................................. 389
Tom Strothmann

SESSION TP6:

Improved RF Metamaterial Band-Pass Filter Design Using CSRR Structures on LCP Substrates ......................... 400
Christopher James

A PCB Technology Electrical Conductivity Sensor for the Measurement of Saltwater Contamination ................. 404
Robert Dean
Design and Fabrication of a PCB MEMS Module with Integrated Switches and Sensor Suite .................................................. 408
Li-Anne Liew
The Discrete Vacuum Packaging of IR Micro-Bolometers ............................................................................................................. 412
Heather Florence

SESSION WP1:
Advancements in Through Glass Via (TGV) Technology …........................................................................................................ 416
Aric Shorey
Material and Process Developments for Robust and High Reliability Glass Wafers .......................................................... 419
Roupen Keusseyan
Characterization of a Semiconductor Packaging System Utilizing Through Glass Via (TGV) Technology ........................................ 423
Tim Mobley
Magnetic Current Imaging of a TSV Short in a 3D IC .................................................................................................................. 428
Jan Gaudestad
A Module-on-module Manufacturing Process and the Study of its Warpage and Signal Integrity ............................................. 439
Thomas Wang
3DIC Yield Analysis Gaps and Possible Approaches ................................................................. 442
Jacob Orbon

SESSION WP2:
Multi Beam Full Cut Dicing of Thin Si IC Wafers ..................................................................................................................... 443
Jeroen van Borkulo
Ultra-Low Residue (ULR) Semiconductor-Grade Fluxes for Flip-Chip and MEMS Applications ................................................. 447
Maria Durham
Design of Filled One Step Chip Attach Materials (OSCA) for Conventional Mass Reflow Processing: Curing Kinetics and Solder Reflow Aspects ...................................................................................................................... 451
Daniel Duffy
Routable aQFN With The Ball Mount Design ......................................................................................................................... 455
C. Lu
Advances in Fine Pitch Off-Chip Interconnections Through the Use of a Novel Surface Finish ............................................. 459
Rick Nichols

SESSION WP3:
A Microcontroller Approach to Measuring the Transmissibility of MEMS Devices ................................................................. 463
Chong Li
A Random Stimulation Source for Evaluating MEMS Devices using an Exact Solvable Chaotic Oscillator ................................ 468
Aubrey Beal
The Increasing Challenges in Testing MEMS ............................................................................................................................. 472
Richard Chrusciel
Optical Cavity Interrogation for MEMS Accelerometers ........................................................................................................... 475
Michael Kranz
A MEMS Magnetometer Utilizing Neodymium Rare Earth Magnets .......................................................................................... 486
John Tatarchuk
Micro-Electro-Mechanical System for Measuring Mechanical Properties of Cell Aggregates ............................................. 491
Negar Moghimi

POSTERS
Challenges and Solutions for Microbump Inspection .................................................................................................................. 494
Hong Shen
New Products and Emerging Laser Technology for the Packaging Industry .............................................................................. 498
Dirk Mueller
Large Field 1.5-2um L/S Patterning by Projection Lithography for Low Cost 2.5D Glass and Organic Interposers............................................................................................................................... 501
Ryuta Furuya

Fabrication and Reliability Evaluation of a Wide I/O Package-on-Package Structure.................................. 502
Edward Huang

Reliability of Cu Wirebonded ICs for Automotive Applications ........................................................................ 506
Mike Howard

Cu Migration and its Impact on the Metastable Behavior of CdTe Solar Cells .................................................. 507
Da Guo

High Temperature InGaN Solar Cell Modeling.................................................................................................. 510
Yi Fang

Suitability of Copper Wire Bond ICs in Automotive and Other Harsh Environment Applications .................. 513
Mike Howard

Automate 3D Modling of Trace and Via Structures ...................................................................................... 529
Mike Howard
