2015 IEEE/ACM 4th International Workshop on Realizing Artificial Intelligence Synergies in Software Engineering

(RAISE 2015)

Florence, Italy
17 May 2015
Fourth International Workshop on Realizing Artificial Intelligence Synergies in Software Engineering (RAISE 2015)

Table of Contents

Message from the Chairs .......................................................................................................................... vi
Committees and Reviewers ..................................................................................................................... vii
Sponsors and Supporters ......................................................................................................................... ix

Text Analysis/Mining

Mining Enterprise Models for Knowledgeable Decision Making .......................................................... 1
Suman Roychoudhury, Vinay Kulkarni, Nikhil Bellarykar — Tata Consultancy Services, India

Text Understanding for Programming in Natural Language: Control Structures ............................. 7
Mathias Landhaeusser, Ronny Hug - Karlsruhe Institute of Technology, Germany

Clustering Source Code Elements by Semantic Similarity Using Wikipedia ......................................... 13
Mirco Schindler, Oliver Fox, Andreas Rausch — TU Clausthal, Germany

Recommendation Systems

Black-Box Test Generation from Inferred Models .................................................................................. 19
Petros Papadopoulos, Neil Walkinshaw — University of Leicester, UK

Recommending Features and Feature Relationships from Requirements Documents for Software Product Lines .......................................................................................................................... 25
Mostafa Hamza, Robert J. Walker - University of Calgary, Canada

Defect Prediction

Towards Interpretable Defect-Prone Component Analysis Using Genetic Fuzzy Systems .................. 32
Themistoklis Diamantopoulos, Andreas Symeonidis
— Aristotle University of Thessaloniki, Greece

Author Index .............................................................................................................................................. 39
