2015 IEEE/ ACM 1st International Workshop on Software Engineering for Smart Cyber-Physical Systems

(SEsCPS 2015)

Florence, Italy
17 May 2015
International Workshop on Software Engineering for Smart Cyber-
Physical Systems (SEsCPS 2015)

Table of Contents

Message from the Chairs ................................................................. vii
Committees and Reviewers ............................................................. viii
Sponsors and Supporters .................................................................. x

Keynote

Modeling Challenges for CPS Systems .............................................. 1
David Garlan — Carnegie Mellon University, USA

Workshop Papers

Accelerating Regression Testing for Scaled Self-Driving Cars with Lightweight Virtualization
—A Case Study .................................................................................. 2
Christian Berger — University of Gothenburg

Fault Localization in Embedded Control System Software .............. 8
Kai Liang, Zhuofu Bai, M. Cenk Cavusoglu, Andy Podgurski, Soumya Ray
— Case Western Reserve University, USA

Verification and Validation in Cyber Physical Systems: Research Challenges
and a Way Forward .......................................................................... 15
Xi Zheng, Christine Julien — University of Texas at Austin, USA

Continuous Collaboration: A Case Study on the Development of an Adaptive
Cyber-physical System ...................................................................... 19
Matthias Höflz, Thomas Gabor — LMU München, Germany

A Model-Based Approach for the Specification of a Virtual Power Plant Operating
in Open Context .............................................................................. 26
Vasileios Koutsoumpas — TUM, Germany,

An Application Conflict Detection and Resolution System for Smart Homes ............................................ 33
Miki Yagita, Fuyuki Ishikawa, Shinichi Honiden — The University of Tokyo, Japan;
National Institute of Informatics, Japan

Taming Heterogeneity and Distribution in sCPS ................................ 40
Brice Morin, Franck Fleurey, Olivier Barais — SINTEF, Norway; INRIA, France
Versioning in Cyber-physical Production System Engineering—Best-Practice
and Research Agenda .......................................................................................................................... 44
Richard Mordinyi, Stefan Biffl — Vienna University of Technology, Austria

Collaborating Multiple System Instances of Smart Cyber-physical Systems: A Problem Situation,
Solution Idea, and Remaining Research Challenges ............................................................................ 48
Marian Daun, Jennifer Brings, Torsten Bandyszak, Philipp Bohn, Thorsten Weyer
— University of Duisburg-Essen, Germany

Towards Cyber-physical Systems as Services: The ASIP Protocol ..................................................... 52
Mirco Bordoni, Michele Bottone, Bob Fields, Nikos Gorogiannis, Michael Margolis,
Giuseppe Primiero, Franco Raimondi — Ocado Group, UK; Middlesex University, UK

Author Index ........................................................................................................................................ 56
