Context-Aware Web Services Recommendation Based on User Preference ..................................................55
  Xiaoliang Fan, Yakun Hu, Ruisheng Zhang, and Xiaoliang Fan

Design and Implementation of Capability Opening Engine in PaaS for Internet
of Vehicles ................................................................................................................................................62
  Hongman Wang, Xiaohan Xia, Yueming Gao, and Hongmin Zhou

An Event-Driven Service-Oriented Architecture for the Internet of Things ..................................................68
  Lina Lan, Fei Li, Bai Wang, Lei Zhang, and Ruisheng Shi

Network Traffic Analysis for Mobile Terminal Based Multi-scale Entropy ..................................................74
  Xiaoming Chen, Huiqiang Wang, Junyu Lin, Guangsheng Feng, and Chao Zhao

Session 3: Big Data and Service Discovery

A Twig Join Algorithm for a Query with ID References ..................................................................................81
  Dong Li, Lin Zhao, and Jing Li

Topic Detection from Microblog Based on Text Clustering and Topic Model
Analysis ..................................................................................................................................................88
  Siqi Huang, Yitao Yang, Huakang Li, and Guozi Sun

A Rule-Based Recommendation for Personalization in Social Networks ....................................................93
  Rui Zhang, Yueqi Zhou, Lin Li, and Chengming Zou

Function Level Web Service Discovery Based on Category Function Tree ..................................................101
  Jipeng Cui and Bingxian Ma

Correlation Search of Web Services ............................................................................................................107
  Fenfang Xie, Jianxun Liu, Mingdong Tang, Buqing Cao, and Saixia Lyu

An Approach to the Location-Based Services Collaboration Evaluation
Algorithm Oriented to Mobile Internet Environment ..................................................................................115
  Manli Lu, Mingjun Xin, and Weimin Li

Session 4: Reliability Technologies and Tools for Services-Based Systems

Towards Logical Architecture and Formal Analysis of Dependencies Between
Services ..................................................................................................................................................121
  Maria Spichkova and Heinrich Schmidt

Finding Optimized Deployment Strategy for Multitenant Services by Iterative
Staging ..................................................................................................................................................129
  Jizun Liu, Zeyu Di, Shijun Liu, Calton Pu, Lei Wu, and Li Pan

False Logic Attacks on SCADA Control System .........................................................................................136
  Weize Li, Lun Xie, Daqian Liu, and Zhiliang Wang

Group Key Agreement in Multimedia Service for Machine Type
Communication ..............................................................................................................................................141
  Jieying Li, Yueyu Zhang, Jie Chen, Hui Li, and Wujun Zhang
A Multiple Watermarking Scheme with Embedding-Order Identifying Feature .................................................. 147
  Zhu-Wei Jin, Ming Su, and Gang Wang

Analysis and Application of Secondary Code in BDS .................................................................................. 152
  Deng-Ao Li, Wen-Hui Niu, Ju-Min Zhao, Shuai Li, and Jin-Qiang Liu

**Session 5: Dependability in Cloud Computing**

Congestion Control Algorithm for Data Center ......................................................................................... 156
  Xiue Gao, Xin Zhao, and Keqiu Li

Joint Subcarrier Pairing and Power Allocation in OFDMA Cooperative Relay Networks .................................................. 162
  Songtao Guo, Jianji Hu, and Chunrong He

Identifying Users’ Interest Similarity Based on Clustering Hot Vertices in Social Networks .................................................. 170
  Tianchi Mo, Hongxiao Fei, Li Kuang, and Qifei Qin

iConCube: A Location-Based Mobile Cloud System for Meeting Organizers and Participants .................................................. 177
  Guo Chi, Liu Xuan, Fang Yuan, and Cui Jingsong

Tree-Structured Network Based Hierarchical Complex Event Processing in Wireless Sensor Networks .................................................. 185
  Mengyuan Xu, Zhihan Liu, and Jinglin Li

Scheduling Parallel Virtual Machine in Xen based on Credit ........................................................................ 191
  Xiaobo Ding, Zhong Ma, Xinfai Dai, and Alin Zhong

**Author Index** ........................................................................................................................................ 199
