22nd International Congress on Sound and Vibration 2015 (ICSV 22)

Florence, Italy
12-16 July 2015

Volume 2 of 8

Editors:

Malcolm J. Crocker
Francesca Pedrielli
Sergio Luzzi

Marek Pawelczyk
Eleonora Carletti

ISBN: 978-1-5108-0903-1
# TABLE OF CONTENTS

## VOLUME 1

**CONVERSION OF NEARFIELD ACOUSTIC HOLOGRAPHY METHOD FOR LOW FREQUENCY LOCALIZATION** .................................................. 1
Nagamatsu Masao

**THE SIMULATION OF ACOUSTIC WAVE PROPAGATION WITHIN NETWORKED PIPE SYSTEMS – DEVELOPMENT AND EXPERIMENTAL VALIDATION** ........................................................................... 9
Tao Linan, Grover Keir, Lemmix Barry

**QUANTITATIVE ULTRASONIC IMAGING OF BONES** ........................................................................................................................ 17
Guillermin Régine, Lassaygues Philippe, Rabau Guy

**ON DEFECT IMAGING USING ULTRASONICS FOR STRUCTURAL HEALTH MONITORING** .................................................................. 23
Nguyen Thompson, Sternini Simone, Lanza Di Scalea Francesco

**COMPARISON OF REGULARIZATIONS FOR SOUND SOURCE IDENTIFICATION BY INVERSE BOUNDARY ELEMENT METHOD** .................................................................................................................... 31
Lv Guoxue, Xiao Youhong

**ARRAY PROCESSING WITH REPLICATED TRACE WAVELENGTHS** ..................................................................................................... 38
Cray Benjamin

**SOUND SOURCE RECONSTRUCTION TECHNIQUES FOR JET NOISE BY INVERSE ACOUSTIC ANALYSIS** ............................................ 43
Tabuchi Satoshi, Yamaguchi Zenzo, Kinosita Shinichi

**NEARFIELD ACOUSTIC HOLOGRAPHY IN A MOVING MEDIUM VIA EQUIVALENT SOURCE METHOD AND PARTICLE VELOCITY MEASUREMENTS** ................................................................................. 51
Hong Bi-Chuan, Joseph Philip, Bi Chuan-Xing, Zhang Xiao-Zheng

**PLATE MODAL AMPLITUDE DETERMINATION FROM MICROPHONE ARRAY DATA** .................................................................................. 57
Moores Elise, Lopez-Arteaga Ines, Nijmeijer Henk

**USE OF THE BEAMFORMING TECHNIQUE TO CREATE PSYCHOACOUSTIC MAPS** .............................................................................. 65
Aranjo Federico, Castro Pinto Fernando

**IDENTIFICATION OF NOISE SOURCES IN REVERBERANT SOUND FIELDS USING BEAMFORMING** .................................................... 73
Santos Eduardo, Pinto Fernando

**ACOUSTIC WAVE PROPAGATION IN METAL PIPES** ............................................................................................................................ 81
Rimlyand Vladimir, Drachev Kirill

**AUTOMATIC MICROPHONE LOCALIZATION INSIDE A CAR CABIN FOR EXPERIMENTAL ACOUSTIC MODAL ANALYSIS** .............. 88
Accardo Giampiero, Cornelis Bram, Janssen Karl, Peeters Bart

**EXPERIMENTAL VALIDATION OF ACOUSTIC SCORING SYSTEM** ...................................................................................................... 96
Go Yeong-Ju, Choi Donghun, Lee Jaehyun, Choi Jong-Soo

**CMUTS WITH VENTED CAVITIES FOR AIRBORNE ULTRASOUND IMAGING APPLICATIONS** .......................................................... 99
Apte Nikhil, Nikoszadeh Amin, Khuri-Yakub B., Park Kwan-Soo

**ACOUSTIC METHODS OF MICROPHONE CALIBRATION** .................................................................................................................... 103
Salzano Carmine, Walber Chad M., Novak Mark, Larratta Nicholas

**SMARTPHONE AS NOISE LEVEL METER?** ................................................................................................................................. 110
Fogola Jacopo, Masera Stefano, Bevacqua Vincenzo

**DESIGN FOR A SELF-CALIBRATING MICROPHONE SYSTEM USING A CLUSTER OF MEMS MICROPHONES** .................................... 118
Benjamin, Barham Richard, Statistasopoulos Konstant

**A NOVEL IN-SITU CALIBRATION METHOD FOR ACOUSTIC PARTICLE VELOCITY SENSORS BASED ON SURFACE VELOCITY** ......... 124
Fernandez Comesaña Daniel, Tijs Emiel, Janzen Martijn, Carrillo Pousa Graciano

**PERFORMANCE COMPARISON OF DIFFERENT CONTACT MICROPHONES USED FOR VOICE MONITORING** ........................................ 132
Castellana Antonella, Carullo Alessio, Casassa Federico, Astolfi Arianna, Pavesi Lorenzo, Pugliesi Giuseppe Emma

**DEVELOPMENT OF AN INTEGRATED SMART SENSOR SYSTEM FOR SOUND SYNTHESIS AND REPRODUCTION IN TELEPRESENCE** ................................................................. 140
Cha Yongwon, Imran Muhammad, Seo Jong Guk, Jeon Jin Yong

**TEMPERATURE AND SENSITIVITY ANALYSIS ON MEMS VIBRATION SENSORS WITH DIFFERENT PRINCIPLES OF OPERATION** .................. 144
Klusacek Stanislav, Havranek Zdenek, Hasik Stanislav, Fialka Jiri, Benes Petr

**NUMERICAL AND EXPERIMENTAL DETERMINATION OF IMPEDANCE CHARACTERISTICS OF PZT ELEMENTS FOR ACOUSTIC EMISSION SENSORS** .................................................................................. 152
Havranek Zdenek, Fialka Jiri, Benes Petr, Klusacek Stanislav

**PERMANENT MAGNET SYNCHRONOUS MOTOR AS A UNIVERSAL BROADBAND TORSIONAL VIBRATION EXCITER** ......................... 160
Kimpian Tibor, Augustinovicz Fulop

**VARIATION OF TEMPERATURE TENSION EFFECT IN STRUCTURAL HEALTH MONITORING OF BEAM BASED ON THE ELECTRO-MECHANICAL IMPEDANCE METHOD** ....................................................... 167
Bakhshi Nejad Firouz, Seperehy Naserodin, Shamshirzad Mahnaz

</table>
HYBRID METHOD TO CHARACTERIZE SOUND-FIELD DIFFUSENESS OF MULTIPURPOSE UNIVERSITY AUDITORIUMS USING SUBJECTIVE AND OBJECTIVE EVALUATION .................................................................348

SUBJECTIVE EVALUATION OF A LOW-ORDER PARAMETRIC FILTER MODEL OF THE PINNA FOR BINAURAL SOUND RENDERING ..........................................................356

SOURCE, SENSOR AND REFLECTOR POSITION ESTIMATION FROM ACOUSTICAL ROOM IMPULSE RESPONSES .................................................................364

WORKFLOW AUTOMATIONS AND OPTIMISATIONS TO FACILITATE ROOM ACOUSTIC PREDICTION WITHIN MULTIMODAL VIRTUAL ENVIRONMENTS .........................................372

THE ACUTY OF COLOUR PERCEPTION USING NON-INDIVIDUALISED DYNAMIC BINAURAL SYNTHESIS .............................................................380

MESH2HRF: AN OPEN-SOURCE SOFTWARE PACKAGE FOR THE NUMERICAL CALCULATION OF HEAD-RELATED TRANSFER FUNCTIONS .................................................388

ASSESSMENT OF THE FACTORS AFFECTING ON THE NOISE OF ELECTRIC WATER HEATERS .................................................................412

THE EFFECTS OF POROUS MATERIALS ON THE NOISE INSIDE A BOX CAVITY ................................................................................................................419

SHOCK VIBRATION CONTROL USING A NOVEL IMPACT DAMPER ......................................................................................................................427

COMPARISON AND ANALYSIS OF SOUND ATTENUATION OF ACOUSTIC ISOLATORS ..............................................................................................................435

ANALYSIS OF THE INFLUENCE OF THE SPEAKER POSITION ON THE STUDY OF THE DYNAMIC BEHAVIOR OF A MEMBRANE COMBINING HOLOGRAPHY TECHNIQUE AND FINITE ELEMENT MODELS ..........................................................................................439

ESTIMATION OF THE ACETABULAR CUP IMPLANT STABILITY VIA IMPACT ANALYSIS ........................................................................................................447

NUMERICAL AND EXPERIMENTAL STUDY OF THE ACOUSTIC RESONANCE OF A TUBE-MEMBRANE SYSTEM ..................................................................................................455

NEW MEASUREMENT FOR DYNAMIC CLEARANCE ...............................................................................................................................463

FINITE ELEMENT MODELING OF DYNAMIC PROPERTIES OF POWER SUPPLY FOR AN INDUSTRIAL APPLICATION .......................................................................................................469

PASSIVE CONTROL OF STRUCTURAL INTENSITY ON A FLAT PANEL BY BEAM ATTACHMENT ..............................................................................................................477

PREDICTION OF GENERATOR SET NOISE IN THE FAR FIELD USING PANEL CONTRIBUTION ANALYSIS AND SCALE MODELING ..........................................................................................484

ANALYSIS OF AUTOMATIC TRANSMISSION VIBRATION FOR CLUTCH SLIPPAGE DETECTION .................................................................................................492

PASSIVE CONTROL OF STRUCTURAL INTENSITY ON A FLAT PANEL BY BEAM ATTACHMENT ..............................................................................................................500

DYNAMIC CHARACTERIZATION OF A COMPLETE TRUCK: METHODOLOGY AND PHYSICAL PHENOMENA ........................................................................................................508

A PERFECT OPAX METHOD FOR VIBRATION TRANSFER PATH ANALYSIS COMBINED WITH OTPA METHOD ..................................................................................................516

ADAPTIVE FEEDFORWARD VIBRATION CONTROL OF A MECHANICAL SYSTEM WITH NONLINEAR DAMPING .................................................................................................524

DUAL FEEDBACK CONTROL FOR VIBRATION ISOLATION SYSTEMS DEALING WITH MULTIPLE EXCITATIONS ........................................................................................................532

SIMULATION AND EXPERIMENT ON A HYBRID MICRO-VIBRATION ISOLATOR ...............................................................................................................................540
SEMII-ACTIVE VIBRATION ISOLATION USING A NEW TYPE OF DEAP ISOLATOR..........................................................................................................................548
Mao Boyong, Xie Shilin, Zhu Jiayong, Zhang Xingong

MODEL UPDATING BASED ON STRUCTURAL STRAIN RESPONSE USING RESPONSE SURFACE METHOD..........................................................................................................................556
Fu Xin, Xie Shilin, Li Jian, Zhu Changchun, Zhang Xingong

INFLUENCES OF CONTROL POINT LOCAL RESPONSES ON MULTIPOINT CONTROL RANDOM VIBRATION TEST...............................................................................................................564
Changchun Zhu

A STUDY OF OPTIMAL TRAJECTORY GENERATION FOR FLEXIBLE MANIPULATOR MOUNTED ON FLEXIBLE LINK........................................................................................................571
Abe Akira, Kohari Yoshihi

LATERAL VIBRATION CONTROL FOR CABLE-GUIDED HOISTING SYSTEM BY ADJUSTING PRELOAD..........................................................................................................................579

ENHANCED ACTIVE DAMPING OF FLEXIBLE STRUCTURES WITH INHERENTLY STABLE POWER PORTS.......................................................................................................................587
Chesu Simon, Milhomeon Arison, Collette Christophe

PERFORMING ACTIVE NOISE CONTROL WITH WAVE FIELD SYNTHESIS.................................................................................................................................593
Morcillo Antonio Cano, Contreras Miguel Ferrer, Anton Maria De Diego, Salvador Alberto Gonzalez

TEST RIG FOR ACTIVE VIBRATION CONTROL WITH PIEZO-ACTUATORS.................................................................................................................................601
Zisser Michael, Haidt Peter, Schweighofer Bernhard, Wegleiter Hannes, Bader Michael

FEEDBACK CONTROL OF BENDING WAVES PROPAGATING IN AN ORTHOTROPIC RECTANGULAR PANEL..........................................................................................................................609
Lee Young-Sup, Ryu Seokhoon, Kim Jeakwan, Kim Seonghyeon, Park Dong Chul

APPLICATION OF PASSIVE/ACTIVE DUFFING VIBRATION ABSORBERS IN DUFFING MECHANICAL SYSTEMS..........................................................................................................................617
Beltran-Carbajal Francisco, Silva-Navarro Gerardo, Abundis-Fong Hugo

ON-LINE HARMONIC FORCE ESTIMATION IN ACTIVE VIBRATION CONTROL OF MASS-SPRING-DAMPER SYSTEMS................................................................................................................625
Beltran-Carbajal Francisco, Silva-Navarro Gerardo

AN ACTIVE DISTURBANCE REJECTION CONTROL APPROACH IN A VIBRATING MECHANICAL SYSTEM.................................................................................................................................633
Beltran-Carbajal Francisco, Damian-Noriega Zeferino, Alvarez-Miranda Gilberto, Villanueva-Pruneda Sergio

TRAJECTORY TRACKING IN A FLEXIBLE LINK ROBOT WITH VIBRATION SUPPRESSION USING A PZT PATCH ACTUATOR........................................................................................................641
Garcia-Perez Oscar Alejandro, Silva-Navarro Gerardo, Peza-Solis Juan Fernando, Trujillo-Franco Luis Gerardo

ACTIVE SOUND QUALITY CONTROL SYSTEM IN A CAR USING C-FXMS.................................................................................................................................649
Lee Young-Sup, Ryu Seokhoon, Kim Jeakwan, Kim Seonghyeon, Park Dong Chul

AUTONOMOUS PARAMETERS ADJUSTMENT IN ALIGNMENT ATTITUDE CONTROL OF AIR SPRING MOUNTING SYSTEM FOR MARINE PROPULSION SYSTEM...........................................................................651
Bu Wenjun, Shi Liang, Xu Wei

OPTIMAL LOAD AND ALIGNMENT CONTROL OF AIR SPRING MOUNTING SYSTEM FOR MARINE PROPULSION MACHINERY........................................................................................................659
Shi Liang, Bu Wenjun, Xu Wei

ACTIVE PASSIVE VIBRATION ISOLATION FOR SHIP MACHINERY USING ELECTROMAGNETIC ACTUATOR AND AIR SPRING........................................................................................................667
He Lin, Li Yan, Shuai Chang-Geng

ACTIVE REDUCTION OF DEVICE NARROWBAND NOISE BY CONTROLLING VIBRATION OF ITS CASING BASED ON STRUCTURAL SENSORS................................................................................................675
Wrona Stanislaw, Pawelczyk Marek

ACTIVE VIBRATION CONTROL ON A COMPLEX 3D STRUCTURE USING PIEZOELECTRIC PATCHES.................................................................................................................................683
Askin Egegen, Buc Utku, Sendur Polat, Bartugan Ipek, Gür Yeltekin

ACTIVE CONTROL OF NOISE EMITTED FROM A DEVICE CASING.................................................................................................................................691
Mazur Krzysztof, Pawelczyk Marek

NOISE TRANSMISSION THROUGH ACTIVE ACOUSTIC METAMATERIALS IN THE NEGATIVE ELASTICITY REGIME.................................................................................................................................699
Mokry Pavel, Vaclavik Jan, Necasek Jakub, Neiger Katerina, Prata Pavel, Dolecek Roman

ON ACTIVE SYNCHROPHASING CONTROL OF VIBRATION FOR A FLOATING RAFT VIBRATION ISOLATION SYSTEM........................................................................................................................670
Yang Jiyuan, Liang Weilong, Di Huang, Zhu Minlong, Liu Zhiquan, Shen Yong, Brennan Michael

RESEARCH AND EXPERIMENT ON DISPLACEMENT SELF-SENSING PRINCIPLE OF “E” ELECTROMAGNETIC ACTUATOR...........................................................................................................................713
Ma Jianguo, Shuai Changgeng, Ni Yuan, Li Yan

STUDIES OF A COLLOCATED PZT BEAM VIBRATION ABSORBER AND HARVESTER.................................................................................................................................720
Huang Shyh-Chin, Lin Hsiao-Hsi

COMPARISON OF DAMPING FORCE PERFORMANCE OF MR DAMPERS FEATURING FLOW AND SHEAR MODES.................................................................................................................................728
Chung Jye Ung, Do Xuan Phu, Choi Seung-Bok, Cho Chang-Hyun

FLUIDLESS ELECTRONIC ENGINE MOUNT.................................................................................................................................735
Vahdati Nader, Mashayekhi Mohammad
VOLUME 2

ROBUST TIME DOMAIN ACOUSTIC CONTRAST CONTROL IN AN ARC-SHAPED AREA USING A LINEAR LOUDSPEAKER ARRAY
Zhao Sipei, Qu Xiaojun, Lu Jing, Cheng Jianchun .................................................. 865

AN ACTIVE NOISE BARRIER SYSTEM OPTIMIZED FOR REDUCING OUTDOOR STATIONARY NOISE
Carligugi Monica, Borchchi Francesco, Martelli Lorenzo, Terchi Alessio, Argenti Fabrizia 873

A NEW EARPLUG BASED ON THE ACTIVE NOISE CONTROL TECHNOLOGY
Del Duca Lindoro, Nataletti Pietro, Ammesi Diego, Moschetto Antonio, Marra Simone, Serra Maurizio 881

EXPERIMENTS ON PERFORMANCES OF ACTIVE-PASSIVE HYBRID MUFFLERS
Sun Hongling, An Fengyan, Wu Ming, Yang Jun ......................................................... 886

TESTS OF THE PROTOTYPE OF ACTIVE VIBRATION CONTROL FOR SLIDING BEARINGS
Tuma Jiri, Simek Jiri, Mahdal Miroslav, Skuta Jaromir, Wagnerova Renata 893

SOURCES ACOUSTIC VIBRATION CONTROL IN A FLYWHEEL ROTOR SYSTEM SUPPORTED BY ACTIVE MAGNETIC BEARINGS
Zhang Kai, Liu Pingfan, Lei Zhao ................................................................. 901

STUDY ON THE CONTROL LIMITATION OF PARALLEL TYPE ACTIVE VIBRATION ISOLATOR BY ELECTROMAGNETIC ACTUATOR FOR NAVAL SHIPBOARD EQUIPMENT
Shin Yun-Ho, Moon Seok-Jun, Jung Woo-Jin, Bae Soo-Ryong 909

ON THE PASSIVE AND ACTIVE LATERAL COUPLING OF BUILDING-LIKE STRUCTURES UNDER GROUND MOTION
Silva-Navarro Gerardo, Hernandez-Flores Alejandro ................................................. 921

ACTIVE CONTROL OF THE DIRECTIVITY OF THE SOUND DIFFRACTION FROM BARRIERS
Qu Xiaojun, Zhao Sipei .................................................................................. 929
DEVELOPMENT OF INDOOR HYBRID ACTIVE NOISE BARRIER ................................................................. 937
Wang Xun, Kuba Tomoko, Ishikawa Satoshi, Kijimoto Shinya

MULTIPLE FREQUENCY TRACKING OF A TORSIONAL OSCILLATOR – APPLICATIONS IN DYNAMIC VISCOMETRY ................................................................................................................................. 945
Brack Tobias, Dual Jürg

FREQUENCY DOMAIN INVERSE MODEL LMS ALGORITHM FOR ACTIVE SOUND TUNING SYSTEM OF POWERTRAIN NOISE .................................................................................................................. 953
Lim Teik, Feng Tao, Sun Guohua, Xu Ji, Li Mingfeng, Lim Teik

APPLYING VIRTUAL SOUND BARRIER AT A ROOM OPENING FOR TRANSFORMER NOISE CONTROL ................................................................. 961
Tao Jiancheng, Wang Shuping, Qiu Xiaojun

UNIDIRECTIONAL ACOUSTIC BOUNDARY THROUGH ACTIVE CONTROL SYSTEM IN ONE-DIMENSIONAL DUCT ................................................................................................................................. 969
Ning Han, Shiiliang Fang

INVESTIGATIONS OF JET-FLAP INTERACTION NOISE IN TSAGI ........................................................................... 977
Kopiev Victor

EFFUSION COEFFICIENT ENGINE INSTALLATION ON GROUND SOUND PRESSURE LEVELS ......................... 984
Lewes Serge, Joly Nicolas, Pascalet Jean-Claude, Thomas Jean-Hugh, Durand Stéphane

NUMERICAL ASSESSMENT OF JET-PLATE INTERACTION WITH AND WITHOUT SWEEP ...................................... 992
Da Silva Filipe Dutra, Da Silva Andrey Ricardo, Deschamps César José, Cavalieri André Valdetaro Gomes, Jordan Peter

ACOUSTIC RESONANCE FREQUENCIES OF AN OPEN CAVITY WITH NON-SYMMETRIC AND NON-PARALLEL WALLS ..................................................................................................................... 1000
Diaz Cristobal Gonzalez, Parra Pedro Cobo

CURRENT ISSUES IN AVIATION NOISE MANAGEMENT: A NON-ACOUSTIC FACTORS PERSPECTIVE ......................... 1008
Sanchez Diana, Naumann Jack, Porter Nicole, Knowles Andy

AIRCRAFT NOISE MODELLING AND ASSESSMENT IN THE IESTA PROGRAM WITH FOCUS ON ENGINE NOISE ................................................................................................................................. 1016
Le Griffon Ingrid

ACCURACY ADJUSTMENT OF FREE FIELD CHARACTERISTICS AT ACOUSTIC TESTS OF AVIATION ENGINE WITH USE OF ICD ............................................................................................................................................ 1024
Gorodkova Natalia, Charsin Valery, Bershnev Yuriy, Grigoriev Aleksandr

VISCOUS DAMPING EFFECT OF SURROUNDING AIR ON VIBRATING SANDWICH PLATE ...................................... 1032
Chanthanumataporn Saharat, Watanabe Naoyuki, Moreoka Satoshi

THE EFFECTS OF TANK DEPTH ON THE NONLINEAR BEHAVIORS OF FLUID-MEMBRANE INTERACTION IN RECTANGULAR TANK ............................................................................................................. 1040
Parasol Worrat, Watanabe Naoyuki

SMALL UNMANNED AERIAL VEHICLE FUSELAGE DYNAMIC MODEL USING WINGS VIBRATIONS ......................... 1048
Zubai Marcellin, Thomas Rohan

USING RESPONSE PROJECTION METHOD TO ELIMINATE THE EFFECT OF BOUNDARY DIFFERENCE DURING VIBRATION TESTS IN SPACECRAFT ................................................................. 1056
Ding Yiting, Yang Zhengxi, Ren Weijia, Zhang Xinong, Zhou Yanlin

STATISTICAL ANALYSIS METHODOLOGY OF TIME DOMAIN STEADY STATE RESPONSE ........................................ 1064
Liu Guoqing, Luo Wenbo, Qian Zhiyong, Luo Min

ON THE USE OF TUNEABLE MASS DAMPER FOR BROAD-BAND NOISE CONTROL IN A CYLINDRICAL ENCLOSURE ......................................................................................................................... 1072
Emanuele Giuseppe, Garzon Paulino

INTERIOR NOISE OF CYLINDRICAL SHELL LINED WITH POROUS MATERIAL UNDER TURBULENT BOUNDARY LAYER EXCITATION .................................................................................................................. 1080
Zhou Jie, Zhang Xin

COMPARATIVE ESTIMATION OF ACOUSTIC RADIATION OF ELASTO-INERTIAL STRUCTURES EXCITED BY A TURBULENT BOUNDARY LAYER FOR TWO MODELS OF THE CROSS SPECTRUM ................................. 1088
Zverev Aleksandr, Efimenko Boris

A MATLAB TOOLBOX FOR SHOCK RESPONSE ANALYSIS DEDICATED TO SPATIAL APPLICATIONS ......................... 1096
Deroussart Gaylor, Kourousis Georges, Fehl Laxaad Ben, Verlinden Oliver, De Fraynier Christophe, De Mots François

THE VIBROACOUSTIC ANALYSIS OF SPACECRAFT STRUCTURE SUBJECTED TO ACOUSTIC EXCITATION ................................................................................................................................. 1104
Zheng Ling, Wu Hao, Zhang Dongdong, Zhu Zhenya, Xiang Shuhong, Li Ye, Zhang Junwang, Fang Guiquan, Li Xinmin

THE INVESTIGATION OF ACOUSTIC TEST SPECIFICATIONS ON SPACECRAFT STRUCTURE BY NUMERICAL ANALYSIS METHODS ......................................................................................... 1112
Xiang Shuhong, Li Ye, Zhang Junwang, Fang Guiquan, Li Xinming, Yan TungFei, Sun Wei, Zheng Ling, Zeng Jie, Zhang Dongdong, Zhu Zhenya, Liu Wanglin

ACOUSTIC TOPOLOGY OPTIMIZATION OF A PLATE WITH CONSTRAINED LAYER DAMPING TREATMENT COUPLED WITH A CAVITY ............................................................................................. 1120
Zheng Ling, Liu Wanglin, Xiang Shuhong

FILM COOLING EFFECTIVENESS FOR HYPERSONIC VEHICLES ........................................................................... 1128
Zhang Minjie, Xiang Shuhong, Tong Jingyu

USING ACOUSTICS EMISSION IN VALIDATING A NEW DESIGN AND MANUFACTURING CONCEPTS OF A HORIZONTAL AXIS VERTICAL TURBINE BLADE ..................................................................................... 1136
Abdulaziz Ahmed H., Elsabbagh Adel, Elnady Tamer

DISCONTINUOUS GALERKIN METHOD FOR NONLINEAR STANDING WAVES IN CLOSED ACOUSTIC RESONATORS .................................................................................................................................................. 6019
Yang Jiaqi, Wei Jingqun, Guo Chibi, Shi Hengbing, Qiu Lianfang, Wei Juan

MULTIMODAL METHOD FOR THE SIMULATION OF GUIDED WAVE PROPAGATION IN CYLINDRICAL RODS WITH VARYING CROSS-SECTION .............................................................................................. 6027
Hoehne Christian, Prager Jens

ANALYTIC AND SIGNAL-PROCESSING APPROACHES TO THE ACOUSTIC CENTERING OF A BAFFLED CIRCULAR PISTON ................................................................................................................................................. 6035
Shahrui Noam R., Völunder Michael

COMPUTATIONAL INTELLIGENCE AIDED DESIGN –BASED ROBUST DAMAGE DETECTION: SENSOR LOCATION OPTIMIZATION ......................................................................................................................... 6043
Shu Qian, Li Y. Y.

EFFECT OF COUPLED MODES IN MEMS/NEMS DEVICES UNDER DIRECT AND FRINGING ELECTROSTATIC FIELDS .............................................................................................................................................. 6050
Kambali Prashant N., Pandey Ashok Kumar

ANALYSIS OF NONLINEAR SHALLOW WATER WAVE IN RECTANGULAR TANK BY CONCENTRATED MASS MODEL .................................................................................................................................................. 6057
Satooshi Ishikawa, Takahiro Kondo, Kenichiro Matsuzaki, Satoshi Yamamura

ENSEMBLE AVERAGED RESPONSE PREDICTION OF BUILT-UP SYSTEMS BY A SCALING APPROACH ................................................................................................................................. 6065
Li Xianhui

INFLUENCE OF BOUNDARY CONDITION ON THE SOUND RADIATED FROM THE VIBRATIONS OF COMPOSITE PLATES .................................................................................................................................................. 6073
Kim Sung Joon, Kim Tae-Uk

PARAMETRIC MODEL-ORDER REDUCTION FOR VISCOELASTIC FINITE ELEMENT MODELS: AN APPLICATION TO MATERIAL PARAMETER IDENTIFICATION ......................................................................................... 6081
Van De Walle Axel, Rouleau Lucie, Deckers Elke, Desmet Wim

COUPLED (VIBRO-)ACOUSTIC PROBLEMS USING GEOMETRICAL ACOUSTICS AND PATCH TRANSFER FUNCTIONS .................................................................................................................................................. 6089
Boucher Matthew, Phuymer Bert, Desmet Wim

PEDESTRIAN-STRUCTURE DYNAMIC INTERACTION BASED IN KINETIC AND KINEMATIC PARAMETERS .................................................................................................................................................. 6097
Tasso Marcelo André, Gomes Herbert Martins

NUMERICAL SIMULATION OF THE OBLIQUE DEFECT IN THE PIPES USING VAN DER POL OSCILLATOR BASED ON ULTRASONIC GUIDED WAVE ................................................................................................... 6105
Yang Fei, Wu Jing, Wen Yuli, Nie Zhenhua, Ma Hongwei

EXTERNAL GEAR PUMP NOISE FIELD PREDICTION BY HARMONIC RESPONSE AND VIBROACOUSTIC ANALYSES ........................................................................................................................................... 6113
Parise Giorgio, Carletti Eleonora, Miccoli Giuseppe

RESOLVING A LARGE WINDNOISE CASE USING HPC BEM .................................................................................................................................................. 6121
Blanchet Denis, Golotta Anton, Zerbib Nicolas, Mebarek Lassen

STUDY ON ROTATING ENERGY STORAGE FLYWHEEL WRAPPED BY COMPOSITE MATERIAL ................................................................................................................................. 6127
Li Hong, Xu Fangfang, Zhang Dongzuo, Li Li
A VIRTUAL PIPE TEST-RIG FOR TESTING ACOUSTIC LEAK DETECTION CORRELATORS
Brennan Michael, Kroll De Lima Fabio, Almeida Fabricio, Joseph Philip

6133

NUMERICAL ANALYSIS OF THE RELATIONSHIP BETWEEN A TONE COLOR AND THE WATER
DROPING POINT OF 'SUIKINKUTSU'
Fujita Yuki, Mizutani Kiochi, Wakatsuki Naoto, Ebihara Tadashi

6141

THE NUMERICAL TECHNIQUE FOR MODELLING OF CAPACITY LOADED PIPE PULSATION
CHARACTERISTICS
Mironova Tatiana

6147

VARIABILITY ANALYSIS OF DYNAMIC CHARACTERISTICS IN AN ELASTOMER DUE TO THERMAL
AGING
Lee Dooah, Kwon Jong-Hyun

6152

TWO DEGREES-OF-FREEDOM ELECTROMAGNETIC SYSTEM FOR HARVESTING ENERGY FROM
LOW-FREQUENCY BRIDGE VIBRATION
Yang Sayoung, Kim Kyoungh, Liu Peipei, Sohn Hoon

6158

AN EFFICIENT THREE-DIMENSIONAL MULTI-LEVEL WAVE BASED METHOD FOR INTERIOR
ACOUSTIC PROBLEMS WITH DISCONTINUOUS BOUNDARY CONDITIONS
Shiozawa Yassou, Deckers Elke, Atak Onar, Desmet Wim

6165

VOLUME 8

SIMULATION OF THE ENERGY FLOW AT MECHANICAL RESONANCE
Fiebig Wieslaw, Wrobel Jakub

6173

SIMULATION OF ULTRASOUND PROPAGATION IN SOLIDS OF VARIOUS SHAPES
Romlyand Vladimir, Aaleev Denis

6181

STUDY ON THE VIBRATION AND NOISE CHARACTERISTIC OF LOW SPEED DIESEL ENGINE WITH
DIFFERENT FIRE ORDERS
Cao Yifeng, Li Renke, Gao Huijun

6189

ACCELERATING THE NVH DESIGN USING A VARIANT OF THE RESONANCE MODES METHOD: THE
EXAMPLE OF AN AIRCRAFT PANEL WITH FREQUENCY-DEPENDENT DAMPING TREATMENT
Zoghaib Lionel, Petitjean Benoit

6196

A ROBUST ALGORITHM FOR FORCE IDENTIFICATION ON STRUCTURES BASED ON
ACCELERATION MEASUREMENTS
Lagerblad Ulrika, Wentzel Henrik

6204

VIRTUAL ENGINEERING APPROACH FOR THE ANALYSIS OF THE ACOUSTIC BEHAVIOR OF AN
ENGINE
Davignaque Fabian, Nitschke Steffen, Strackeljan Jens, Gabbert Ulrich

6211

ACOUSTOPHORETIC TRAJECTORY SIMULATION FOR COMPLEX PARTICLES
Hahn Philipp, Baasch Thierry, Daul Jurg

6219

NUMERICAL INVESTIGATIONS ON PARAMETRIC EXCITATION OF A VERTICAL BEAM UNDER
PRESCRIBED AXIAL DISPLACEMENTS
Franzoni Guilherme, Gay Neto Alfredo

6227

LINEORIZED JOINT DAMPING MODEL FOR ASSEMBLED STRUCTURES WITH INHOMOGENEOUS
CONTACT PRESSURE USING THIN-LAYER ELEMENTS
Clappier Marcel, Ehrlich Christian, Gaul Lothar

6235

ANALYTICAL PREDICTION OF THE EFFECTIVE DYNAMIC BEHAVIOR AND THE DAMPING
CHARACTERISTICS OF LAMINATED STEEL STACKS AS USED IN ELECTRIC MACHINES
Schwarzer Michael, Zimmerling Clemens, Burti Endre, Dannemann Martin, Bocyncek Ralph, Bein Thilo

6243

STUDY OF THE DYNAMICS OF A SHIP PROPELLER WITH HARMONIC FINITE ELEMENTS
Chen Yong, Chen Xuefeng, Chu Hongxing, Hu Hongxing

6251

A NEW EFFICIENT STRATEGY TO INVESTIGATE THE INTERACTION BETWEEN ROTATING
MACHINES AND ELASTIC SUPPORTING STRUCTURES
Meli Enrico, Pallini Giovanni, Panconi Simone, Rindi Andrea, Rossini Stefano

6259

NONLINEAR DYNAMIC ANALYSIS WITH AN UNCERTAIN COMPUTATIONAL MODEL FOR
MISTUNED BLADED DISKS
Capiez-Lernout Evangeline, Soize Christian, Mhaye Moustapha

6267

VIBRATION ANALYSIS OF HIGH SPEED TURBINE FOR PAINT ATOMIZER
Park J Hoon, Sohn Jung Won, Cho Seung-Bok

6275

EXPERIMENTAL DETERMINATION OF MATERIAL PROPERTIES IN STACKING DIRECTION OF
LAMINATED STACKS BELONGING TO ELECTRICAL MACHINE ROTORS USING A DILATATION TEST
Clappier Marcel, Gaul Lothar, Westkämper Engelbert

6279

APPLICATION OF CHI SQUARE FEATURE RANKING TECHNIQUE AND RANDOM FOREST
CLASSIFIER FOR FAULT CLASSIFICATION OF BEARING FAULTS
Vinay Vakharia, Kumar Gupta Vijay, Kumar Kankar Pavan

6287

REAL-TIME WET/DRY ROAD SURFACE DISCRIMINATION USING ROLLING NOISE ACOUSTIC
FOOTPRINT ANALYSIS
Antoniu József, Asensio César, López Juan Manuel, Pauín Ignacio, De Arcas Guillermo

6295

AUDIO INFORMATION EXTRACTION FROM ARBITRARY SOUND RECORDINGS
Duncan Philip, Mohammed Duraid, Li Francis
