Fourth International Symposium on Innovative Nuclear Energy Systems (INES-4)

Energy Procedia Volume 71

Tokyo, Japan
6-8 November 2013

Editors:

S. Chiba T. Yoshida
C.-Y. Han Y. Oguri
H. Sagara J. Ryu
T. Suzuki M. Takahashi...et al

TABLE OF CONTENTS

Preface .................................................................................................................................................................................... 1
Satoshi Chiba

INNOVATIVE NUCLEAR REACTORS

Criticality Uncertainty Dependence on Nuclear Data Library in Fast Molten Salt Reactors ................................................................. 3
W.F.G. van Rooijen; Y. Shimazu; N. Yamano

Study on Severe Accident Scenarios: Pin Failure Possibility of MYRRHA-FASTEF Critical Core ........................................................ 14
Rui Li; Xue-Nong Chen; Claudia Matzerath Boccaccini; Andrei Rineiski; Werner Maschek

Particle-type Burnable Poisons for Thorium-based Fuel in HTGR ........................................................................................................... 22
Piyatida Trinuruk; Toru Obara

Sensitivity and Uncertainty Analysis of the VENUS-F Critical Core ................................................................................................. 33
Hiroki Iwamoto; Alexey Stankovskiy; Wim Uyttenhove

Optimization of Start-up Fuel Management for OTTO Cycle Pebble Bed Reactor ........................................................................ 42
Topan Setiadipura; Toru Obara

INNOVATIVE NUCLEAR ENERGY UTILIZATION SYSTEMS

Combination of Thermochemical Energy Storage and Small Pressurized Water Reactor for Cogeneration System ....................... 90
Hirokazu Ishitobi; Junichi Ryu; Yukitaka Kato

INNOVATIVE SEPARATION, TRANSMUTATION AND FUEL CYCLES

High-Safety Fast Reactor Core Concepts to Improve Transmutation Efficiency of Long-lived Radioactive Waste .......................................................... 97
Koji Fujimura; Katsuyuki Kawashima; Akira Sasaahira; Satoshi Inouka; Hiroshi Kiyotake; Masayuki Takakura

Continuous Mutual Separation of Lanthanides by a Liquid-liquid Countercurrent Centrifugal Extractor with Taylor Vortices .......................................................................................................................... 106
Masahiko Nakase; Mikiya Tanaka; Kenji Takeshita

Kinetic Analysis and Prediction of Thermal Decomposition Behavior of Tertiary Pyridine Resin in the Nitrate Form .................. 112
Yoshishiko Sato; Takehiko Matsunaga; Shin-ichi Koyama; Tatuyasa Suzuki; Masaki Ozawa

Extraction Behavior of Phenyl-substituted Phosphine Oxides for Some Fission Product Elements ........................................... 123
Masanobu Nogami; Masatoshi Hashimoto; Yuhei Sasaoka; Ryosuke Tanabe; Hiroki Satou

ASTRID-like Fast Reactor Cores for Burning Plutonium and Minor Actinides ................................................................................... 130
Fabrizio Gabrielli; Andrei Rineiski; Barbara Tuzzoli; Werner Maschek; Concetta Fazio; Massimo Salvatores

Lithium Isotope Effects upon Electrochemical Release from Lithium Manganese Oxide ............................................................................ 140
Koji Okano; Yuta Takami; Satoshi Yanase; Takao Oi
NUCLEAR SAFETY, SECURITY AND NONPROLIFERATION

Preliminary Safety Analysis of Mixed Oxide Sphere-pac Driver Fuels in the CP-ESFR WH Core
Lena Andriolo; Xue-Nong Chen; Claudia Matzerath Bocaccini; Andrei Rineiski; Werner Manchek; Fabienne Delage; Elsa Merle-Lacotte

Validation of Burnup Calculation Code SWAT4 by Evaluation of Isotopic Composition Data of Mixed Oxide Fuel Irradiated in Pressurized Water Reactor
Takahiro Kashima; Kenya Sayama; Hiroki Mochizuki

Research Program for the Evaluation of Fission Product and Actinide Release Behaviour, Focusing on their Chemical Forms
Shuhei Miwa; Shinichiro Yamashita; Akihiko Ishimi; Masahiko Osaka; Masaki Amaya; kosuke Tanaka; Fumihisa Nagase

Analysis on Proliferation Resistance Factor and Fuel Breeding Capability Based on Even Mass Plutonium Isotope Compositions
Sidik Permana; Novitrian; Abdul Waris; Zaki Saud; Mitsutooishi Suzuki

NUCLEAR FUNDAMENTALS AND NEUTRON UTILIZATION

PHITS Simulation of Quasi-Monoenergetic Neutron Sources from $^7$Li(p,n) Reactions
S. Hashimoto; O. Iwamoto; Y. Iwamoto; T. Sato; K. Niita

Measurement of Double Differential Neutron Yields from Thick Aluminum Target Irradiated by 9 MeV Deuteron
Shouhei Araki; Yukinobu Watanabe; Tadahiro Kin; Nobuhito Shigyo; Kesshi Sagara

A Comprehensive Approach to Estimate Delayed-neutron Data of Actinides and Minor-actinides
Satoshi Chiba; Katsuhisa Nishio; Yoshihiro Aritomo; Hiroaki Koura; Osamu Iwamoto; Teruhiko Kago

Problem on MATXS Files with Multiple Temperature Cross Section Data
Chikara Kono; Shigetaka Maeda; Kazumitsu Kosaka

Development of a Calculation Code System for Evaluation of Deuteron Nuclear Data
Hiroki Koura; Satoshi Chiba

Validation of 241Am Capture Cross Section through Integral Test Using Criticality Data of Light-water Moderated MOX Cores
Ken Nakajima; Tadafumi Sano; Yoshihiro Yamamoto

INNOVATIVE APPLICATION OF ACCELERATORS AND PLASMAS

Numerical Analysis of the Hydrodynamic Behavior of Ion-beam-heated Uranium Targets for Equation-of-state Studies under Extreme Conditions
Y. Oguri; K. Kondo; J. Hasegawa; K. Horimoto

Design of a Proton-induced Quasimonochromatic Micro-XRF Setup for Wet Biological Samples
K. Ploykrachang; J. Hasegawa; K. Kondo; H. Fukada; Y. Oguri

Evaluation of Transport Properties in Warm Dense Matter Generated by Pulsed-power Discharge for Nuclear Fusion Systems
Toru Sasaki; Takuya Takahashi; Takumi Ohuchi; Yoshimasa Kawaguchi; Kazumasa Takahashi; Takashi Kikuchi; Tsukasa Aso; Nob. Harada; Kazukiko Horikoca; Hideo Nagatomo; Shinsuke Fujimoto

Velocity Measurement of Electromagnetically-driven Shock Wave to Produce a Dissociated Hydrogen Target for Beam Interaction Experiment
K. Kondo; J. Hasegawa; K. Horimoto; Y. Oguri

Effect of Vacuum Drying in Target Preparation from Potassium Hydroxide Solution on the Spectra of Rutherford Backscattering Spectroscopy
T. Toriyama; S. Suzuki; K. Kawasaki; Y. Takagi; M. Nagai; H. Fukuda; K. Kondo; Y. Oguri

MATERIALS FOR INNOVATIVE NUCLEAR ENERGY SYSTEMS

Oxidation Behavior of Am-containing MOX Fuel Pellets in Air
Kosuke Tanaka; Hiroshi Yoshimochi; Hiroshi Obayashi; Shin-ichi Koyama
Chemical Heat Storage of Thermal Energy from a Nuclear Reactor by Using a Magnesium Hydroxide/Expanded Graphite Composite Material ................................................................. 293
Massimiliano Zamengo; Junichi Ryu; Yukitaka Kato
Neutron Irradiation Effects of Oxide Sintering Additives for SiCf/SiC Composites ........................................... 306
Hiroshi Konishi; Mohd Idzat Idris; Masamitsu Imai; Katsumi Yoshida; Toyohiko Yano
Experimental Study on Diffusion of Ni in Lead-bismuth Eutectic (LBE) ............................................................. 313
Yan Gao; Minoru Takahashi; Masao Nomura
Effect of Annealing on Thermal Diffusivity in Ceramics Irradiated by Electrons and Neutrons .......................... 320
Masafumi Akiyoshi; Huiji Takagi; Toshihisa Yoshiie; Xu Qiu; Koichi Sato; Toyohiko Yano
Neutron Irradiation Swelling of SiC and SiCf/SiC for Advanced Nuclear Applications ........................................ 328
Mohd Idzat Idris; Hiroshi Konishi; Masamitsu Imai; Katsumi Yoshida; Toyohiko Yano

HEAT TRANSFER AND HYDRAULICS FOR INNOVATIVE NUCLEAR ENERGY SYSTEMS

Measurement of Bubbly Two-phase Flow in Vertical Pipe Using Multiwave Ultrasonic Pulsed Doppler Method and Wire Mesh Tomography .............................................................................................................................. 337
Tat Thang Nguyen; Hiroshige Kikura; Hideki Murakawa; Nobuyoshi Tsuzuki
A Study of Air-coupled Ultrasonic Flowmeter Using Beam Focusing ................................................................. 352
Keisuke Tsukada; Nobuyoshi Tsuzuki; Hiroshige Kikura

BIOLOGICAL EFFECTS AND MEDICAL APPLICATIONS OF RADIATION

Application of Radiation in Medicine and Agriculture in Japan ................................................................................. 360
Kazuaki Yanagisawa
Quantitative Assessment of 131I in Soil Originating from the Fukushima Daiichi Nuclear Power Plant Disaster Using a Germanium Semiconductor Detector ......................................................................................... 370
Yutaro Mori; Tomonori Isobe; Kenta Takada; Etsuuke Sato; Satoshi Kamizawa; Hideki Takahashi; Hideyuki Sakurai; Takeji Sakae
