Table of Contents

Message from Chairs .......................................................... viii
Conference Organization .................................................... ix
Program Committee .......................................................... x
Additional Reviewers ......................................................... xii

Socio-Technical Focus

The Danger of Architectural Technical Debt: Contagious Debt and Vicious Circles .......................................................... 1
  Antonio Martini and Jan Bosch

A Study on Architectural Decision-Making in Context ........................................ 11
  Iris Groher and Rainer Weinreich

An Architecture Framework for Collective Intelligence Systems .......................... 21
  Juergen Musil, Angelika Musil, Danny Weyns, and Stefan Biffl

Supporting Change

Supporting Dynamic Software Architectures: From Architectural Description to Implementation .................................................. 31
  Everton Cavalcante, Thais Batista, and Flavio Oquendo

A Unified Approach to Architecture Conformance Checking ............................. 41
  Andrea Caracciolo, Mircea Filip Lungu, and Oscar Nierstrasz

Hotspot Patterns: The Formal Definition and Automatic Detection of Architecture Smells ........................................ 51
  Ran Mo, Yuanfang Cai, Rick Kazman, and Lu Xiao
Software Architecture in the Long Run

When Software Architecture Leads to Social Debt .............................................61
   Damian A. Tamburri and Elisabetta Di Nitto
Architectural Technical Debt Identification Based on Architecture Decisions
and Change Scenarios ........................................................................................65
   Zengyang Li, Peng Liang, and Paris Avgeriou
Why Data Needs more Attention in Architecture Design - Experiences
from Prototyping a Large-Scale Mobile App Ecosystem ..................................75
   Matthias Naab, Susanne Braun, Torsten Lenhart, Steffen Hess, Andreas Eitel,
   Dominik Magin, Ralf Carbon, and Felix Kiefer
Architectural Decision Guidance Across Projects - Problem Space Modeling,
Decision Backlog Management and Cloud Computing Knowledge ................85
   Olaf Zimmermann, Lukas Wegmann, Heiko Koziolek, and Thomas Goldschmidt
Architecture Knowledge for Evaluating Scalable Databases ..........................95
   Ian Gorton, John Klein, and Albert Nurgaliev
A Conceptual Model for Architecting Mobile Applications ............................105
   Scott Barnett, Rajesh Vasa, and Antony Tang

Wicked Problems in Practice

Architecting in the Automotive Domain: Descriptive vs Prescriptive Architecture ................115
   Ulf Eliasson, Rogardt Heldal, Patrizio Pelliccione, and Jonn Lantz
A Proactive Support for Conceptual Interoperability Analysis in Software
Systems ............................................................................................................119
   Hadil Abukwaik, Matthias Naab, and Dieter Rombach
Exploring Software Architecture Context ......................................................123
   K. Eric Harper and Jiang Zheng

More than Just Architecture

Architecting in a Solution Costing Context: Early Experiences
with Solution-Based Estimating ........................................................................127
   Eltjo Poort and Eric van der Vliet
Towards Architecting for Continuous Delivery ............................................131
   Lianping Chen
Enriching Architecture Knowledge with Technology Design Decisions ............135
   Mohamed Soliman, Matthias Riebisch, and Uwe Zdun
Modelling Complexity

Migrating to an Extensible Architecture for Abstract Syntax Trees .................................................................145
   Luis Diogo Couto, Peter W.V. Tran-Jørgensen, Joey W. Coleman, and Kenneth Lausdahl

Proactive Detection of Higher-Order Software Design Conflicts .................................................................155
   Jae Young Bang and Nenad Medvidovic

A Conversation Based Approach for Modeling REST APIs ................................................................................165
   Florian Haupt, Frank Leymann, and Cesare Pautasso

Author Index ..........................................................................................................................................................175
