# TABLE OF CONTENTS

Editorial to the Proceedings of the 3rd International Conference on Solar Heating and Cooling for Buildings and Industry (SHC 2014) ................................................................. 1

Andreas Häberle

Simulation of a Solar Collector Array Consisting of two Types of Solar Collectors, with and Without Convection Barrier ................................................................. 4

Federico Bava, Simon Farbro, Bengt Perers

The Theoretical and Experimental Research on Thermal Performance of Solar Air Collector with Finned Absorber ................................................................. 13

Wei Chang, Yunfeng Wang, Ming Li, Xi Luo, Yongbao Ruan, Yongrui Hong, Shaobo Zhang

The SolabCool®, Cooling of Dwellings and Small Offices by Using Waste or Solar Heat ................................................................. 23

Aart de Geus, Henk de Beijer, Lucienne Krosse

Experimental Study of a Single-pass Flat Plate Solar air Collector with Severe Dust Deposition on the Transparent Glass Cover ................................................................. 32

Jie Deng, Xiaodong Yang, Ming Yang, Zhifeng Wang

Experimental Study of the Thermal Performance for the Novel Flat Plate Solar Water Heater with Micro Heat Pipe Array Absorber ................................................................. 41

Yuechao Deng, Yaohua Zhao, Zhenhua Quan, Tingting Zhu

Calculated Thermal Performance of Solar Collectors Based on Measured Weather Data from 2001-2010 ................................................................. 49

Janne Dragsted, Simon Farbro, Elsa Andersen, Bengt Perers, Kristian P. Nielsen

A New Tool for Assessing the performance of Transpired Solar Collectors Used for Solar Ventilation Pre-heating ................................................................. 57

Richard Hall, Andy Allen

Characterization of Novel Mid-temperature CPC Solar Thermal Collectors ................................................................. 65

Lun Jiang, Bennett Widyanar, Roland Winston

Research on Annual Thermal Performance of Solar Water Heating Balcony System ................................................................. 71

Deli LING, Guanghu Liu, Genmao Mo, Junfeng Li, Xiaojing Wang

Field Study of the Performance for a Solar Water Heating System with MHPA-FPCs ................................................................. 79

Haimin Liu, Wei Wang, Yaohua Zhao, Yuechao Deng

Experimental Study of the Water Heating Performance of a Novel Tile-shaped Dual-function Solar Collector ................................................................. 87

Bingqing Luo, Zhongting Hu, Xiaojianqiang Hong, Wei He

Performance Analysis and Optimization of a Vapor-filled Flat-plate Solar Collector ................................................................. 95

Deodat Makhanlall, Peixue Jiang

A Case for Façade Located Solar Thermal Collectors ................................................................. 103

Richard O’Hegarty, Oliver Kinnane, Sarah McCormack

Experimental Monitoring of Different Dimensions of Transpired Solar Collectors ................................................................. 111

Emmanuel Perisoglou, Dylan Dixon

Measurement of Reflectance Covering UV to MIR of Solar Selective Coatings by One Fourier Transform Spectrometer ................................................................. 121

Jian Wang, Omid Shekoofi, Zhiqiang Yin, Jing Qi, Xijie Liu, Wei Ke

Medium-temperature Solar Collectors with All-glass Solar Evacuated Tubes ................................................................. 126

Jian Wang, Zhiqiang Yin, Jing Qi, Guangrui Ma, Xijie Liu

Simulation Study on Household Forced Circulation Photovoltaic Thermal System Based on Micro Heat Pipe Array ................................................................. 130

Lincheng Wang, Yaohua Zhao, Zhenhua Quan, Hongyu Gan, Heran Jing

Experimental Study of a Novel Testing Platform for the Thermal Performance of Solar Domestic Water Heating Systems ................................................................. 138

Yihong Yang, Yanjiu Wang, Wei He

Experimental Investigation on the Performance of a Novel Solar air Heater Based on Flat Micro-heat Pipe Arrays (FMHPA) ................................................................. 146

Ting-tian Zhu, Yan-hua Zhao, Yan-hua Diao, Feng-fei Li, Yue-chao Deng

Modelling the Heating of the Green Energy Lab in Shanghai by the Geothermal Heat Pump Combined with the Solar Thermal Energy and Ground Energy Storage ................................................................. 155

Hanne Thorndahl Andersen, Yong Li

Indoor Characterisation of a Photovoltaic/Thermal Phase Change Material System ................................................................. 163

Maria C. Browne, Keith Lawlor, Adam Kelly, Brian Norton, Sarah J. McCormack
Laboratory Test of a Prototype Heat Storage Module Based on Stable Supercooling of Sodium Acetate Trihydrate
Mark Dannemand, Weiqiang Kong, Jianhua Fan, Jakob Berg Johansen, Simon Furbo

172

Coatings for Heat Storage Reactors with Hygroscopic Salts
Ard-Jan de Jong, Ralph Stevens, Corné Rentrop, Christophe Hoegaerts

182

Development of a Hot Water Tank Simulation Program with Improved Prediction of Thermal Stratification in the Tank

193

Limitations Imposed on Energy Density of Sorption Materials in Seasonal Thermal Storage Systems
Benjamin Fumey, Robert Weber, Paul Gantenbein, Xavier Daguenet-Frick, Ian Hughes, Viktor Dorer

203

A Review on Borehole Seasonal Solar Thermal Energy Storage
Liuhua Guo, Jun Zhao, Zipeng Tang

209

PCM Thermal Energy Storage in Buildings: Experimental Study and Applications
Francesco Guarino, Vasken Dermardiros, Yuxiang Chen, Jivu Rao, Andreas Athienitis, Maurizio Cellura, Marina Mistretta

219

Experimental Study on the Performance of RT 25 to be Used as Ambient Energy Storage
Muriel Ien, Shuli Liu

229

Data Measurement and Analysis of a Solar Heating System with Seasonal Storage
Qingtai Jiao, Weivei Liu, Guanghu Liu, Yongqing Zhang, Jiayun Cai, Hongbao Qin

241

Thermal Conductivity Enhancement of Sodium Acetate Trihydrate by Adding Graphite Powder and the Effect on Stability of Supercooling
Jakob Berg Johansen, Mark Dannemand, Weiqiang Kong, Jianhua Fan, Janne Dragsted, Simon Furbo

249

Preparation & Characterization of Sodium Sulfide Hydrates for Application in Thermochemical Storage Systems
Mark Roelands, Ruud Cuypers, Katrina D. Kruit, Henk Oversloot, Ard-Jan de Jong, Willem Duvalois, Laurens van Vliet, Christophe Hoegaerts

257

Low Cost and Marketable Operational Experiences for a Solar Heating System with Seasonal Thermal Energy Storage (SHSTES) in Hebei (China)
Tao Tao, Fan Zhang, Wei Zhang, Peng Wan, Xuchuan Shen, Honghui Li

267

Study on the Performance of the Solar Cooling System Using Cavity Receiver Based on the Neural Network
 Haoju Li, Shuhuai Wang, Zheng Zhang, Xu Xu, Kai Song

275

Kaichun Li, Tong Li, Hanzhong Tao, Yuanxue Pan, Jingshuan Zhang

285

New Innovative Solar Heating System (Cooling/Heating) Production
Elena-Lavinia Niederhäuser, Matthias Rouge, Antoine Delley, Harold Brühlhart, Christian Tinguely

293

Drain Back Systems in Laboratory and in Practice
Bengt Perers, Simon Furbo, Jianhua Fan, Weiqiang Kong, Ziqian Chen

300

Long Term Testing and Evaluation of PV Modules with and without Sunarc Antireflective Coating of the Cover Glass
Bengt Perers, Simon Furbo, Jianguang Han, Weiqiang Kong, Stamoulis Stergiakis

311

Development of Glazed and Unglazed PVT Collectors and First Results of their Application in Different Projects
Matthias Rommel, Daniel Zenhäusern, Aleksis Baggenstos, Ozan Türk, Stefan Brunold

318

Study on Heat Transfer Capacity of the Solar Horizontal Heat Pipe
Chunjing Wang, Weiwei Feng, Qingtai Jiao, Shai Li, Dejun Cai

324

Performance Evaluation of All-glass Evacuated Tube Solar Water Heater with Twist Tape Inserts
Using CFD
Keguowang Yao, Tong Li, Hanzhong Tao, Jiajie Wei, Ke Feng

332

Study on Demand-side Design Parameters of Solar Domestic Hot Water System in Residential Buildings
Xilin Chen, Bin Hao, Shan Liu, Weiye Zhou, Chunni Yao, Shanshan Wang

340

Chinese National Standards for Application of Solar Thermal Technology in Civil Buildings
Zinian He

347

Analysis on limitation of Using Solar Fraction Ratio as Solar Hot Water System Design and Evaluation Index
Shan Liu, Bin Hao, Xilin Chen, Chunni Yao, Weiye Zhou

353

Global Solar Certification, GSC
Jan Erik Nielsen

361

Proficiency Testing for Global Solar Collector Certification
Xiaochao Tong, Wenfang Chang

364
The Effect of Measurement Uncertainty and Environment on Domestic Solar Water Heating Systems' Energy Efficiency Grades ................................................................. 371
  Li Yuwu, Cheng Linlin, Yang Dandan, Liu Huakai, Liu Lei, Yan Shifeng, Tian Liangguang, Sun Yuquan
Statistical Modeling for Real Domestic Hot Water Consumption Forecasting ................................................. 379
  Aurélie Lomet, Frédéric Sauret, David Chéze
Concept and Practical Results for a Solar DHW System in Multi-family Houses with Decentralized Storages ................................................................. 388
  Daniel Mugnier, Léon Ramos Seleme
  Xiaolin Sun, Yanjun Dai, V. Novakovic, J. Wu, Ruzhu Wang
Analysis for Common Problems in Domestic Hot Water System Field-testing in China ............................... 402
  Chunyi Yao, Bin Hao, Shan Liu, Xilin Chen
Techno-economic Evaluation of Solar-assisted Heating and Cooling Systems with Sorption Module Integrated Solar Collectors ................................................................. 409
  Corey Blackman, Chris Bales, Eva Thorin
Theoretical Analysis and Case Study on Solar Driven Two-stage Rotary Desiccant Cooling System Combined with Geothermal Heat Pump ................................................................. 418
  Yanjun Dai, Xian Li, Ruzhu Wang
Second Generation of Freescoo Solar DEC Prototypes for Residential Applications ..................................... 427
  Pietro Finocchiaro, Marco Beccalli, Andrea Calabrese, Edoardo Moreci
A Continuous Commissioning Analysis and Its Application to a New Installed Solar Driven DEC System Coupled with Heat Pump ................................................................. 435
  Antoine Frein, Marcello Aprile, Matteo Muscherà, Rossano Scoccia, Mario Motta
Integration of Sorption Modules in Sydney Type Vacuum Tube Collector with Air as Heat Transfer Fluid ......................................................................................................................... 445
  Olof Hallström, Gerrit Fäldner
Application of Solar Thermal Cooling System Driven by Low Temperature Heat Source in China .................. 454
  Tao He, Xinyu Zhang, Conghui Wang, Min Wang, Bojia Li, Ning Xue, Kazuo Shimizu, Kenji Takahashi, Yonri Wu
Side by Side Tests of Two SDHW Systems with Solar Collectors with and Without Antireflection Treatment ......................................................................................................................... 462
  Weiqiang Kong, Jiangong Han, Bengt Perers, Simon Furbo, Jianhua Fan
New Generation Solar Cooling and Heating Systems with IEA SHC Task 53: Overview and First Results ................................................................................................................................. 470
  Daniel Mugnier, Roberto Fedrizzi, Richard Thygesen, Tim Selke
Practical Successful Results Regarding Electrical Overall Efficiency for a Solar Water Heating and Cooling System in South of France ................................................................. 474
  Daniel Mugnier, Léon Ramos Seleme
Novel Approach for Heating/Cooling Systems for Buildings Based on Photovoltaic-heat Pump: Concept and Evaluation ......................................................................................................................... 480
  Elena-Lavinia Niederhäuser, Matteo Muscherà, Matthias Rouge, Pierre Guiol, David Orlando
The Design and Installation of a Combined Concentrating Power Station, Solar Cooling System and Domestic Hot Water System ......................................................................................................................... 486
  Jeremy P. Osborne, Paul Kohlenbach, Uli Jakob, Johan Dreyer, Jamey Kim
Development of an Advanced Simulation Model for Solar Cooling Plants ................................................................. 495
  Giovanni Puglisi, Gioacchino Morosinotto, Giuseppe Emni
Experimental Study of a Parabolic Trough Medium Temperature Solar Thermal System ................................. 504
  Hang Qu, Mingtao Wang
Solar Thermal Cooling on the Northernmost Latitudes ......................................................................................... 510
  Peteris Shipkovs, Andrejs Snegirjovs, Janis Shipkovs, Gailina Kashkarova, Kristina Lebedeva, Lana Migla
A Solar/gas Fired Absorption System for Cooling and Heating in a Commercial Building ................................. 518
  HaiQuan Sun
Performance Assessment of Solar Assisted Absorption Heat Pump System with Parabolic Trough Collectors ................................................................................................................................. 529
  Fu Wang, Huanhuan Feng, Jun Zhao, Wen Li, Fengxue Zhang, Rui Liu
Experimental Study of a Novel PV/T- Air Composite Heat Pump Hot Water System ......................................... 537
  Gang Wang, Zhenhua Quan, Yaohua Zhao, Peng Xu, Chenning Sun
Experimental Investigation of A Liquid Desiccant System for Air Dehumidification Working With Ionic Liquids ................................................................................................................................. 544
  Mark T. Zegenhugen, Cristina Ricart, Thomas Meyer, Roland Kühn, Felix Ziegler
Experimental Investigation on a Solar-powered Absorption Radiant Cooling System ......................................... 552
  Xiaoqiang Zhai, Yuwu Li, Xiwen Cheng, Ruzhu Wang
Grid-interactivity of a Solar Combined Heat and Power District Heating System ................................................................. 560
Mehmet Elci

Testing, Development and Demonstration of Large Scale Solar District Heating Systems .............................................................. 568
Simon Furbo, Jianhua Fan, Bengt Perers, WeiQiang Kong, Daniel Trier, Niels From

Analysis for Marketization Development Prospect of Large-scale Solar Heating Combisystems in China .............................................................. 574
Zheng Ruicheng, Nie Jingjing

Towards Solar District Heating with more than 70% Solar Fraction ......................................................................................... 580
Daniel Trier

Solar District Heating in East Germany – Transformation in a cogeneration Dominated City................................................................. 587
Thorsten Urbaneck, Thomas Oppelt, Bernd Platzer, Holger Frey, Ulf Uhlig, Thomas Gischedl, Dieter Zimmermann, Dirk Rabe

Control Optimization through Simulations of Large Scale Solar Plants for Industrial Heat Applications .............................................................. 595
Ilyes Ben Hassine, Mariela Cotrado Sehgelmeble, Robert Stil, Dirk Pietruschka

Large Scale Solar Plants Integration in Electro-winning Copper Recovery Process ................................................................. 605
Felipe Cuevas, Clare Murray, Werner Platzer, Anna Heimsath

Monitoring Results of a Solar Process Heat System Installed at a Textile Company in Southern Germany .............................................................. 615
Patrick Frey, Stephan Fischer, Harald Drück, Klemens Jakob

Solar Process Steam for Pharmaceutical Industry in Jordan ......................................................................................... 621
Martin Haugen, Christian Zahler, Elke Zimmermann, Mahmoud M.R. Al-Najami

Experimental Investigation of a Solar Dryer System for Drying Carpet ......................................................................................... 626
Guofeng Yuan, Liang Hong, Xing Li, Li Xu, Wensue Tang, ZhiFeng Wang

Performance and Sizing of Solar Driven dc Motor Vapor Compression Refrigerator with Thermal Storage in Hot Arid Remote Areas ......................................................................................... 634

Exergetic Analysis of a GAX Refrigeration System Design to Operate with LP Gas and Solar Energy .............................................................. 644
Guadalupe Moreno-Quintanar, Victor Gomez, Roberto Best

Solar-Active-Houses – Dynamic System Simulations to Analyze Building Concepts with High Fractions of Solar Thermal Energy ......................................................................................... 652
Axel Oliva, Gerhard Stryi-Hipp, Sven Kobelt, Dominik Bestenlehner, Harald Drück, Georg Dasch

Kinetic Solar Skin: A Responsive Folding Technique ......................................................................................... 661
Marco Pesenti, Gabriele Masera, Francesco Fiorito, Michele Sauchelli

Investigation on Photovoltaic Application in Buildings in China ......................................................................................... 673
Zhang Wenjie, Hao Bin, Li Nianping, Liu Shan, Yao Chunn

Hybrid Photovoltaic-thermal Systems in Buildings – A Review ......................................................................................... 683
Clara Good, Jinfeng Chen, Yanjun Dai, Anne Grete Hestnes

An Experimental Investigation of a Novel Trombe Wall with Venetian Blind Structure ......................................................................................... 691
Zhongting Hu, Bingqiang Luo, Wei He

The Application of Solar Indirect System in Passive House in Cold Region and Severe Cold Region of CHINA ......................................................................................... 699
Yuan Jing, Wang Min, Wang Xuan, Sun Zhifeng, Ma Wensheng, Lang Qilin, Jin Xi, Zhang Xinyu, Li Ji, Huang Zhulan

Methodology and First Results of an R&D Road Map for Façade-integrated Solar Thermal Systems......................................................................................... 704
Christoph Maurer, Christoph Cappel, Tilmann E. Kuhn

Investment Grade Energy Audit: A Financial Tool for the Cost-effective Renovation of Residential Buildings ......................................................................................... 709
Carlo F. Bonacina, Gabriele Masera, Alberto Pavan

Lean Strategies for Window Retrofit of Italian Office Buildings: Impact on Energy Use, Thermal and Visual Comfort ......................................................................................... 719
Andrea Giovanni Mainini, Daniele Bonato, Tiziana Poli, Alberto Speroni

Measurements of the Angular Distribution of Diffuse Irradiance ......................................................................................... 729
Elsa Andersen, Kristian P. Nielsen, Janne Dragsted, Simon Furbo

Qualities of Solar Incidence Diagram ......................................................................................... 737
Sebastian M. Kazimierski
