2015 IEEE/ACM 1st International Workshop on Complex Faults and Failures in Large Software Systems

(COUFLESS 2015)

Florence, Italy
23 May 2015
First International Workshop on Complex faUlts and Failures in LargE Software Systems (COUFLESS 2015)

Table of Contents

Message from the Chairs ......................................................................................................................... vii
Committees................................................................................................................................................. ix
Sponsors and Supporters ......................................................................................................................... xi

Fault Location

FLAVS: A Fault Localization Add-In for Visual Studio .................................................................................. 1
Nan Wang, Zheng Zheng, Zhenyu Zhang, Cheng Chen — Beihang University, China;
Chinese Academy of Sciences, China

The Importance of Being Positive in Causal Statistical Fault Localization: Important Properties
of Baah et al.’s CSFL Regression Model ...................................................................................................... 7
Zhuofu Bai, Shih-Feng Sun, Andy Podgurski — Case Western Reserve University, USA

Evaluating Bug Finders—Test and Measurement of Static Code Analyzers ............................................. 14
Aurelien Delaitre, Bertrand Stivalet, Elizabeth Fong, Vadim Okun — NIST, USA;
West Virginia University, USA

Cross-Technology, Cross-Layer Defect Detection in IT Systems—Challenges and Achievements .......... 21
Philippe-Emmanuel Douziech, Bill Curtis — CAST Research Lab, Germany;
CAST Research Lab, USA

Environment and Failures

The Role of Environmental Assumptions in Failures of DNA Nanosystems .............................................. 27
Thein Tun, Robyn Lutz, Brian Nakayama, Yijun Yu, Divita Mathur, Bashar Nuseibeh
— The Open University, UK; Iowa State University, USA; Lero, Ireland

Emulating Environment-Dependent Software Faults .............................................................................. 34
Roberto Pietrantuono, Stefano Russo, Kishor Trivedi — University of Naples Federico II, Italy;
Duke University, USA

Towards Classification of Concurrency Bugs Based on Observable Properties ...................................... 41
Sara Abbaspour Asadollah, Hans Hansson, Daniel Sundmark, Sigrid Eldh
— Malardalen University, Sweden; Ericsson AB, Sweden
Defect Analysis, Verification, and Modelling

Modeling and Verification of Zone Controller: The SCADE Experience in China’s Railway Systems ........................................................................................................................ 48
   Jie Qian, Jing Liu, Xiang Chen, Junfeng Sun — East China Normal University, China;
   CASCO Signal Ltd., China

Defect Analysis over Multiple Release Versions of a Semiconductor Software System ........................................... 55
   Eric Abuta, Jeff Tian — Verity Instruments, USA; Southern Methodist University, USA

An Imperfect Software Debugging Model Based on Stochastic Differential Equation ........................................... 62
   Jinyong Wang, Zhibo Wu, Yanjun Shu, Zhan Zhang — Harbin Institute of Technology, China

Crying Wolf and Meaning It: Reducing False Alarms in Monitoring of Sporadic Operations through POD-Monitor ......................................................................................................................... 69
   Xiwei Xu, Liming Zhu, Min Fu, Daniel Sun, An Binh Tran, Paul Rimba,
   Srini Dwarakanathan, Len Bass — NICTA, Australia

Author Index ................................................................................................................................................................. 76
