# TABLE OF CONTENTS

## SESSION 1: OVERVIEWS

**Chair:** Odile Lavigne

1. A Recent History of Thermal Barrier Coatings for Aero-propulsion Applications
   - Brian Hazel, Michael J. Maloney
   - Page 1

2. High-temperature Ceramic Coatings Used in Aero Engine Environments
   - David Rickerby, Paul Morrell, Matthew Hancock
   - Page 3

## SESSION 2: BONDCOAT DEVELOPMENT AND OXIDATION BEHAVIOR

**Chairs:** Tresa Pollock, Vladimir Tolpygo

1. The Effect of Exposure Variables on the Development of Alumina Scales
   - Gerry Meier
   - Page 5

2. Effect of Bondcoat Roughness on Lifetime of APS-TBC Systems in Dry and Wet Gases
   - W.J. Quadakkers, D. Naumeko, P. Mor, W. Nowak, L. Singheiser
   - Page 7

3. Design Constraints and Higher Temperature Intermetallic Bond Coatings
   - T.M. Pollock, D. Jorgensen, R.W. Jackson, M. He, A. Suzuki, D. Lipkin
   - Page 9

   - Daniel Mumm, Timothy Montalbano, Matthew Sullivan
   - Page 12

5. The Role of Reactive Elements in Improving the Cyclic Oxidation Performance of $\beta$-NiAl Coatings
   - Hongbo Guo, Hui Peng, Dongqing Li, Tian Zhang, Shengkai Gong
   - Page 14

6. The Effect of Environment and Superalloy Composition on TBC Lifetime
   - Bruce Pint, Kinga Unocic, Michael Lance, J. Allen Haynes
   - Page 16

7. Application of EQ bond coat to EB-PVD TBC systems
   - Kazushige Matsumoto, Kyoko Kawagishi, Yutaka Koizumi, Hiroshi Harada
   - Page 18

8. On the Behavior of Titanium Within Thermal Barrier Coatings and Its Influence on Residual Stress Within the TGO
   - Robbie J. Bennett, Ian Edmonds, Neil Jones, Catherine Rae
   - Page 20

## SESSION 3: TOP COAT DEVELOPMENT - MATERIALS AND PROCESSING

**Chairs:** Robert Vaßen, Sanjay Sampath

1. Zirconia-doped Yttrium Tantalates As a Potential Next Generation Thermal Barrier Coating Material
   - David R. Clarke
   - Page 22

2. New Class of Refractory Ceramics for Thermal Barrier Coatings
   - Wei Pan
   - Page 24

3. Performance of Columnar 7-8 wt% YSZ Coatings on Platinum Aluminide Bondcoats
   - Christopher Petorak
   - Page 57

4. Stress and Crack Monitoring During Plasma Spraying of TBC
   - Seiji Kuroda, Xiancheng Zhang, Makoto Watanabe, Kaita Ito, Manabu Enoki
   - Page 59

5. Engineered Multi-layered Thermal Barrier Coatings for Enhanced Durability
   - Sanjay Sampath, Vaishak Vissanathan, Gopal Dwivedi
   - Page 61

6. Suspension Plasma Sprayed Thermal Barrier Coatings
   - Per Nylen, Nicholas Curry, Ashish Ganvir, Nicolaie Markocsan
   - Page 63

7. Columnar Structured Thermal Barrier Coatings by Thermal Spray Methods
   - Robert Vassen, Nadine Schlegel, Stefan Rezanka, Georg Maurer, Emine Bakan, Daniel Mack
   - Page 65

8. Multilayered Thermal Barrier Coatings
   - Xueqiang Cao
   - Page 68

9. High Temperature Oxidation and Burner Rig Testing of Different TBCs in the Frame of the European Project TOPPCOAT: A Summary of Results
   - Federico Cernuschi, Robert Vassen
   - Page 70
SESSION 4: FAILURE MECHANISMS – CMAS AND MITIGATION STRATEGIES

Chairs: David Shiffler, Carlos Levi

CMAS Degradation and Implications for Coating Design .......................................................... 89
Arlos Levi

TBC Lifetime Under Thermal Gradient Cyclic Testing with Simultaneous CMAS Attack: Towards
Prediction of Advanced Tbc Performance...................................................................................... 91
Daniel Mack, Doris Sebold, Michael Müller, Robert Vassen, Maria Ophelia Jarligo, Tanja Wohst

Solubility of Oxides from ZrO2-Y2O3 and ZrO2-Nd2O3 Systems in a Molten CAS. Selection of a
Thermal Barrier Composition Resistant to CAS Infiltration.......................................................... 94
Marie-Helene Vidal-Settf, Catherine Rio, Odile Lavigne, Nezha Chellah, M. Vilasi, C. Rapin, C. Petitjean, P.
Panteix

A Thermodynamic Database for Simulation of CMAS and TBC Interactions ...................................... 97
Lina Kjellqvist, Johan Brattberg, Ake Jansson, Huahai Mao

Attack of Thermal Barrier Coatings by Molten Silicate Deposits (Sand, Ash) and Its Mitigation .......... 111
Nitin P. Padture

CMAS Deposition Within the Turbine of a Small Jet Engine and Effects on TBC Spallation .............. 113
T.W. Clyne

Examination of CMAS-induced EB-PVD TBC Failure ..................................................................... 115
Vladimir Tolpygo

Development of a Naturalistic Test Media for Dust Ingestion CMAS Testing of Gas Turbine Engines .......... 117
Andrew W. Phelps, Lynne Pfledderer

Yttrium Oxide a Candidate Material for Environmental and Thermal Barrier Coatings ................ 119
Peter Mechanich, Wolfgang Bruse, Nadine K. Eils, Stefan Hackemann, Ravisankar Naraparaju

SESSION 5: FAILURE MECHANISMS – LIFE MODELING AND DEGRADATION

Chairs: Matt Begley, Stefan Lampenscherf

APS TBC Life Prediction - Impact of Manufacturing Variations...................................................... 121
Stefan Lampenscherf, Ramesh Subramanian

Probabilistic Lifetime Prediction of TBC Coated Parts Considering Design, Operation and
Manufacturing + Thermal Barrier Coatings Ageing Mechanisms in Land-based Gas Turbines ........ 123
Hans Peter Bossmann, Gregoire Witz

Specific Failure Modes of Ni-base Superalloys and TBCs Under a Simulated Combustion Gas
Atmosphere ................................................................................................................................. 125
Mazaku Okazaki, Satoshi Yamagishi, Y. Hayashi

Lifetime Assessment Tools for Thermal Barrier Systems.............................................................. 127
Jean Louis Chaboche, Frederic Felay, Martine Poulain, Noemie Rakotomalala, Arjen Roos, Jean Roch Vaunois,
Arnaud Longuet, Pascale Kanaoute

Reliable Measurement of Mechanical TBC Properties for Quality Control and Life Prediction .......... 130
Peter Wittig, Stefan Lampenscherf, Uwe Retting, Matthias Oechsner

Mechanical Stability Limits of Bi-layer Thermal Barrier Coatings................................................ 132
Mario Rudolphi, Mathias Galetz, Michael Schutze, Martin Frommherz, Alfred Scholz, Matthias Oechsner, Emine
Bakan, Robert Vassen, Werner Stann

Simulations of Fracture in Coatings with Complex Microstructures ............................................. 148
Mathew R. Begley, William Pro, Ron Kwei Lim, Linda Petzold

SESSION 6: ENVIRONMENTAL BARRIER COATINGS FOR BEYOND NI-BASED MATERIALS

Chairs: Brian Hazel, Gerry Meier

High Temperature Environmental Resistance of Mo-Si-B Alloys and Coatings .............................. 150
John H. Perepezko

Manufacture of Silicide Coatings for the Protection of Niobium Alloys Against High Temperature
Oxidation ...................................................................................................................................... 152

Lifetime of Environmental/thermal Barrier Coatings Deposited on an Nb/Nb5Si3- Based Alloy with
Feb-modified M:Si2-based Bond Coat .......................................................................................... 155
Reinhold Braun, Annika Lange, Uwe Schulz, L. Portebois, Stephane Mathieu, M. Vilasi, S. Drawin

Ceramic Matrix Composite Environmental Protection Strategies .................................................. 158
Bradley Richards, Hengbei Zhao, Haydn Wadley
Nasa's Advanced Environmental Barrier Coatings Development for SiC/SiC Ceramic Matrix
Composites: Understanding Cmas Degradations and Resistance .......................................................... 160
Dongming Zhu

SESSION 7: PROPERTIES AND CHARACTERIZATION TECHNIQUES
Chairs: Mike Maloney, Hongbo Guo

Evaluating Deformation Behavior of a TBC-System During Thermal Gradient Mechanical Fatigue by Means of High Energy X-ray Diffraction .................................................................................. 162
Nondestructive Thickness Measurements on EBPVD Thermal Barrier Coatings by Using Terahertz Technique .................................................................................................................. N/A
Thomas Cosack
Prediction of the Cyclic Durability As a Function of Cycle Duration and Temperature of an Air Plasma Sprayed Coating Using Inelastic Strain .................................................................................. 182
Eric H. Jordan, Shayan Ahmadian, Maurice Gell
High Temperature Thermodynamic, Mechanical and Kinetic Properties from First Principles .......................... 184
Anton Van der Ven
Demonstration of Two Novel Methods for Residual Stress Management on NiAl Bond Coats .................. 186
Markus Krottenthaler, Karsten Durst, Mathias Goken
