Sponsors and Supporters ...................................................................................................................... xvii

Keynotes

Test Complement Exclusion: Guarantees from Dynamic Analysis............................................................... 1
Andreas Zeller — Saarland University, Germany

Concise and Consistent Naming: Ten Years Later ....................................................................................... 3
Florian Deissenboeck, Markus Pizka — CQSE GmbH, Germany; itestra GmbH, Germany

Mining Software Repositories - Technical Research Papers

Discovering Loners and Phantoms in Commit and Issue Data ................................................................. 4
Gerald Schermann, Martin Brandtner, Sebastiano Panichella, Philipp Leitner, Harald Gall
— University of Zurich, Switzerland

Detection of Software Evolution Phases Based on Development Activities ........................................... 15
Omar Benomar, Hani Abdeen, Houari Sahraoui, Pierre Poulin, Mohamed Aymen Saied
— Université de Montréal, Canada

I Know What You Did Last Summer - An Investigation of How Developers Spend Their Time ............... 25
Roberto Minelli, Andrea Mocci, Michele Lanza — University of Lugano, Switzerland

RCLinker: Automated Linking of Issue Reports and Commits Leveraging Rich Contextual Information .............................................................................................................. 36
Tien-Duy B. Le, Mario Linares-Vasquez, David Lo, Denys Poshyvanyk
— Singapore Management University, Singapore; College of William and Mary, USA

Generating Reproducible and Replayable Bug Reports from Android Application Crashes ..................... 48
Martin White, Mario Linares-Vásquez, Peter Johnson, Carlos Bernal-Cárdenas, Denys Poshyvanyk — College of William and Mary, USA

Active Semi-supervised Defect Categorization ........................................................................................... 60
Ferdian Thung, Xuan-Bach D. Le, David Lo — Singapore Management University, Singapore
Learning and Sharing Program Knowledge
- Technical Research Papers

Could We Infer Unordered API Usage Patterns Only Using the Library Source Code? .................................................... 71
Mohamed Aymen Saied, Hani Abdeen, Omar Benomar, Houari Sahraoui
— Université de Montréal, Canada

Searching the State Space: A Qualitative Study of API Protocol Usability ................................................................. 82
Joshua Sushine, James D. Herbsleb, Jonathan Aldrich — Carnegie Mellon University, USA

Synonym Suggestion for Tags on Stack Overflow ........................................................................................................ 94
Stefanie Beyer, Martin Pinzger — University of Klagenfurt, Austria

Laura MacLeod, Margaret-Anne Storey, Andreas Bergen — University of Victoria, Canada

Generating Refactoring Proposals to Remove Clones from Automated System Tests .................................................... 115
Benedikt Hauptmann, Sebastian Eder, Maximilian Junker, Elmar Juergens, Volkmar Woinke — Technische Universität München, Germany; CQSE GmbH, Germany; Munich Re, Germany

Learning and Sharing Program Knowledge
- Early Research Achievement Papers

Framework Instantiation Using Cookbooks Constructed with Static and Dynamic Analysis .............................................. 125
Raquel F.Q. Lafetá, Marcelo A. Maia, David Röthlisberger — Federal University of Uberlandia, Brazil; Universidad Diego Portales, Chile

Users, User Interfaces, and Feature Location
- Technical Research Papers

Two User Perspectives in Program Comprehension: End Users and Developer Users ...................................................... 129
Tobias Roehm — Technische Universität München, Germany

Exploring the Use of Concern Element Role Information in Feature Location Evaluation .............................................. 140
Emily Hill, David Shepherd, Lori Pollock — Drew University, USA; ABB Inc., USA; University of Delaware, USA

Rethinking User Interfaces for Feature Location ................................................................................................. 151
Fabian Beck, Bogdan Dit, Jaleo Velasco-Madden, Daniel Weiskopf, Denys Poshivanyk
— University of Stuttgart, Germany; Boise State University, USA; College of William and Mary, USA

Detecting Clones in Android Applications through Analyzing User Interfaces ..................................................... 163
Charlie Soh, Hee Beng Kuan Tan, Yauhen Leanidavich Arnatovich, Lipo Wang
— Nanyang Technological University, Singapore
# Users, User Interfaces, and Feature Location

- Early Research Achievement Papers

Manually Locating Features in Industrial Source Code: The Search Actions of Software Nomads ........ 174
  *Howell Jordan, Jacek Rosik, Sebastian Herold, Goetz Botterweck, Jim Buckley*
  — University of Limerick, Ireland

From Obfuscation to Comprehension ....................................................................................................... 178
  *Eran Avidan, Dror G. Feitelson* — Hebrew University of Jerusalem, Israel

The Plague Doctor: A Promising Cure for the Window Plague .............................................................. 182
  *Roberto Minelli, Andrea Mocci, Michele Lanza* — University of Lugano, Switzerland

# Large Scale Empirical Studies - Technical Research Papers

Polymorphism in the Spotlight: Studying Its Prevalence in Java and Smalltalk ....................................... 186
  *Nevena Milojkovic, Andrea Caracciolo, Mircea Filip Lungu, Oscar Nierstrasz, David Röthlisberger, Romain Robbes* — University of Bern, Switzerland; Universidad Diego Portales, Chile; University of Chile, Chile

A Survey of the Forms of Java Reference Names ................................................................................... 196
  *Simon Butler, Michel Wermelinger, Yijun Yu* — The Open University, UK

Make It Simple - An Empirical Analysis of GNU Make Feature Use in Open Source Projects ............ 207
  *Douglas H. Martin, James R. Cordy, Bram Adams, Giulio Antoniol* — Queen’s University, Canada; École Polytechnique de Montréal, Canada

License Usage and Changes: A Large-Scale Study of Java Projects on GitHub .................................... 218
  *Christopher Vendome, Mario Linares-Vasquez, Gabriele Bavota, Massimiliano Di Penta, Daniel German, Denys Poshyvanyk* — College of William and Mary, USA; Free University of Bozen-Bolzano, Italy; University of Sannio, Italy; University of Victoria, Canada

Unsupervised Software Categorization Using Bytecode ......................................................................... 229
  *Javier Escobar-Avila, Mario Linares-Vásquez, Sonia Haiduc* — Florida State University, USA; College of William and Mary, USA

# Large Scale Empirical Studies - Early Research

Achievement Papers

The Last Line Effect .................................................................................................................................. 240

# Reading and Visualizing - Technical Research Papers

How Programmers Read Regular Code: A Controlled Experiment Using Eye Tracking .................. 244
  *Ahmad Jbara, Dror G. Feitelson* — Hebrew University of Jerusalem, Israel
Eye Movements in Code Reading: Relaxing the Linear Order ................................................................. 255
Teresa Busjahn, Roman Bednarik, Andrew Begel, Martha Crosby, James H. Paterson, Carsten Schulte, Bonita Sharif, Sascha Tamm — Freie Universität Berlin, Germany; University of Eastern Finland, Finland; Microsoft Research, USA; University of Hawaii at Manoa, USA; Glasgow Caledonian University, UK; Youngstown State University, USA

Comparing Trace Visualizations for Program Comprehension through Controlled Experiments .......... 266
Florian Fittkau, Santje Finke, Wilhelm Hasselbring, Jan Waller — Kiel University, Germany

Reading and Visualizing - Early Research
Achievement Papers

Towards Visual Reflexion Models ............................................................................................................. 277
Marcello Romanelli, Andrea Mocci, Michele Lanza — University of Lugano, Switzerland

Understanding Web Applications Using Component Based Visual Patterns ......................................... 281
Dan C. Cosma, Petru F. Mihancea — Politehnica University of Timisoara, Romania

Industry and Experience Reports

Fault Localization during System Testing .................................................................................................... 285
Pavan Kumar Chittimalli, Vipul Shah — TCS Innovation Labs, India

Recovering Workflows from Functional Tests ........................................................................................... 287
Chetan Khadke, Sunjit Rana, Vipul Shah — Tata Consultancy Services, India; Tata Research Development and Design Center, India

Reordering Results of Keyword-Based Code Search for Supporting Simultaneous Code Changes .......................................................... 289
Yusuke Sabi, Hiroaki Murakami, Yoshiki Higo, Shinji Kusumoto — Osaka University, Japan; Sumitomo Electric Information Systems Co. Ltd., Japan

Tool Demos

VerXCombo: An Interactive Data Visualization of Popular Library Version Combinations .................. 291
Yuki Yano, Raula Gaikovina Kula, Takashi Ishio, Katsuro Inoue — Osaka University, Japan

ITMViz: Interactive Topic Modeling for Source Code Analysis ................................................................. 295
Amir M. Saeidi, Jurriaan Hage, Ravi Khadka, Slinger Jansen — Utrecht University, Netherlands

ExceptionTracer: A Solution Recommender for Exceptions in an Integrated Development Environment ............................................................................................................. 299
Vahid Amintabar, Abbas Heydarnoori, Mohammad Ghafari — Sharif University of Technology, Iran; Politecnico di Milano, Italy
