# TABLE OF CONTENTS

## BALLOON SYSTEMS I

### The NASA Balloon Program – Positioning For the Future
- Gabriel J. Garde, Debora A. Fairbrother
  - 1

### The French balloon program 2013 – 2015
- André Vargas, Vincent Dubourg, Stéphane Louvel, Philippe Cocquerez, Didier Vassaux
  - 9

### Qualification of the NASA Super Pressure Balloon
- Henry M. Cathey, Debora A. Fairbrother, Jeffrey W. Tuttle, Magdi A. Said, Rodger E. Farley
  - 23

### Non-Linear Analysis of the NASA Super Pressure Balloons: Implementation of a Large Strain Material Model
- David Wakefield, Adam Bown
  - 37

### Returning to Hydrogen Gas : a Strategic Decision to Continue Achievement of Stratospheric Balloons Flights
- Jacqueline Gary, Bernard Dellery, Gérard Letrenne, Stéphanie Venel, André Vargas
  - 60

### Suitability of ADS-B as a Beacon for Stratospheric Balloon Platforms and Payloads
- Timothy T. Lachenmeier, Russell G. Dewey
  - 69

## BALLOON SYSTEMS II

### Balloon Aspects of StratEx World Altitude Record Skydive
- Julian Nott, S. Sreenivasan, John Straus, Sebastian Padilla, Taber McCallum
  - 79

### Recent Improvements to the Design and Manufacture of High Altitude Zero-Pressure Balloons
- Justin L. Marsh, Mitzi A. Giles
  - 88

### The Wallops Arc Second Pointer – A Balloon Borne Fine Pointing System
- David W. Stuchlik
  - 101

### Current Status of a NASA High-Altitude Balloon-Based Observatory for Planetary Science
- Denise M. Varga, Zach Dischner
  - 116

### Technology Development for the ExaVolt Antenna (EVA). The 1/20-Scale Deployment Test
- Peter Gorham, Gary Varner, Harm Schoorlemmer, Christian Miki, Liem Nguyen, Jim Beatty, Amy Connolly, Patrick Allison, Carl Pfender, Brian T. Daily, Frank Baginski, Joshua Furer, Kaiyu Zhao, Ken Brakke, Debra Fairbrother, Magdi Said, Steven Lang, Leyland Young
  - 125

### Shape Analysis of the 1/20-Scale ExaVolt Antenna (EVA) Test Balloon
- Frank E. Baginski, Kaiyu Zhao, Ken Brakke
  - 134

### An Undergraduate Student Instrumentation Project (USIP) to Develop New Instrument Technology to study the Auroral Lonomosphere and Stratospheric Ozone Layer Using Ultralight Balloon Payloads
- Edgar A. Bering, Rachel Gamblin, Bonnie J Dunbar, Barry Lefer, Hamza Ahmad, Christopher Bias, Daniel Canales, John Cao, Arian Ehtashami, Diego Guala, Daniel Hermosillo, Erika Marrero, Michele Nowling, Megan Pina, Sikender Shahid
  - 142
