Study on Temperature Calibration System .......................................................... 280
X. Peng, K. Yang

Low Cost Interactive board using Infrared Pen and Wiimote ........................................ 284
C. Photong, A. Polyiam, K. Phomsalee, N. Suwapaet

Reliabilizing a Dynamic Performance Testing System Based on TTCN-3 ......................... 287
X. Liu, S. Liu, Y. Liu, J. Wu

Research on Network Education Method based on the Big Data ................................ 291
M. Tang, S. Zeng, J. Hu, J. Hu

The Design and Implementation of the Badminton Distance Teaching Platform based on B/S Architecture ...................................................................... 294
X. Liu, F. Wang, Z. Zeng

Design and Implementation of Indoor Environmental Quality Monitoring System based on ZigBee ............................... 297
X. Liu, F. Wang, Z. Zeng

Security System Research in the Government Network .................................................. 301
Y. Ji, C. Yu, B. Wang

Research on BOC Signal Characteristics and Code Acquisition Methods ....................... 304
J. Yang, P. Xu, Y. Ma, D. Cheng

An Efficient Identity-based Multi-signcryption Scheme .............................................. 308
Z. Qi, H. Yang, H. Huang

Research on ADS1282-based Distributed Seismic Data Acquisition System ...................... 311
H. Wang, W. Wei, M. Deng, Q. Zhang, J. Huang

The Clock System in Readout Electronics System for the External Target Experiment in CSR of HIFL ................................................................. 315
L. Zhan, Z. Zhao, J. Shi, J. Li, S. Liu, Q. An

A New Stealthy Target Detection based on Stratospheric Balloon-borne Radar System .................. 319
M. Barbary, F. Yang, P. Zong

A Vehicle Type Recognition Method based on Sparse Auto Encoder ............................... 323
H. Rong, Y. Xia

Zhejiang Province Communication Resource Management System 2nd Stage Technology Solutions ................................................................. 327
Y. Ji, J. Yu, Y. Lin

Reliability Analysis of The Subway Door System Based on Monte Carlo .......................... 330
F. Shi, X. Guo, Z. Xing, Y. Chen, Y. Qin

Design of Distributed Control System for Radiotherapy Equipment Based on Field Bus ........ 334
S. Shi, X. Zhang, P. Ye, H. Zhang

Study on Surface Defect Detection of Automobile Seat ................................... 338
X. Zhang, H. Wang

Temperature and Humidity Memory Instrument And Its Data Processing System ................ 342
D. Chi

The Phase Compensation Methods of Distributed Radar Systems .................................. 345
M. Ding, T. Sun

The Design of the Multi-user MIMO Nonlinear Precoding System .............................. 349
L. Zhang, G. Chen, J. Ren

Human Action Recognition Based On Multi-level Feature Fusion .................................. 353
Y. Xu, G. Xiao, X. Tang

Abrasion Calibraion of Optical Measuring Wheel ...................................................... 356
J. Shieh, W. Huang, Y. Liu, G. Liao

Modelling of Complex Adaptive System of Information Flow ..................................... 359
W. Cao, X. He, X. Fan, G. Liu, D. Zhou, B. Luo

Method for Detection and Stereoscopic Measuring Lane Markers ............................. 363
C. Mu, X. Ma, C. Zhang

Research on the Architecture and Application Schema of Cloud Warehousing Mode ........ 367
K. Nie, X. Fan

Research on Balance Measurement System Based on Embedded OMAP and Filtering Technology ................................................................. 371
Y. Jiao, G. Chen, Y. Wang

A Queueing Analysis for Job Assignment on Two-Type Heterogeneous Supercomputer System ................................................................. 375
C. Wang, Y. Chen, C. Hwang

Proving Authentication Property of Modified Needham-Schroeder Protocol with Logic of Events ................................................................. 379
M. Xiao, C. Deng, C. Ma, K. Zha, D. Cheng
Analysis and Research of Several Problems of Bad Short Message Filtering System ................................................................. 384
W. Du, G. Chen

Research on Big Data Technology-Based Agricultural Information System................................................................................. 388
N. Xie, X. Zhang, W. Sun, X. Hao

An Evaluation of Third-Party Mobile Payment Usage Intention in China................................................................................................. 391
X. Lv, C. Su, Z. Huang, T. Gao

An Improved Designated Verifier Signature Schemes Using Bilinear Paring.................................................................................. 395
Q. Yue, H. Shen, J. Chen

Research on Secure Communication Mechanism of Traffic Recorder ............................................................................................... 399
L. Li, Y. Zhu, R. Xie, F. Li

DATA, SIGNAL AND IMAGE PROCESSING

The Application of Rough Sets Theory in Video Information Processing and Analysis ................................................................. 403
X. Li, Y. Kang

Vector Median Filters Based on Noise Detection for Color Images ................................................................................................. 406
J. Wang

Research on Information Models and Modelling Methods of the New Generation of OSS for Data Management ................................................................. 410
Y. Lin, Y. Wang, H. Zhang, J. Yang

A Polar Coding Scheme for Secure Data Transmission Based on 1D Chaotic-Map.......................................................................... 414
T. Soliman, F. Yang, S. Ejaz

Mining Blocks' Association Rules for Disk Data Perfecting.................................................................................................................. 418
L. Zhu, G. Xiao, J. Liao

A New Approach for Target Detection Performance Enhancement Under Clutter Effect................................................................. 422
A. Alimsbany, Q. Cao, C. Wang

Short-Term Photovoltaic Output Forecasting with Weakly Related Meteorological Data........................................................................... 426
C. Lin, Y. Xiao, J. Chen, X. Wen, C. Du

A Framework for Product Lifecycle Knowledge Service .................................................................................................................. 430
Z. Wu, L. Li, H. Mao, Z. Huang, H. Mao

Research on Evaluation Model of The Urban Economy Based on Rough Set and Neural Network ......................................................... 433
X. Yan, L. Zhang

Realization of FPGA-Based Video Image Fusion Technology............................................................................................................. 437
C. Duan, W. Liu, Y. Chen, Q. Xie, B. Yi, Y. Fang, X. Song

Comparison of Solution of A Class of Second Order Difference Equation...................................................................................... 441
Y. Qin

Empirical Study on Reversible Lane in Beijing ................................................................................................................................. 444
A. Wang, Y. Wang, M. Zhang

Improved DPA Attack Method on AES Encryption......................................................................................................................... 448
S. Lan

Analysis of Signal Integrity on High Speed Signal Processing System of Vehicle-Mounted Video................................................................. 450
X. Wang, J. Tang

A Review of a Text Classification Technique: K-Nearest Neighbor ...................................................................................................... 453
R. Zhou, Z. Wang

Analysis of the NETSCIENCE Social Network .................................................................................................................................................. 456
X. Li, V. Podpecan, N. Lavrac

Shape-Controlled Synthesis of CeO2 Nanotube Using P123 Triblock Copolymer and Its Application in Catalytic Ozonation.................................................................................................................................................. 460
X. Qiu, Q. Bi, X. Li, Z. Xiong

Category Scores for Selecting the Most Desirable Options in a Learning Setting ................................................................................ 463
S. Encheva

An Approach for Multifaceted Mobile Nodes Sending Information to Manage the Network ................................................................. 466
C. Miao, H. Zhou, H. Zhang, W. Su

The Risk Assessment Model of Small and Medium-Sized Enterprises of Science and Technology Based On Boosting .................................................................................................................................................. 470
X. Lei, Z. Wang, Y. Li

Study of Breast Tissues Dielectric Properties in UWB Range for Microwave Breast Cancer Imaging ................................................................. 473
M. Bah, J. Hong, D. Jamro

Research on Dynamic Pricing and Ordering Policy of Fresh Agriculture Product Considering Consumers’ Perceived Quality .................................................................................................................................................. 476
K. Nie, D. Xie, W. Li
Finite-Time Synchronization of Chaos Gyros via Terminal Sliding Mode Control
R. Xu, C. Guo, M. Gao

IDFT: An Intermediate Node Based Deterministic Fault Tolerant Routing in 2D Mesh
C. Yang, X. Ding, X. Ren, P. Ren

Providing Support for Today's Decision Making Processes
S. Encheva

Network Assembled Structures from a Series of Macromolecular Surfactants

The Constructions of DNA Codes from Linear Self-Dual Codes over $\mathbb{Z}_4$
B. Feng, S. Bai, B. Chen, X. Zhou

AUTOMATION AND CONTROL ENGINEERING

A Composite Control Strategy for an Air-Breathing Hypersonic Vehicle with Wing-Rudder Deflection
Y. Fan, P. Yan, Y. Yu, X. Li

The Study of Real-Time Industrial Ethernet Power link Medium Redundancy
J. Wang, M. Duan, Z. Liu

VOLUME 2

Research on Obstacle Avoidance of Fire-Fighting Robot Based On Fuzzy Control
Y. Lei, X. Zhu, C. Tai

Research of an Improved RFID Authentication Protocol
W. Yu, Z. Tu, Y. Zhang

COMPUTER SCIENCE AND SOFTWARE ENGINEERING

A Lightweight Encoding Mechanism for Encrypted User Notification on Mobile Device in Power Grid System
T. Zhang, Y. Jin, Z. Sun

New Evaluation Model on Web Site Credibility
Y. Ma, F. Chen, Z. Sun

Research on Intelligent Energy Efficiency Management System Based on CBR/MAS
K. Xu, D. Zhou, Y. Chen, W. Lu

Design and Implementation of the Fuze Circuit Board Tester
Y. Zhang, B. Qiao, L. Chen

Pervasive Marketing Intelligence
T. Guarda, M. Santos, F. Pinto

The Binding Operation for Mobile IPv6
R. Li, D. Wang

ARTIFICIAL INTELLIGENCE AND CONTROL AUTOMATION

Research of Guangdong and Macao Tourism Cooperation Condition based on DEFCA
J. Xiao, S. Luo, Y. Yue

Study on the Simulation of Hot Event’s Propagation Based on Ant Colony Algorithm in Social Networks
D. Qu, H. Xie, H. Lian, J. Bai, S. Guo

Simulation of PLCC Routing Algorithm using OPNET Modeler
J. Chen, R. Yan, Y. Zhang, Y. Zhao

Enhanced Indoor Navigation Using Fusion of IMU and RGB-D Camera
W. Chai, C. Chen, E. Edwan

Explore on Illuminance Control of Daylight Perceptive Lighting by Fuzzy Logic
Y. Gao, X. Guo, Y. Liu, F. Cao, G. Cao, J. Yu, N. Zou, H. Zhang

A Study and Construction of Multi-level Fuzzy Comprehensive Evaluation System of Course
L. Tan, T. Jiang, J. Hu, J. Lian, L. Shang

A Comparison of Effective Discretization Schemes for The Double Heston Model in Financial Industry
Y. Sun, L. Ding, C. Liu, G. Zhang
Application of An Improved Grey Neural Network in Grain Yield Prediction ................................................................. 560
H. Lv, T. Lei, X. Huang, Y. Zhang

Research on Structure understanding of Complex-Table in Form Applications.......................................................... 565
X. Wang, H. Mi, D. Liang, Z. Du

LS Algorithm for Semi-online Scheduling Jobs with Non-decreasing Release Times and Non-decreasing Processing Times ................................................................. 569
F. Tang, J. Nie

Comparative Study on Maximum Power Point Tracking Methods of Photovoltaic Cells ................................................................. 573
A. Zhang, H. Liu, Y. Song, M. Dai

Multiplex Communication in 2D Mesh Neural Network ................................................................................................. 577
T. Kamimura, Y. Yagi, S. Tamura, Y. Chen

A Non-parametric Probabilistic Model for Hepatic Tumor Detection .................................................................................. 581
Y. Konno, X. Han, Y. Chen, X. Wei

Automatic Segmentation of Spleen based on Anatomical Model and Template Matching ................................................................. 585
C. Dong, X. Han, T. Tateyama, Y. Chen, A. Foruzan

IOSS Control for A Class of Switched Hopfield Neural Networks with Disturbance Input ................................................................. 589
