# Table of Contents

## KEYNOTE

- Dissimilarity and Retrieval of Time-Varying Data Towards Big Data Analysis
  - Teruhisa Hochin ................................................................. 1
- Empowering Patient Through Personal Healthcare System Using Interoperable Electronic Health Record
  - Yeong-Tae Song ................................................................. 3

## ALGORITHMS

- Knowledge Mining for Cognitive Agents Through Path based Forward Checking
  - Tanvir Atahary, Tarek Taha, Fredrick Webber, Scott Douglass ................................. 5
- Survivability Prediction of Web System Based On Log Statistics
  - Jiaan Zhou, Huai Kou Miao, Jinyu Kai, Honghao Gao .............................................. 13
- Multithreading MAS for real time scheduling
  - Yaroslav Shepilov, Daria Pavlova, Daria Kazanskaia, Valerii Novikov .......................... 19
- Optimizing Strassen Matrix Multiply on GPUs
  - Mayez Al-Mouhamed, Ayaz Ul Hassan Khan .......................................................... 25
- Evaluation of Global Synchronization for Iterative Algebra Algorithms on Many Core
  - Mayez Al-Mouhamed, Ayaz Ul Hassan Khan, Lutfi Firdous ....................................... 31
  A computational study on different penalty approaches for constrained optimization in radiation therapy treatment planning with a simulated annealing algorithm.
  - Sadegh Mohammadi, Charles Shang, Zoubir Ouhib, Theodora Leventouri, Georgios Kalantzis .................................................. 37
- An Efficient Multi Query System for Content Based Image Retrieval Using Query Replacement
  - E R Viminu, Jacob K Poulose, Ramakrishnan K, Nandakumar Navya ................................. 43
- SIMD Vectorization of Nested Loop Based on Strip Mining
  - Jinlong Xu, Huihui Sun, Rongcai Zhao ......................................................................... 49
- Application of Improved Core Vector Machine in the Prediction of Algal Blooms in Tolo Harbour
  - Xiu Li, Jin Yu, Zhuo Jia, Huimin Wang ....................................................................... 57

## ARTIFICIAL INTELLIGENCE

- A Term Weighting Scheme Based on the Measure of Relevance and Distinction for Text Categorization
  - Jieming Yang, Jing Wang, Zhiyin Liu, Zhaoyang Qu ................................................ 63
- A Variety Weapons and Armors Design Algorithm for Role-Playing Games
  - Jung-Ying Wang .................................................................................... 69
- Bayesian Network and Response Surface Methodology for Prediction and Improvement of Bacterial Metabolite Production
  - Lobna Bouchaala, Saoussen Ben Khedher, Hela Mezghanni, Nabil Zouari, Slim Tounsi ................................................................. 75
- Advance Quantum based Binary Neural Network Learning Algorithm
  - Om Prakash Patel, Aruna Tiwari .............................................................................. 81
- A Genetic Clustering Technique for Anomaly-Based Intrusion Detection Systems
  - Belhadj Aissa Naila, Gueroumi Mohamed .................................................................. 87
- High Performance Declarative Memory Systems through MapReduce
  - Mark Edmonds, Tanvir Atahary, Scott Douglass, Tarek Taha .................................... 93
- Analysis and Classification of Respiratory Health Risks with Respect to Air Pollution Levels
  - Ruhul Amin Dicken, S.A.M Fazle Rubby, Sheefta Naz, A. M. Arefin Khaled, Shuvo Ashish Rahman, Sharmina Rahman, Mohammad Rashedur Rahman .......................................................... 101
- Applying Data Mining Techniques To Predict Annual Yield Of Major Crops And Recommend Planting Different Crops In Different Districts In Bangladesh

## AUDIO AND VIDEO TECHNOLOGY

- Video Gender Recognition Using Temporal Coherent Face Descriptor
  - Wei-Cheng Wang, Ru-Yun Hsu, Chun-Rong Huang, Li-You Syu .................................. 113

EMBEDDED SYSTEMS
Flood Sensing Framework by Arduino and Wireless Sensor Network in Rural-Rwanda
Vianney Vunabandi, Ryuji Matsunaga, Sandor Markon, Willy Nsabiyumva 259

IMAGE, SPEECH, AND SIGNAL PROCESSING
Bidirectional Confidential with Bilateral Filter on Local Based Optical Flow for Image Reconstruction under Noisy Condition
Darun Kersrat, Vorapoj Patanavijit 265
Accelerating the Pre-processing Stages of JPEG Encoder on a Heterogeneous System using OpenCL
Nasser Alqudami, Shin-Dug Kim 269

INTERNET TECHNOLOGY AND APPLICATIONS
Perceived Fairness on Service Recovery Satisfaction and on Positive Behavioral Intentions in Cloud Service
Montri Lawkobkit, Ravipa Larpasiri 275
Development of Scaling Mechanism for Distributed Web System
Akihiko Horiuichi, Keizo Saisho 283
Various "aaS" of Everything as a Service
Yucong Duan, Xiaobing Sun, Yuan Cao 289
Empowering patients using cloud based Personal Health Record System
Yeong-Tae Song, Sungchul Hong, Jinie Pak 295
The Application of Graph Algorithms: A Reference Mapping Tool
Chunning Wang, Simon Xu 301
Design and Evaluation of Database and API Supporting Shogi Learners on the Internet
Ryo Miura, Toshiki Kinuhata, Shinji Ohara, Hiroyuki Tarumi, Toshihiro Hayashi, Junko Ichino 307

MOBILE/WIRELESS/AD-HOC NETWORKS
Reducing Mobile Device Energy Consumption with Computation Offloading
Hao Qian 313
A Hybrid Communication Approach for Disaster Recovery System
Tanapat Ruengsatra, Kudit Na Nakorn, Krerk Piromsopa, Kultida Rojviboonchai 321
An Energy Efficient and Optimal Randomized Clustering for Wireless Sensor Networks
Kyung Tae Kim, Manyun Kim, Ji Hyeon Choi, Hee Yong Youn 327
Reducing Connection Failure in Mobility Management for LTE HetNet using MCDM Algorithm
Xianda Chen, Young Ho Suh, Seung Wan Kim, Hee Yong Youn 333
An Integrated Optimization Model for Wireless Access Point Deployment Construction, and Enhancement
Chen-Shu Wang, Shiang-Lin Lin 339

NEURAL NETWORKS & GENETIC ALGORITHMS
Complex brain network of patients with epilepsy using cascading failure analysis of fMRI data
Ming Ke, Xiaoxin Duan, Xiaoping Yang, Fan Zhang 345

OPERATING SYSTEMS
Dynamic User-Level CPU allocation for Volunteer Computing in CFS-based scheduler environment
Korakit Seemakhupt, Krerk Piromsopa 351
NVM/DRAM Hybrid Memory Management with Language Runtime Support via MRW Queue
Gaku Nakagawa, Shuichi Oikawa 357
Experimental Design of High Performance Non Volatile Main Memory Swapping using DRAM
Hirotaka Kawata, Shuichi Oikawa 363

PARALLEL AND DISTRIBUTED COMPUTING
MPDBS: A Multi-level Parallel Database System Based on B-Tree
Lei Yu, Ge Fu, Yan Jin, Xiaojia Xiang, Huaiyuan Tan, Hong Zhang, Xiaobo Zhu, Xinran Liu 369
Trend of centralization in bitcoin’s distributed network
Alireza Beikverdi, Jooseok Song 377
Cold Data Eviction Using Node Congestion Probability for HDFS based on Hybrid SSD
   Nayoung Park, Byungjun Lee, Kyung Tae Kim, Hee Yong Youn .................................................. 383
An Abelian Group Model of Commutative Data Dependence Relations for the Iteration Space Slicing
   Hong Yao, Huifang Deng .................................................. 389
A Simulation Study of Heuristic Node Reordering for Collective I/O
   Kwangho Cha, Sungho Kim .................................................. 395
Data Layout Transformation For Structure Vectorization On SIMD Architectures
   Peng-Yuan Li, Rong-cai Zhao, Qing-Hua Zhang, Hai-Ning Yu .................................................. 403
Performance Analysis of Various VM Placement Strategies in CloudSim
   Mohammed Rashid Choudhury, Mohammad Raihan Mahmud, Mohammad Rashedur Rahman ............ 411

SOFTWARE SPECIFICATION & ARCHITECTURE

Virtual Cloud Bank: An Architectural Approach for Intermediating Cloud Services
   Joonseok Park, Youngmin An, Keunhyuk Yeom .................................................. 417
A Software Binding Application Tool based on the Orthogonal Variability Description Language for Software Product Line Development
   Gyeongmin Go, Sungwon Kang, Jongsun Ahn .................................................. 423
A Sewage Outfall Management System Based on WebGIS: Design and Implement
   Xiul Li, Zhuo Jia, Jin Yu, Zhixiong Yang .................................................. 431

SOFTWARE TESTING

Test Oracles Based on Metamorphic Relations for Image Processing Applications
   Tahir Jameel, Mengxiang Lin .................................................. 437
Test Suite Reduction for Mutation Testing Based on Formal Concept Analysis
   Liping Li, Honghao Gao .................................................. 443
Overview of Graphical Operational Profiles for Generating Test Cases of GUI Software
   Yuma Namba, Shun Akimoto, Tomohiko Takagi .................................................. 449
Test Case Selection Technique for Regression Testing Using Differential Control Flow Graphs
   Shun Akimoto, Rihito Yaegashi, Tomohiko Takagi .................................................. 453
Overview of a Place/Transition Net-Based Mutation Testing Framework to Obtain Test Cases Effective for Concurrent Software
   Tomohiko Takagi, Takuya Arao .................................................. 457

USER-CENTERED DESIGN METHODS

Revolutionizing the Afghan Educational Assessment Paradigm through ICT
   Hamidullah Sokout, Samiullah Paracha, Mohammad Hanif Gharanai, Abdul Rashid Ahmadi ............ 461

WEB-BASED APPLICATIONS

Web Application Security Vulnerabilities Detection Approaches: a Systematic Mapping Study
   Saifjad Rafique, Mamoon Humayun, Bushra Hamid, Ansar Abbas .................................................. 469
Web News Ranking for Elementary School Children based on Degree of SNS Users’ Attention and Popular Search Queries among Children
   Shoya Tanaka, Kazuaki Ando .................................................. 475

OTHER

Considering Block Popularity in Disk Cache Replacement Scheme for improve Hit Ratio based on Solid State Drive
   Yonjoong Ryou, Byungjun Lee, Sanghyun Yoo, Hee Yong Youn .................................................. 479
Toward Conceptual Representation of Patterns
   Sabah Al-Fedaghi, Mohamad Almutairy .................................................. 485

SPECIAL SESSION 1: ANALYSIS, EVALUATION, AND USAGE OF WEB INFORMATION, SYSTEM BEHAVIORS, AND HUMAN ACTIONS

Incorporating Trust Relationships in Collaborative Filtering Recommender System
   Xiaoshen Shen .................................................. 493
A comparison of driving behaviour prediction algorithm using multi sensory data on smartphone
   Thunyasit Pholprasit, Worasit Choochaiwattana, Chalermpol Saiprasert .................................................. 501
A new algorithm for m-closest keywords query over spatial web with grid partitioning
Yuan Qiu, Tadashi Ohmori, Takahiko Shintani, Hideyuki Fujita ........................................507
Fields for Efficient Analysis of Big Data
   Teruhisa Hochin, Hiroki Nomiya .................................................................515
Document Similarity Computation by Combining Multiple Representation Models
   Jiyi Li, Toshiyuki Shimizu, Masatoshi Yoshikawa ........................................521
Effect of Color of a Character on Its Impression
   Yui Nonomura, Teruhisa Hochin, Hiroki Nomiya .........................................527
Method of Introducing Appropriate Respondents to Questions at Question-and-Answer Sites
   Yuya Yokoyama, Teruhisa Hochin, Hiroki Nomiya .......................................533
Design and Evaluation of Automated Scoring Java Programming Assignments
   Yuki Akahane, Hiroki Kitaya, Ushio Inoue ..................................................539
A Study of Pupil Detection and Tracking by Image Processing Techniques for a Human Eye-Computer Interaction System
   Yoshihiro Mitani ...................................................................................................545
SPECIAL SESSION 2: DATA MINING FOR INFO-COMMUNICATION NETWORKS AND SERVICE DIFFUSION
549
Service and Billing Management Method of Interactive Communication Services
   Motoi Iwashita, Shigeaki Tanimoto ..................................................549
A Method of Safe and Efficient Editing in Tabular Forms Using a Descriptive Grammar of Semantic Structures
   Hiroyuki Aoki, Lina Zhang, Yasuhiko Morimoto, Shoichi Nakamura, Youzou Miyadera 555
A Model for the Connectedness of Stones in the Game of Go
   Masafumi Sato, Koichi Anada, Masayoshi Tsutsumi ....................................561
A Formalization of Financial Statements with Heterogeneous Parts by Graph Grammars
   Koushi Anzai, Ken Yokota, Takeo Yaku ..................................................567
Improvement of Multiple CP/CPS based on Level of Assurance for Campus PKI Deployment
   Shigeaki Tanimoto, Toshihiko Moriya, Hiroyuki Sato, Atsushi Kanai ..................571
Risk Assessment of Social-media Utilization in an Enterprise
   Shigeaki Tanimoto, Kenichi Ohata, Shoichi Yoneda, Motoi Iwashita, Yosiaki Seki, Hiroyuki Sato,
   Atsushi Kanai ......................................................................................577
SPECIAL SESSION 3: EXPERIENCES OF SOFTWARE ENGINEERING
581
Proposal of Debate Assistant System for Improving the Ability of Externalization and Response in Conversation
   Yasuo Miyoshi, Zhongwei Xu ...................................................................581
Active S-quiz: An Intelligent Educational System for Basic Knowledge Learning by Question-Posing
   Toshihiro Hayashi, Shimpei Nakagawa, Takuya Kishimoto, Yuii Hirai, Kazuhiro Ura, Rihito Yaegashi,
   Hiroshi Murai, Hiroyuki Tarumi ..................................................583
A Study of Load-Balancing Strategy Based on Students’ Action on University Cooperative e-Learning
   Hiroyuki Ura, Katsuhiro Ura, Norifumi Suehoro, Rihito Yaegashi, Yoshiro Inami, Keizo Saisho,
   Toshihiro Hayashi ........................................................................587
Development of the Creating System for Lecture Contents by Combining the Lecture Contents
   Keima Kuman, Ryosuke Takata, Toshihiro Hayashi, Hiroshi Murai, Katsuhiro Uenosono, Rihito Yaegashi 591
A System which Manages Lecture Materials Using Meta Data of Lecture Materials
   Ryosuke Takata, Keima Kuman, Ryo Oooka, Hiroshi Murai, Toshihiro Hayashi, Rihito Yaegashi ...........593
SPECIAL SESSION 4: THEORY AND PRACTICE OF INTELLECTUAL SOFTWARE
597
Research on Mid-long Term Load Forecasting based on Combination Forecasting Model
   Yao Min, Zhao Min, Xiao Hui ................................................................597
SPECIAL SESSION 5: SIGNAL PROCESSING FOR SOCIAL WELFARE
603
Graphic Models for the Recognition of Arabic Continuous Speech based Triphones Modeling
   Elyes Zarrouk, Yassine Benayed, Faiez Gargouri ........................................603
SPECIAL SESSION 6: SOFTWARE TESTING 1
611
A Chain Algorithm for Conformance Testing based on UIO Sequences
Proceedings of the 4th International Conference on Engineering Systems and Research Applications (SERA 2015)

Formal Verification of Internal Block Diagram of SysML for Modeling Real-Time System
Weiwei Lin, Hongwei Zeng ................................................................. 611

The Method to Create Test suite based on Operational Profiles for Combination Test of Status
Hisashi Fukutake, Liang Xu, Ryota Watanabe, Tomohiko Takagi, Rihito Yaegashi ........................................ 623

SERA 2015

A New and Fast Variant of the Strict Strong Coloring based Graph Distribution Algorithm
Nousseiba Guidoum, Meriem Bensouyad, Djamel-Eddine Saidouni ................................................................. 627

A Method for Service and Billing Management using Connection Paths
Motoi Iwashita and Shigeaki Tanimoto .......................................................... 632

IoT-Academia Architecture: A profound approach
Hany F. Elyamany, Amer H. AlKhairi ........................................................ 639

Analysis Process for Context Aware Applications in Pervasive Environments
Nesrine Khabou, Ismael Bouassida Rodriguez ............................................. 644

Wireless Sensor Networks Modeling as a Probabilistic Combinatorial Optimization Problem
Aref Ghabri, Monia Bellalouna ................................................................. 652

The EventB2PN Tool: From Event-B Specification to Petri Nets through Model Transformation
Mohamed Garoui, Belhassen Mazigh, Abderrafiaa Koukam ......................................................... 657

Rule Based Inference Engine to forecast the Prevalence of Congenital Malformations in live births
Fareeha Choudhry, Usman Qamar, Madeeha Chaudhry ......................................................... 664

Systematic Mapping Study of Missing Values Techniques in Software Engineering Data
Ali Idri, Ibtissam Aboane, Alain Abran .......................................................... 671

Automatic C code Manipulation and Transformation to Rapid Embedded Systems Design
Emna Kallel, Yassine Aoudni, Mohamed Abid ............................................. 679

Comparing AHP and ELECTRE I for Prioritizing Software Requirements
Joao M. Fernandes, Susana Prozil Rodrigues, Lino A. Costa ................................................ 684

Towards a Conceptual Framework to support Adaptive Agent-Based Systems Partitioning
Chahrazed Labba, Narj’es Bellamine ben Saoud, Julie Dugdale ................................................ 692

A Branch and Bound Algorithm for the Probabilistic Traveling Salesman Problem
Soumaya Sassi Mahfoudh, Walid Khaznaji, Monia Bellalouna ......................................................... 697

Author Index

................................................................. 703
