10th International Conference on Acid Rock Drainage & IMWA Annual Conference

(ICARD-IMWA 2015)

Santiago, Chile
21-24 April 2015

Volume 1 of 3

Editors:

Adrian Brown       Joanna Burgess       Devin Castendyk
Lisa Kirk          Manuel Carballo      Linda Figueroa
James McPhee       Virginia McLemore   Mike O’Kane
Robert Seal        Jacques Wiertz       Ward Wilson
David Williams
Christian Wolkersdorfer

ISBN: 978-1-5108-0458-6
TABLE OF CONTENTS

VOLUME 1

PLENARY PRESENTATIONS

International Network for Acid Prevention’s Path Forward ............................................................ 3
Terrence Chatwin

Acid Rock Drainage Best Management Practices: A Great Success Story at the Margajita River, Pueblo Viejo
Carlos Tamayo, Rodolfo Espinell, Tim Kahl, Benoit Bissonnette, Jorge Lobato ................................. 13

Gold Mine, Dominican Republic ........................................................................................................ 13

Conga Mining Project (Cajamarca, Peru). International Expertise of the Water Component .................. 14
Rafael Fernández-Bahio, Luis López, José Martins

Mine Planning and Acid Rock Management ....................................................................................... 29
Dean Williams, Jim Fowler, Dirk van Zyl

A Global Mining Industry Perspective on Water Stewardship ............................................................ 39
Ross Hamilton

Acid Rock Drainage Treatment (TADA) at Codelco Andina .................................................................. 40
Jorge Lobas

Control of Water Pressure in Mine Slopes ............................................................................................ 41
Adrian Brown

Challenges Following the Transitional Phase of Implementing the New Mine Closure Law in Chile ........ 42
Lilian Valdebenito

CHAPTER 1 – GEOMICROBIOLOGY, BIOGEOCHEMICAL CYCLES AND BIOMINING

Chemical Transformations of Metals Leaching from Gold Tailings .................................................... 45
Bronwyn Camden-Smith, Nicole Pretorias, Anthony Turton, Peter Camden-Smith, Hlanganani Tutu

Characterization of U and REE Mobility Downstream of a U Tailings Impoundment near Bancroft, Ontario 54
Allison Laidlaw, Michael Parsons, Heather Jameson

Copper Toxicity and Organic Matter: Resiliency of Watersheds in the Duluth Complex, Minnesota, USA 64
Nadine Piatak, Robert Seal, Perry Jones, Laurel Woolreff

Prediction of Acid Neutralizing Potential of Wetlands Affected by Gold Mining in a Semi-Arid Area ........ 74
Julien Luxiito-Makiese, Ewa Cukrowska, Hlanganani Tutu, Luke Chimuka, Isabel Weiersbye

Assessment of As and Hg in Mine Tailings and Indigenous Grass: A Case Study of Non-Functional New Union
Gold Mine, South Africa .......................................................................................................................... 85
Tsedzululo Mundalono, Jabulani Gumbo, Confidence Mazereghi, Francis Ducoota

Acid Rock Drainage in Antarctica: An Important Source for Trace Elements in the Southern Ocean ........ 96
Bernhard Dold, Elena Gonzalez-Toril, Angeles Aguilera, Maria Eugenia Cisternas, Enrique Lopez-Pamo, Ricardo Amils

In Situ Attenuation of Selenium in Coal Mine Flooded Pits .................................................................. 97
Alan Martin, Robert Goldblatt, Justin Stockwell

Biogeochemical Selenium Sequestration in Unsaturated Coal Reject Piles .......................................... 107
Chris Kennedy, Stephen Day, Daniel Mackie, Nicole Posenen

Established and Emerging Passive and Hybrid Biological Sulfate Removal from Mining Effluents ........ 118
Michael Bratty, Tom Rutkowski, Eric Blumenstein, Kevin Conroy, Andre Van Nickerk

Mine Water Treatability Studies for Passive Treatment of Coal Mine Drainage .................................... 129
Alexander Sutton, Devin Sapsford, Arabella Moorhouse

Case Study: 19 Years of Acid Rock Drainage Mitigation after a Bactericide Application ......................... 139
James Gusek, Van Plocus

Removal of Metals from pH Circum-Neutral Mine Water by Biologically-Induced Diurnal pH Cycling .......... 150
David Jones, Robert Jung, Bernard Chapman

Biogeochemical Cycle of Mercury in Wetlands Ecosystem Affected by Gold Mining in a Semi-Arid Area .... 161
Ewa Cukrowska, Julien Luxiito-Makiese, Hlanganani Tutu, Luke Chimuka, Isabel Weiersbye

Use of Genomic Methods to Characterize Microbial Community in Assessment of ARD Impacts and Mine Closure Activities ........................................................................................................ 171
Melanie Blanchette, Mark Lund, Lisa Kirk

Comparative Analyses of Metagenomes from Acid Rock Drainages .................................................. 172
Ana Moya-Beltrán, Francisco Issotta, Harold Núñez, Francisco Osandón, David Holmes, Raquel Quatrini

Targeted Metagenomic Analysis of Myxysty Parys Acid Rock Drainage Microbial Communities ............ 173
Harold Núñez, Juan Pablo Cardenas, Ana Moya-Beltrán, Francisco Issotta, Mónica Gonzalez, D. Barrie Johnson, Raquel Quatrini

Bioaccessibility Testing of Sulfidic Rocks and Wastes ........................................................................... 174
Eleanor van Veen, Anita Parbhakar-Fox, Bernd Lottermoser

Removing Heavy Metals from Acid Mine Drainage through the Biological Generation of High-Value Metal Nanoparticles ........................................................................................................................................ 175
Giovanni Ulloa, Bernardo Collao, José Manuel Pérez
Trace Elements of Economic Value and Environmental Concern in Acidic Drainage, Biofilms and Mineral Precipitates..........................................................................................................................................................................................176
Lori Manoukian, Bryn Kimball, Danielle Fortin, Heather Jamieson, Claudio Andrade

CHAPTER 2 – APPLIED MINERALOGY AND GEOENVIRONMENTAL UNITS

Setting ARD Management Criteria for Mine Wastes with Low Sulfide and Negligible Carbonate Content .........................................................179
Stephen Day, Chris Kennedy

A Desulfurization Flotation Approach for the Integrated Management of Sulfide Wastes and Acid Rock Drainage Risks .................................................190
Jennifer Broadhurst, Susan Harrison

Pre-Mining Characterization of Ore Deposits: What Information Do we Need to Increase Sustainability of the Mining Process? ..................201
Bernhard Dold

Mobility of Strategic Elements in Chilean Tailings in the Context of Secondary Mining Processes .................................................................208
María Ussath, Corinne Wendler, Nils Hoth, Ursula Kelm, Frank Haubrich, Michaela Hache, Gerhard Heide, Marlies Grimmer, Carsten Drehenstedt

Tracking the Fate of Metals in Mining Waste Rock Using Metal Stable Isotopes ..........................................................................................218
Elliott Skierszkan, Ulrich Mayer, Roger Beckie, Dominique Weiss

Using Spatially Explicit Data and Modeling to Inform Ecological Risk Assessment at Mining Sites ..........................................................228
Brad Parks, Sean Kowinski, Les Williams, Andrew Nicholson

Effluent Chemistry of Closed Sulfide Mine Tailings: Influence of Ore Type .................................................................................................238
Päivi Kaupila, Marja Räisänen

Challenges in Prediction of Acid Rock Drainage Potential for Skarns – Use of Modified Testing .................................................................248
Felipe Vasquez, Jacob Waples, Javier Condor

Geochemical Characteristics of Oil Sand Tailings and Bitumen Upgrading By-Products, Alberta, Canada ..........................................................260
Brenten Farzabi, Stephen Day, Aladipo Omoosa

Pyrite Oxidation Rates from Laboratory Tests on Waste Rock ..................................................................................................................271
Kim Lapakko, Edward Trujillo

Russell Schumann, Alan Robertson, Andrea Gerson, Ron Fan, Nobuyuki Kawashima, Jun Li, Roger Smart

Prediction of Acid Rock Drainage (ARD) from Calculated Mineralogy ..................................................................................................296
Júliu Ibar, Ron Berry, Anita Parbhakar-Fox, Bernd Lottermoser

Characterization of Weathering Products and Controls on Metal Mobility at a Cu-Ni-PGE Deposit ..........................................................306
Paul Fix, Tamara Diedrich, Chris Kennedy, Stephen Day

Mineralogically-Based Determinations of Neutralization and Acid Potential Using Automated Mineralogy ..........................................................316
Martha Buckwalt-Davis, Colin Lusitier-Purdy, Heather Jamieson

The Effect of Aluminium Source and Sludge Recycling on the Properties of Ettringite Formed during Water Treatment .................................................................................................................................326

Management of Pyrrhotite Tailings at Savannah Nickel Mine: A Decade of Experience and Learning ...............................................................336
Alan Robertson, Nobuyuki Kawashima, Roger Smart, Russell Schumann

Waste Rock Modeling to Improve ARD Prediction and Project Economies: A Case Study .................................................................347
Emily Luscz, Terre Lane

Meliadine Gold Project: Investigation of the Buffering Capacity of Waste Rock ..........................................................................................355
Valérie Bertrand, Jennifer Cole, Stéphane Robert

Effect of Geological Models on ML/ARD Characterization Program Design at the KSM Project .................................................................364
Mark Nelson, Mike Lechner, Kelsey Norlund, Clem Pelletier, Brent Murphy

Laura Laurenzi, Ulrich Mayer, Roger Beckie

Management of Spontaneous Combustion for Metalliferous Mines ........................................................................................................384
Matt Landers, Brent Usher

Deportment of Sulfide and Neutralization Potential by Particle Size Distribution in Limited Buffering Mine Wastes ..............................................395
David Tait, Andew Barnes, Claudio Andrade, Matt Dey, Robert Boswell, Carl Williams

CHAPTER 3 – PREDICTION OF DRAINAGE FLOW

The Calculation of Actual Evaporation from an Unsaturated Soil Surface .................................................................................................399
Murray Fredlund, Dat Tran, Delwyn Fredlund

Near-Surface Water Balances of Coal Waste Rock Dumps ....................................................................................................................414
Mike O’Kane, Tyler Birkham, Amy Goodbrand, Lee Barbour, Sean Carey, Justin Straker, Trevor Baker, Robert Klein

Water Balance Modeling of Preferential Flow in Waste Rock Materials .................................................................................................426
Jason Keller, Michael Milczarek, Guosheng Zhan
CHAPTER 4 – PREDICTION OF DRAINAGE CHEMISTRY

The ADTI/SME Prediction Volume: Techniques for Predicting Metal Mining Influenced Water: The Consensus Process and What’s New ................................................................. 511
R. David Williams, Lisa Kirk, Linda Figueroa, Sharon Diehl

A Risk Assessment of ARD Prediction and Control .................................................................................................................. 518
Shannon Shaw, Andrew Robertson

Acid Mine and Metalliferous Drainage (AMD); Sample Assortment a Gigantic Task ................................................................. 530
Edgardo Alarcón León, Carel van der Westhuizen, Lucy (Xim) Du

Opportunistic AMD Sampling from Multi-Discipline Drilling Programs for Large Mining Companies ........................................ 540
Joshua Pearce, Juan Gutierrez

Difficulties of Interpretation of NAG Test Results on Net Neutralizing Mine Wastes: Initial Observations of Elevated pH Conditions and Theory of CO₂ Disequilibrium ........................................................................ 551
Jessica Charles, Andrew Barnes, Julien Declercq, Ruth Warrender, Christopher Brough, Robert Bowell

Applicability of a New and More Efficient Approach to the ABCC Test .................................................................................. 561
Carla Calderón Rosas, Natalia Farfán, Maria Carolina Soto

A Detailed ABA Study of the Coal-Bearing Formations in the Waterberg Coalfield, Limpopo Province, South Africa ........................................................................................................................................... 572
Lorie Marie Deyssel, Danie Vermeulen

Estimation of Immediate Acid and Neutralization Rates within ARD Waste Rock Storage Facilities ........................................ 582
Jun Li, Andrea Gerson, Nobuyuki Kawashima, Rong Fan, Roger Smart, Russell Schumann

Acid Mine Drainage Risk Assessment Utilizing Drill-Hole Data and Geological Modeling Tools ............................................. 593
Claire Linklater, Alison Hendry, John Chapman

Weathering and Oxidation Rates in Black Shales – A Comparison of Laboratory Methods ..................................................... 603
Claire Linklater, Alex Watson, John Chapman, Rosalind Green, Steven Lee

Lessons Learned in the Interpretation of Mine Waste Static Testing Results ........................................................................... 614
Cheryl Ross, Rens Verburg

Kinetic Tests to Evaluate the Relative Oxidation Rates of Various Sulfides and Sulfosalts .......................................................... 623
Aurélie Chopard, Mostafa Benzaazoua, Benoît Plante, Hassan Bouazizh, Philippe Marion

VOLUME 2

A Kinetic Approach to Assessing the Risk of Groundwater Acidification from Sulfidic Soils .......................................................... 633
Karen MacKenzie, Hannah Dannatt, Andrew Barker, Chris Wendt, Christian Wallis

Comparison of Actual and Calculated Lag Times in Humidity Cell Tests .................................................................................. 643
Kelly Saxsmith, Dylan MacGregor, Andrew Barnes

Evaluation of Humidity Cell Reproducibility with Implications for Water Quality Modeling Precision ................................. 653
Stephanie Theriault, Tamara Diefedrich, Stephen Day

Evaluation of Lag Times for Tailings in Extreme Arid Climates by Long-Term and Delayed-Rinse Kinetic Tests .................. 662
Jacob Waples, Troy Jones, Guillermo Aguirre, Christian Wisskirchen

Pyrite Oxidation in Well-Constrained Humidity Cell Tests ........................................................................................................ 672
Mark Williamson

Comparison between Long-Term Humidity Cell Testing and Static Net Acid Generation (NAG) Tests: Potential for NAG Use in Preliminary Mine Site Water Quality Predictions ........................................................................ 682
Andrew Barnes, Robert Bowell, Ruth Warrender, Devin Sapsford, Kelly Saxsmith, Jessica Charles, Julien Declercq, Marco Santonastaso, Brian Day

Coupled Modeling of Iron Loads from Lignite Mining Dump Groundwater to the Pleiß River .................................................. 692
Heike Büttcher, Holger Mansel, Lutz Weber

Simulating the Performance of a Dry Stack Tailings Design for Water Control Permitting ...................................................... 702
Amy Hudson, April Hussey, Andrew Harley, Timothy Dyhr

Using PhreePlot to Calibrate Mining Related Geochemical Models: A User’s Perspective ........................................................... 712
John Mahoney

</table>
Performance of a 16 ha Engineered Wetland for the Treatment of Neutral-pH Gold Mine Effluent (Ontario, Canada) ................................................................. 1241

Passive Removal of Iron from AMD Using VFRs ......................................................... 1253
Devin Sapford, Kay Florence, James Pope, Dave Trumm

Characterization of Passive Treatment System Substrates and Potential for Zn Recovery ................................................................. 1263
Matthew Bailey, Adam Jarvis, Catherine Gandy

Metal Removal and Secondary Contamination in a Passive Mine Drainage Treatment System ................................................................. 1273
Adam Jarvis, Catherine Gandy, Matthew Bailey, Jake Davis, Patrick Orme, John Malley, Hugh Potter, Arabella Moorshouse

Passive Treatment of Toe Drain Discharges from a Tailings Storage Facility Using an Oxidic Granite Bed ....................... 1282
Robert Hedin, Jeffrey Millgate, Brian Authors, Ron Nunn Patrnick, Vinath Khamsana, Neil Wolfe

VOLUME 3

Mechanisms of Iron Removal during Passive Treatment of AMD in a Vertical Flow Reactor ................................................................. 1290
Kay Florence, Devin Sapford, Christian Wolkersdofer

Passive Limestone Treatment of Mining Influenced Water with Low PH and High Concentrations of Ferric Iron ............................... 1300
Linda Figueras

Development of a Linear Channel Reactor for Simultaneous Sulfate Reduction and Sulfide Oxidation ................................................................. 1301
Robert van Hille, Tynan Marais, Susan Harrison

Bio-Remediation of Acid Mine Drainage Using Charcoal-Based Constructed Wetlands ................................................................. 1302
Ileshree Moodley, Craig Sheridan, Karl Rumbold, Peter Kuschk, Cindy Bartisch

CHAPTER 8 – MINE WATER AND DRAINAGE COLLECTION AND TREATMENT – IMPACT ASSESSMENT AND MITIGATION

Manganese Mining Impacts on Water Quality in the Caucasus Mountains, Republic of Georgia ................................................................. 1305
Brian Caruso, Merab Mirtskhulava, Michael Wireman, William Schroeder, Boris Komilovich, Susan Griffin

Best Available Technologies Economically Achievable (BATEA) to Manage Effluent from Mines in Canada ................................................................. 1316
Kristin Pouw, Kathryn Campbell, Lisa Babel

Minimizing Life Cycle Costs at High Flowrates ................................................................. 1326
Joseph Tamburin, H. C. Liang

Assessment of Acid Neutralization Rates from Site Rock for AMD Control ................................................................. 1333
Roger Smart, Joseph Ciccarelli, Shengjia Zeng, Rong Fan, Jun Li, Nobuyuki Kawashima, Andrea Gerson, Russell Schumann

Acid Rock Drainage (ARD) Inhibition by Sulfite Used as Part of the Inco Process for Cyanide Removal ................................................................. 1342
Leslie Hardy, Paul Morton

Geochemical Study of the Interaction of Acid and Alkaline Mine Drainage with BaCO3 ................................................................. 1352
Julio Castillo, Alba Gomez-Arias, Jan Posthumus, Megje Weijman-Purchase, Esta van Heerden

Recovery of River Systems Affected by the Hungarian Bauxite Processing Residue (Red Mud) Spill ................................................................. 1364
William Mayes, Aron Anton, Viktoria Feigl, Orsolya Klebucz, Katalin Gruiz, Ian Burke, Adam Jarvis

CHAPTER 9 – COVER DESIGN AND PERFORMANCE

Incorporating Climate Variability into Cover System Design ................................................................. 1367
Lindsay Tallon, Mike O’Kane, Jason Song, Amy Heidman

Efficacy of Cover Systems in High Elevation Andean Climates ................................................................. 1378
Michael Milcarek, Jason Keller, Tzang-mow Yoo, Ernesto Prieto, Carlos Veneegas, William Ludwick, Raul Orellana, Francisco Quevedo, Guosheng Zhan

Integration of Climate Analysis into a Framework for Cover Design ................................................................. 1388
Thomas Baumgartl, Andrea Farinoli, Sven Arnold

Design, Construction and Preliminary Results for an Inclined Store-and-Release Cover Experimental Cell Built on an Abandoned Mine Site in Morocco ................................................................. 1397
Jihane Knidiri, Bruno Busxiere, Rachid Hakhou, Mostafa Benzaaoua, Etienne Parent, Abdelahbar Maqsoud

Evaluation of Cover System Field Trials with Compacted Till Layers for Waste Rock Dumps at the Boliden Aitik Copper Mine, Northern Sweden ................................................................. 1408
Matt McKeown, David Christensen, Tami Taylor, Seth Mueller

A Field-Scale Performance Evaluation of Erosion Control Measures for Slopes of Mine Tailings Dams ................................................................. 1419
Francis Amponsah-Dacosta

Improving Till by Adding Green Liquor Dregs in Sealing Layers to Control AMD - A Pilot Study ................................................................. 1427
Maria Maktitalo, Joséf Macsik, Christian Maurice, Bjorn Ohlander

Evaluating the Benefits of Water Covers as a Rehabilitation Strategy in Temperate Climates: A Tasmanian Perspective ................................................................. 1434
Laura Jackson, Anita Farbhabar-Fox, Dan Gregory, Alison Hughes, Janelle Agus, Tony Ferguson, Daniel Lester

Case Study of Geita Gold Mine: An Example of Proactive AMD Mitigation Performance ................................................................. 1445
Bonnie Dobchuk, Peter Scott, Paul Weber, Dave Christensen, Yusuph Mhando
CHAPTER 10 – SCALING FROM LABORATORY TO FIELD STUDIES

The Diavik Waste Rock Project: Heat Transfer in a Large Scale Waste Rock Pile Constructed in a Permafrost Region ................................................................................................................................. 1456

Waste Rock Dump Geochemical Evolution: Matching Lab Data, Models and Predictions with Reality ............................................................. 1469
Needham, Richard Amos, David Blows, Leslie Smith, Dave Sego

Scaling Laboratory Sulfate Release Rates to Operational Waste Rock Piles .................................................................................................................. 1480
Kim Lapakko, Mike Olson

Scaling Geochemical Loads in Mine Drainage Chemistry Modeling: An Empirical Derivation of Bulk Scaling Factors .................................................................................................................. 1495

Comparison of Leach Column Experiment from Laboratory Bench to Mine Site for Coal Mine Overburden ................................................................. 1504
Rudy Sayoga Gautama, M. Sonny Abertiawan, Ginting Jala Katama, Firman Gunawan

Construction, Instrumentation and Preliminary Results of Field Leach Pads for Scaling Reaction Rates and Assessing Field Performance ........................................................................................................... 1515
Keith Mouttay, Annette Markussen-Brown, Vivian Ferrera, Tyson Kaeffer

Up-Scaling from Trial to Operation: Practicalities of Construction and Permitting, Force Crag Mine .................................................................................. 1526
Arabela Moorhouse, Rachel Harris, Lee Wyatt, Stephen Hill, Hugh Potter

Using Oxygen Consumption Rates as a Guide to Scale Up Laboratory Kinetic Data to Field Conditions .......................................................................................................................... 1537
L. E. Eary

Approach to Scaling Up from Laboratory Humidity Cells through a Field-Scale Unit to a Waste Rock Dump ........................................................................ 1548
Carla Calderon Rosas, Maria Carolina Soto, Natalia Farfan, Angela Oblasier

CHAPTER 11 – RELIABLE MINE WASTE MANAGEMENT

The Canadian MEND Program - The First Twenty-Five Year .................................................................................................................. 1551
Gilles Tremblay, Charlene Hogan

Managing the Waste Rock Storage Design, Can We Build a Waste Rock Dump that Works? ................................................................................ 1560
Rebecca Barratt, Peter Scott

On-Land or Submarine Tailings Disposal? - Pros and Cons .................................................................................................................. 1569
Bernhard Dold

Water Management in the Closure of Tailings Storage Facilities .............................................................................................................. 1576
Carlos Cacciuttolo, Kathia Tabra

A Holistic Framework for Progressively Constructing Stable Waste Storage Facilities ................................................................................ 1589
Andrew Baisley, Mike O’Kane, Paul Weber, Peter Scott, Steven Pearce

CHAPTER 12 – RELIABLE MINE WATER OPERATION

Mine Water Balance for a Semi-Arid Climate: Overcoming Challenges to Maintain Operations .................................................................................................................. 1593
Scott Davidson, Emily O’Hara

Use of Cemented Paste Backfill Based on Arsenic - Rich Tailings from Cyanidation ............................................................................................. 1602
Roger Hamberg, Christian Maurice, Lena Alakangas

From Salt Balance to Contaminant Flux: Managing Water Quality Risk Using a Systems Approach ........................................................................ 1612
Terry Harck

Innovative Mine Waste Management Planning at a Site with Multiple Waste Streams ................................................................................ 1623
Brent Johnson, Gary Parkinson, William Cincilla

Groundwater in the Chilean North: A Brief Synopsis .................................................................................................................. 1633
Sven Renner, Igor Aguirre

Building Better Waste Landforms for Reactive Waste: A New Level of Waste Assessment and Construction ................................................................. 1647
Peter Scott, Ian Taylor, Paul Weber, Steven Pearce, Bonnie Dobchuk, Andre Kemp

Plugin Arcgis - FEFLOW - Case Study ........................................................................................................................................... 1657
Katty Barzola, Ezio Crestaz, Robin Dufour

CHAPTER 13 – MINE DEWATERING

Mine Water Disaster Issues of Carboniferous and Permian Coalfields at Easter China and Their Technical Countermeasures - A Case Study on Wanbei Mining Areas .................................................................................................................. 1658
Yuhua Wu, Zhongwen Duan, Benkai Sun, Rongjie Hu

Dewatering of Opencast Mines Using Model-Based Planned Horizontal Wells .............................................................................................................. 1671
Holger Mansel, Richard Eichler, Marcel Nitz, Maik Biedermann, Rene Blankenburg, Carsten Drehenstedt

Removing of High Flows of Acid Water from Disused Mines in Johannesburg ........................................................................................................... 1680
Axel Doring

Dewatering of a Deep Shaft in a Complex Hydrogeologic Setting .................................................................................................................. 1688
Michael Gabora, Philip Brown, Hank Ohlin, Korin Carpenter, Greg French
Comparison of Borehole Testing Techniques and Their Suitability in the Hydrogeological Investigation of Mine Sites ................................................................................................................................................................................................................1699

CHAPTER 14 – MINE WATER MANAGEMENT FOR CLOSURE

Practice in Setting Sustainable Water Management Closure Performance Criteria ..........................................................1713
Henning Boshoff

Mine Water Management for Closure - Mine Reclamation and Surface Water Balances ..................................................................................................................................................................................................................................1722
Justin Straker, Mike O’Kane, Sean Carvey, Dan Charest, Lee Barbou

Acid-Generating Waste Rock Encapsulation in Subalpine Environment .................................................................................................................1734
Larry Breckenridge, Fred Bickford, Amy Livingston

Geophysical Tools to Delineate ARD and Sulfate in Groundwater at a Former Sulfuric Acid Plant .................................................................1744
Jennifer Cole, Albert Stoffers, Roy Angelow

Environment Assessment for the Decommissioning of Uranium Waste Rock Pile .........................................................................................1754
Carolina Abreu, Peter Fleming, Dina Lopez, Virginia Ciminelli, Marcelo Mansur

Prediction of Drainage Water Quality from Mining Waste with Carbon Sequestration Potential .................................................................1762
El-Hadji B. Kamdj, Benoit Plante, Bruno Buscierie, Ake-Sylvette Awoh, Bibi-Amirah Ibrahim Saib, Georges Beaudoin, Pierre-Philippe Dupont

A Management Plan Towards the Flooding of an Open-Cast Mine with Adjacent Underground Sections ...............................................................................1773
Ezclo Luks, Danie Vermeer

Response to Increasing Rainfall and High Rainfall Events at Wheat Jane, Cornwall, UK ...............................................................................................1784
Lee Wyatt, Arabella Moorhouse, Ian Watson

Simulation of Hydrological Processes in the Dump Slope of a Mining Pit for Landslide Forecasting .................................................................1794
Juexing Guo, Rene Blankenburg, Peter-Wolfgang Gruaer

A Source Apportionment Methodology for South African Gold Mines ........................................................................................................1804
Ingrid Dennis, Rainier Dennis, Michael Eckart, Christoph Klinger

Characterizing Abandon Mining Dams by Geophysical Methods (ERI) and Sounding: La Carolina District (Southern Spain) .................................................................................................................................................................................1816
Julian Martinez, Javier Rey, Maria Del Carmen Hidalgo, Jesus Garrido, Diego Rojas, Claus Kohfahl, Jose Benavente

CHAPTER 15 – MINE WATER GEOCHEMISTRY

Ten Years Later: The Ronneburg Waste Rock Relocation Project in the Light of Performance Monitoring and Sustainability Analysis ..................................................................................................................................................................................................................1817
Michael Paul, Silvia John

Minewall Stations and Mass Loadings at an Epithermal High Sulfidation Deposit - What, No Scaling? ................................................................................1821
Claudio Andrade, Keith Mountijoy

Establishing an Total Dissolved Solids: Electrical Conductivity Ratio for Mine Waters ..............................................................................................1838
Christian Wolkersdorfer, Elena Hubert

Arsenic Mobility under a Neutral Mine Drainage Environment in a Gold-Mine Tailings Dam ................................................................................1846
Leonardo Bissacot, Virginia Ciminelli, Mark Logsdon

Use of Oxygen Sensors and TDR Probes for In Situ Monitoring of Tailings Impoundments (Jaen, Spain) ........................................................................1853
Maria Carmen Hidalgo, Diego Rojas, Claus Kohfahl, Javier Rey, Julian Martinez, Maria Jose de la Torre, Jose Benavente

Electrical Resistivity Imaging in Abandoned Mining Dams: The Influence of Measurement Conditions (La Carolina District, Southern Spain) ........................................................................................................1854
Julian Rey, Julian Martinez, Maria del Carmen Hidalgo, Jesus Garrido, Diego Rojas, Claus Kohfahl, Jose Benavente

CHAPTER 16 – PIT LAKES

Key Issues in Mine Closure Planning Related to Pit Lakes .................................................................................................................................1857
Jerry Vandenberg, Clint McCullough, Devin Castendyk

Designing Meromictic Pit Lakes as a Mine Closure Mitigation Strategy in Northern Canada ............................................................................1867
Michael Herrrell, Jerry Vandenberg, John Faithful

Variable-Density Transport Modeling in Hypersaline Pit Lakes .................................................................................................................................1877
Gay Roemer, Colleen Burger, Sonya Gadle

Selecting Pit Lake Model Approaches Based on Data Availability .................................................................................................................................1887
Jan Vanhooydonck, John Mahoney, Rebecca Stephen, Gordon Maclear

Predicting Pit Lake Formation and Water Quality .................................................................................................................................1898
David Arcos, Jordi Guimera, Salvador Jordana, Eduardo Ruiz, Jorge Molinero

Riverine Flow-Through of Mine Lakes: Improving both Mine Pit Lake and River Water Quality Values? ........................................................1908
Clint McCullough, Martin Schultz

Nucleation Seeding to Promote Chemical Precipitation of Hardness and Alkalinity from Mine Pit Lakes ..................................................................................................................................................................................................................1918
Allison Haus, Meaghan Blair

Addition of Bulk Organic Matter to Acidic Pit Lakes May Facilitate Closure ........................................................................................................1928
Mark Lund, Clint McCullough

Pit Lake Rebound Modeling, a Fully Integrated Approach Using FEFLOW ........................................................................................................1939
Alexia Carpentier, Robin Dufour
Use of Pit Lake Water Quality Prediction as a Tool to Support Management of Mine Closure Decisions .................................................. 1940
Luciano Santos
