# TABLE OF CONTENTS

## KEYNOTE:

Future Perspective of Materials and Processes of LTCC Technology Beyond Microelectronics Packaging

Yoshihiko Imanaka

---

## SESSION TA1: CERAMIC COMPONENTS FOR POWER ELECTRONICS

- **Dielectrics for Power Capacitors**
  
  R. Karmazin

- **Material Requirements for Power and High Temperature Multilayer Ceramic Capacitors (MLCC)**
  
  Guenter F. Engel

- **Insulating Ceramic Layers Fabricated by Aerosol Deposition Process for Heat Dissipation of High Power Circuit Boards**
  
  Jun Akedo

- **Piezoelectric and Dielectric Multilayer Components**
  
  Clive Randall

---

## SESSION TA2: THICK FILM GLASSES

- **Sintering and Foaming of Barium and Calcium Silicate Glass Powders**
  
  B. Agea Blanco

- **High Modulus Oxide Glasses**
  
  Katharina Philipp

- **Corrosion of Borosilicate Glasses**
  
  Constans M. Weber

- **Requirements on Glasses for Femtosecond-laser Bases Micro-Structuring**
  
  Thomas Seuthe

---

## SESSION THA1: MICROSYSTEMS APPLICATIONS

- **LTCC Microreactors Application in Microfluidic Integrated System for Hydrophobic Drug Encapsulation in Polymeric Nano/Microparticles**
  
  Rincon Ardila L. K.

- **LTCC Based Multi-Electrode Arrays for In-Vitro Cell Culture**
  
  Heike Bartsch

- **3D Focalization Microfluidic Devide Built with LTCC Technology for Nanoparticle Generation Using Nanoprecipitation Route**
  
  Houari Cobas Gomez

- **Thin Film Strain Gauges on LTCC Membranes for Surface Monitoring of High Power Lasers Mirrors**
  
  Nam Gutzeit

- **3D-Shaping of Ceramic Tapes to Manufacture a High-Temperature Miniaturized Furnace**
  
  Jaroslav Kita

---

## SESSION THA2: LTCC PROCESSING AND MANUFACTURING

- **Heat Development at the Microscale in Ceramic Components - Thermography and Complementary Tools**
  
  Soren Rohrig

- **Quality Aspects in Ceramic Green Tape Micro Structuring**
  
  Gunter Hagen

- **Laser Structuring of Printed Layers on Thick Film Ceramic Substrates**
  
  R. Schueubeck
SESSION THA3: CERAMIC ADDITIVE MANUFACTURING

Comparison of Silver Sources for Silver/Glass Compounds by Multi-Material 3D-Printing ................................................. 94
Dominik Polsakiewicz
Stereolithographic Additive Manufacturing of Diamond Photonic Crystal Composed of Titania and Alumina Micro Lattices ................................................................................................................. 103
Soshu Kirihara
First Approach to 3D Screen Printing of Ceramics and Ceramic-Metal Combinations .................................................. 111
Thomas Studnitzy
Multilayer Ceramic Technology and Ceramic Injection Molding - a Technological Combination for the Manufacturing of 3D Functional LTCC-Components .................................................. 112
Steffen Ziesche

SESSION TP1: RF-MATERIALS AND APPLICATIONS

Miniature Lowpass Filters in Low Loss 9k7 LTCC ................................................................. 113
Steve Dai
LTCC Solution for Millimeter-Wave Automotive Short-Range Radar Applications ...................................................... 117
Xin Wang
Integration of Silver Heat Spreaders in LTCC Utilizing Thick Silver tape in the Co-Fire Process ........................ 121
Tilo Welker
A 10 MHz to 80 GHz BGA Transition from Chip to LTCC Interposer for Chip Scale Packages ................ 126
Bradley A. Thrasher
Tolerance-optimized RF Structures in LTCC For MM-Wave Frequencies Applications ........................................ 132
Jordi Balcells-Ventura

SESSION TP2: MICROSYSTEMS MATERIALS AND PROPERTIES

Ultra Low Sintering Temperature Electroceramics Toward Practical Applications ...................................................... 136
Heli Jantunen
Preparation, Characterization and Properties of Bismuth Silicate LTCC Tapes ...................................................... 137
M. T. Sebastian
Electrical Characterization of Thick Film Materials ........................................................................................................ 138
L. Rebenklau
Mechanical Characterization of Miniaturized Functional Substrates and Components in Different Environments ............................. 144
Raul Bermejo

SESSION TP3: ADVANCED DEPOSITION TECHNOLOGY

Printing of Ultrathin Nanoparticulate Indium Tin Oxide Structures ...................................................... 151
Moritz Wegener
Advanced Functional Oxide Thin Film on Flexible Substrate by Photo Reaction of Hybrid Solution (PRHS) ................................................................................................................................. 162
Tetsuo Tsuchiya
Low Loss Dielectric Ink Based on Natural Zircon ........................................................................................................ 163
Jobin Varghese
SESSION TP4: INTERACTIVE POSTER SESSION

LTCC Piezoelectric Transducer for Energy Harvesting ......................................................... 164
Arkadiusz P. Dabrowski

Silver Metallization on Porosified LTCC Deposited by Pulse Plating Technique .................. 171
Frank Steinhausser

Dielectric Breakdown Mechanism of Perovskite-Structured Ceramics ................................. 175
Takuya Hoshina

The Influence of Glassy Carbon on Tribological Properties in Metal-Ceramic Composites With
Skeleton Reinforcement ........................................................................................................... 180
Jerzy Myalski

The Influence of Carbon Additions on Structure and Properties of Composites Manufactured via
Powder Metallurgy Method .................................................................................................... 184
Bartosz Hekner

Cobalt Oxide Addition Effects on the Microstructure and Electronic Properties of CuZn Ferrites . 190
Hsing-I Hsiang

Design and Fabrication of Ceramic Microchannel Heat Exchangers and Micoreactors ............. 198
Ca Lewinsohn

New Piezo Material and Its Application for Energy Harvesting and Ultrasound Probe .............. 199
Sang-Goo Lee

SESSION WA1: PIEZOELECTRIC MATERIALS AND DEVICES

Piezoelectric Materials and Applications .............................................................................. 200
Muhammad Umair Farrukh

High Performance PMN-PT Based Piezoelectric Single Crystals and the Applications ............. 201
Jian Tian

Simulation of the Working Range of an Implantable Hearing Aid Transducer by Use of Different
Piezoelectric Materials .......................................................................................................... 202
Martin Koch

Micro-Positioning Stages for Adaptive Optics Based on Piezoelectric Thick Film Actuators .... 207
Sylvia Gebhardt

SESSION WA2: MATERIALS AND MICROSYSTEMS DESIGN AND SIMULATION

Stress and Strain Modeling of Low Temperature Cofired Ceramic (LTCC) Seal Frame and Lid .... 214
Daniel Krueger

Substrate Integrated MM-Wave Antenna Utilizing Metalized Cavity Walls ............................ 221
J. Balcells-Ventura

Design of Small-size and Low-loss LTCC Filters on Capacitively Loaded Cavities ................. 229
Viacheslav Turgaliev

Design of LTCC Based Ceramic Microsystem for Water Purification Portable Device ............ 241
Darko Belavic

Investigation of Inhomogeneous Shrinkage of Partially Crystallizing Low Temperature Co-Fired
Ceramics (LTCC) .................................................................................................................. 242
Christian Lenz

SESSION WA3: CERAMIC BASED ENERGY APPLICATIONS

High-Performance Ni Nanocomposite Anode Fabricated from Gd-Doped Ceria Nanocubes for Solid
Oxide Fuel Cells at Low Operaturing Temperature ................................................................. 249
Satoshi Ohara

Latest Results of the new enerday SOFC System EN 350/500 for Propane and Natural Gas in
Different Industrial Applications ............................................................................................. 250
Matthias Boltze

Thermoelectric Generators of Oxide Ceramic Materials in Multilayer Design ......................... 251
Timmy Reimann
Fabrication and Characterisation of Vibration and Wind Energy Harvestors Using Multi-layer Free-standing Piezoelectric Thick-films ............................................................................................................................... Yang Bai

SESSION WA4: EMERGING TECHNOLOGIES/NANOMATERIALS

3D THz all-Dielectric Metamaterial Ceramic from Stereolithography .......................................................... Sophie Guillemet-Fritsch
Characteristics of Carrier Transport of Al- or Ga- Doped ZnO Highly Transparent Conductive Films: Theory and Experimental ............................................................................................................................... Tetsuya Yamamoto
Single-Crystalline BaTiO3 Nanocubes and Assemblies for Supercapacitors .......................................................... Kazumi Kato

SESSION WP1: CERAMIC BASED SENSORS

NiC: A Highly Sensitive Functional Layer based on a Nickel/Graphene Thin Film for Pressure and Force Sensors ............................................................................................................................... Ralf Koppert
Assessment of Thick-Film Resistors for Manufacturing Piezoresistive Sensors .......................................................... Thomas Maeder
Towards Hydrogen Detection at Room Temperature with Printed ZnO Nanoceramics Films Activated with Halogen Light ............................................................................................................................... Van Son Nguyen
Novel Thermoelectric Temperature Sensors ............................................................................................................................... L. Rebenklau
Porous Thick-Film Silver Metallisation for Thermally Mismatched Brazing Operations in Tokamak Magnetic Sensor ............................................................................................................................... Caroline Jacq

SESSION WP2: INTEGRATED PASSIVES AND FERRITES

Pressure-Assisted Sintering of Buried Thick Film Resistors in LTCC ............................................................................................................................... Andreas Heunisch
Low Temperature Sintering of Sc-Substituted M-Type Ferrites for Microwave Applications .......................................................... Silvia Bierlich
Key Technology and Materials for the Development of DC-DC Convertor Module .......................................................... Hsing-I Hsiang
Multi-layer Turnable Capacitors Fabricated by Thick Film Processes ............................................................................................................................... Keisuke Kageyama

Author Index
