49th Annual Loss Prevention Symposium 2015

(LPS)

Topical Conference at the 2015 AIChE Spring Meeting and 11th Global Congress on Process Safety

Austin, Texas, USA
26-30 April 2015

ISBN: 978-1-5108-0685-6
# TABLE OF CONTENTS

- Chemical Engineering: Is This the Golden Age? ................................................................. 1
  - Marvin O. Schlanger

- (11a) Suppression of Overpressure during a Vapor Cloud Explosion – A New Approach ................................................................. 2
  - Norbert Baron, Chris Buchwald

- (11b) Explosion Load Generator: Repeatability and Application to Test Article Blast Loading ................................................................. 23
  - Brad Horn, Martin L. Goodrich, J. Kelly Thomas

- (71ad) On the Use of Laminar Burning Velocities in Process Safety ................................................................. 32
  - Alfonso F. Ibarrera, Timothy J. Myers, Kevin Marr, Stephen W. Garner, Sean C. O'Hern

- (31a) Hydrogen Jet Vapor Cloud Explosion: Test Data and Comparison with Predictions ................................................................. 53
  - Derek Miller, Craig Eastwood, J. Kelly Thomas

- (31b) Prediction of the Mass Flow of Heavy Gas Released from Standard Gas Bottles ........................................................................ 70
  - Christian Rauchegger, Susan Bayley, Volkmar Schroder, Dominique Thievenin

- (31c) Credibility of Designing Refrigerated Atmospheric Storage Tank Pressure Relief Systems for a Tornado ................................................................. 92
  - Joe Riordan, Bob Kelly

- (60a) Risk Ranking Criteria for Catastrophic Vessel Failures Due to Fire Exposure. Vessel Wall Dynamics & Consequence Analysis ........................................................................ 108
  - Jordi Dunjo, Georges Melhem

- (60b) Observations and Modeling of Off-Site Damage from Large Vapor Cloud Explosion (VCE) Events ................................................................. 124
  - Raymond H. Bennett, Quentin A. Baker

- (60c) Risk Assessment for a Gas and Liquid Hydrogen Fueling Station ........................................................................ 138
  - Jo Nakayama, Naoya Kasai, Tadahiro Shihabumi, Atsumi Misesake, Junji Sakamoto

- (60a) The Human Factors behind Inherently Safer Design of LNG Liquefaction Terminals ........................................................................ 151
  - David Weimer, Morgan Reed, Eric Peterson

- (60b) The Hazard We Know: Comparing Transportation Risk of LPG and LNG ........................................................................ 152
  - Ryan J. Hart, Delmar (Trey) Morrison

- (60c) Experimental Study on Propane Jet Fire Hazards: Thermal Radiation ........................................................................ 153
  - Raymond H. Bennett, Quentin A. Baker

- (70aa) Product Failure Rates Vs Site-Specific Failure Rates: Implications for Safety ........................................................................ 167
  - Julia V. Bukowski, William M. Goble, Iwan van Beurden

- (70ad) Exploring Dependencies of Ignition Locations on Probabilistic Explosion Analysis ........................................................................ 185
  - Benjamin Poblete, Scott Klarie, Advait Sane, Bharat Tuleyan, Michael Stahl, John Johnson, Andrew Staszak

- (70ae) Process Safety Near-Miss Management System in Takreer Ruwais Refinery: An Effective Tool for Applying Prevention Strategies ........................................................................ 186
  - Christian Rauchegger, Susan Bayley, Volkmar Schroder, Dominique Thievenin

- (70af) How Having Updated Heat & Material Balances Commits to Process Safety ........................................................................ 187
  - Nicholas N. Cristea, Dustin J. Smith, Dick A. Baum, Juan Lopez

- (70ai) Safety Culture and Leadership- Independent of Language ........................................................................ 195
  - Kumar Irsani, Yaneira Saud, Sandra Lovell, Sarah Acton

- (70ic) Best Practice in Application of CAA CAP 437 Guidance for Offshore Helicopter Landing Areas ........................................................................ 196
  - Tom Jones, Chris Robinson, Andrew Grand, Morgan Reed

- (70id) Introducing a Dynamic Calculation Method for Pressure Relief Load and Orifice Sizing ........................................................................ 205
  - Steve Strebelow, Jay Riha

- (70f) Quantifying Human Error Probabilities through a Bayesian Network Using Expert Opinion and an Auditing Tool: An Application to the Tokai-Mura Accident ........................................................................ 228
  - Paulo Fernando Fraturoso e Melo, Antonio Carlos Ribeiro, Anna Leticia B. Sousa, Juliana P. Duarte

- (70h) Numerical Modeling of Pool Fire inside an Offshore Methanol Storage Tank ........................................................................ 238
  - Tony Liu, Morgan Reed, Eric Peterson, Iman Shalibi

- (70i) Credibility of Designing Refrigerated Atmospheric Storage Tank Pressure Relief Systems for a Tornado ........................................................................ 239
  - Syed Usman Ahmed

- (70j) Cultura De Liderazgo y Seguridad – Independientemente Del Idioma ........................................................................ 253
  - Yaneira Saud, Kumar Irsani, Sarah Acton, Sandra Lovell

- (70k) Ensure Compliance to NFPA Standards through Corporate Level Combustible Dust Audits ........................................................................ 254
  - Amy Theis, Richard Kwansy

- (70l) Combining Traditional UOP HAZOP Analysis with Dynamic Simulation a New Process Safety / Risk Assessment Tool ........................................................................ 255
  - Scott M. Wozniak, Bill Wade

- (70m) How Close Is My Operation to a Major Accident? ........................................................................ 277
  - Abouzar Yousefi, Manuel Rodriguez Henrandez, Jaime Martin Juez

- (70o) An Approximate Model for Discharge Density Associated with Critical Flow ........................................................................ 289
  - Henry Foust III

- (70v) A Multilevel Safety EARLY Warning Method Based on Bayesian Networks with Applications for Petrochemical Process ........................................................................ 290
  - Jinqiu Hu, Luabin Zhang
(70w) Summary of Macondo Inquiries and Recommendations .......................................................... 291
Robin Pihlado

(70s) Operational Risk Management Aided By Continuous Monitoring of Barriers ....................................................... 304
Ed Silva, Sergio Saad
A Spreadsheet Application for Evaluating Two-Phase Emergency Venting Transients Utilizing an Interface to a Thermodynamic Property Package ................................................................. 308
Subin Hada, Robert D'Alessandro, J. Andrew Jones

(71a) Anatomy of a Potential LNG Incident ....................................................................................... 318
Fabianna Weber

(71ab) Application of Risk Prioritization Matrix of Nonconformities in the Offshore Industry .................................................. 319
Tatiana Corddeiro, Claudia Morgado

(71ac) Experimental Study on Gas Explosion in an Obstructed Confined Pipe .......................................................... 328
Rafiziana M. Kasmnani, Mimi H. Hassim, Siti Zuhaidah Sulaiman, Sina D Emami, Kamarizan Kidam, Roshafima, R. Ali

(71ae) Uncertainty Analysis for LOPA in the Offshore Industry .............................................................. 329
Sangwak Kim, Kwangil Chang, Eunhyun Park

(71af) Quantitative Risk Assessment (QRA) with the Inclusion of Human and Organizational Factors and Maintenance .......................................................... 330
Meemood Ahmad

(71ag) Implementing SIS Metrics for Life Cycle Management - Part 1: Proof Testing .................................................. 331
Keith Lapeyrouse, John Harrison

(71ah) Dust Explosion Kinetics ........................................................................................................ 332
Russell A. Ogles, Sean J. Dee, Brenton L. Cox

(71ai) Vapor Cloud Hazards of Enclosed Liquid Flammable Processes ...................................................... 333
Kevlin Kenny, Eric S. Becker

(71aj) Comparison of Results of the Classified Areas of a Typical Hydrogen Generation Unit (GHU) Using the Standards NFPA 497 and API RP 505 ........................................................................ 334
Gisele Nascimento, James Hall Sr.

(71ak) The Requirements and Tools to Treat Safety Process Risk Caused By Organizational Changes ...................................................... 335
Salvador Avila Filho, Estron T. Dantus, Jonas Duarte

(71am) Using Unrealistically Optimistic Failure Data: Is It Ethical? .......................................................... 347
Karen Stewart, Ivan van Beurden

(71an) Dynamic Simulation As a Robust Tool for Optimum Flare Systems Design .................................................. 357
Farzad Khan, Christopher Ng, Jim Bridgett

(71ao) Best Practice MOC and Pssr 2014 ............................................................................................ 358
Mike Mike

(71ap) Application of Risk Analysis in Pilot Plants and Research Labs ........................................................ 359
Kabir Moideenkaty

(71aq) Integrating Cyber Security Risk Assessments into the Process Safety Management Work Process .................................................. 360
Harold W Thomas, John Day

(71ar) Integrating Alarm Management into Your PHA and LOPA Processes .................................................... 379
Todd Stauffer, Harold W Thomas

(71as) High Integrity Pressure Protection Systems: Design, Analysis, Justification and Implementation .................................................. 380
Charles Fishkowski

(71at) Predicting Far Field Blast Overpressures: An Evaluation of Enhanced Input Parameters for FLACS .................................................. 381
Meiqian Wang, Morgan Reed, Ank Rai, Eric Peterson

(71av) The Application of the Bifunctional Environmental Deodorizer for Sulfur and Sour Water in Sinopec Tianjin .................................................................................................................. 382
Aijun Wang, Jiliang Chen

(71aw) Safety-Centered Site Master Planning .................................................................................... 383
Steve Clepper, Hollie Schmidt

(71ax) Exothermal Test for Green Plastics Materials by DSC ........................................................................ 398

(71az) The Studies of Flame Propagation Simulation in the Municipal Pipeline .............................................. 404
Fenglei Han, Gangze Liu, Mengmeng Du, Ren Sun

(71b) The Study on the Vulnerability of Urban Oil and Gas Pipeline Network of the Mechanism of Action ........................................................................ 411
Su Hu

(71bb) Application of HAZOP Study On Some Butyl-Octyl Alcohol Plants .................................................. 412
Jialai Huang, Junjie Chen, Minbong Sheng, Kanggu Chen, Dong Xue

(71bc) Critical Success Factors for Effective PHAs ............................................................................ 422
Arllyn Poppen, John Herber

(71bd) Security Risks and Countermeasures of Pesticide Formulations Production Process .................................................. 448
Wenqiang Wan

(71be) Incorporate Safety During Process Design ................................................................................ 449
Krishnarmo Guntu

(71bf) Study on Application of LOPA in HAZOP on China Refinery Design .................................................. 450
Mingfang Gu, Zhigang Wang, Hua Zhou, Wenjuan Wang

(71bg) Field Application of Risk-Based Approach for Fatality Prevention .................................................. 462
Alfonsois Arianwan

(71bh) Problems and Resolutions of SIS Engineering Application ..................................................... 463
Ruoqing Wang
(134c) Calculating Facility Siting Study Leak Sizes - One Size Does Not Fit All
Gary A. Fitzgerald ................................................................. 682

(137a) LNG Spills on Water: A Comparison of the Shallow Water Model to Experiments
Nicolas F. Ponchaut, Harri K. Kytomaa ................................ 690

(137b) Methodology for Design of Knock out Drum Considering Internal Explosion in Flare System
Eun Sang Jung, Sangmin Park Sr., Kil Nam, T.J. Kim ............. 691

(137c) Experimental Study and CFD Simulation on Bund Overtopping in Case of a Catastrophic Failure of Tanks
Containing Water/Liquid Nitrogen/LNG ................................ 692

(139a) Safety Case VS SEMS: Are They Really All That Different? An Operator’s Perspective
Kumar Irvani, Dennis Butts, Joshua Yang .......................... 693

(139b) A Modern Well HAZOP Approach ................................ 702
Yaneira Saud, Dennis Butts

(139c) To Safely Go Where No Man Has Gone before: Exploring and Producing with Process Safety
Mike Broadribb ........................................................................ 714

(71a) An Optimization Formulation for Risk Reduction of the Layout of Offshore Platforms
Yi Liu, Nirupama Gopalawasami, Wen Zhu, Bin Zhang, M. Sam Mannan .................................................... 727

(153b) Blast Resistant Design and Retrofit of Buildings at Petrochemical Facilities .................................. 746
Paul Summers, Guzhao Li, Zonglei Mu

(153c) Thermal Radiation Analysis from Large Pool Fires in an Existing Atmospheric Storage TANK Farm to
Estimate the Maximum FIRE Water Demand ......................... 760
Marco-Antonio Medrano-Gonzalez, Roma Norte

(157a) Case Study on SMALL-Scale LNG Facility Expansion ................................................................. 773
Ettilyza Suter, Jenna Wilson

(157b) Quantification of Turbulence in Cryogenic Liquid Pool Using High Speed Flow Visualization
Nirupama Gopalawasami, Delphine Laboureure, Ray Mentzer, Sam Mannan .................................................. 782

(157c) Automating the Depressuring of a Plant ................................ 794
Gowthami Tamilselvan, Satyajit Verma

(176a) CFD Analysis of Gaseous Leaks with 80% CO2 on Offshore Facilities .............................................. 807
Juanjo Lu, Andrey Filippov, Fernando Marcancola, Victor Alcocer

(176b) Case Study on Laser-Based Gas Detection Technology and Dispersion Modeling Used to Eliminate False
Alarms and Improve Safety Performance on Terra Nova FPSO ........................................................................ 821
Brajit Barua, Edward Sharpe, Are Bratteeteig, Zona Bath

(176c) Escape Routes Selection for Offshore Units Based on Quantitative Risk Assessment Results .................. 842
Mariana Bahadian Bardy

(189a) Chemical Incompatibility Matrices ........................................................................................................ 852
Michelle Murphy, Surendra K. Singh

(189b) Understanding the Effect of Fill-Ratio on Thermo-Kinetic Data .......................................................... 865
Swati Umbrajkar

(189c) Lending Industrial Experience through Reactive Hazard Examples in University Safety Instruction ........ 877
Henry T. Kohlbrand, David J. Dixon

(205a) Fire from the Cascading Failure of an Oxygen Supply System .......................................................... 892
Delmar Morrisset, Vijay Kumar, Sean J. Dee, Brenton L. Cox, Mohammad Al-Shamary, Abdulqader Al-Qabandi

(205b) Lessons Learned from an Incident at a Cryogenic Gas Processing Facility ........................................... 913
Adrian Porrerazio

(205c) 1996 Amines Plant Explosion ................................................................................................................ 925
Jerry J. Forest

(205d) U.S. Chemical Safety Board's Final Investigation Report on the Chevron Richmond Refinery Pipe Rupture
and Fire ...................................................................................... 933
Lauren Grim, Mark Wingard, Steve Cutchan, Dan Tillema, Amanda Johnson

(205e) Bhopal 30 Years Later .......................................................................................................................... 936
Ronald J. Willey, Daniel A. Crowl
