2015 IEEE/ACM 8th
International Workshop on
Cooperative and Human Aspects
of Software Engineering

(CHASE 2015)

Florence, Italy
18 May 2015
Eighth International Workshop on Cooperative and Human Aspects of Software Engineering (CHASE 2015)

Table of Contents

Message from the Chairs ........................................................................................................................ viii
Committees and Reviewers ...................................................................................................................... ix
Sponsors and Supporters .......................................................................................................................... xi

Long Papers

An Empirical Investigation of Personality Traits of Software Testers ...................................................... 1
  Tanjila Kanij, Robert Merkel, John Grundy
  — Swinburne University of Technology, Australia; Monash University, Australia

Animating Organizational Patterns ........................................................................................................... 8
  Tomáš Frtala, Valentino Vranić — Slovak University of Technology in Bratislava, Slovakia

Characteristics of Sustainable OSS Projects: A Theoretical and Empirical Study ............................... 15
  Hideaki Hata, Taiki Todo, Saya Onoue, Kenichi Matsumoto — Nara Institute of Science and Technology, Japan; Kyushu University, Japan

Evaluation of the Simulated Application of the UDC-LSI Method: The iPeople Case Study ............ 22
  Ulrike Abelein, Barbara Paech, Michael Kern, Maria Woydich
  — Universität Heidelberg, Germany; sovanta AG, Germany

Facilitating Collaboration between COTS Stakeholders via Principles of Advanced ISD Methods: The Vendor Perspective ................................................................. 29
  Anat Segal-Raviv, Irit Hadar, Meira Levy — University of Haifa, Israel;
  Shenkar College of Engineering and Design, Israel

Geographically Distributed Sensemaking: Developing Understanding in Forum-Based Software Development Teams ........................................................................................................... 36
  Ben Shreeve, Paul Ralph, Pete Sawyer, Patrick Stacey — Lancaster University, UK;
  University of Auckland, New Zealand

Human Factors Related Challenges in Software Engineering—An Industrial Perspective ................ 43
  Per Lenberg, Robert Feldt, Lars Göran Wallgren — Chalmers University, Sweden;
  Blekinge Institute of Technology, Sweden; University of Gothenburg, Sweden
Perceptions of Diversity on Git Hub: A User Survey .......................................................... 50
Bogdan Vasilescu, Vladimir Filkov, Alexander Serebrenik — University of California at Davis, USA;
Eindhoven University of Technology, Netherlands

Sketching and Conceptions of Software Design ..................................................................... 57
David Socha, Josh Tenenberg — University of Washington at Bothell, USA;
University of Washington at Tacoma, USA

The “Pair” as a Problematic Unit of Analysis for Pair Programming ...................................... 64
David Socha, Kevin Sutanto — University of Washington at Bothell, USA

Toward Defining the Role of the Software Architect ................................................................. 71
Sofia Sherman, Irit Hadar — University of Haifa, Israel

Short Papers

An Empirical Study into Social Success Factors for Agile Software Development ...................... 77
Evelyn van_Kelle, Joost Visser, Aske Plaat, Per van der Wijst
— Tilburg University, Netherlands; Radboud University Nijmegen, Netherlands;
Leiden University, Netherlands

Ask the Engineers: Exploring Repertory Grids and Personal Constructs
for Software Data Analysis .......................................................................................................... 81
Lucas Layman, Carolyn Seaman, Davide Falessi, Madeline Diep
— Fraunhofer CESE, USA; University of Maryland, USA

Fathoming Software Evangelists with the D-Index .................................................................... 85
Ferran Borreguero, Elisabetta Di_Nitto, Dmitrii Stebliuk, Damian A. Tamburri,
Chengyu Zheng — Politecnico di Milano, Italy; VU University Amsterdam, Netherlands

Knowledge Management and Organizational Culture in a Software Organization—
A Case Study .................................................................................................................................. 89
Jacilane de Holanda Rabelo, Edson César Cunha de Oliveira, Davi Viana dos Santos,
Luís Carlos da Silva Braga, Gleison dos Santos Souza, Igor Fabio Steinmacher,
Tayana Uchôa Conte — Universidade Federal do Amazonas, Brazil; UNIRIO, Brazil;
UTFPR, Brazil

Real-Time Monitoring of Neural State in Assessing and Improving
Software Developers’ Productivity ............................................................................................... 93
Steveche Radevski, Hideaki Hata, Kenichi Matsumoto
— Nara Institute of Science and Technology, Japan

Regulation as an Enabler for Collaborative Software Development ....................................... 97
Maryi Arciniegas-Mendez, Alexey Zagalsky, Margaret-Anne Storey, Allyson F. Hadwin
— University of Victoria, Canada

Soft Skills in Software Development Teams: A Survey of the Points of View of Team Leaders
and Team Members ....................................................................................................................... 101
Gerardo Matturro, Florencia Raschetti, Carina Fontán — Universidad ORT Uruguay, Uruguay

The Human Side of Software as a Service: Building a Tighter Fit between Human Experiences
and SOA Design Practices ............................................................................................................ 105
Victoria Karaseva, Ahmed Seffah — Lappeenranta University of Technology, Finland
Towards Emotion-Based Collaborative Software Engineering ......................................................... 109
Prasun Dewan — University of North Carolina, USA

Notes

Can Social Screencasting Help Developers Learn New Tools? ............................................................... 113
Kevin Lubick, Titus Barik, Emerson Murphy-Hill — North Carolina State University, USA;
ABB Corporate Research, USA

Exploring Causes of Frustration for Software Developers ................................................................. 115
Denae Ford, Chris Parnin — North Carolina State University, USA

Exploring FLOW Distance in Project Communication ........................................................................ 117
Kurt Schneider, Olga Liskin — Leibniz Universität Hannover, Germany

Gamifying Software Engineering Tasks Based on Cognitive Principles: The Case
do Code Review ......................................................................................................................................... 119
Naomi Unkelos-Shpigel, Irit Hadar — University of Haifa, Israel

Integrating Usability-Engineering into the Software Developing Processes of SME: A Case Study
of Software Developing SME in Germany ................................................................................................ 121
Dominik Hering, Tobias Schwartz, Alexander Boden, Volker Wulf
— Fraunhofer-Institut für Angewandte Informationstechnik FIT, Germany

The Affect of Software Developers: Common Misconceptions and Measurements ......................... 123
Daniel Graziotin, Xiaofeng Wang, Pekka Abrahamsson
— Free University of Bozen-Bolzano, Italy

Author Index ............................................................................................................................................ 125
