2015 IEEE International Conference on Microelectronics Systems Education

(MSE 2015)

Pittsburgh, Pennsylvania, USA
20 – 21 May 2015
Table of Contents

2015 International Conference on Microelectronic Systems Education—MSE’15

Towards Multidisciplinarity for Microelectronics Education: A Strategy of the French National Network .......... 1
Olivier Bonnaud and Laurent Fesquet

All Aspects of Computer Engineering Undergraduate Education in Turkey ............................................................... 5
Deniz Dal, Tolga Aydin, and Sinan Kul

A Project-Based Embedded Systems Design Course using a Reconfigurable SoC Platform ........................................ 9
Daniel Roggow, Paul Uhing, Phillip Jones, and Joseph Zambreno

Using Industry-Grade Test Equipment in a Digital Test and Product Engineering Lab Course ................................. 13
Christopher Miller, Tina A. Hudson, and Shannon Sipes

Flexible Controller for Educational Robot Kit ............................................................................................................. 17
Priit Ruberg, Alvar Guitar, and Peeter Ellervee

The Impact of Industry-Organized Contests on EDA Education ................................................................................. 21
Nima Karimpour Darav, Amin Farshidi, Aysa Fakheri Tabrizi, Emily Marasco, Amir Karbalaei, Andrew Kennings, Ismail S. Bustany, and Laleh Behjat

Enhancing EDA Education through Gamification ........................................................................................................ 25
Emily Marasco, Laleh Behjat, and William Rosehart

Satisfying ABET Criterion using an Industrial Microelectronic Skills Incubator ........................................................... 28
Matthew A. Swabey and Mark C. Johnson

Analog Systems Education: An Integrated Toolset and FPAA SoC Boards ................................................................. 32
Michelle Collins, Jennifer Hasler, and Suma George

Technological Fluency through Circuit Bending ............................................................................................................ 36
Erik Brunvand

A Cost-Effective Way to Expand the Scope of FPGA based Projects .............................................................. 40
Pong P. Chu

A System-Level Mixed-Signal Design Course .............................................................................................................. 44
Lars Svensson and Lena Peterson
