2015 International Conference on Advanced Robotics and Intelligent Systems

(ARIS 2015)

Taipei, Taiwan
29-31 May 2015
# TABLE OF CONTENTS

Vision-Based Coverage Navigation for Robot Trash Collection Task ................................................................. 1
C.-H. Chiang

Design of Frequency Synthesizer with VCO Charged by Near Infrared for Bioinformatics and Healthcare Wireless Applications on Robotic Nurses ................................................................. 7
W.-C. Lai, J.-F. Huang

An Economic Assistance Strategy for Autonomous Driving System ......................................................................... 13

Control of Nonlinear Systems by Fuzzy Observer-Controller with Unmeasurable Premise Variables ....................... 17
C. Liu, H. Lam, S.-H. Tsai, C.-S. Chen

A Novel Method of Distribution Power System Reconfiguration using Parallel Cooperative Metaheuristics .................. 23
D. Teshome, K. Lian

QR Code Detection Using Convolutional Neural Networks ..................................................................................... 29
T.-H. Chou, C.-S. Ho, Y.-F. Kuo

2-DOF PID with Reset Controller for 4-DOF Robot Arm Manipulator .................................................................. 34
A. Shakibjoo, M. Shakibjoo

Inverse Kinematics of Robot Manipulators with Offset Wrist .................................................................................. 40
M.-K. Wu, Y.-S. Kang, F.-C. Lee, W.-C. Chen

Dual-Sensor Fusion for Obstacle Avoidance in Indoor Environment ......................................................................... 46
J.-D. Lee, Z.-Y. Dang

Dual Laser 3d Scanner for Random Bin Picking System .......................................................................................... 51
W.-Y. Chiu

Attack-Resistant Power Management Scheme for Wireless Sensor Network ............................................................ 54
K.-L. Tsai, M.-Y. Ye, S.-H. Tsai, Y.-J. Wang, Y.-H. Zhuang

Co-Simulation for a Flexible Four-Bar Mechanism ................................................................................................. 58
F.-S. Lee, C.-I. Lin, Z.-Y. Chen

Novel-Fuzzy-Model based Modeling and Control of Nonlinear Chaotic Systems with Uncertainty ......................... 63
L.-M. Tam, S.-Y. Li

Design and Development of Bio-Inspired Flapping Wing Aerial Vehicles ................................................................ 69
T. Zhang, C. Zhou, S. Su

Humanoid Robot Motion Imitation Using Kinect ........................................................................................................ 75
H.-I. Lin, C.-C. Chou

Robot Vision To Recognize Both Object And Rotation For Robot Pick-And-Place Operation ...................................... 79
H.-I. Lin, Y.-Y. Chen

Development of a Real-time Drowsiness Warning System Based on an Embedded System ....................................... 85
C.-J. Lin, C.-H. Ding, C.-C. Liu, Y.-L. Liu

Microfluidic Mixing using Chaotic Signals from the Chen-Lee System .................................................................... 89

A Novel Barcode System for Intelligent Automation Industry .................................................................................. 94
W.-S. Chen, K.-W. Chen, H.-S. Ni, Y.-Y. Chen

Real-time Coplanar NURBS Curve Fitting and Interpolation for 6-DOF Robot Arm .................................................. 100

A Proposal of Right and Left Turning Mechanism for Quasi-Passive Walking Robot .................................................. 106
F. Ikeda, S. Toyama

Control Design and Implementation of Intelligent Vehicle with Robot Arm and Computer Vision ............................... 111
H.-Y. Hsu, J.-S. Lin

Conceptual Design of Master-Slave Exoskeleton for Motion Prediction and Control .................................................. 117
A. Chai, E. Lin

Controlled Synchronization of Networked Mobile Manipulators under Switching Topologies .................................. 121
G.-B. Dai, Y.-C. Liu

Non-Destructive Displaying Defects for Luminescence Image of Photovoltaic Panel Arrays .................................... 127
C.-Y. Peng, S.-Y. Wen, Z.-J. Li, C.-P. Huang

Semi-automatically Simultaneous Localization and Mapping for Home Service Robots ....................................... 131

Supporting in Physics-based eRobotics-Testbeds the Pervasive Employment of Intelligent Robot Manipulators .......... 137
E. Kaigom, J. Robmann
Quality Assurance of Camera Zooming by Detecting Len-Shake .......................................................... 143
W.-C. Chang, C.-C. Wang
Prediction-Coverage-First Detection Scheduling for Energy Efficient Multi-Target Tracking .................. 148
C.-S. Huang, S.-T. Huang, C.-Y. Chen, J.-Y. Chen
Backstepping and Self-Organizing Fuzzy Control Hybridized for Linear Motor Single-Axis Robots ............ 153
K.-C. Hsu, H.-H. Chiang, L.-W. Lee
Simulation and Study of Robotic Slave Arm Operating Envelope ........................................................... 159
A. Chai, E. Lim
A Novel Dual-Input Power Converter for Renewable-Energy Generation System ...................................... 164
C.-L. Shen, S.-W. Wang
Robust Stabilization of a Class of Uncertain Time-Delay Fuzzy Bilinear Systems ...................................... 170
S.-H. Tsai, Y.-A. Chen, C.-S. Chen
A Novel Approach in Navigation of FPGA Robots in Robust Indoor Environment ...................................... 175
M. Chinnaiyah, T. Savirii, P. Kumar
Author Index
