# TABLE OF CONTENTS

## VOLUME 1

### KEYNOTE LECTURE

**BWR and PWR Chemistry Operating Experience and Perspectives**
Keith Fruzzetti, Susan Garcia, Nicole Lynch, Richard Reid

**Activity of Water Chemistry Division of the Atomic Energy Society of Japan**
Yosuke Katsumura

### SESSION 1 – BWR OPERATING EXPERIENCE

**Reducing Radiation Levels at Boiling Water Reactors of a Commercial Nuclear Power Plant Fleet**
Andrew Odell, Mary Jarvis

**Investigations into Surface Treatment Methods for Reduction of Recontamination of BWR Reactor Systems**
Bernhard Stellwag, Juan De Dios Sanchez Zapata, Ashim Basu, Tomas Beraosaluce, Stephan Hoffmann-Wankelr, Luis Sempere Belda

**Uncommon Water Chemistry Observations in Modern Day Boiling Water Reactors**
Samson Hettiarachchi, Christoph Weber

**Behavior of Shut-Down Dose Rate of Recirculation Piping of BWR under Noble Metal Application**
Motomasa Fuse, Makoto Nagase, Motohiro Aizawa, Yoichi Wada, Kazushige Ishida, Hideyuki Hosokawa, Samson Hettiarachchi, Christoph Weber

**Effect of Seawater Infiltration from Main Condenser, Damaged by Break on the Reactor Facilities, Hamaoka Unit 5**
Tadashi Tsukada, Tsugitaka Egami, Yoshiaki Watanuki, Kazumi Mitani, Tetsuya Watanabe

### SPECIAL SESSION (INVITED) – FUKUSHIMA DAIICHI NPP ACCIDENT

**Current Status of Fukushima Daiichi NPS Efforts for Decommissioning and Contaminated Water Control**
Ryoji Doi

**Current Situation of Decommissioning Work in Fukushima Daiichi Nuclear Power Station**
Sakae Muto

**Latest Activities of the AESJ Investigation Committee on the Nuclear Accident at the Fukushima Daiichi NPP**
Shunsuke Uchida, Masanori Naitho, Hiroaki Suzuki, Hitotoshi Okada

**Implementation and Planning of Preventive and Multi-Layered Contaminated Water Treatment**
Tomoyuki Arai, Takeshi Takahashi

**Influence of Radiolysis and Gas-Liquid Partition of I-131 in Accumulated Water on Late Phase Source Terms at Fukushima NPP Accident**
Akihide Hidaka

**The TMI-2 Recovery & Cleanup**
Chuck Negin

**State of Radioactive Water in the Ruined Unit 4 of Chernobyl Nuclear Power Plant and Hydro-Geological /Monitoring of Groundwater**
Victor Krasnov

**An Overview of Approach to Corrosion Issues in Fukushima Daiichi Nuclear Power Station**
Yuichi Fukaya, Toshihumi Hirasuki, Katsuhiko Kamagai, Teruhisa Tatsuoka, Kenro Takamori, Shunichi Suzuki

**Progress on Off-Site Cleanup Efforts in Japan**
Teruyoshi Hayamizu
SESSION 2 – PWR, VVR & CANDU/PHWR OPERATING EXPERIENCE

The Evolution of Chemistry in PWR Nuclear Power Plants: Overview and Safety Perspectives ........................................ 202
Ian De Curieres

Actions Taken to Significantly Reduce Activity Levels on Primary Loop Surfaces at Loviisa NPP ..................................... 210
Kari Makela, Sari Jarvinmaki, Roger Kvarnstrom, Minna Makinen

Zinc Injection on the EDF Pressurized Light Water Reactors: Current Results and Operating Experience Feedback ............................................................... 220
Olivier Piana, Arnaud Duval, Edgar Molefair, Moez Benfarah, Jean-Luc Breitelle, Guy Chaigne

Appropriate Zinc Addition Management into PWR Primary Coolant after the Plant Long-Term Maintenance ............................................................... 232
Atsushi Hirose, Ryo Matsui, Haruki Imamura, Akira Takahashi, Yuichi Shimizu, Noritaka Kogawa, Kunitaka Nagamine

The Effects of Zinc Injection from HFT at TOMARI Unit 3 .......................................................................................... 243
Yamato Azawa, Kenji Ouchi, Hitoshi Hayakawa, Satoshi Nakahama, Takao Nishimura, Ryuji Umehara, Yuichi Shimizu, Noritaka Kogawa, Zenjiro Ojima

Primary Heat Transport System Return to Service Following the Refurbishment Outage at the Point Lepreau Generating Station ............................................................... 255
Craig Stuart, William Cook, Eric Gardner

Westinghouse Fuel Performance in Modern RCS Chemistry .......................................................................................... 266
Jayashi Iyer

First Steam Generator Cleanup Application with Dispersant at Doel 3 .............................................................................. 277
Charles Laire, Dominique Courstiers, Steven Bosmans, Rene Delporte, Stephanie Coart, Raphael Lecocq

SESSION 3 – WATER CHEMISTRY SCIENTIFIC STUDIES

A Novel Technology for Fouling Mitigation and Dose Reduction in BWR ........................................................................... 289
Young-Jin Kim, Juan Varela

Effects of Zinc Injection on Electrochemical Corrosion and Cracking Behavior of Stainless Steels in Borated and Lithiated High Temperature Water ................................................................. 300
Xinqiang Wu, Xiahe Liu, En-Hou Han, Wei Ke

Uptake of Co-60 on Alloy 690 and Stainless Steel Type 304L Surfaces in Simulated PWR Primary Chemistry ........................................................................... 313
Johan Oljemark, Bernt Bengtsson, Peter Gillen, Pernilla Svaneberg, Jiaxin Chen

New Insights into Activity Transport within the Primary Heat Transport Systems of CANDU Reactors ............................................................... 325
Yury Verzilov, Aamir Husain

Modelling Material and Radioactivity Transport in the Primary Circuit of CANDU Reactors ........................................................................... 339
Olga Palazhchenko, Derek Lister

New Data for Thermodynamic and Kinetic Behaviour of Nickel Phases in PWR Physicochemical Conditions ........................................................................... 351
Dominique You, Gabriel Planque, Patrick Lovera

The OSCAR Code: Modelling and Simulation of the Corrosion Product Behaviour under Nucleate Boiling Conditions in PWRs ........................................................................... 363
Frederic Dacquait, Alexandre Ferrer, Benoit Gall, Gilles Ranchoux, Mathieu Corbineau

Electrochemical and Microstructural Characterization of Crud ........................................................................... 375
Fabio Scenini, Jonathan Duff, Nicholas Stevens, Andrea Cioncolini, Anthony Cook, Andrew Banks

Modeling Chemistry in PWR Fuel Crud ........................................................................... 387
Jim Henshaw, Amit Agarwal, John McGurk, Sarah Connolly, Shirley Dickinson, Dan Wells, Aylin Kucuk

Characteristics of Fuel Crud from Ringhals Unit 4 - A Comparison of Crud Samples from Ultrasonic Fuel Cleaning and Fuel Scrape ........................................................................... 399
Jiaxin Chen, Chuck Marks, Bernt Bengtsson, John Dingee, Daniel Wells, Jonas Eskhult

Capacity of Ammonia, ETA, and MPA on Corrosion Inhibition and Delay of Carbon Steel in PWR Secondary Condition ........................................................................... 411
In Hyoun Kang, Hyeonjun Jung, Young In Kim

Reactor Coolant Cleanup Optimization ........................................................................... 420
Joel McElrath, Daniel Wells, Al Jarvis, David Morey
SESSION 4 – SECONDARY WATER CHEMISTRY (STEAM CYCLE)

The Effect of Polyacrylic Acid on Iron Oxides Formed on Steam Generator Tubes and on Metallic Copper Present in Pressurized Water Reactors .............................................................................................................. 433
Marion Roy, Carine Mansour, Dominique You

Hard Sludge and Denting in the Secondary Side of PWR Steam Generators ................................................................................................................................. 443
Rocio Fernandez Saavedra, Marta Fernandez Diaz, Maria Belen Gomez Mancebo, Gonzalo De Diego, Alberto Jose Quejido Cabezas, Maria Dolores Gomez Briceno

Secondary System Return to Service Following the Refurbishment Outage at the Point Lepreau Generating Station ................................................................................................. 456
William Cook, Eric Gardner, Jason Lee, Craig Stuart

PWR Steam Generator Tube Denting at Top of Tubesheet ........................................................................................... 468
Samuel Choi, Chuck Marks, Ryan Wolfe

Impacts of WWER Power Increase on Horizontal Steam Generators ...................................................................................... 476
Roman Krautschneider, Lukas Joch

Study of Corrosion Resistance and Semiconductor Properties for the Passive Film of Nuclear Grade Stainless Steel Welding Joint ................................................................. 487
Xin Changsheng, Wang Hai, Hai Zhengyin, Hu Yong

SESSION 5 – LIFE TIME MANAGEMENT AND PLANT AGING

The IAEA Activities on Plant Life Management and Ageing Management ............................................................................................................................... 488
Keeyoung Kim, Ki-Sig Kang

Concept Study of Steam-Water Cycle Sampling System Modernization at NPP Borssele ................................................................. 489
Andreas Drexler, Niels Van Dijke, Manuel Sigrist

Role of Cavity Formation in SCC of Cold-worked Alloy 690 in High-Temperature Water .............................................................. 501
Takuyo Yamada, Masanori Aoki, Tomoki Miyamoto, Koji Arioka

A Comprehensive Investigation of the Platinum Application to BWRs to Mitigate Stress Corrosion Cracking ................................................................. 513
Pascal Grundler, Lyubomira Veleva, Amuthan Ramar, Stefan Ritter

System Safety Analysis of Aging NPPs Based on Probabilistic Risk Evaluation of Flow-Accelerated Corrosion ............................................................................................................................... 525
Hidetoshi Okada, Shunsuke Uchida, Masanori Naitoh, Hiroaki Suzuki, Seiichi Koshizuka, Derek Lister

SESSION 6 – CHEMISTRY AND FUEL PERFORMANCE

Impact of Long Term Injection of Platinum (HWC/OLNC) on Water Chemistry, Crud Behavior and Platinum Deposition ............................................................................................................................... 533
Lena Oliver, Britta Helmersson, Peter Cronstrand, Guido Ledergerber, Aylin Kucuk

AREVA M5™: A Zirconium Alloy Highly Resistant to Detrimental Water Impurities ............................................................................................................................... 545
Pierre Guillermier, Damien Kaczorowski, Delphine Perche, Charles Brussieux

Studies on ZIRCALOY-4 Cladding Corrosion in the Halden Reactor ................................................................................................. 556
Peter Bennett, Reka Szoke

Study for Nickel Deposition on the Fuel Cladding by DH transition under Simulated PWR Conditions ............................................................................................................................... 568
Yuichi Shimizu, Takao Nishimura, Ryuji Umehara, Noritaka Kogawa, Zenjiro Ojima, Kunitaka Nagamine, Masashi Suzuki

Effect of Concentration Ratios of Ni/Fe Ions on the Fuel Crud Deposition ............................................................................................................................... 580
Do Haeng Hur, Seung-Heon Baek, Hee-Sang Shim, Kyung Sool Im, UH Chul Kim

Ukraine’s WWER-1000 Primary Coolant Chemistry Optimization ............................................................................................................................... 587
Mykhaylo Tretyakov, Volodymyr Krasnourutskyy, Viktor Grytsyna, Valeriy Zayok, Roman Rud, Ivan Petelgazov

SESSION 7 – CHEMISTRY OPTIMIZATION PROGRAMS AND COMPLIANCE MANAGEMENT

Recent Advances in BWR Water Chemistry ............................................................................................................................... 598
Susan Garcia, Nicole Lynch, Joseph Giannelli, Mary Jarvis, Alfred Jarvis

Chemistry Evaluation in French EDF Nuclear Power Plants ............................................................................................................................... 612
Herve Jacquier
Current Status of Regulatory Aspects Relating to Water Chemistry in Japanese NPPs.......................................................................................... 619
Masatoshi Sato

BWR Water Chemistry Guidelines in Japan ................................................................................................................................. 627
Hideo Hirano, Naoshi Usui, Hideaki Kitajima, Hirotaka Kawamura, Yuki Fukabori, Junichi Suzuki, Norio Kawai, Tsunuki Yamaguchi, Satoshi Uemura, Satoshi Onodera, Kenji Hisamune, Yutaka Ueyama, Hidehiro Urata

Primary Water Chemistry Guidelines for Japanese PWR Plants.................................................................................................................. 640
Hirotaka Kawamura, Yasuhiko Shoda, Yasuo Tsuzuki, Hideo Hirano, Yoshihumi Watanabe, Kotaro Takeda, Takumi Terachi, Nobuaki Ishihara, Akira Takahashi, Kenji Hisamune, Yasuke Nakano, Takao Nishimura

SPECIAL SESSION – FUKUSHIMA DAIICHI NPP ACCIDENT

Study on the Radioactive Wastewater Treatment System for Fukushima Daiichi Nuclear Power Station (I) Sr Adsorption Characteristics on Zeolite........................................................................................................ 653
Takatoshi Hijikata, Kenta Inagaki, Takeshi Tsukada, Tadafumi Koyama, Eiji Ishizaki, Minoru Matsukura

TMI-2 Cleanup Operations...................................................................................................................................................... 665
Chuck Negin

Application of Phenol-Based Ion-Exchange Resin for Radioactive Cesium Removal from Contaminated Seawater........................................... 671
Kenta Mino, Wataru Sugino, Kenji Hisamune, Yoshinori Meguro, Shintaro Tsuzuki, Katsuya Takawa

Development of the Radioactive Cesium Decontamination Technology from Radioactive Fly Ash............................................................... 680
Keita Takakura, Tsuguyuki Kobayashi, Hideki Nakamura, Hisao Oomura, Shinichi Makino

Effect of Oxygen on Radiolytic Hydrogen Production from X-Type Zeolite-Water Mixtures ................................................................. 690
Yuta Kamagai, Atsushi Kimura, Mitsunasa Taguchi

Effects of Seawater Components on Radiolysis of Water at Elevated Temperature ............................................................................ 699
Yoichi Wada, Masahiko Tachibana, Kazushige Ishida, Nobuyuki Ota, Naoto Shigenaka, Hiromitsu Inagaki, Hiroshi Noda

Consideration of Radiolytic Behavior in Diluted and Concentrated Systems of Seawater for Computational Simulation of Hydrogen Generation........................................................................................................ 708
Ryuji Nagaishi, Masao Inoue, Ryutarou Hino, Toru Ogawa

Nordic Owners Group Study on Radiolysis Gas Management Post-Fukushima ............................................................................................... 717
Jorgen Finne, Peter Cronstrand, Yiva-Li Lindh, Frida Karlen, Erik Slobe, Richard Faxen, Ingemar Jansson, William Eek, Hakan Wennerstrom

Iodine Chemistry in Nuclear Reactor Accident Conditions: Recent Studies and Hypotheses ........................................................................ 729
Shirley Dickinson, Ari Asvinen, Loic Bosland, Dana Powers, Glenn Glova, Beatrice Teisseve, Sabrina Tietze

Effects of Environmental Factors on Oxidation of Iodide under 254 nm Ultra-Violet Irradiation................................................................. 742
Jei-Won Yeon, Sang-Hyuk Jung, Sue Young Hong, Kyuseok Song

Application of Nanofiltration to Separate Strontium from Seawater ........................................................................................................ 750
Yasuke Shioda, Yasushi Maeda, Shintaro Tsuzuki, Supriyo Das, Elbir Jove, Scott Beardsley, Garth Parker, Steven Rosenberg

An Electro-de-Ionization Device for the Continuous Measurement of the Conductivity after a Cation Exchanger............................................................................................ 759
Heini Maurer, Martin Aicher

Lay up Practices at EDF PWR Fleet and Future Developments .................................................................................................................. 769
Olga Alos Ramos, Sergio De Maria Pablo, Matthieu Wintergert, Alexandra Postic, Jean-Pierre Courtaudiere, Christian Fournier, Robin Viallet, Jacques Waebre, Didier Couturier, Philippe Robillard

Reverse Osmosis and its Use at the Nuclear Power Plants-Purification of Primary Circuit Coolant by the Means of Reverse Osmosis ........................................................................................................ 782
Katerina Vonkova, Pavel Kas, Katerina Kunesova, Sarka Bartova, Martin Skala, Tomas Moucha

SESSION 8 – MAINTENANCE

Study on the Radioactive Wastewater Treatment System for Fukushima Daiichi Nuclear Power Station (I) Cs Adsorption Characteristics on Sorbent........................................................................................................ 788
Takeshi Tsukada, Takatoshi Hijikata, Kenta Inagaki, Tadafumi Koyama, Eiji Ishizaki, Minoru Matsukura

Recent Decontamination Experiences in BWRs and the Effect of Operational Water Chemistry on the Decontamination Application .................................................................................................................. 801
Ashim Basu, Johan Lejon, Monika Mattsson

Sorbents for Effective Removal of Radioactive Antimony during Chemical Decontamination ........................................................................ 814
Padala Abdul Nishad, Anupkumar Bhaskarapillai, Sankaralingam Velmarugan

Approaches to Enhancing Early Hydrogen Water Chemistry for IGSCC Mitigation During BWR
Startups ........................................................................................................................................ 1015
Susan Garcia, Andrew Odell, Joseph Giannelli, James Tingen

Mitigation Performance Indicator for Boiling Water Reactors.................................................... 1025
Susan Garcia, Joseph Giannelli, Mary Jarvis

Boiling Water Reactor Shutdown Dose Rate Experience after On-Line NobleChem™ .............. 1034
Susan Garcia, Joseph Giannelli, Mary Jarvis

BWR Shutdown and Startup Chemistry Experience and Application Sourcebook ...................... 1042
Susan Garcia, Joseph Giannelli, Alfred Jarvis

Cobalt Sequestration Resin Plant Demonstration Experience in BWRS .................................... 1055
Susan Garcia, Paul Frattini, Andrew Odell, Michelle Muru, Joseph Giannelli

Modeling of Platinum Deposition on BWR Surfaces During On-Line NobleChem™ .............. 1068
Susan Garcia, Jim Henschaw, Joseph Giannelli

Measures to Reduce the Generation of LCW Spent Resin at the Shika Nuclear Power Station .... 1078
Daigo Hatake, Takeshi Saito, Hideyuki Takashima

Initiatives to Reduce the Occupational Radiation Exposure of ABWR Plants ............................ 1089
Hajime Hiratsuru, Hidehiro Uraita, Taku Ueda, Seiji Yamamoto, Yumi Yaita

Application of the Hi-F Coat to the Shimane Nuclear Power Station ....................................... 1098
Satoshi Uemura, Tadashi Kanaoka, Hiroyasu Kajitani, Makoto Nagase, Satoshi Ouchi

Update on the Use of Dissolved Oxygen Addition to Monitor the Effectiveness of Noble Metal
Applications in External Manifolds .................................................................................................. 1104
Juan Varela, Hubert Huie, Andrew Odell, Russell Seeman, Carl Bourne

The Planning of NMCA Application and ECP Monitoring in Tokai-2 ........................................ 1119
Katsuhiko Kato, Yukata Ueyama, Takehiko Takahashi, Kenji Hisamune

Noble Metals Sampling Experience ............................................................................................... 1126
Richard Kohlmann, Alan Drehmel

POSTER 3 (BRW)

Circulating Crud Characterization in Condensate System of Boiling Water Reactors at NWC/HWC
Environments .................................................................................................................................. 1136
Tung-Jen Wen, Yu-Hung Shih, Charles Fang Chu, Sze Chieh Shen

An Investigation into Stress Corrosion Cracking Susceptibility of 304 Stainless Steel in Simulated
Boiling Water Reactor Start-Up Environments .............................................................................. 1148
Yau-Wen Chiou, Tsung-Kuang Yeh, Mei-Ya Wang

An Investigation into the Electrochemical Behavior of Hydrogen Peroxide on TiO2 Treated Type 304
Stainless Steels in High Temperature Water ................................................................................ 1159
Tsung-Han Li, Tsung-Kuang Yeh, Mei-Ya Wang

The Influences of ECP and Metal Dopants on Radiation Field Build-Up on Stainless Steel Surfaces
Identification of Chromium Oxides and Other Solids in BWR Reactor Water ............................ 1181
Jiaxin Chen, Petter Andersson, Fredrik Lindberg, Johan Lejon, Jimmy Hagge, Margareta Tanse-Larsson, Charlotte
Lager, Charlotte Obitz

On The Interation of Injected Zinc with Oxide Films Formed on Stainless Steel under Cyclic
Oxidising and Reducing Conditions ............................................................................................ 1191
Jiaxin Chen, Charlotte Obitz, Fredrik Lindberg, Johan Lejon, Jimmy Hagge, Margareta Tanse-Larsson, Arne
Johansson

Evaluation of Silica Behavior for Reducing the Precoating Frequency of the Reactor Water Cleanup
System of the Hamaoka NPS ......................................................................................................... 1203
Miyuki Ito, Hiromitsu Inagaki, Toshio Kuzuya

Development of a Suppression Method for Deposition of Radioactive Cobalt by a Platinum Deposition
Treatment after Chemical Decontamination .................................................................................. 1215
Hideyuki Hosokawa, Tsuyoshi Ito, Makoto Nagase, Motohiro Aizawa, Motomasa Fuse

The Effect of Chloride Ion on the Iron Elution from Carbon Steel in High Temperature Water .... 1221
Masato Okamura, Taku Ueda, Seiji Yamamoto, Hiromitsu Inagaki, Takehiko Minamikawa

“Radiation-Induced Electrolysis” - A Potential Root Cause Of Hydrogen Explosions In The
Fukushima Daiichi Accident - .......................................................................................................... 1230
Gen Saji

Development of Evaluation Tool for Radiation Dose Rate Distribution in PCV of Hamaoka BWR
Plants based on Water Chemistry ................................................................................................. 1243
Hiromitsu Inagaki, Toshio Kuzuya
Effect of Gadolinium Nitrate Concentration on the Corrosion Compatibility of Structural Materials in a Proposed Indian Tube Type Boiling Reactor

Sina Chandran, Puspalata Rajesh, Debasis Mal, Rangarajan Srinivasan, Shaju K. Albert, Velmurugan Sankaralingam

POSTER 5

The Corrosion Model of Zirconium Alloys in the Water Coolant

Irina Berezina, Vladimir Krivosy, Elizaveta Mokhova

Boiling Water Reactor Vessel Internals Project (BWRVIP) - Continuing a Proactive Approach for Managing Degradation

Andrew Odell, Andrew McGehee, Raj Pathania, Robert Carter, Robin Dyle

Zirconia Membrane ECP Electrode for Water Chemistry Experiments in the JMTR

Satoshi Hanawa, Kunihi Hata, Akira Shibata, Yasuhiro Chimi, Shigeki Kasahara, Nobuyuki Tsutsui, Akihiro Iwase, Yutaka Nishiyama

Impact of Iron Oxide Deposition on seal #1 of Reactor Coolant Pump

Ingrid Sellier, Gregory Lefevre, Bruna Martin-Caban, Jean-Luc Riviere, Carole Monchy-Leroy

Cleanliness Requirements in Nuclear Power Plants: Revision of German Standards DIN 24510 and DIN 25493

Andreas Drexl, Janine Winkler, Steffen Weiss

Laboratory Investigations on the Corrosion Rate of A42 Carbon Steel in Various Secondary Circuit Chemistries Representative of Hydraulic Tests Conditions

Charles Brussieux, Olga Alos-Ramos, M. H Clinard, Michael Guilloco

The Study of Cavity Formation in SCC of Cold Worked Carbon Steel in High-Temperature Water

Masanori Aoki, Takayo Yamada, Tomoki Miyamoto, Koji Arioka

Effect of Liquid Film Velocity and Thickness on Thinning Rate of Flow Accelerated Corrosion under Water-Steam Two-Phase Flow

Masaaki Satake, Kimitoshi Yoneda, Ryo Morita, Kazutoshi Fujiwara, Fumio Inada

Characterization of the Oxide Film Formed in the Flow-Accelerated Corrosion of Carbon Steels

Takuma Yano, Hiroshi Abe, Takamichi Miyazaki, Yutaka Watanabe, Kazutoshi Fujiwara, Fumio Inada

POSTER 8

Corrosion Evaluation of Structural Materials during Chemical Cleaning of Steam Generator Tubing in the Secondary System

Clinton Fong, Yi-Ching Lee, Meng-Jen Chen

Fouling of Steam Generator Tubes in Nuclear Power Plants: Laboratory Tests to Reproduce Oxides Deposition and Chemical Cleanings

Christophe Goujon, Carine Mansour

Steam Generator Cleaning Experience at Korean PWRs: 2014 Experience Update

In-Ho Hwang, Young-Bok Kang, Min-Gil Lee, Robert Varrin, Michael Little, Peter Krull

Development of Advanced Electrodes for Corrosion Monitoring in Nuclear Power Plants

Hee Kwon Ku, Dong Seok Lim, Jae Seon Cho

Effect of Electrochemical Corrosion Potential on 60Co Deposition on Corrosion Oxide Formed under Boiling Water Reactor Conditions

Tayoshi Ito, Hideyuki Harakawa, Toru Kawasaki, Makoto Nagase, Motohiro Aizawa, Motomasa Fuse

Material Compatibility during Removal of Antimony by Oxidative Process Using Hydrogen Peroxide

Chandramohan Palogi, Rufus A. L, Srinivasan M. P, Velmurugan Sankaralingam

POSTER 9

Replacement of Hydrazine in Closed Cooling Systems Using 3-Step Treatment System

Jimmy Hogg, Pernilla Svanberg, Jenny Rouden, Stjepan Jagunic, Thomas Cole

Cesium Separation Using Integrated Electro-Membrane Technique

Parik Fors, Anna Velin, Christina Lillforspinter, Bernt Bengtsson, Henrik Widestrand

Preparation of Titanium Doped Sodium Niobium Oxide for the Removal of Radionuclides in Wastewater

Chi-Hung Liao, Kuang-Li Chien, Sheng-Wei Chiang, Shih-Che Huang, Kou-Ming Lin, Jen-Chren Chung
Effects of Spilled Chemicals on Fouling, Heat Transfer and Corrosion in the Cooling Water Systems of NPPs ................................................................. 1440

Ray Irradiation ........................................................................................................................................... 1609

Haruyoshi Otobe, Yoshihiro Kitatsuji, Masaki Kurata, Masahide Takano

Crum Removal by Ion Exchange Resin DIAION HPAN10 and its Mechanisms ................................................. 1450

Yuichi Sano, Hiromu Anbai, Masayuki Takeuchi, Hideki Ogino, Kenji Koizumi

Application of Mixed Bed Ion Exchange Resins with High Durability for Condensate Polishing in Air-Cooled Ultra-supercritical Pressure Steam Power Plants ......................................................... 1457

Chi-Chung Shen, Chao-Rui Chen, Jen-Chen Chung

The Study of Radioactive Organic Wastewater Treatment of INER ........................................................................ 1466

Development of the Granular Adsorbent Manufactured by Titanate which can Adsorb Sr Selectively ............ 1475

Chi Bun Bahn

Chemical Effects on Sump Strainer Clogging Under Post-Accident Conditions: Review on ANL Testing ............................................................... 1478

Joel McElrath, Richard Breckenridge

Closed Cooling Water Chemistry Guidelines Revision ......................................................................................... 1490

Joel McElrath, Richard Breckenridge

Open Cooling Water Chemistry Guidelines ........................................................................................................ 1499

Joel McElrath, Richard Breckenridge

Purification of Liquid Radwaste Using Hollow Fiber Membrane Cross Flow ......................................................... 1508

Khaled El Tayara, Henrik Widestrand, Bernt Bengsson, Patrik Fors, Carl-Henrik Hansson, Anders Hoglund

Thermodynamic Data for the Assessment of SG Blowdown Demineralizers Performance ................................. 1520

Jacques Ly, Delphine Hainos, Virginie Blin, Bruna Martin-Cabanas, Carine Mansour

New System Applying Image Processor to Automatically Separate Cation Exchange Resin and Anion Exchange Resin for Condensate Demineralizer .............................................................. 1530

Tsuneo Adachi, Nobuaki Nagao, Yasuhide Yoshimori, Takashi Inoue, Shuji Yoda

Development of Decomposition Method of Hydrogen Peroxide in Spent Fuel Pool ............................................. 1537

Tatsuya Deguchi, Takeshi Izumi, Makoto Komatsu, Daisuke Akutagawa, Takeshi Manabe, Yasuke Nakano

Change of Cation-Exchange Resin by Heat in a Simulated Pressurized Water Reactor Environment ............... 1548

Kotaro Nakata, Michihiko Hironaga

Basic Study on Radiation Degradation of Potassium Nickel Ferrocyanide .............................................................. 1559

Yoichi Arai, So Watanabe, Youko Takahatake, Masahiro Nakamura, Yasuo Nakajima

Conditioning Alkaline Coolant Radioactive Waste from Research Reactor BR-10 .............................................. 1567

Kirill Butov, Vladimir Smykov, Mikhail Kononuk

POSTER (SPECIAL)

Evaluation of Short- and Long-Term Fission Product Sources at the Fukushima Daiichi NPP .............................. 1575

Shunsuke Uchida, Masanori Naitoh, Hiroaki Suzuki, Hidetoshi Okada, Marco Pellegrine, Andrea Achilli, Yoko Manamoto, Hiroaki Suzuki

Post-Severe Nuclear Accident Chemical Water and Surface Clean-Up Methods for LWRs to Reduce the Amounts of Highly Contaminated Waste Water .............................................................. 1586

Sabrina Trotte, Mark Foreman

Safety Regulations Regarding to Accident Monitoring and Accident Sampling at Russian NPPs with VVER Type Reactors ........................................................................................................................................... 1595

Nataliya Khaititonova, Rachet Sharafuddinov, Michail Lunkin

Effects of Dissolved Species on Radiolysis of Diluted Seawater ......................................................................... 1603

Kuniki Hata, Satoshi Hanawa, Shigeki Kasahara, Takafumi Motooka, Takashi Tsukada, Yusa Muroya, Shinichi Yamashita, Yosuke Katsumura

Corrosion of the Stainless Steel in the Zeolite Containing Diluted Artificial Seawater under Gamma-Ray Irradiation ........................................................................................................................................... 1609

Chiaki Kato, Tomonori Satoh, junichi Nakano, Fumiyoshi Ueno, Isao Yamagishi

Development of the Granular Adsorbent Manufactured by Titanate which can Adsorb Sr Selectively in Aqueous Solution with High Salinity ............................................................................................. 1618

Koichi Mori, Mamoru lwasaki, Hitoshi Kanda, Yuichi Niibori, Hitoshi Mimura

Seawater Immersion Tests of Irradiated Zircaloy-2 Cladding Tube ........................................................................... 1626

Yoshishiro Seki, Ichiro Yamagata, Shinichiro Yamashita, Masaki Inoue, Koji Maeda

Corrosion Resistance of Tank Material for Flock Storage in the Fukushima Daiichi Nuclear Power Plant ...................... 1636

Yuichi Sano, Hiromu Aihai, Masayuki Takeuchi, Hideki Ogino, Kenji Koizumi

Corrosion of Uranium and Plutonium Dioxides in Aqueous Solutions ........................................................................ 1646

Harayoshi Oohbe, Yoshihiro Kitatsuji, Masaki Kurata, Yasuhide Takano
VOLUME 3

Effect of Oxide Film Formed During Gamma-Ray Irradiation on Pitting Corrosion of Fuel Cladding in Water Containing Sea Salts................................................................. 1657
Takafumi Motooka, Takashi Tsukada

JAEA’s Research on the Effects of Seawater and Radiation on Corrosion of Zircaloy and PCV/RPV Steels.......................................................... 1666
Takashi Tsukada, Takafumi Motooka, Junnichi Nakano

Reevaluation of Hydrogen Generation by Water Radiolysis in SDS Vessels at TMI-2 Accident ............................ 1675
Ryuji Nagashima, Keisuke Morita, Isao Yamagishi, Ryutaro Hino, Toru Ogawa

Removal of the Radioactive Materials from the Trench Submergence in Fukushima .................................... 1684
Takeshi Okita, Akira Ikeda, Hisao Oomura, Chiaki Kajima, Keti Noyawa

Desalination Processes for Spent Fuel Pools of Fukushima Daiichi Nuclear Power Plant ........................ 1693
Toru Kawasaki, Masao Kataoka, Motohiro Aizawa

Contaminated Water Purification by Simultaneous Adsorption of Cs and Sr ........................................ 1699
Yuko Kani, Takashi Asano, Shin Tamata

SESSION 2

Effect of Non-Halide Anions on Repassivation of Crevice Corrosion on the Austenitic Stainless Steel............. 1705
Tomohiro Sekiguchi, Yutaka Watanabe, Hiroshi Abe

Change in Corrosion Potential of SUS304 in Natural River Water ................................................................. 1716
Masahiro Yamamoto, Hideki Katayama, Yonomori Satoh, Takashi Tsukada

Calculation for the Water Chemistry Condition in the Spent Fuel Pool in Fukushima-Daiichi Nuclear Power Station........................................................... 1722
Tomonori Satoh, Takafumi Motooka, Kuniki Hata, Masahiro Yamamoto, Takashi Tsukada

Development of the Multi Radio Nuclide Removal System to Reduce the Contaminated Water at Fukushima-Daiichi Nuclear Power Station ..................... 1729
Hidehiro Urata, Teruki Fukuimatsu, Hiroyuki Arai, Hidechika Nagayama, Kei Kobayashi

Estimation of the Cesium Concentration in Spent Zeolite Vessels ................................................................. 1733
Keisuke Morita, Isao Yamagishi, Kenji Nishihara, Yasuhiko Tsubata

Sorption-Coagulation Treatment of Liquid Radioactive Waste with Complex Composition by Using New Inorganic Coagulants and Sorbents ........................................ 1744
Victor Krasnov

Precipitation of Iron Species on the Cold Side of PWR Steam Generator and its Possible Correlation to Dose Rate Elevation......................................................... 1783
Bernt Bengtsson, Jiaxin Chen, Petter Andersson

Influence of the S/N Ratio on the Corrosion Release of Alloy 690 Tubes in a Primary Coolant ....................... 1793
Hee-Sang Shim, Myung Sik Choi, Tak-Sang Choi, One Yoo, Kyung Mo Kim, Myung Ji Seo, Do Haeng Hur

Hot Functional Testing of the Pressurized Heavy Water Reactor Plant Atucha II with Light Water ..................... 1803
Berhard Stellwag, Andreas Drexler, Jorge Duca, Pedro Fribe, German Grasso, Miguel Ormando, Guillermo Galarza, Betina Schonbrod, Mauricio Chocron

Dispersant Application - Significant Operating Experience and Status .......................................................... 1813
Keith Fruzzetti, Marc Kreider, Iain Duncanson, Stephen Sawochka, Dave Morey

Optimal Resin Operation in Primary System Demineralizers at Ikata Nuclear Power Station ...................... 1826
Yutaka Fujimoto

The Improvement for PWR Secondary System Integrity at Tomari Unit 3 Commercial Operation from 2009 .... 1835
Keisuke Sasaki, Hitoshi Hayakawa, Satoshi Nakahama, Yamato Aizawa, Yashikho Shoda, Katsuhiro Yamakami, Kazutoyo Murata, Masato Kanedome
Results of Work Radiation Control Based on Dose Reduction Effect Caused by Zinc Injection at Tomari NPS Unit 3 .................................................................................................................. 1847
Satoshi Watanabe, Yuki Nakagawa, Akira Sasaki, Shigeki Matsuda, Ryoma Watari

Application of BAT Assessments for Sampling and Monitoring Techniques in the UK EPR ................................................................. 1860
Erwan Du Fou De Kerle, Julie Colim, Florian Moyano, Audrey Ardon

Dose Rate Determining Factors of PWR Primary Water ................................................................................................................. 1864
Takashi Terachi, Toshihara Kage, Nobuo Nakano, Kazunori Yamaguchi, Tomokazu Nakagawa, Masakazu Murashita, Tetsuya Tanabe, Takuya Okada, Fumitaka Iwaki, Kazufumi Sakai, Takao Nishimura, Ryuji Umehara, Yuichi Shimizu

Effect of Surface Stress State on Dissolution Property of Alloy 690 in Simulated Primary Water Condition .................................................................................................................. 1874
Kyung Mo Kim, Hee-Sang Shim, Eun Hee Lee, Myung Ji Seo, Jung Ho Han, Do Haeng Hur

Primary Shutdown Chemistry Guidelines for EDF PWRs: A New Approach for Better Results .......................................................... 1883
Arnaud Duval, Patrice Varray, Jean-Luc Brebelle, Edgar Moleiro, Damien Deforge, Moez Benfarah

Sulphate Issues and Learning for Secondary Loop System at Dayabay Nuclear Power Plant .............................................................. 1890
Changchun Wang, Jun Fang, Xuehong Yao, Yanhong He, Bin Chen

Investigation of 08Ch18N10T (AISI321) Stainless Steel Corrosion Behavior in SG Crevice Environment .................................................................................................................. 1904
Ivan Smiesko, Marek Postler, Dalibor Karnik, Martin Kronska

SESSION 3 (PWR)

Effect of Dissolved Hydrogen on Corrosion Behavior of Ni-Base Alloy in High-Temperature Water .......................................................... 1917

Influence of n,-field Fluctuations on Critical Hydrogen Concentration in the Reactor Primary Coolant .............................................................................................................................................. 1926
Oleg Arkhipov, Sergey Kabakchi

Study on the Impact of the Criteria to Take Offline the Last Reactor Coolant Pump ............................................................................. 1935
Priscilla Mondit, Julien Bonnefon, Serge Blond, Christelle Disse

Colloids in PWR Primary and Secondary Coolant Innovative Analytical Methods ......................................................................................... 1948
Karsten Nowotka, Carsten Burchardt, Roland Geier, Robert Lehr, Michael Guillodo, Bernhard Stellwag

Modelling of the Local Chemistry in Stagnant Areas in the PWR Primary Circuit .................................................................................... 1954
Richard Reid, Keith Fruzzetti, Kawaljit Ahluwalia, Alexander Summe, Cecile Dame, Kyle Schmitt

Effect of Zinc on Corrosion Product Release Behavior under PWR Primary System Conditions .............................................................. 1966
Richard Reid, Dennis Hussey, Chuck Marks, Jack Dingee

Complexation of Nickel Ions by Boric Acid or (Poly)borates .................................................................................................................. 1978
Anais Graff, Martin Bachet

Oxide Phases Induced by Electron Irradiation of 316L/PWR interfaces at High Temperature and Pressure .......................................................... 1987
Catherine Corbel, Mt Wang, Stéphane Perin, Catherine Corbel, Damien Feron

Validity Range of the Meissner Activity Coefficient Model Used in MULTEQ ......................................................................................... 1999
Shirley Dickinson, Martin Bachet, Richard Eaker, Chuck Marks, Peter Tremaine, Daniel Wells

Modelling Zinc Behavior in PWR Plant ........................................................................................................................................... 2011
Jim Henshaw, John McGurk, Shirley Dickinson, Dan Wells, Keith Garbett, Joan Pau Barrios Figueras, Santiago Maldonado Sanchez, Enrique Fernandez Lillo

EPRI PWR Primary Water Chemistry Guidelines Revision .................................................................................................................. 2022
Joel McElrath, Keith Fruzzetti

Simulation of Alpha Contamination in PWR with the OSCAR Code ......................................................................................................... 2030
Jean-Baptiste Genin, Moez Benfarah, Christelle Disse, Mathieu Corbineau

Characterisation of Particulate Material in PWR Primary Coolant ............................................................................................................... 2044
John McGrady, Fabio Scenini, Nicholas Stevens, Nicholas Bryan, Andrew Banks

EELS and Electron Diffraction Studies on Possible Bonaccordite Crystals in PWR Fuel CRUD and in Oxide Films of Alloy 600 Material ........................................................................................................................................... 2056
Jiaxin Chen, Fredrik Lindberg, Daniel Wells, Bernt Bengtsson

Magnetc Solubility Studies Under Simulated PWR Primary-Side Conditions, Using Lithiated, Hydrogenated Water ........................................................................................................................................... 2067
John Hewett, Jonathan Morrison, Christopher Cooper, Clive Ponton, Brian Connolly, Shirley Dickinson, Jim Henshaw
Oxide Characterization for the Mechanistic Understanding of the Initiation Behaviors of Alloy 182
Weld In Various Water Chemistry Conditions ................................................................. 2080
Jong-Dae Hong, Junho Lee, Changheui Jung, Ji Hyun Kim, Yun Soo Lim, Masashi Watanabe, Jain Xu, Testuo Shoji, Ho-Sup Kim

Contamination Simulation of DOEL-4 PWR Using the OSCAR V1.2 Code and Parametrical Studies during Cycles or Cold Shutdowns .......................................................... 2090
Benoit Hubert, Frederic Dacquait, Raphael Lecoeq, Kim Schildermans

Corrosion and Deposition of Metal Oxides in the Primary Coolant System of PWR’s .......................................... 2100
Jonathan Morrison, John Hewett, Chris Cooper, Clive Ponton, Brian Connolly, Andrew Banks

Evaluation of pH Control Agents Influencing on Corrosion of Carbon Steel in Secondary Water Chemistry Condition of Pressurized Water Reactor ........................................ 2113
In Hyoung Ree, Hynjunso Jung, Daechul Cho, Hong Jin Yoo

In-Situ Oxide Investigation of Oxide Films on Zr-Cladding with Varying Dissolved Hydrogen Concentration .............................................................. 2124
Tae Ho Kim, Jong Jin Kim, Seung Hyun Kim, Ji Hyun Kim

Understanding of Early Stage Oxidation Behavior on Ni Surface Using Ab-Initio Molecular Dynamics ............... 2132
Kwang Beom Ko, Ji Hyun Kim, Jongjin Kim

POSTER 4

Streaming Potential Technique in Determining Zeta Potential of Magnetite in PWR Secondary Side Water Treated with Ammonia or Morpholine ........................................ 2141
Essi Velin, Timo Saario, Konsta Sipila, Saija Vaisanen

Qualification of FFA Treatment for the Water-Steam Cycle as an Innovative Lay-up Strategy for the Long Term Outage of a CANDU-6 Reactor .................................................. 2151
Jorg Fandrich, Ricardo Sainz, Luis Ovando, Cecilia Herrera, Maribel Mendizabal, Adriana Damon, Mauricio Chocron

Outcomes and Analyses of the Secondary Circuit Water Chemistry Strategy for the French PWR Fleet .................................................. 2160
Thomas Duchasson, Olga Alos Ramos, Gonghao Qiu, Kelly Knight, Guillaume Fontan, Jean-Luc Bretelle

Application of Nano-Structured Coatings to Mitigate Flow-Accelerated Corrosion in Secondary Pipe Systems of Nuclear Power Plants .................................................. 2173
Seung Hyun Kim, Jong Jin Kim, Seung Chang Yoo, Ji Hyun Kim

POSTER 6

Experience with High Efficiency Ultrasonic Fuel Cleaning Using a Side-Stream Sampling System at Ringals Unit 4 .......................................................... 2184
Bernt Bengtsson, Pernilla Svanberg, John Dingee, Abbey Pellman, Daniel Wells

Optimization of Fuel Deposit Properties for Reducing Plant Radiation Fields an Assessment .................................. 2197
Keith Frazzetti, Daniel Wells, Dave Morgan, Joseph Giannelli, Charles Marks, Cecile Dume

Crevce Corrosion Behavior of Stainless Steel in High Temperature Diluted Seawater ........................................ 2210
Masahiko Tachibana, Kazushige Ishida, Yoichi Wada, Ryosuke Shimizu, Nobuyuki Ota, Motohiro Aizawa, Nauto Shigenaka

CANDU Fuel Deposits and Chemistry Optimizations - Recent Regulatory Experience in Canadian Nuclear Power Plants .................................................. 2216
Ram Kameswaran

Out-of-Reactor Test of Corrosion and Hydrogen Pickup in Fuel Cladding Materials ........................................ 2225
Daniel Wells, Richard Becker, Clara Anghel, Jayashri Iyer, Jacqueline Stevens

Influence of Welding on Corrosion Resistance of Zircaloy-4.................................................. 2237
Yosuke Sato, Shinji Ono, Yoshihiro Tsuchida

Pressurised Light Water Reactor Failed Fuel Monitoring : Comparison of International Strategies Used in the Surveillance of the Primary Barrier ........................................ 2246
Robin Aldworth, Christelle Dinsie, Didier Mole

The Benefits of Using Enriched Boric Acid in Commercial Nuclear Power Plants ........................................ 2255
Kevin Cook, Debora Wiedenmann

Review of BWR Industry Implementation of Online NobleChemTM Process Update and Operating Experience ........................................ 2265
Russell Seeman, Juan Varela, Hubert Huie, Kimberly Shbrocchi, Peter Andresen
Three Dimensional Multiphysics Modeling and Validation of CRUD-Induced Localized Corrosion (CILC) In PWRs ............................................................... 2277
Andrew Dykhuis, Michael Short

POSTER 7

Analysis of Data on Evaporator Module Steel Corrosion as a Result of BN-600 Third Circuit Chemical Clean-Ups ............................................................... 2289
Vladimir Smykov, Artur Tzekh

Boron Recycling Strategy for FLAMANVILLE3-EPR Reactor ............................................................... 2296
Arancha Tigeras, Yvan Bouhlassi

New Method of Study on the Leachable Behavior of Cation Exchange Resin ............................................................... 2307
Dah-Yu Kao, Liang-Cheng Chen, Tung-Jen Wen, Charles-Fang Chu

POSTER 10

Ion Exchange Filter Transition Plan for BWRs and PWRs ............................................................... 2319
Susan Garcia, Joel McElrath, Joseph Giannelli, Jeremie Varnam

The Effectiveness of Early Hydrogen Water Chemistry on Corrosion Mitigation for Boiling Water Reactors ............................................................... 2327
Mei-Ya Wang, Tsung-Kuang Yeh

Water Chemistry Control to Meet the Advanced Design and Operation of Light Water Reactors ............................................................... 2337
Hiroshi Shirai, Shunsuke Uchida, Masanori Naitoh, Hidetoshi Okada, Masatoshi Sato

Formation of Platinum Oxide Nanoparticle Colloidal Solution under Gamma-Ray Irradiation ............................................................... 2348
Kazushige Ishida, Yoichi Wada, Masahiko Tachibana, Nobuyuki Ota, Motohiro Aizawa

Experimental and Computational Approaches to Evaluate the Environmental Mitigation Effect in Narrow Spaces by Noble Metal Chemical Addition (NMCA) ............................................................... 2354
Ryosuke Shimizu, Nobuyuki Ota, Makoto Nagase, Motohiro Aizawa, Kazushige Ishida, Yoichi Wada

Development of 60Co Monitoring System for RRS Piping during Plant Operation ............................................................... 2363
Hirofumi Matsubara, Toru Kawasaki, Nobuyuki Ota, Makoto Nagase, Katsunori Ueno, Takahiro Tadokoro, Koichi Takamiya

A Leading-edge Condensate Polishing System Design ............................................................... 2369
Jumpei Fukawa

Optimization of Operational Water Chemistry for Supercritical-Water Cooled Reactor ............................................................... 2382
Marketa Zychova, Monika Sipova, Katerina Vonkova, Zuzana Skoumalova, Jan Macak

Development of Advanced Radioactivity Control Method (ARCOM) in LWR Primary Systems ............................................................... 2388
Masafumi Domae, Kazutoshi Fujiwara, Yutaka Ueyama, Wataru Sugino, Kenji Hisamune

Scientific Root-Causes of Component Degradation of Aged LWRs - Radiation-Induced Long-Cell Action Corrosion ............................................................... 2400
Genn Saji

Manufacture and Evaluation of Integrated Metal-Oxide Electrode Prototype for Corrosion Monitoring in High Temperature Water ............................................................... 2413
Yoshinori Hashimoto, Jun-Ich Tani

3MTM Neutron Quench: Compounds with Substantial Water Solubility and Boron Content ............................................................... 2420
Kevin Cook, Alex Blake, C. Jody Neef

Fuel Cell as Burner for Converting Hydrogen (D2) Formed in Primary and Moderator System of PHWRs ............................................................... 2428
Chandramohan Palogi, Murugesan N, Harinath Y. V, Srinivasan M, P, Ramesh C, Velmurugan Sankaralingam

Improvement of the Pre-Filming Technique for the Reduction of the Metal Release from TP304L ............................................................... 2433
Kiyoko Takeda, Yasutoshi Hidaka, Akihiro Uehira

Author Index
