# Table of Contents

## 2015 IEEE International Conference on Communications (ICC)

### ICC'15 (01) SAC 1-GC: IEEE ICC 2015 SAC - Green Communications

## Energy Efficient Heterogeneous Wireless Systems

**Energy Efficiency in Heterogeneous Networks**

Jie Tang (University of Manchester, United Kingdom), Daniel K. C. So (University of Manchester, United Kingdom), Emad Alsusa (Manchester University, United Kingdom), Khairi A. Hamdi (University of Manchester, United Kingdom), Arman Shojaeifard (University of Manchester, United Kingdom) ................................................................. 1

**A Greedy Algorithm for Energy-Efficient Base Station Deployment in Heterogeneous Networks**

Cemil Can Coskun (University of California, Irvine, USA), Ender Ayanoglu (University of California, Irvine, USA) ....................................................................................................................... 7

**On Energy Efficient Inter-Frequency Small Cell Discovery in Heterogeneous Networks**

Oluwakayode Onireti (University of Surrey, United Kingdom), Ali Imran (University of Oklahoma, USA), Muhammad Ali Imran (University of Surrey, United Kingdom), Rahim Tafazolli (University of Surrey, United Kingdom) ....................................................................................................................... 13

**Energy Efficient Multicast in Interference-limited Heterogeneous Networks**

Changqing Yang (Huawei Technologies Co., Ltd., P.R. China), Yong Wu (Huawei Technologies Co., Ltd., P.R. China), Qizhi Zhang (Huawei Technologies Co. Ltd., P.R. China), Yuan Li (Huawei Technologies Co. Ltd., P.R. China) ....................................................................................................................... 19

**Proactive Push with Energy Harvesting Based Small Cells in Heterogeneous Networks**

Jie Gong (Tsinghua University, P.R. China), Sheng Zhou (Tsinghua University, P.R. China), Zhenyu Zhou (North China Electric Power University & Waseda University, P.R. China), Zhisheng Niu (Tsinghua University, P.R. China) ....................................................................................................................... 25

**Impact of Intra- and Inter-RAT Offloading on the Spectrum/Energy Efficiency of HetNets**

Jaya B Rao (Huawei Technologies Canada, Canada), Abraham O Fapojuwo (University of Calgary, Canada) ....................................................................................................................... 31

## Energy Efficient Wireless Systems II

**Noise Enhanced Energy Efficiency in Green Wireless Communications**

Jin Liu (State Key Laboratory of Integrated Services Networks, Xidian University, P.R. China), Zan Li (Xidian University, P.R. China) ....................................................................................................................... 37

**A Comparative Study of Energy Efficiency Between MIMO and SISO based LTE RANs**

Abdelrahman Arbi (University of Sheffield, United Kingdom), Timothy O’Farrell (University of Sheffield, United Kingdom) ....................................................................................................................... 43

**Bayesian Mechanism Based Inter-Operator Base Station Sharing for Energy Saving**

Yanan Bao (University of California, Davis, USA), Jian Wu (University of California, Davis, USA), Sheng Zhou (Tsinghua University, P.R. China), Zhisheng Niu (Tsinghua University, P.R. China) ....................................................................................................................... 49

**ECO-M: Energy-Efficient Cluster-Oriented Multimedia Delivery in a LTE D2D Environment**

Ramona Trestian (Middlesex University, United Kingdom), Quoc-Tuan Vien (Middlesex University, United Kingdom), Huan X Nguyen (Middlesex University, United Kingdom), Orhan Gemikonakli (Middlesex University, United Kingdom) ....................................................................................................................... 55

**More Spectrum for Less Energy: Green Cooperative Sensing Scheduling in CRNs**

Abdulkadir Celik (Iowa State University, USA), Ahmed E. Kamal (Iowa State University, USA) ........ 62
Energy Harvesting

Optimal Offline and Competitive Online Strategies for Transmitter-Receiver Energy Harvesting
Rushil Nagda (IIT-Roorkee, India), Siddhartha Satpathi (IIT Kharagpur, India), Rahul Vaze (TIFR Mumbai, India)................................................................. 74

Block-Wise Time-Switching Energy Harvesting Protocol for Wireless-Powered AF Relays
Ali A Nasir (Australian National University, Australia), Xiangyun Zhou (The Australian National University, Australia), Salman Durrani (The Australian National University, Australia), Rodney Andrew Kennedy (The Australian National University, Australia) ..................................................... 80

Energy Harvesting Aware Relay Node Addition for Power-Efficient Coverage in Wireless Sensor Networks
Djamel Djenouri (CERIST Research Center, Algeria), Miloud Bagaa (Norwegian University of Science and Technology (NTNU), Norway) ............................................................... 86

Optimal Power Control for Energy Harvesting Cognitive Radio Networks
Peter He (Ryerson University, Canada), Lian Zhao (Ryerson University, Canada) ................................. 92

Adaptive Sensing Scheduling for Energy Harvesting Sensors with Finite Battery
Jing Yang (University of Arkansas, USA), Xinwen Wu (University of Arkansas, USA), Jingxian Wu (University of Arkansas, USA) ........................................................................ 98

Opportunistic Reception in a Multiuser Slow-Fading Channel with an Energy Harvesting Receiver
Hajar Mahdavi-Doost (Rutgers University, USA), Roy Yates (Rutgers University, USA) .......................... 104

Cloud and Core Energy Efficiency

Approximation Caching Algorithms for Energy-efficient Networks
Konstantinos Poularakis (University of Thessaly, Greece), Leandros Tassiulas (Yale University, USA) ..................................................................................................................... 110

Energy Aware Green Spine Switch Management for Spine-Leaf Datacenter Networks
Xialin Li (Carleton University, Canada), Chung-Horng Lung (Carleton University, Canada), Shikharesh Majumdar (Carleton University, Canada) ......................................................... 116

Usage Based Topology for DCNs
Qing Yi (Portland State University, USA), Suresh Singh (Portland State University, USA) .................... 122

Renewable Energy in Distributed Energy Efficient Content Delivery Clouds
Ahmed Lawey (University of Leeds, United Kingdom), Taisir El-Gorashi (University of Leeds, United Kingdom), Jaafar Elmirghani (University of Leeds, United Kingdom) .................................................. 128

Energy Storage Management in Core Networks with Renewable Energy in Time-of-Use Pricing Environments
Nadeem Abji (University of Toronto, Canada), Ali Tizghadam (University of Toronto, Canada), Alberto Leon-Garcia (University of Toronto, Canada) ................................................................. 135

Implementing Energy-aware Algorithms in Backbone Networks: a Transient Analysis
Luca Chiariaviglio (University of Rome Sapienza, Italy), Antonio Cianfrani (University of Rome "La Sapienza", Italy), Marco Listanti (University of Rome "La Sapienza", Italy), Luigi Mignano (University of Rome Sapienza, Italy), Marco Polverini (University "La Sapienza" Roma, Italy) 142
Wireless and Renewable Powered Systems

Exploring Green Interference Power for Wireless Information and Energy Transfer in the MISO Downlink
Gan Zheng (University of Essex, United Kingdom), Christos Masouros (University College London, United Kingdom), Ioannis Krikidis (University of Cyprus, Cyprus), Stelios Timotheou (University of Cyprus, Cyprus) ................................................................. 149

Energy-Efficient Transmission for Wireless Powered Multiuser Communication Networks
Qingqing Wu (Shanghai Jiao Tong University, P.R. China), Meixia Tao (Shanghai Jiao Tong University, P.R. China), Derrick Wing Kwan Ng (Friedrich-Alexander-University Erlangen-Nürnberg, Germany), Wen Chen (Shanghai Jiao Tong University, P.R. China), Robert Schober (University of British Columbia, Canada) .................................................................................................................. 154

Opportunistic Wireless Information and Energy Transfer for Sustainable Cooperative Relaying
Hengzhi Wang (Zhejiang University, P.R. China), Wei Wang (Zhejiang University, P.R. China), Zhaoyang Zhang (Zhejiang University, P.R. China) .................................................................................................................. 160

Max-Min Energy Based Robust Secure Beamforming for SWIPT
Muhammad R. A. Khandaker (University College London, United Kingdom), Kai-Kit Wong (University College London, United Kingdom) .................................................................................................................. 166

Outage Estimation for Solar Powered Cellular Base Stations
Vinay Chamola (National University of Singapore, Singapore), Biplab Sikdar (National University of Singapore, Singapore) .................................................................................................................. 172

Dimensioning the Power Supply of a LTE Macro BS Connected to a PV Panel and the Power Grid
Michela Meo (Politecnico di Torino, Italy), Yi Zhang (Trinity College Dublin, Ireland), Raffaella Gerboni (Politecnico di Torino, Italy), Marco G Ajmone Marsan (Politecnico di Torino & IMDEA Networks, Italy) .................................................................................................................. 178

Energy Efficient Wireless Systems I

Dynamic Idle Mode Control in Small Cell Networks
Bahar Partov (Hamilton Institute & Alcatel-Lucent Bell Labs, Ireland), Douglas Leith (Trinity College Dublin, Ireland), Rouzbeh Razavi (Bell labs, Alcatel-Lucent, Ireland), Holger Claussen (Bell Labs, Alcatel-Lucent, Ireland) .................................................................................................................. 185

Sleep Mode Mechanisms in Dense Small Cell Networks
Edwin Mugume (University of Manchester, United Kingdom), Daniel K. C. So (University of Manchester, United Kingdom) .................................................................................................................. 192

Sleep Period Optimization Model For Layered Video Service Delivery Over eMBMS Networks
Lorenzo Carlà (Università di Firenze, Italy), Francesco Chiti (Università degli Studi di Firenze, Italy), Romano Fantacci (University of Florence, Italy), Andrea Tassi (Lancaster University, United Kingdom) .................................................................................................................. 198

Random Multicell Topology Adjustment for Greening Cellular Networks
Taesoo Kwon (ETRI, Korea), Moon-Sik Lee (Electronics and Telecommunications Research Institute & Stanford University, Korea) .................................................................................................................. 204

A Game Theoretical Approach for Cooperative Green Mobile Operators under Roaming Price Consideration
Hakim Ghazzai (Qatar Mobility Innovations Center & QMIC, Qatar), Seifallah Jardak (King Abdullah University of Science and Technology, Saudi Arabia), Elias Yaacoub (Strategic Decisions Group, Lebanon), Hong-Chuan Yang (University of Victoria, Canada), Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia) .................................................................................................................. 210

An Evolutionary Algorithm for Energy Management in Cellular Base Stations under Time-of-Use Pricing
Johann Leithon (National University of Singapore, Singapore), Sumei Sun (Institute for Infocomm Research, Singapore), Teng Joon Lim (National University of Singapore, Singapore) .................................................................................................................. 215
Energy Efficient Communications I

Energy Saving Local Control Policy for Green Reconfigurable Routers
Yifei Wei (Dublin City University, Ireland), Xiaojun Wang (Dublin City University, Ireland), Feng Guo (Dublin City University, Ireland), Gabriel Hogan (Dublin City University & ADAPT Centre for Digital Content Technology, Ireland), Martin Collier (Dublin City University, Ireland) ................................................................. 221

SAMbA: A Session Aware Multicast based Architecture for Cost-Efficient Smart Grid Applications
Helber Silva (Federal Institute at Rio Grande do Norte, Brazil), Augusto J. Venancio Neto (Federal University of Rio Grande do Norte & Centro de Ciências Exatas da Terra, Brazil), Eduardo Cerqueira (Federal University of Para & UCLA & UFPA & UCLA, Brazil), Helcio Silva (Federal Rural University of the Semi-arid (UFERSA), Brazil) ................................................................. 226

An Energy-Efficient System Signaling Control Method based on Mobile Application Traffic
Yunjian Jia (Chongqing University, P.R. China), Yu Zhang (Chongqing University, P.R. China), Liang Liang (Chongqing University, P.R. China), Sheng Zhou (Tsinghua University, P.R. China) ................................................................. 232

Weighted Tradeoff between Effective Capacity and Energy Efficiency
Wenjuan Yu (Lancaster University, United Kingdom), Leila Musavian (Lancaster University, United Kingdom), Qiang Ni (Lancaster University, United Kingdom) ................................................................. 238

Energy Efficient Communications II

Power-efficient Base Station Operation through User QoS-aware Adaptive RF Chain Switching Technique
Ranjini Garani Guruprasad (University of California, San Diego, USA), Kyuho Son (T-Mobile US, Inc., USA), Sujit Dey (University of California, San Diego, USA) ................................................................. 244

Power Efficient Multicast for Multiple Description Media in Wireless Mesh Networks
Abdulelah Alganas (McMaster University, Canada), Dongmei Zhao (McMaster University, Canada) ................................................................. 251

On the Impact of Correlated Sampling Processes in WSNs with Energy-neutral Operation
Javier Matamoros (Centre Tecnologic de Telecomunicacions de Catalunya, Spain), Miguel Calvo-Fullana (Centre Tecnològic de Telecomunicacions de Catalunya, Spain), Carles Antón-Haro (Centre Tecnològic de Telecomunicacions de Catalunya (CTTC), Spain) ................................................................. 258

ICC'15 (01) SAC 2-DSCC: IEEE ICC 2015 SAC - Data Storage and Cloud Computing

Data Storage I

Coding Scheme for 3D Vertical Flash Memory
Yongjune Kim (Carnegie Mellon University, USA), Robert Mateescu (HGST Research, USA), Seung-Hwan Song (HGST Research, USA), Zvonimir Z Bandic (SJRC Research & HGST, USA), B. V. K. Vijaya Kumar (Carnegie Mellon University, USA) ................................................................. 264

Error Analysis and Inter-Cell Interference Mitigation in Multi-Level Cell Flash Memories
Veeresh Taranalli (University of California, San Diego, USA), Hironori Uchikawa (Toshiba Corporation, Japan), Paul H. Siegel (University of California, San Diego, USA) ................................................................. 271

Spread programming for NAND flash
Tianqiong Luo (Purdue University, USA), Borja Peleato (Purdue University, USA) ................................................................. 277

Histogram-Based Flash Channel Estimation
Haobo Wang (University of California, Los Angeles, USA), Tsung-Yi Chen (Northwestern University, USA), Richard Wesel (University of California, Los Angeles, USA) ................................................................. 283

Predicting Bad Pages in NAND Flash to Improve Read Time: A Dynamic Programming Approach
Haleh Tabrizi (DSSD/EMC, USA), Rajiv Agarwal (Stanford University, USA) ................................................................. 289
BER-based wear leveling and bad block management for NAND flash
Borja Peleato (Purdue University, USA), Haleh Tabrizi (DSSD/EMC, USA), Rajiv Agarwal (Stanford University, USA), Jeffrey Ferreira (DSSD Inc., USA) ................................................................. 295

Cloud Computing - I Network Modeling and Service

FT-INDEX: A Distributed Indexing Scheme for Switch-Centric Cloud Storage System
Xiaofeng Gao (Shanghai Jiao Tong University, P.R. China), Binjie Li (Shanghai Jiao Tong University, P.R. China), Zongchen Chen (Shanghai Jiao Tong University, P.R. China), Maofan Yin (Shanghai Jiao Tong University, P.R. China), Guihai Chen (Shanghai Jiao Tong University, P.R. China), Yaohui Jin (Shanghai Jiaotong University, P.R. China) ................................................................. 301

Minimizing Average Coflow Completion Time with Decentralized Scheduling
Shouxi Luo (University of Electronic Science and Technology of China, P.R. China), Hongfang Yu (University of Electronic Science and Technology of China, P.R. China), Yangming Zhao (University of Electronic Science and Technology of China, P.R. China), Bin Wu (Tianjin University, P.R. China), Sheng Wang (University of Electronic Science and Technology of China, P.R. China), Le Min Li (University of Electronic Science and Technology of China, P.R. China) ................................................................. 307

SWF: Segmented Wildcard Forwarding for Flow Migration in OpenFlow Datacenter Networks
Kuan-Tsen Kuo (National Chiao Tung University, Taiwan), Charles H.-P. Wen (National Chiao Tung University, Taiwan), Cheng Suo (National Chiao Tung University, Taiwan), I-Chen Tsai (National Chiao Tung University, Taiwan) ................................................................. 313

Continuous Resource Allocation in Cloud Computing
Zhigang Zhou (Harbin Institute of Technology, P.R. China), Hongli Zhang (Harbin Institute of Technology, P.R. China), Xiangzhan Yu (Harbin Institute of Technology, P.R. China), Junwu Guo (Harbin Institute of Technology, P.R. China) ................................................................. 319

OSDT: A Scalable Application-Level Scheduling Scheme for TCP Incast Problem
Shuli Zhang (Institute of Information Engineering, Chinese Academy of Sciences, P.R. China), Yan Zhang (Institute of Information Engineering, Chinese Academy of Sciences, P.R. China), Yifang Qin (Chinese Academy of Sciences, P.R. China), Yanni Han (Institute of Acoustics, Chinese Academy of Sciences, P.R. China), Zhijun Zhao (Chinese Academy of Sciences, P.R. China), Song Ci (University of Nebraska-Lincoln, USA) ................................................................. 325

Cloud Computing III

Joint Admission Control and Provisioning for Virtual Machine
Liu Liu (University of Electronic Science and Technology of China, P.R. China), Jie Xu (George Mason University, USA), Hongfang Yu (University of Electronic Science and Technology of China, P.R. China), Xuetao Wei (University of Cincinnati, USA) ................................................................. 332

RETCP: A Ratio Estimation Approach For Data Center Incast Applications
Jun Zhang (Tsinghua University, P.R. China), Jiangtao Wen (Tsinghua University, P.R. China) ................................................................. 338

The Cloud Service Distribution Problem in Distributed Cloud Networks
Marc Barceló (Universitat Autònoma de Barcelona & Bell Labs, Alcatel-Lucent, Spain), Jaime Llorca (Bell Labs, Alcatel-Lucent, USA), Antonia Tulino (Bell Labs, USA), Narayan Raman (Alcatel-Lucent, USA) ................................................................. 344

Using Phoebus Data Transfer Accelerator in Cloud Environments
Miao Zhang (Indiana University, USA), Ezra Kissel (Indiana University, USA), Martin Swany (Indiana University, USA) ................................................................. 351

Adaptive Purchase Option for Multi-Tenant Data Center
Yong Zhan (University of Electronic Science and Technology of China, P.R. China), Du Xu (University of Electronic Science and Technology of China, P.R. China), Huiran Yang (University of Electronic Science and Technology of China, P.R. China), Mi Tang (University of Electronic Science and Technology of China(UESTC), P.R. China), Shuping Peng (University of Bristol, United Kingdom), Dimitra Simeonidou (University of Bristol, United Kingdom) ................................................................. 358
Distributing Very-large Content from Cloud to Smart Home Hubs: Measurement and Implications
Liang Chen (Shenzhen University, P.R. China), Suiming Guo (The Chinese University of Hong Kong, Hong Kong), Guoqiang Zhang (Xunlei Networking Technologies, P.R. China) .................................................. 364

Cloud Computing and Data Storage

Improving NAND Flash Read Performance Through Learning
Haleh Tabrizi (DSSD/EMC, USA), Borja Peleato (Purdue University, USA), Rajiv Agarwal (Stanford University, USA), Jeffrey Ferreira (DSSD Inc., USA) ................................................................. 370

Endurance Limits of MLC NAND Flash
Thomas Parnell (IBM Research - Zurich, Switzerland), Celestine Dünner (IBM Research - Zurich, Switzerland), Thomas Mittelholzer (IBM Zurich Research Laboratory, Switzerland), Nikolaos Papandreou (IBM Research - Zurich, Switzerland), Haralampos Pozidis (IBM Research, Switzerland) .................................................................................................................. 376

Baseline wander cancelation on trellis for perpendicular magnetic recording
Naveen Kumar (SK Hynix Memory Solutions, USA), Marcus Marrow (SK Hynix Memory Solutions, USA) .......................................................................................................................... 382

Secure Erasure Codes With Partial Decodability
Hoang Dau (Singapore University of Technology and Design, Singapore), Wentu Song (Singapore University of Technology and Design, Singapore), Chau Yuen (Singapore University of Technology and Design, Singapore) ................................................................................................. 388

Multi-Dimensional Scheduling in Cloud Storage Systems
Zhihao Yao (Purdue University, USA), Ioannis Papapanagiou (Purdue University, USA), Bob Callaway (NetApp & NC State University, USA) ................................................................................................................... 395

Using SDN Technology to Mitigate Congestion in the OpenStack Data Center Network
Hua-Ting Chang (National Chiao Tung University, Taiwan), Shie-Yuan Wang (National Chiao Tung University, Taiwan) .................................................................................................................. 401

Data Storage II

Iterative Symbol-Level Detection and Decoding for Nonbinary LDPC Coded 2D Intersymbol Interference Channels
Zhiliang Qin (Data Storage Institute, Singapore), Kui Cai (Singapore University of Technology and Design, Singapore), Songhua Zhang (Data Storage Institute, Singapore) ............................................ 407

Energy Optimization of LDPC Decoder Circuits with Timing Violations
François Leduc-Primeau (McGill University, Canada), Frank R. Kschischang (University of Toronto, Canada), Warren Gross (McGill University, Canada) ........................................................................................................ 412

Two-Track Joint Detection for Two-Dimensional Magnetic Recording (TDMR)
Jun Yao (Carnegie Mellon University, USA), Eui Seok Hwang (Gwangju Institute of Science and Technology, Korea), B. V. K. Vijaya Kumar (Carnegie Mellon University, USA), George Mathew (Avago Technologies, USA) ........................................................................................................ 418

Multihead Multitrack Detection in Shingled Magnetic Recording with ITI Estimation
Bing Fan (University of California San Diego & Center for Magnetic Recording Research, USA), Hemant K. Thapar (Center for Magnetic Recording Research & University of California San Diego, USA), Paul H. Siegel (University of California, San Diego, USA) .................................................................................................................. 425

Detection in the Presence of Additive Noise and Unknown Offset
Kees A. Schouhamer Immink (Turing Machines Inc., The Netherlands), Jos H. Weber (Delft University of Technology, The Netherlands) ........................................................................................................ 431

PErasure: a Parallel Cauchy Reed-Solomon Coding Library for GPUs
Xiaowen Chu (Hong Kong Baptist University, Hong Kong), Chengjian Liu (Hong Kong Baptist University, Hong Kong), Kai Ouyang (Hong Kong Baptist University, Hong Kong), Ling Sing Yung (Hong Kong Baptist University, Hong Kong), Hai Liu (Hong Kong Baptist University, Hong Kong), Yiu-Wing Leung (Hong Kong Baptist University, Hong Kong) ......................................................... 436
Optimizing the Embedding of Virtualized Cloud Network Infrastructures across Multiple Domains
Joao Soares (Ericsson Research, Sweden), Susana Sargento (Instituto de Telecomunicações, Universidade de Aveiro, Portugal) .......................................................... 442

Optimal Composition of a Virtual Sensor for Efficient Virtualization Within Sensor-cloud
Subarna Chatterjee (Junior Research Fellow, India), Sudip Misra (Indian Institute of Technology-Kharagpur, India) ........................................................................ 448

On Live Migration and Routing Integration for Delay-sensitive Cloud Services in Wireless Mesh Networks
Yuji Manaka (Osaka University, Japan), Keita Hasegawa (Osaka University, Japan), Yuki Koizumi (Osaka University, Japan), Toru Hasegawa (Osaka University, Japan) ........................................................................ 454

SmartRep: Reducing Flow Completion Times with Minimal Replication in Data Centers
Fuguang Wang (Nanjing University, P.R. China), Zhuzhong Qian (Nanjing University, P.R. China), Sheng Zhang (Nanjing University, P.R. China), Mianxiong Dong (Muroran Institute of Technology, Japan), Sanglu Lu (Nanjing University, P.R. China) ........................................................................ 460

On the Feasibility of a Network Coded Mobile Storage Cloud
Márton Sipos (Budapest University of Technology and Economics, Hungary), Frank H.P. Fitzek (Technische Universität Dresden & ComNets - Communication Networks Group, Germany), Daniel E. Lucani (Aalborg University, Denmark) ........................................................................ 466

Distributed Consensus-based Auctions for Wireless Virtual Network Embedding
Flavio Esposito (Exegy Inc., USA), Francesco Chiti (Università degli Studi di Firenze, Italy) .......................................................... 472

A Data Partitioning and Scrambling Method to Secure Cloud Storage with Healthcare Applications
Shudi Bao (Ningbo University of Technology, P.R. China), Yang Lu (Ningbo University of Technology, P.R. China), Yan-Kai Yang (Ningbo University of Technology, P.R. China), Chun-Yan Wang (Ningbo University of Technology, P.R. China), Meng Chen (Ningbo University of Technology, P.R. China), Guang-Zhong Yang (Imperial College London, United Kingdom) ........................................................................ 478

Heartbeat Detection by Using Doppler Radar with Wavelet Transform Based on Scale Factor Learning
Shoichiro Tomii (Keio University, Japan), Tomoaki Ohtsuki (Keio University, Japan) .......................................................... 483

Heart Rate Estimation Using Wrist-acquired Photoplethysmography Under Different Types of Daily Life Motion Artifact
Zhe Lin (Hong Kong University of Science and Technology, Hong Kong), Jin Zhang (South University of Science and Technology of China, P.R. China), Yanjiao Chen (University of Toronto, Canada), Qian Zhang (Hong Kong University of Science and Technology, Hong Kong) ........................................................................ 489

Activity Recognition Using Low Resolution Infrared Array Sensor
Shota Mashiyama (Keio University, Japan), Jihoon Hong (Keio University, Japan), Tomoaki Ohtsuki (Keio University, Japan) .......................................................... 495

Performance of Simple and Smart PHY/MAC Mechanisms for Body Area Networks
Ryoko Matsuo (Toshiba Corporation, Japan), Toshihisa Nabetani (Toshiba Corporation, Japan), Hirokazu Tanaka (Toshiba Corporation & Toshiba Research Europe Limited, Japan), Woon Hau Chin (Toshiba Research Europe Limited, United Kingdom), Siva Subramani (Toshiba Research Europe Limited, United Kingdom) ........................................................................ 501
ICC'15 (01) SAC 4-IoT: IEEE ICC 2015 SAC - Internet of Things

Security and Privacy in IoT

Activity Recognition Using Array Antenna
Yusuke Hino (Keio University, Japan), Jihoon Hong (Keio University, Japan), Tomoaki Ohtsuki (Keio University, Japan) .................................................................................................................. 507

Feature selection and data balancing for activity recognition in smart home
Labiba Fahad (City University London, United Kingdom), Syed Fahad Tahir (Queen Mary University of London, United Kingdom), Muttukrishnan Rajarajan (City University London, United Kingdom) .................................................................................................................. 512

Are Mobile Health Cloud Apps Better than Native?
Borja Martínez-Pérez (University of Valladolid, Spain), Isabel de la Torre (University of Valladolid, Spain), Miguel López-Coronado (University of Valladolid, Spain), Joel J. P. C. Rodrigues (Instituto de Telecomunicações, University of Beira Interior, Portugal) .................................................................................................................. 518

A RESTful Web Networking Framework for Vital Sign Monitoring
Shashi Raj Singh (National University of Singapore, Singapore), Janaka Jayasurya (National University of Singapore, Singapore), Chongyu Zhou (National University of Singapore, Singapore), Mehul Motani (National University of Singapore, Singapore) .................................................................................................................. 524

A Reliable and Energy-Efficient Leader Election Algorithm for Wireless Body Area Networks
Rongrong Zhang (University of Paris Descartes, France), Hassine Mounsla (University of Paris Descartes, France), Ahmed Mehaoua (University of Paris Descartes, France) .................................................................................................................. 530

Privacy for IoT: Involuntary Privacy Enablement for Smart Energy Systems
Arijit Ukil (Tata Consultancy Services, India), Soma Bandyopadhyay (TATA Consultancy Services, India), Arpan Pal (Tata Consultancy Services, India) .................................................................................................................. 536

The Use of Handle to Aid IoT Security
Socrates Varakliotis (University College London, United Kingdom), Peter Kirstein (University College London, United Kingdom), Giuliia Deiana (University College London, United Kingdom) .................................................................................................................. 542

Security as a CoAP resource: an optimized DTLS implementation for the IoT
Angelo T Capossele (University of Rome "La Sapienza", Italy), Valerio Cervo (University of Rome "La Sapienza", Italy), Gianluca De Cicco (University of Rome "La Sapienza", Italy), Chiara Petrioli (University of Rome "La Sapienza", Italy) .................................................................................................................. 549

Towards a Holistic Federation of Secure Crowd-enabled IoT Facilities
Constantinos Marios Angelopoulos (University of Geneva, Switzerland), Gabriel Filios (University of Patras and Computer Technology Institute, Greece), Sotiris E. Nikoletseas (University of Patras and Computer Technology Institute, Greece), Theofanis P. Raptis (University of Patras and Computer Technology Institute, Greece), Jose Rolim (University of Geneva, Switzerland), Konstantinos Veroutis (University of Patras, Greece), Sebastien Ziegler (Mandat International, Switzerland) .................................................................................................................. 555

Contextual Occupancy Detection for Smart Office by Pattern Recognition of Electricity Consumption Data
Adnan Akbar (University of Surrey, United Kingdom), Michele Nati (Digital Catapult & University of Surrey, United Kingdom), Francois Carrez (University of Surrey, United Kingdom), Klaus Moessner (University of Surrey, United Kingdom) .................................................................................................................. 561
CrowdSensing and Mobile IoT solutions

An Efficient and Truthful Pricing Mechanism for Team Formation in Crowdsourcing Markets
Qing Liu (National University of Singapore, Singapore), Tie Luo (Institute for Infocomm Research & National University of Singapore, Singapore), Ruiming Tang (National University of Singapore, Singapore), Stephane Bressan (NUS, Singapore) .......................................................... 567

A User-enabled Testbed Architecture with Mobile Crowdsensing Support for Smart, Green Buildings
Constantinos Marios Angelopoulos (University of Geneva, Switzerland), Orestis Evangelatos (University of Geneva, Switzerland), Sotiris E. Nikoletseas (University of Patras and Computer Technology Institute, Greece), Theofanis P. Raptis (University of Patras and Computer Technology Institute, Greece), Jose Rolim (University of Geneva, Switzerland), Konstantinos Veroutis (University of Patras, Greece) .................................................................................................................. 573

Accurate Detection of real-world Social Interactions with Smartphones
Niklas Palaghias (University of Surrey, United Kingdom), Seyed Amir Hoseinitabatabaei (University of Surrey, United Kingdom), Michele Nati (Digital Catapult & University of Surrey, United Kingdom), Alexander Gluhak (Intel, United Kingdom), Klaus Moessner (University of Surrey, United Kingdom) .................................................................................................................. 579

Infrastructureless Signal Source Localization using Crowdsourced data for Smart-city Applications
Fang-Jing Wu (Institute for Infocomm Research, Singapore), Tie Luo (Institute for Infocomm Research & National University of Singapore, Singapore) .................................................................................................................. 586

Collective domotic intelligence through dynamic injection of semantic rules
Panagiotis Kasnisis (National Technical University of Athens, Greece), Charalampos Z Patrikakis (Technological Educational Institute of Piraeus, Greece), Iakovos S. Venieris (National Technical University of Athens, Greece) .................................................................................................................. 592

On combining the Internet of Things with Crowdsourcing in managing emergency situations
Lambros Lambrinos (Cyprus University of Technology & Imperial College London, Cyprus) .......................................................... 598

MAC optimizations and deterministic IoT

Industrial IEEE802.15.4e Networks: Performance and Trade-offs
Thomas Watteyne (Inria & Linear Technology, Dust Networks Product Group, France), Joy Weiss (Linear Technology, USA), Lance Doherty (Linear Technology, USA), Jonathan Simon (Linear Technology, USA) .................................................................................................................. 604

Exploiting Multiple Parents in RPL to Improve both the Network Lifetime and its Stability
Oana Iova (University of Strasbourg, Italy), Fabrice Theoleyre (CNRS - University of Strasbourg, France), Thomas Noel (University of Strasbourg, France) .................................................................................................................. 610

Traffic-Aware ACB Scheme for Massive Access in Machine-to-Machine Networks
Hongliang He (Xi'an Jiaotong University, P.R. China), Qinghe Du (Xi'an Jiaotong University, P.R. China), Houbing Song (West Virginia University & West Virginia Center of Excellence for Cyber-Physical Systems, USA), Wanyu Li (Xi'an JiaoTong University, P.R. China), Yichen Wang (Xi'an Jiaotong University, P.R. China), Pinyi Ren (Xi'an JiaoTong University, P.R. China) .................................................................................................................. 617

A Delayed Random Access Speed-Up Scheme for Group Paging in Machine-Type Communications
Jenhui Chen (Chang Gung University, Taiwan), Yun-Ting Lin (Chang Gung University, Taiwan), Ray-Guang Cheng (National Taiwan University of Science and Technology, Taiwan) .............................. 623

A Coupled Processors Model for 802.11 Ad Hoc Networks Under Non Saturation
Christian Vitale (Institute IMDEA Networks & Universidad Carlos III Madrid, Spain), Gianluca A. Rizzo (HES SO Valais, Switzerland), Vincenzo Mancuso (IMDEA Networks Institute, Spain) .......................................................... 628

CAEsAR: A Context Aware Addressing and Routing Scheme for RPL Networks
Andrés Kalmár (Budapest University of Technology and Economics, Hungary), Rolland Vida (Budapest University of Technology and Economics, Hungary), Markosz Malisz (Budapest University of Technology and Economics, Hungary) .................................................................................................................. 635
IPv6 and IoT network protocols

Efficient 6LoWPAN Neighbor Discovery Applied to Multilink IoT Subnets
Thomas Watteyne (Inria & Linear Technology, Dust Networks Product Group, France), Pascal Thubert (Cisco Systems, France) .................................................................................................................. 642

Information Centric Networking in IoT scenarios: the Case of a Smart Home
Marica Amadeo (University Mediterranea of Reggio Calabria, Italy), Claudia Campolo (University Mediterranea of Reggio Calabria, Italy), Antonio Iera (University Mediterranea of Reggio Calabria, Italy), Antonella Molinaro (University Mediterranea of Reggio Calabria, Italy) .... 648

Aggregation and Scheduling in CoAP/Observa Based Wireless Sensor Networks
David Sacramento (University of Algarve, Portugal), Gabriela Schütz (University of Algarve, Portugal), Noelia Correia (University of Algarve, Portugal) .................................................................................................................. 654

Utility Maximization for Electric Vehicle Charging with Admission Control and Scheduling
Zhe Wei (University of Victoria, Canada), Jianping He (University of Victoria, Canada), Min Xing (University of Victoria, Canada), Lin Cai (University of Victoria, Canada) .......................................................... 661

MTRAC - Discovering M2M Devices in Cellular Networks from Coarse-grained Measurements
Arian Bär (Telecommunications Research Center Vienna (FTW), Austria), Philipp Svoboda (Vienna University of Technology, Austria), Pedro Casas (Telecommunications Research Center Vienna (FTW), Austria) .................................................................................................................. 667

Developing and Deploying End-to-End Interoperable & Discoverable IoT Applications
Charalampous Doukas (CREATE-NET, Italy), Fabio Antonelli (CREATE-NET, Italy) .................................................................................................................. 673

Enabling Federated Emergencies and Public Safety Answering Points with wearable and mobile Internet of Things support: An approach based on EENA and OMA LWM2M emerging standards
Antonio J. Jara (HES-SO, Switzerland), Yann Bocchi (HES-SO Valais - Wallis, Switzerland), Dominique Genoud (Hesso/Wallis - IIG, Switzerland), Ian Thomas (Fujitsu Enabling Software Technologies, United Kingdom), Lambros Lambrinos (Cyprus University of Technology & Imperial College London, Cyprus) .................................................................................................................. 679

IoT Applications and Energy Optimization

Real Time Analysis of Sensor Data for the Internet of Things by means of Clustering and Event Processing
Hugo Hromic (National University of Ireland Galway - NUIG, Ireland), Martin Serrano (National University of Ireland Galway - NUIG & Insight Centre for Data Analytics (DERI - Digital Enterprise Research Institute), Ireland), Conor Hayes (National University of Ireland Galway - NUIG, Ireland), Aleksandar Antonic (University of Zagreb, Croatia), Ivana Podnar Zarko (University of Zagreb, Croatia), Danh Le Phuoc (National University of Ireland Galway - NUIG, Ireland), Stefan Decker (National University of Ireland Galway - NUIG, Ireland) .... 685

Using a Distributed Shapley-value Based Approach to Ensure Navigability in a Social Network of Smart Objects
Leonardo Militano (Mediterranea University of Reggio Calabria, Italy), Michele Nitti (University of Cagliari, Italy), Luigi Atzori (University of Cagliari, Italy), Antonio Iera (University Mediterranea of Reggio Calabria, Italy) .................................................................................................................. 692

Exploiting IoT-based Sensed Data in Smart Buildings to Model its Energy Consumption
Maria Victoria Moreno Cano (University of Murcia, Spain), Antonio Fernando Skarmeta Gomez (University of Murcia, Spain), Luc Dufour (HES SO Valais, Switzerland), Dominique Genoud (Hesso/Wallis - IIG, Switzerland), Antonio J. Jara (HES-SO, Switzerland) .................................................................................................................. 698

An IoT-based User-centric Ecosystem for Heterogeneous Smart Home Environments
Luca Mainetti (University of Salento, Italy), Vincenzo Mighali (University of Salento, Italy), Luigi Patrono (University of Salento, Italy) .................................................................................................................. 704

Design of a Context Aware Object Model for Smart Spaces, Things, and People
Muthucumaru Maheswaran (McGill University, Canada), Yanzheng Wen (McGill University, Canada), Andrew Gowing (McGill University, Canada) .................................................................................................................. 710
ICC'15 (01) SAC 5-CSG: IEEE ICC 2015 SAC - Communications for the Smart Grid

Powerline Communication Channel Characterization and Noise Mitigation

Orthogonal Poly-Phase MC-CDMA over Multipath Power-Line Channels with Middleton Class-A Noise
Khaled M. Rabie (University of Manchester, United Kingdom), Emad Alsusa (Manchester University, United Kingdom) ......................................................... 722

Performance Analysis of Adaptive Hybrid Nonlinear Preprocessors for Impulsive Noise Mitigation over Power-Line Channels
Khaled M. Rabie (University of Manchester, United Kingdom), Emad Alsusa (Manchester University, United Kingdom) ......................................................... 728

A Novel Approach of Canceling Cyclostationary Noise in Low-Voltage Power Line Communications
Bin Han (Karlsruhe Institute of Technology (KIT), Germany), Cornelius Kaiser (Karlsruhe Institute of Technology (KIT), Germany), Klaus M. Dostert (Karlsruhe Institute of Technology (KIT), Germany) ...................................................................................... 734

On the derivation of the capacity of discrete-time narrowband PLC channels
Nir Shlezinger (Ben Gurion University, Israel), Ron Dabora (Ben-Gurion University, Israel) .............. 740

Sparse Channel State Information Acquisition for Power Line Communications
Wenbo Ding (Tsinghua University, P.R. China), Yang Lu (Imperial College London, United Kingdom), Fang Yang (Tsinghua University, P.R. China), Wei Dai (Imperial College, United Kingdom), Jian Song (Tsinghua University, P.R. China) ...................................................................................... 746

Robust Transceiver to Combat Periodic Impulsive Noise in Narrowband Powerline Communications
Jing Lin (Qualcomm, USA), Tarkesh Pande (Texas Instruments, USA), Il Han Kim (Texas Instruments, USA), Anuj Batra (Texas Instruments, USA), Brian L Evans (The University of Texas at Austin, USA) ................................................................. 752

Storage, EV Charging and Energy Management for Smart Grid

Performance Analysis of Lidar for Smart Wind Turbines
Xian Liu (University of Arkansas at Little Rock, USA), Hsiao-Chun Wu (Louisiana State University, USA) ...................................................................................... 758

Integration of IEEE C37.118 and Publish/Subscribe Communication
Michael J Hoefling (University of Tuebingen, Germany), Florian Heimgaertner (University of Tuebingen, Germany), Daniel Fuchs (University of Tuebingen, Germany), Michael Menth (University of Tuebingen, Germany), Paolo Romano (Swiss Federal Institute of Technology Lausanne (EPFL), Switzerland), Teklemariam Tsegay Tesfay (Swiss Federal Institute of Technology Lausanne (EPFL), Switzerland), Mario Paolone (Swiss Federal Institute of Technology Lausanne (EPFL), Switzerland), Jimmie Adolph (National Instruments, Sweden), Vidar Gronas (National Instruments, Norway) ...................................................................................... 764

Energy Storage Sizing for Peak Hour Utility Applications
Islam Safak Bayram (Hamad Bin Khalifa University and Qatar Environment and Energy Research Institute, Qatar), Mohamed M. Abdallah (Texas A&M University at Qatar, Qatar), Ali Tajer (Rensselaer Polytechnic Institute, USA), Khalid A. Qaraqe (Texas A&M University at Qatar, USA) ...................................................................................... 770
Privacy, Security and Performance Enhancements in Smart Grid Communication Networks

Bargaining-based Energy Trading Market for Interconnected Microgrids
Hao Wang (The Chinese University of Hong Kong, Hong Kong), Jianwei Huang (The Chinese University of Hong Kong, Hong Kong) ............................................................. 776

IP2DM for V2G Networks in Smart Grid
Wenlin Han (University of Alabama, USA), Yang Xiao (The University of Alabama, USA) ............... 782

MUSP: Multi-service, User Self-controllable and Privacy-preserving System for Smart Metering
Mustafa Asan Mustafa (The University of Manchester, United Kingdom), Ning Zhang (University of Manchester, United Kingdom), Georgios Kalogridis (Toshiba Research Europe Ltd, United Kingdom), Zhong Fan (Toshiba Research Europe, United Kingdom) ............................... 788

Proactive key dissemination-based fast authentication for in-motion inductive EV charging
Hongyang Li (University of Illinois at Urbana-Champaign, USA), György Dán (KTH Royal Institute of Technology, Sweden), Klara Nahrstedt (University of Illinois, USA) ................................. 795

A Difference-Comparison-based Approach for Malicious Meter Inspection in Neighborhood Area Smart Grids
Xiaofang Xia (SIA, USA), Wei Liang (Shenyang Institute of Automation, P.R. China), Yang Xiao (The University of Alabama, USA), Meng Zheng (Shenyang Institute of Automation, Chinese Academy of Sciences, P.R. China), Zhifeng Xiao (Penn State Erie, the Behrend College, USA) ........................................................................................................ 802

Hierarchical Wireless Network Design for Synchronphasor Communication in Distributed Generation Grid
Hamid Gharavi (NIST & ITL, USA), Bin Hu (National Institute of Standards and Technology, USA) .................................................................................................................. 808

A Time Correlated Attacker-Defender Model for Smart Grid Communication Networks
Ying Bi (University of Sydney, Australia), Abbas Jamalipour (University of Sydney, Australia) ........... 815

Uplink Scheduling for Smart Metering and Real-Time Traffic Coexistence in LTE Networks
Marco Carlesso (University of Trento, Italy), Angelos Antonopoulos (Telecommunications Technological Centre of Catalonia (CTTC), Spain), Fabrizio Granelli (University of Trento, Italy), Christos Verikoukis (Telecommunications Technological Centre of Catalonia, Spain) ............................................................ 820

Robustness of the Routing Protocol for Low-power and Lossy Networks (RPL) in Smart Grid’s Neighbor-Area Networks
Quang-Dung Ho (McGill University, Canada), Yue Gao (Mcgill University, Canada), Gowdemy Rajalingham (McGill University, Canada), Tho Le-Ngoc (McGill University, Canada) ............................................. 826

ICC'15 (01) SAC 6-SSC: IEEE ICC 2015 SAC - Satellite and Space Communications

Satellite Networking

Earth Stations Deployment for Maximizing System Throughput in Satellite/Solar-Powered Mesh Integrated Network
Shin Koseki (Tohoku University, Japan), Hiroki Nishiyama (Tohoku University, Japan), Nei Kato (Tohoku University, Japan), Byongpyo Jeong (NICt, Japan), Morio Toyoshima (National Institute of Information and Communications Technology, Japan) .................................................................................. 832

On the Throughput of the Return-Link Multi-Beam Satellite Systems using Genetic Algorithm-Based Schedulers
Behrooz Makki (Chalmers University of Technology, Sweden), Tommy Svensson (Chalmers University of Technology, Sweden), Giuseppe Cocco (German Aerospace Center (DLR), Germany), Tomaso De Cola (German Aerospace Center (DLR), Germany), Stefan Erl (German Aerospace Center (DLR), Germany) ................................................................................................. 838
Effective Resource Allocation in 5G-Satellite Networks
Giuseppe Araniti (University Mediterranea of Reggio Calabria, Italy), Massimo Condoluci (University Mediterranea of Reggio Calabria, Italy), Antonino Orsino (University Mediterranea of Reggio Calabria, Italy), Antonio Iera (University Mediterranea of Reggio Calabria, Italy), Antonella Molinaro (University Mediterranea of Reggio Calabria, Italy) .................................................. 844

On Throughput-Delay Tradeoff of Random Access over Satellite Links
Majid Ghanbarinejad (University of Alberta, Canada), Christian Schlegel (Dalhousie University, Canada), Majid Khahbazzian (University of Alberta, Canada) .................................................. 850

ME-SSA: an Advanced Random Access for the Satellite Return Channel
Gennaro Gallinaro (Space Engineering S.p.A., Italy), Nader Alagha (European Space Agency, The Netherlands), Riccardo De Gaudenzi (European Space Agency (ESA), The Netherlands), Kimmo Kansanen (Norwegian University of Science and Technology, Norway), Ralf R. Müller (FAU Erlangen-Nürnberg, Germany), Pierluigi Salvo Rossi (Norwegian University of Science and Technology, Norway) .................................................. 856

Cooperative Application Layer Joint Coding and Rate Allocation Techniques for Video Transmissions over Satellite Channels through Smartphones
Igor Bisio (University of Genoa, Italy), Stefano Delucchi (University of Genoa, Italy), Fabio Lavagetto (University of Genoa, Italy), Giulio Luzzati (University of Genoa, Italy), Mario Marchese (DIST- University of Genoa, Italy) .................................................. 862

Satellite Communications

Frequency Sharing between Satellite and Terrestrial Systems in the Ka Band: A Database Approach
Wuchen Tang (University of Surrey, United Kingdom), Paul Thompson (University of Surrey, United Kingdom), Barry Evans (University of Surrey, United Kingdom) .................................................. 867

Joint Carrier Allocation and Beamforming for Cognitive SatComs in Ka-band (17.3-18.1 GHz)
Shree Krishna Sharma (University of Luxembourg, Luxembourg), Sina Maleki (University of Luxembourg & The Interdisciplinary Centre for Security, Reliability and Trust (SnT), Luxembourg), Symeon Chatzinotas (University of Luxembourg, Luxembourg), Joel Grotz (Newtec Cy., Belgium), Jens Krause (SES S.A., Luxembourg), Björn Ottersten (University of Luxembourg, Luxembourg) .................................................. 873

Blind Satellite Inter-Gateway Interference Mitigation
Jesús Arnau (Huawei Technologies Co. Ltd. & Mathematical and Algorithmic Sciences Lab, France Research Center, France), Carlos Mosquera (University of Vigo, Spain) .................................................. 879

Co-channel interference in high-throughput multi-beam satellite systems
Erich Lutz (German Aerospace Center (DLR), Germany) .................................................. 885

An Interference Estimation Technique for Satellite Cognitive Radio Systems
Vincenzo Icolari (University of Bologna, Italy), Alessandro Guidotti (University of Bologna, Italy), Daniele Tarchi (University of Bologna, Italy), Alessandro Vanelli-Coralli (University of Bologna, Italy) .................................................. 892

On the Application of Multiuser Detection in Multibeam Satellite Systems
Giulio Colavolpe (University of Parma, Italy), Andrea Modenini (European Space Agency, The Netherlands), Amina Piemontese (University of Parma, Italy), Alessandro Ugolini (University of Parma, Italy) .................................................. 898

Satellite communications and networking

Measurement and Modeling of the UHF Satellite Channel for Animal Tracking Systems
Christian A Hofmann (Munich University of the Bundeswehr, Germany), Robert T. Schwarz (Munich University of the Bundeswehr, Germany), Andreas Knopp (Munich University of the Bundeswehr, Germany) .................................................. 903
Geometric Polarization and Faraday Effects for VHF Satellite Communication Links
Linda M. Davis (University of South Australia, Australia), David Haley (University of South Australia, Australia) ......................................................... 910

Mobile-to-Mobile Communications via Stratospheric Relays: Relay Selection and Performance Analysis
Nikolaos Nomikos (University of the Aegean, Greece), Emmanuel T. Michailidis (University of Piraeus, Greece), Demosthenes Voyioukas (University of the Aegean, Greece), Athanasios G. Kanatas (University of Piraeus, Greece) ......................................................... 916

Analysis and Assessment of the Effects of Phase Noise in Constant Envelope Multicarrier Satellite Transmissions
Claudio Sacchi (University of Trento, Italy), Ernestina Cianca (University of Rome Tor Vergata, Italy), Tommaso Rossi (University of Rome "Tor Vergata", Italy), Mauro De Sanctis (University of Rome "Tor Vergata", Italy) .................................................................................. 922

Enabling E2E Reliable Communications with Adaptive re-Encoding over Delay Tolerant Networks
Tuan Tran Thai (University of Toulouse, France), Vassanta Chaganti (University of Massachusetts, USA), Emmanuel Lochin (University of Toulouse - ISAE, France), Jerome Lacan (University of Toulouse, France), Emmanuel Dubois (CNES, France), Patrick Gelard (CNES, France) .................................................................................. 928

A Unified Performance Evaluation of Integrated Mobile Satellite Systems with Ancillary Terrestrial Component
Gervais N. Kamga (INRS, University of Quebec, Canada), Minghua Xia (INRS, University of Quebec, Canada), Sonia Aïssa (INRS, University of Quebec, Canada) .................................................................................. 934

Copper DSL Access and PLC home networks

Mitigating Disorderly Leaving Events in G.fast
Yezi Huang (Lund University, Sweden), Thomas Magesacher (Lund University, Sweden), Eduardo Medeiros (Lund University, Sweden), Chenguang Lu (Ericsson Research, Sweden), Per-Erik Eriksson (Ericsson Research, Sweden), Per Ödling (Lund University, Sweden) ......................................................... 939

Novel bitloading algorithms for coded G.fast DSL transmission with linear and nonlinear precoding
Julie Neckebroek (Ghent University, Belgium), Marc Moeneclaey (Ghent University, Belgium), Werner Coomans (Bell labs, Alcatel-Lucent, Belgium), Mamoun Guenach (Bell Laboratories, Alcatel-Lucent, Belgium), Paschalis Tsiaflakis (Bell Labs, Alcatel-Lucent, Belgium), Rodrigo B. Moraes (Alcatel-Lucent & Bell Labs, Belgium), Jochen Maes (Alcatel-Lucent Bell Labs, Belgium) .................................................................................. 945

When Priority Resolution Goes Way Too Far: An Experimental Evaluation in PLC Networks
Cristina Cano (NUI Maynooth, Ireland), David Malone (Maynooth University, Ireland) ......................................................... 952

Achievable Rates with Implementation Limitations for G.fast-based Hybrid Copper/Fiber Networks
Rainer Strobel (Technische Universität München & Lantiq Deutschland GmbH, Germany), Michael Joham (Technische Universität München, Germany), Wolfgang Utschick (Technische Universität München, Germany) .................................................................................. 958

Evaluation of Binder Management for Partially Controlled DSL Vectoring Systems
Daniel Hincapie Henao (Fraunhofer Institute for Embedded Systems and Communication Technologies ESK, Germany), Andreas Achtzehn (RWTH Aachen University, Germany), Gerhard Maierbacher (Fraunhofer Institute for Embedded Systems and Communication Technologies ESK, Germany), Marina Petrova (RWTH Aachen University, Germany) .................................................................................. 964

Comparison of Interference Mitigation Techniques for Next Generation DSL Systems
Sanda Drakulić (Forschungszentrum Telekommunikation Wien (FTW), Austria), Driton Statovci (FTW Telecommunications Research Center Vienna, Austria), Martin Wolkerstorfer (FTW Telecommunications Research Center Vienna, Austria), Thomas Zemen (AIT Austrian Institute of Technology GmbH & FTW Telecommunications Research Center Vienna, Austria) ............... 971
PON and wireless fronthaul in Access

Clipping and Predistortion for Compensation of OFDM-Radio over Fiber Link Distortion
Luis C. Vieira (Universidade Tecnológica Federal do Paraná, Brazil), Nathan J Gomes
(University of Kent, United Kingdom) 977

Increasing Coverage and Maximum CFO in DFT-s-OFDM for Machine-Type Communications
Javier Lorca (Telefonica I+D, Spain) 982

Self-Coherent Reflective FDMA-PON for next generation access and LAN architectures
Silvio Abrate (Istituto Superiore Mario Boella, Italy), Stefano Straullu (Istituto Superiore Mario Boella, Italy),
Antonino Nespoli (Istituto Superiore Mario Boella, Italy), Paolo Savio (Istituto Superiore Mario Boella, Italy),
Valter Ferrero (Politecnico di Torino, Italy), Joana Chang (Politecnico di Torino, Italy), Roberto Gaudino (Politecnico di Torino, Italy) 988

High-Speed and Low-Latency Front-haul System for Heterogeneous Wireless Networks Using Seamless Fiber-Millimeter-Wave
Tien Dat Pham (National Institute of Information and Communications Technology, Japan),
Atsushi Kanno (National Institute of Information and Communications Technology, Japan),
Tetsuya Kawanishi (National Institute of Information and Communications Technology, Japan) 994

Efficient and Dynamic Bandwidth Allocation for Non-Status Reporting Gigabit Passive Optical Networks (GPON)
Anwar Walid (Bell-labs, Alcatel Lucent, USA), Aiyou Chen (Google, USA) 1000

Refining the GIANT dynamic bandwidth allocation mechanism for XG-PON
Jerome A Arokkiam (University College Cork & CTVR, Ireland), Kenneth N Brown (University College Cork, Ireland),
Cormac J. Sreenan (University College Cork, Ireland) 1006

Access Networks and Systems

Delay improved Media Access Control for Passive Optical Networks
Sebastian Scholz (University of Stuttgart, Germany) 1012

Lightweight Privacy-Preserving Passive Measurement for Home Networks
Xuzi Zhou (University of Kentucky, USA), Ken Calvert (University of Kentucky, USA) 1019

Tracing of Hardware Addresses in Layer Two Bridged Networks
Thorsten Scholz (HYTEC Geraetebau GmbH, Germany), Janis Kruse (HYTEC Geraetebau GmbH, Germany) 1025

Enabling DSL and Radio on the Same Copper Pair
Yezi Huang (Lund University, Sweden), Eduardo Medeiros (Lund University, Sweden), Stefan Höst (Lund University, Sweden),
Thomas Magesacher (Lund University, Sweden), Per-Erik Eriksson (Ericsson Research, Sweden),
Chenguang Lu (Ericsson Research, Sweden), Per Ödling (Lund University, Sweden), Per Ola Börjesson (Dept. of Electrical and Information Technology Lund University, Sweden) 1031

Implementation and Experimental Evaluation of a Collision-Free MAC Protocol for WLANs
Luis Sanabria-Russo (Universitat Pompeu Fabra, Spain), Francesco Gringoli (University of Brescia, Italy),
Jaume Barcelo (Universitat Pompeu Fabra, Spain), Boris Bellalta (Universitat Pompeu Fabra, Spain) 1036

ICC’15 (01) SAC 8-NMQN: IEEE ICC 2015 SAC - Nanoscale, Molecular and Quantum Networking

Nanoscale, molecular, and quantum networking: Communication- and information-theoretic aspects

A Fundamental Framework for Molecular Communication Channels: timing & payload
Christopher Rose (Brown University, USA), I. Saira Mian (LBNL, USA) 1043
Nanoscale, molecular, and quantum networking: Applications, implementations, and experiments

**Self-Orthogonal Convolutional Codes (SOCCs) for Diffusion-Based Molecular Communication Systems**
Yi Lu (University of Warwick, United Kingdom), Matthew D Higgins (University of Warwick, United Kingdom), Mark S Leeson (University of Warwick, United Kingdom) ................................................................. 1049

**A Universal Channel Model for Molecular Communication Systems with Metal-Oxide Detectors**
Na-Rae Kim (Yonsei University, Korea), Nariman Farsad (York University, Canada), Chan-Byoung Chae (Yonsei University, Korea), Andrew Eckford (York University, Canada) ......................................................... 1054

**Capacity of LTI-Poisson Channel for Diffusion based Molecular Communication**
Gholamali Aminian (Sharif University of Technology, Iran), Hamidreza Arjmandi (Sharif University of Technology, Iran), Masoumeh Nasiri-Kenari (Sharif University of Technology, Iran), Urbanas Mitra (University of Southern California, USA) ..................................................................................................... 1060

**Adaptive Molecule Transmission Rate for Diffusion Based Molecular Communication**
Mohammad Movahednasab (Sharif University of Technology, Iran), Mehdi Soleimanifar (Sharif University of Technology, Iran), Masoumeh Nasiri-Kenari (Sharif University of Technology, Iran), Urbanas Mitra (University of Southern California, USA) ................................................................. 1066

**Capacity of electron-based communication over bacterial cables: the full-CSI case with binary inputs**
Nicolò Michelusi (University of Southern California, USA), Urbanas Mitra (University of Southern California, USA) ........................................................................................................... 1072

**Inbody Mobile Bionanosensor Networks Through Non-diffusion-based Molecular Communication**
Takuya Obuchi (Osaka University, Japan), Yutaka Okaie (Osaka University, Japan), Takahiro Hara (Osaka University, Japan), Shojiro Nishio (Osaka University, Japan) ..................................................................................................... 1078

**Under-Water Molecular Signalling: a Hidden Transmitter and Absent Receivers Problem**
Song Qiu (University of Warwick, United Kingdom), Nariman Farsad (York University, Canada), Yin Yao Dong (University of Oxford, United Kingdom), Andrew Eckford (York University, Canada), Weisi Guo (University of Warwick, United Kingdom) ......................................................... 1085

**A Touchable Molecular Communication Model of Targeted Contrast Agent Delivery**
Yifan Chen (South University of Science and Technology of China, P.R. China), Panagiotis Kosmas (King's College London, United Kingdom), Putri Anwar (South University of Science and Technology of China, USA), Limin Huang (South University of Science and Technology of China, P.R. China) ........................................................................................................... 1091

**Molecular Barcodes: Information Transmission via Persistent Chemical Tags**
Linchchen Wang (York University, Canada), Nariman Farsad (York University, Canada), Weisi Guo (University of Warwick, United Kingdom), Sebastian Magierowski (York University, Canada), Andrew Eckford (York University, Canada) .......................................................................................................................... 1097

**Transmitting information with microfluidic systems**
Andrea Biral (University of Padova, Italy), Davide Zordan (University of Padova, Italy), Andrea Zanella (University of Padova, Italy) ........................................................................................................... 1103

**Multi-Scale Stochastic Simulation for Diffusive Molecular Communication**
Adam Noel (University of British Columbia, Canada), Karen C Cheung (University of British Columbia, Canada), Robert Schober (University of British Columbia, Canada) ................................................................. 1109
Nanoscale, molecular, and quantum networking: Models and algorithms

Communication Theory Aspects of Synaptic Transmission
Mladen Veletić (Norwegian University of Science & Technology, Norway), Fabio Mesiti (Norwegian University of Science and Technology, Norway), Pål Anders Floor (Oslo University Hospital, Norway), Ilangko Balasingham (Norwegian University of Science & Technology & Oslo University Hospital, Norway) ................................................................. 1116

Detection Algorithms for Molecular MIMO
Bonhong Koo (Yonsei University, Korea), Huseyin Birkan Yilmaz (Yonsei University, Yonsei Institute of Convergence Technology & Bogazici University, Korea), Chan-Byoung Chae (Yonsei University, Korea), Andrew Eckford (York University, Canada) ................................................................. 1122

Error Detection in Diffusion-based Molecular Communication
Arash Einolghozati (Georgia Tech, USA), Faramarz Fekri (Georgia Institute of Technology, USA) ................................................................................................. 1128

An Algorithmic Distance Estimation Scheme for Diffusion Based Molecular Communication Systems
Xiayang Wang (University of Warwick, United Kingdom), Matthew D Higgins (University of Warwick, United Kingdom), Mark S Leeson (University of Warwick, United Kingdom) ................................................................. 1134

Multiscale Modeling of Biological Communication
Navid Azizan Ruhi (University of Southern California, USA), Paul Bogdan (Univ of Southern California, USA) ................................................................................................. 1140

ICC'15 (01) SAC 9-SN: IEEE ICC 2015 SAC - Social Networking

Security, Trust and Profiling in Social Networks

Snooping Wikipedia Vandals with MapReduce
Michele Spina (Telecom ParisTech, France), Dario Rossi (Telecom ParisTech, France), Mauro Sozio (Institut Mines-Télécom, France, France), Silviu Maniu (Telecom ParisTech, France), Bogdan Cautis (TELECOM ParisTech, France) ................................................................. 1146

Monitor Placement to Timely Detect Misinformation in Online Social Networks
Huiling Zhang (University of Florida, USA), Md Abdul Alim (University of Florida, USA), My T. Thai (University of Florida, USA), Hien T. Nguyen (Ton Duc Thang University, Vietnam) ................................................................. 1152

Profiling the Followers of the Most Influential and Verified Users on Sina Weibo
Huiyu Wang (Peking University, P.R. China), Kai Lei (Peking University, P.R. China), Kuai Xu (Arizona State University, USA) ................................................................................................. 1158

CLPP: Context-aware Location Privacy Protection for Location-based Social Network
Hongli Zhang (Harbin Institute of Technology, P.R. China), Zhikai Xu (Harbin Institute of Technology, P.R. China), Zhigang Zhou (Harbin Institute of Technology, P.R. China), Jiantao Shi (Harbin Institute of Technology, P.R. China), Xiaojian Du (Temple University, USA) ................................................................. 1164

Dynamically Blocking Contagions in Complex Networks by Cutting Vital Connections
Pavlos Basaras (University of Thessaly, Greece), Dimitrios Katsaros (University of Thessaly, Greece), Leandros Tassiulas (Yale University, USA) ................................................................................................. 1170

Trust-Aware Optimal Crowdsourcing With Budget Constraint
Xiangyang Liu (University of Maryland, College Park, USA), He He (University of Maryland College Park, USA), John S. Baras (University of Maryland College Park, USA) ................................................................. 1176

Data Discovery and Applications in Social Networks

Extracting Unknown Words from Sina Weibo via Data Clustering
Kai Lei (Peking University, P.R. China), Wei Yang Zhang (Peking University, P.R. China), Kai Zhang (Peking University, P.R. China), Kuai Xu (Arizona State University, USA) ................................................................. 1182
Applications and Social Networks

*Joint Optimization of Throwbox Deployment and Storage Allocation in Mobile Social Networks*
Bo Fan (University of Electronic Science and Technology of China, P.R. China), Supeng Leng (University of Electronic Science and Technology of China, P.R. China), Caixing Shao (University of Electronic Science and Technology of China, P.R. China), Yan Zhang (Simula Research Laboratory and University of Oslo, Norway), Kun Yang (University of Essex, United Kingdom) .......................................................................................................................... 1213

*Opportunistic Dissemination using Context-Based Data Aggregation over Interest Spaces*
Radu Ciobanu (University Politehnica of Bucharest, Romania), Radu C Marin (Polytechnic University of Bucharest, Romania), Ciprian Dobre (University Politehnica of Bucharest, Romania), Valentin Cristea (University Politehnica of Bucharest, Romania), Constandinos X. Mavromoustakis (University of Nicosia, Cyprus), George Mastorakis (Technological Educational Institute of Crete, Greece) ...................................................................................................................... 1219

*Resource Allocation for Cloud-based Social TV Applications Using Particle Swarm Optimization*
Gosala Kulupana (University of Surrey, United Kingdom), Dumidu S. Talagala (University of Surrey, United Kingdom), Hemantha Kodikara Arachchi (University of Surrey, United Kingdom), Anil Fernando (Center for Communications Research. University of Surrey, United Kingdom) ...................................................................................................................... 1226

*Personalized Online Video Recommendations by Using Adaptive Feedback Control Frameworks*
Zhen Zhang (Beijing Institute of Technology, P.R. China), Jigao Fu (Beijing Institute of Technology, P.R. China), Alvin Chin (University of Toronto, Canada), Jon Crowcroft (University of Cambridge, United Kingdom) ...................................................................................................................... 1232

Modeling and Structure of Social Networks

*Weighted Label Propagation Algorithm for Overlapping Community Detection*
Chao Tong (Beihang University, P.R. China), Jianwei Niu (Beihang University, P.R. China), Jinming Wen (McGill University, France), Zhongyu Xie (Beihang University, P.R. China), Fu Peng (The Chinese University of Hong Kong, Hong Kong) .......................................................................................................................... 1238

*Modeling Video Viewing and Sharing Behaviors in Online Social Networks*
Yi Long (The University of Hong Kong, P.R. China), Victor O. K. Li (University of Hong Kong, P.R. China), Guolin Niu (The University of Hong Kong, P.R. China) .......................................................................................................................... 1244
**ICC'15 (01) SAC10-MWC: IEEE ICC 2015 SAC - Millimeter-wave Communications**

**Link Prediction for New Users in Social Networks**
Xiao Han (Institut Telecom, Telecom SudParis, France), Leye Wang (Institut Mines Télécom, SudParis, France), Son N. Han (Institut Mines-Telecom, Telecom SudParis, France), Chao Chen (Institut TELECOM & Management SudParis, France), Noel Crespi (Institut Mines-Télécom, Télécom SudParis, France), Reza Farahbakhsh (Institut Mines-Telecom, Telecom Sud-Paris & Paris VI, France) ................................................................. 1250

**CITEX: A new citation index to measure the relative importance of authors and papers in scientific publications**
Arindam Pal (TCS Research, India), Sushmita Ruj (Indian Statistical Institute, Kolkata, India) ..... 1256

**Information Cascades in Social Networks via Dynamic System Analyses**
Shao-Lun Huang (Massachusetts Institute of Technology, USA), Kwang-Cheng Chen (National Taiwan University, Taiwan) ................................................................. 1262

**Estimating the Size and Average Degree of Online Social Networks at the Extreme**
Emrah Cem (University of Texas at Dallas, USA), Kamil Sarac (University of Texas at Dallas, USA) ................................................................. 1268

**Joint Estimation and Compensation of Transmitter and Receiver IQ Imbalances in Millimeter-Wave SC-FDE Systems**
Xiantao Cheng (University of Electronic Science and Technology of China, P.R. China), Zengqiang Luo (University of Electronic Science and Technology of China, P.R. China), Jinglei Liu (University of Electronic Science and Technology of China, P.R. China) ................................. 1274

**Phase Noise and Frequency Offset Compensation in High Frequency MIMO-OFDM System**
Huang Huang (Huawei Technologies Co., Ltd., P.R. China), Guangjian Wang (Huawei Technologies, P.R. China), Jia He (Huawei Technologies Co., Ltd., P.R. China) ................................................................. 1280

**A molecular noise model for THz channels**
Pavel Boronin (The Bonch-Bruevich Saint-Petersburg State University of Telecommunications, Finland), Dmitri Moltchanov (Tampere University of Technology, Finland), Yevgeni Koucheryavy (Tampere University of Technology, Finland) ................................................................. 1286

**Beam-searching and Transmission Scheduling in Millimeter Wave Communications**
Hossein Shokri-Ghadikolaei (KTH, Royal Institute of Technology, Sweden), Lazaros Gkatzikis (Mathematical and Algorithmic Sciences Lab, France Research Center, Huawei Technologies Co. Ltd., France), Carlo Fischione (KTH, Sweden) ................................................................. 1292

**Codebook Design for Hybrid Beamforming in Millimeter Wave Systems**
Jiho Song (Purdue University, USA), Junil Choi (The University of Texas at Austin, USA), David Love (Purdue University, USA) ................................................................. 1298

**Fast Channel Estimation for Millimetre Wave Wireless Systems Using Overlapped Beam Patterns**
Matthew Kokshoorn (University of Sydney, Australia), Peng Wang (The University of Sydney, Australia), Yonghui Li (University of Sydney, Australia), Branka Vucetic (University of Sydney, Australia) ................................................................. 1304

**Millimeter-wave networking**

**MmWave Ad Hoc Network Coverage and Capacity**
Andrew Thornburg (The University of Texas at Austin, USA), Tianyang Bai (The University of Texas at Austin, USA), Robert Heath (The University of Texas at Austin, USA) ................................................................. 1310

**Efficient analog multiband channelization for bandwidth scaling in mm-wave systems**
Hossein Roufarshbaf (University of California, Santa Barbara, USA), Upamanyu Madhow (University of California, Santa Barbara, USA), Mark J W Rodwell (University of California, Santa Barbara, USA), Sridhar Rajagopal (Samsung Research America - Dallas, USA) ................................................................. 1316
Advanced spatial diversity in millimeter-wave communications

Multi-Device Multi-Path Beamforming Training for 60-GHz Millimeter-Wave Communications
Bo Gao (Tsinghua University, P.R. China), Zhenyu Xiao (Beihang University, P.R. China), Li Su (Tsinghua University, P.R. China), Zhen Chen (Nanjing University, P.R. China), Depeng Jin (Tsinghua University, P.R. China), Lieguang Zeng (Tsinghua University, P.R. China) .................................................. 1328

Near-Optimal Hybrid Analog and Digital Precoding for Downlink mmWave Massive MIMO Systems
Linglong Dai (Tsinghua University, P.R. China), Xinyu Gao (Tsinghua University, P.R. China), Jinguo Quan (Tsinghua University, P.R. China), Shuangfeng Han (China Mobile, P.R. China), Chih-Lin I (China Mobile Research Institute, P.R. China) .................................................. 1334

Low Complexity Hybrid Sparse Precoding and Combining in Millimeter Wave MIMO Systems
Cristian Rusu (University of Vigo, Spain), Roi Méndez-Rial (University of Vigo, Spain), Nuria González-Prelcic (Universidad de Vigo, Spain), Robert Heath (The University of Texas at Austin, USA) .................................................. 1340

Hybrid Radio Frequency Beamforming and Baseband Precoding for Downlink MU-MIMO mmWave Channels
Lin-Kai Chiu (National Chiao Tung University, Taiwan), Sau-Hsuan Wu (National Chiao Tung University, Taiwan) .................................................. 1346

Blind Phase Noise Mitigation for a 72 GHz Millimeter Wave System
Timothy A. Thomas (Nokia, USA), Mark Cudak (Nokia Networks, USA), Tom Kovarik (Nokia Networks, USA) .................................................. 1352

Methods and Measurements of Channel Phase difference in 2x2 Microwave LOS-MIMO Systems
Lei Bao (Ericsson AB, Sweden), Bengt-Erik Olsson (Ericsson AB, Sweden) .................................................. 1358

Experimental Demonstrations of millimeter-wave systems

10-Gb/s Wireless Signal Transmission over a Seamless IM/DD Fiber-MMW System at 92.5 GHz
Tu Lam Thanh (Posts and Telecommunications Institute of Technology, Vietnam), Tien Dat Pham (National Institute of Information and Communications Technology, Japan), Atsushi Kanno (National Institute of Information and Communications Technology, Japan), Tetsuya Kawanishi (National Institute of Information and Communications Technology, Japan), Vo Nguyen Quoc Bao (Posts and Telecommunications Institute of Technology, Vietnam) .................................................. 1364

Experimental Measurements of Multipath-Induced Intra- and Inter-Channel Crosstalk Effects in a Millimeter-Wave Communications Link using Orbital-Angular-Momentum Multiplexing
Yan Yan (University of Southern California, USA), Long Li (University of Southern California, USA), Guodong Xie (University of Southern California, USA), Changjing Bao (University of Southern California, USA), Peicheng Liao (University of Southern California, USA), Hao Huang (University of Southern California, USA), Yongxiong Ren (University of Southern California, USA), Nisar Ahmed (University of Southern California, USA), Zhe Zhao (University of Southern California, USA), Martin Lavery (University of Glasgow, United Kingdom), Nima Ashrafi (University of Texas at Dallas & NxtGen Partners, USA), Solomyan Ashrafi (NxtGen Partners, USA), Shilpa Talwar (Intel, USA), Soji Sajuyigbe (Intel Labs, Intel Corporation, USA), Moshe Tur (Tel Aviv University, Israel), Andreas Molisch (University of Southern California, USA), Alan Willner (University of Southern California, USA) .................................................. 1370

Comparison of OFDM standards for 60GHz SMF-MMF radio over fiber links
Spiros Mikroulis (University College London, United Kingdom), Manoj Thakur (University College London, United Kingdom), John Mitchell (University College London, United Kingdom) .................................................. 1376
Coverage and Channel Characteristics of Millimeter Wave Band Using Ray Tracing
Jung Ryu (Qualcomm CRD, USA), Zhenliang Zhang (Qualcomm Flarion Technology, USA), Sundar Subramanian (Qualcomm & Qualcomm, USA), Ashwin Sampath (Qualcomm, USA) ............................................. 1380

Investigation into the Effects of Polarization in the Indoor mmWave Environment
Timothy A. Thomas (Nokia, USA), Frederick W. Vook (Nokia Networks, USA), Shu Sun (NYU WIRELESS & New York University, USA) .................................................................................................. 1386

Experimental Demonstration of 16-Gbit/s Millimeter-Wave Communications Link using Thin Metamaterial Plates to Generate Data-Carrying Orbital-Angular-Momentum Beams
Zhe Zhao (University of Southern California, USA), Yongxiong Ren (University of Southern California, USA), Guodong Xie (University of Southern California, USA), Yan Yan (University of Southern California, USA), Long Li (University of Southern California, USA), Hao Huang (University of Southern California, USA), Changjing Bao (University of Southern California, USA), Nisar Ahmed (University of Southern California, USA), Martin Lavery (University of Glasgow, USA), Chongfu Zhang (University of Electronic Science and Technology of China, P.R. China), Nima Ashrafi (University of Texas at Dallas & NxGen Partners, USA), Solym Ashrafi (NxGen Partners, USA), Shilpa Talwar (Intel, USA), Soji Sajuyigbe (Intel Labs, Intel Corporation, USA), Moshe Tur (Tel Aviv University, Israel), Andreas Molisch (University of Southern California, USA), Alan Willner (University of Southern California, USA) .................................................. 1392

**ICC'15 (02) WC: IEEE ICC 2015 - Wireless Communications Symposium**

**Cognitive Radio**

Analysis of maximally improper signaling schemes for underlay cognitive radio networks
Christian Lameiro (University of Cantabria, Spain), Ignacio Santamaría (University of Cantabria, Spain), Peter J. Schreier (Universitaet Paderborn, Germany) .................................................. 1398

Goodput-maximizing Resource Allocation in Cognitive Radio BIC-OFDM systems with DF Relay Selection
Jeroen Van Hecke (Ghent University, Belgium), Paolo Del Fiorentino (University of Pisa, Italy), Riccardo Andreotti (University of Pisa, Italy), Vincenzo Lottici (University of Pisa, Italy), Filippo Giannetti (University of Pisa, Italy), Luc Vandendorpe (Université catholique de Louvain, Belgium), Marc Moeneclaey (Ghent University, Belgium) .................................................. 1404

AUC Study of Energy Detection Based Spectrum Sensing over $\eta-\mu$ and $\alpha-\mu$ Fading Channels
Alireza Bagheri (Semnan University, Iran), Paschalis C. Sofotasios (Tampere University of Technology & Aristotle University of Thessaloniki, Finland), Theodoros Tsiftsis (Technological Educational Institute of Central Greece, Greece), Ali Shahzadi (Semnan University, Iran), Mikko Valkama (Tampere University of Technology, Finland) ................................................................. 1410

Repeater for 5G Wireless: A Complementary Contender for Spectrum Sensing Intelligence
Shree Krishna Sharma (University of Luxembourg, Luxemburg), Mohammad N Patwary (Staffordshire University, Stafford, United Kingdom), Symeon Chatzinotas (University of Luxembourg, Luxemburg), Björn Ottersten (University of Luxembourg, Luxemburg), Mohamed Abdel-Maguid (University Campus Suffolk, United Kingdom) ................................................................. 1416

Background Detection of Primary User Activity in Opportunistic Spectrum Access
Juan Jose Alcaraz (Universidad Politécnica de Cartagena, Spain), Mario López-Martinez (Technical University of Cartagena, Spain), Javier Vales-Alonso (Universidad Politécnica de Cartagena, Spain), Joan Garcia-Haro (Technical University of Cartagena, Spain) .................................................. 1422

Power Control for Cognitive Radio Systems with Unslotted Primary Users Under Sensing Uncertainty
Gozde Ozcan (Syracuse University, USA), M. Cenk Gursoy (Syracuse University, USA), Jian Tang (Syracuse University, USA) ................................................................. 1428
Massive MIMO

Secure Massive MIMO Transmission in the Presence of an Active Eavesdropper
Yongpeng Wu (University of Erlangen-Nuremberg, Germany), Robert Schober (Universität Erlangen-Nürnberg, Germany), Derrick Wing Kwan Ng (Friedrich-Alexander-University Erlangen-Nürnberg, Germany), Chengshan Xiao (Missouri University of Science and Technology, USA), Giuseppe Caire (Technische Universität Berlin, Germany) 1434

Spatial Separation of Closely-Spaced Users in Measured Massive Multi-User MIMO Channels
Jose Flordelis (Lund University, Sweden), Xiang Gao (Lund University, Sweden), Ghassan S Dahman (Lund University, Sweden), Fredrik Rusek (Lund University, Sweden), Ove Edfors (Lund University, Sweden), Fredrik Tufvesson (Lund University, Sweden) 1441

Channel Modeling and Capacity Analysis of Large MIMO in Real Propagation Environments
Gervais N. Kamga (INRS, University of Quebec, Canada), Minghua Xia (INRS, University of Quebec, Canada), Sonia Aïssa (INRS, University of Quebec, Canada) 1447

Achievable Sum-Rate of Multiuser Massive MIMO Downlink in Ricean Fading Channels
WeiQiang Tan (Southeast University, P.R. China), Shi Jin (Southeast University, P.R. China), Jue Wang (Nantong University, P.R. China), Michail Matthaiou (Queen’s University Belfast, United Kingdom) 1453

Compressed CSI Acquisition in FDD Massive MIMO with Partial Support Information
Juei Chin Shen (MediaTek, Taiwan), Jun Zhang (The Hong Kong University of Science and Technology, Hong Kong), Emad Alsusa (Manchester University, United Kingdom), Khaled B. Letaief (The Hong Kong University of Science and Technology, Hong Kong) 1459

Exploiting the Preferred Domain of FDD Massive MIMO Systems with Uniform Planar Arrays
Junil Choi (The University of Texas at Austin, USA), Taeyoung Kim (Samsung Electronics, Korea), David Love (Purdue University, USA), Ji-Yun Seol (Samsung Electronics, Korea) 1465

Small cells and heterogeneous Networks

Optimal Total-Downlink-Transmitting-Power and Subchannel Allocation for Green Cellular Networks
Limei Guo (Central South University, USA), Hsiao-Chun Wu (Louisiana State University, USA), Yiyian Wu (Communications Research Centre, Canada), Xian Liu (University of Arkansas at Little Rock, USA) 1471

Stochastic Geometry Analysis of Multi-User MIMO Cellular Networks Using Zero-Forcing Precoding
Wei Lu (L2S UMR 8506 & CNRS - Supélec - Université paris Sud 11, France), Marco Di Renzo (French National Center for Scientific Research (CNRS), France) 1477

C-RNTI Management for Orthogonally-Filled Subframes in LTE Heterogeneous Networks
Stepan Kucera (Bell Labs, Alcatel-Lucent Ltd., Ireland), David López-Pérez (Bell Labs Alcatel-Lucent, Ireland) 1483

An Outage-Based Transmission Strategy for MIMO Femtocells
Tianxiang Luan (Tsinghua University & Institute of China Electronic System Engineering Company, P.R. China), Feifei Gao (Tsinghua University, P.R. China), James C. F. Li (NEC Laboratories China, P.R. China) 1489

Co-primary inter-operator spectrum sharing over a limited spectrum pool using repeated games
Bikramjit Singh (Aalto University, Finland), Konstantinos Koufos (Aalto University, Finland), Olav Tirkkonen (Aalto University, Finland), Randall A Berry (Northwestern University, USA) 1494

Optimization on Power Splitting Ratio Design for K-tier HCNs with Opportunistic Energy Harvesting
Yongce Chen (Beijing University of Posts and Telecommunications, P.R. China), Ying Wang (Beijing University of Posts and Telecommunications, P.R. China), Ran Zhang (University of Waterloo, Canada), Sherman Shen (University of Waterloo, Canada) 1500
Cooperative networks and relaying

**Power Management Game for Cooperative Localization in Asynchronous Networks**
Junting Chen (Massachusetts Institute of Technology, Hong Kong), Wenhan Dai (Massachusetts Institute of Technology, USA), Yuan Shen (Tsinghua University & Massachusetts Institute of Technology, P.R. China), Vincent Lau (Hong Kong University of Science and Technology, Hong Kong), Moe Win (Massachusetts Institute of Technology, USA) \(\pmb{1506}\)

**Performance Study of Relay Coordination Schemes for Two-Hop Networks: Two-Cell Case**
Kasun T. Hemachandra (University of Alberta, Canada), Norman C Beaulieu (Beijing University of Posts and Telecommunications BUPT, P.R. China) \(\pmb{1512}\)

**Differential Spatial Modulation for Dual-hop Amplify-and-Forward Relaying**
Meng Zhang (Peking University, P.R. China), Miaowen Wen (South China University of Technology, P.R. China), Xiang Cheng (Peking University, P.R. China), Liuqing Yang (Colorado State University, USA) \(\pmb{1518}\)

**Multi-Antenna Cognitive AF Relay Systems with Multiple Primary Receivers**
Imene Trigui (INRS - Centre Energie, Matériaux et Télécommunications, Canada), Imen Mechmeche (INRS-EMT, Canada), Sofiene Affes (INRS-EMT, Canada), Alex Stéphenne (Ericsson & INRS-EMT, Canada) \(\pmb{1524}\)

**Effective Area Spectral Efficiency Metric for Decode-and-Forward Cooperative Wireless Communications**
Aymen Omri (Qatar University, Qatar), Mazen Omar Hasna (Qatar University, Qatar), Mohammed Nafie (Cairo University & Nile University, Egypt) \(\pmb{1529}\)

**Adaptive Relay-Aided OFDM Underwater Acoustic Communications**
Xilin Cheng (Colorado State University, USA), Liuqing Yang (Colorado State University, USA), Xiang Cheng (Peking University, P.R. China) \(\pmb{1535}\)

WLAN

**Throughput Optimization of Non-real-time Flows with Delay Guarantee of Real-time Flows in WLANs**
Yayu Gao (Huazhong University of Science and Technology, P.R. China), Lin Dai (City University of Hong Kong, Hong Kong), Xiaojun Hei (Huazhong University of Science and Technology, P.R. China) \(\pmb{1541}\)

**Enhancement of Wide Bandwidth Operation in IEEE 802.11ac Networks**
Seongho Byeon (Seoul National University, Korea), Changmok Yang (Seoul National University, Korea), Okhwan Lee (Samsung Electronics, Korea), Kangjin Yoon (Seoul National University, Korea), Sunghyun Choi (Seoul National University, Korea) \(\pmb{1547}\)

**RSS-eye: Human-assisted Indoor Localization without Radio Maps**
Pierluigi Gallo (University of Palermo, Italy), Stefano Mangione (Università di Palermo, Italy) \(\pmb{1553}\)

**Energy Efficient Cooperative Transmission in Single-Relay UWB Based Body Area Networks**
Jie Ding (Macquarie University, Australia), Eryk Dutkiewicz (Macquarie University, Australia), Xiaojing Huang (University of Technology, Sydney, Australia), Gengfa Fang (Macquarie University, Australia) \(\pmb{1559}\)

**Detecting Co-located Mobile Users**
Marzieh Dashti (Bell Labs, Alcatel-Lucent, Ireland), Mohd Amiruddin Abd Rahman (University of Sheffield, United Kingdom), Hamed Mahmoudi (Bell Labs, Alcatel-Lucent, Ireland), Holger Claussen (Bell Labs, Alcatel-Lucent, Ireland) \(\pmb{1565}\)

**Online Channel Selection and User Association in High-density WiFi Networks**
Lingzhi Wang (Shanghai Jiao Tong University, P.R. China), Cunqing Hua (Shanghai Jiao Tong University, P.R. China), Rong Zheng (McMaster University, Canada), Rui Ni (Huawei Technologies Co Ltd, P.R. China) \(\pmb{1571}\)
### Cooperative networks and relaying

**On the Sum Capacity of Cluster-based Cooperative Cellular Networks**  
Rajitha Senanayake (University of Melbourne, Australia), Phee Lep Yeoh (University of Melbourne, Australia), Jamie Evans (Monash University, Australia) ......................................................................................................................... 1613

**Adaptation of Decode-Forward Two-Way Relaying to Fading Links: a Rate and Power Analysis**  
Lisa Pinals (Tufts University, USA), Mai Vu (Tufts University, USA) ......................................................................................................................... 1619

**Computationally Efficient Relay-Source Antenna Selection for MIMO Two-Way Relay Networks**  
Yuehua Yu (The University of Sydney, Australia), Peng Wang (The University of Sydney, Australia), Yonghui Li (University of Sydney, Australia), Branka Vucetic (The University of Sydney, Australia) ......................................................................................................................... 1625

**Compute-and-Forward Protocol Design Based on Improved Sphere Decoding**  
Jinming Wen (McGill University, France), Baojian Zhou (The Hong Kong University of Science and Technology, Hong Kong), Wai Ho Mow (Hong Kong University of Science and Technology & HKUST, Hong Kong), Xiao-Wen Chang (McGill University, Canada) ......................................................................................................................... 1631

**A Cooperation Framework for Traffic Offloading in Cellular Systems**  
Diep N. Nguyen (University of Arizona, USA), Iain B. Collings (Macquarie University, Australia), Stephen Hanly (Macquarie University, Australia), Phil Whiting (Bell Labs, Lucent Technologies, USA) ......................................................................................................................... 1637

**Two-Way CSI-Assisted AF Relaying with HPA Nonlinearity**  
Jian Qi (University of Reading, United Kingdom), Sonia Aïssa (INRS, University of Quebec, Canada), Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia) ......................................................................................................................... 1643
Interference management and resource allocation

Downlink Interference Analytical Predictions under Shadowing within Irregular Multi-Cell Deployments
Fatima Zohra Kaddour (CEA - Leti, France), Benoit Denis (CEA-Leti Minatec, France), Dimitri Kténas (CEA, France) .................................................................................................................................................................................1649

Normal Inverse Gaussian Approximation to Downlink Inter-cell Interference
Xiaojun Yan (Shanghai Institute of Microsystem and Information Technology(SIMIT) & Shanghai Research Center for Wireless Communications(WiCO), P.R. China), Jing Xu (Shanghai Research Center for Wireless Communications, P.R. China), Yuanping Zhu (Shanghai Institute of Microsystem and Information Technology, Chinese Academy of Sciences & Shanghai Research Center for Wireless Communications, P.R. China), Yang Yang (Shanghai Research Center for Wireless Communications & CAS Shanghai Institute of System and Information Technology, P.R. China), Guoping Tan (Hohai University, P.R. China) .................................................................................................................................................................................1655

A Distributed Scheduling with Interference-Aware Power Control for Ultra-Dense Networks
Moon-Je Cho (Gyeongsang National University, Korea), Tae Won Ban (Gyeongsang National University, Korea), Hyun Jong Yang (UNIST, Korea), ..............................................1661

A Novel Power Allocation Algorithm in Multi-MRN Aided Multiuser Systems
Qifeng Li (Southeast University, P.R. China), Xiangyang Wang (Southeast University, P.R. China), Qiao Pang (Southeast University, P.R. China) .................................................................................................................................................................................1667

System Performance of Interference Alignment under TDD Mode with Limited Backhaul Capacity
Matha Deghel (CentraleSupélec, France),Mohamad Assaad (CentraleSupelec, France), Mériouane Debbah (Huawei, France) .................................................................................................................................................................................1673

Interference Minimization Through Sleep Mode Based Resource Allocation for Future Femtocell Networks
Aysha Ebrahim (Manchester University, United Kingdom), Emad Alsusa (Manchester University, United Kingdom) .................................................................................................................................................................................1679

Massive MIMO

Experimental Evaluation of the Effect of BS Antenna Inter-Element Spacing on MU-MIMO Separation
Ghassan S Dahman (Lund University, Sweden), Jose Floridelis (Lund University, Sweden), Fredrik Tufvesson (Lund University, Sweden) .................................................................................................................................................................................1685

Coherent versus Noncoherent Massive SIMO Systems: Which has Better Performance?
Mainak Chowdhury (Stanford University, USA), Alexandros Manolakos (Stanford University, USA), Andrea Goldsmith (Stanford University, USA) .................................................................................................................................................................................1691

Massive MIMO at Night: On the Operation of Massive MIMO in Low Traffic Scenarios
Hei Victor Cheng (Linköping University, Sweden), Daniel Persson (Linköping University, Sweden), Emil Björnson (Linköping University, Sweden), Erik G. Larsson (Linköping University, Sweden) .................................................................................................................................................................................1697

Massive MIMO with IQ Imbalance: Performance Analysis and Compensation
Nikolaos Kolomvakis (Chalmers University of Technology, Sweden), Michail Matthaiou (Queen's University Belfast, United Kingdom), Jingya Li (Chalmers University of Technology, Sweden), Mikael Coldrey (Ericsson Research & Ericsson AB, Sweden), Tommy Svensson (Chalmers University of Technology, Sweden) .................................................................................................................................................................................1703

Limited Feedback Scheme for Massive MIMO in Mobile Multiuser FDD Systems
Ernest Kurniawan (Institute for Infocomm Research, Singapore), Jingon Joung (Institute for Infocomm Research, Singapore), Sumei Sun (Institute for Infocomm Research, Singapore) ............1710
Synchronization of Mutually Coupled Digital PLLs in Massive MIMO Systems
David J Jörg (Max Planck Institute for the Physics of Complex Systems, Germany),
Alexandros Pollakis (Technische Universität Dresden, Germany), Lucas Wetzel (Max Planck
Institute for the Physics of Complex Systems, Germany), Marvin Dropp (Technische
Universität Dresden, Germany), Wolfgang Rave (Dresden University of Technology,
Germany), Frank Jülicher (Max Planck Institute for the Physics of Complex Systems,
Germany), Gerhard Fettweis (Technische Universität Dresden, Germany) ........................................... 1716

Distributed Antenna System

3-Dimension Coverage with Ultra-Densely Distributed Antenna Systems: System Design and
Rate Analysis
Dongming Wang (Southeast University & National Mobile Communications Research Lab.,
P.R. China), Wei Chen (Tsinghua University, P.R. China), Jiaheng Wang (Southeast University
& National Mobile Communications Research Lab, P.R. China), Mugen Peng (Beijing University
of posts & Telecommunications, P.R. China), Feifei Gao (Tsinghua University, P.R. China),
Xiaohu You (National Mobile communication Research Lab., Southeast University, P.R. China) .... 1722

Capacity Analysis of Interlaced Clustering in a Distributed Antenna System
Vishnu V Ratnam (University of Southern California, USA), Giuseppe Caire (Technische
Universität Berlin, Germany), Andreas Molisch (University of Southern California, USA) ............ 1727

Precoder Design for Distributed Antenna Systems (DAS) with Limited Channel State Information
Hieu Duy Nguyen (Institute for Infocomm Research (I2R), The Agency for Science,
Technology and Research (ASTAR), Singapore), Jingon Joung (Institute for Infocomm
Research, Singapore), Sumei Sun (Institute for Infocomm Research, Singapore) ......................... 1733

Pilot Sequence Design for Multi-Cell Distributed MIMO Systems with Large-scale CSI
Yingjie Zhang (Tsinghua University, P.R. China), Wei Feng (Tsinghua University, P.R. China),
Lin Hao Dong (Tsinghua University, P.R. China), Ning Ge (Tsinghua University, P.R. China) ........ 1739

Synchronization for Multi-hop Distributed MIMO-OFDM
Yong Jun Chang (Georgia Institute of Technology, USA), Qiongjie Lin (Georgia Institute of
Technology, USA), Mary Ann Weitnauer (Georgia Institute of Technology, USA) ...................... 1745

A Free Deterministic Equivalent for the Capacity of MIMO MAC with Distributed Antennas
Sets
An-an Lu (Southeast University, P.R. China), Xi Qi Gao (Southeast University, P.R. China),
Chengshan Xiao (Missouri University of Science and Technology, USA) ...................................... 1751

Massive MIMO

User Scheduling for Massive MIMO OFDMA Systems with Hybrid Analog-Digital Beamforming
Tadilo Endeshaw Bogale (University of Western Ontario, Canada), Long Bao Le (INRS,
University of Quebec, Canada), Afshin Haghighat (InterDigital Communications, Canada) .......... 1757

On the Matrix Inversion Approximation Based on Neumann Series in Massive MIMO Systems
Dengkui Zhu (RF DSP Inc., USA), Boyu Li (RF DSP Inc., USA), Ping Liang (University of
California, Riverside, USA) ............................................................................................................ 1763

Joint Multicast Beamforming and User Grouping in Massive MIMO Systems
Hao Zhou (Shanghai Jiao Tong University, P.R. China), Meixia Tao (Shanghai Jiao Tong
University, P.R. China) ................................................................................................................... 1770

Performance of Downlink Massive MIMO in Ricean Fading Channels with ZF Precoder
Chuili Kong (Zhejiang University, P.R. China), Caijun Zhong (Zhejiang University, P.R. China),
Michail Matthaiou (Queen’s University Belfast, United Kingdom), Zhaoyang Zhang (Zhejiang
University, P.R. China) ................................................................................................................... 1776

Performance Limits of Massive MIMO Systems Based on Bayes-Optimal Inference
Chao-Kai Wen (National Sun Yat-sen University, Taiwan), Yongpeng Wu (University of
Erlangen-Nuremberg, Germany), Kai-Kit Wong (University College London, United Kingdom),
Robert Schober (Universität Erlangen-Nürnberg, Germany), Pangan Ting (Tsing Hua
University, Taiwan) ....................................................................................................................... 1783
Cooperative networks and relaying

Widely Linear Block-Diagonalization Type Precoding in Massive MIMO Systems with IQ Imbalance
Wence Zhang (Southeast University, P.R. China), Rodrigo C. de Lamare (Pontifical Catholic University of Rio de Janeiro & University of York, Brazil), Cunhua Pan (Southeast University, P.R. China), Ming Chen (Southeast University, P.R. China) .......................................................... 1789

Wireless Powered Dual-Hop Multiple Antenna Relay Transmission in the Presence of Interference
Guangxu Zhu (Zhejiang University, P.R. China), Caijun Zhong (Zhejiang University, P.R. China), Himal A Suraweera (University of Peradeniya, Sri Lanka), George K. Karagianni (Aristotle University of Thessaloniki, Greece), Zhaoyang Zhang (Zhejiang University, P.R. China), Theodoros Tsiftsis (Technological Educational Institute of Central Greece, Greece) ............ 1795

Optimal Power Allocation for Secure Communications in Large-Scale MIMO Relaying Systems
Jian Chen (Nanjing University of Aeronautics and Astronautics, P.R. China), Xiaoming Chen (Nanjing University of Aeronautics and Astronautics, P.R. China), Xiumin Wang (Hefei University of Technology, P.R. China), Lei Lei (Nanjing University of Aeronautics and Astronautics, P.R. China) ................................................................. 1801

Outage Analysis of dual-hop OFDM relay system with Subcarrier Mapping in Nakagami-m fading
Raza Ali Shah (Electrical Engineering, HITEC University Taxila Cantt & National Institute of Technology (NII), Tokyo and Asian Institute of Technology (AIT), Thailand, Pakistan), Nandana Rajatheva (University of Oulu, Finland), Yusheng Ji (National Institute of Informatics, Japan) ...... 1807

Adaptive Link Selection in Buffer-Aided Relaying with Statistical QoS Constraints
Khoa Tran Phan (McGill University, Canada), Tho Le-Ngoc (McGill University, Canada) ............. 1813

Cooperative Network Coded ARQ Strategy for Broadcast Networks
Rasit Tutgun (TUBITAK UZAY Space Technologies Research Institute, Turkey), Emre Aktas (Hacettepe University, Turkey) ......................................................................................... 1819

Optimal caching placement of caching system with helpers
Jaeyoung Song (KAIST, Korea), Hojin Song (KAIST, Korea), Wan Choi (KAIST, Korea) .......... 1825

Small cells and heterogeneous networks

Downlink MIMO Diversity with Maximal-Ratio Combining in Heterogeneous Cellular Networks
Ralph Tanbourgi (Karlsruhe Institute of Technology (KIT), Germany), Friedrich K. Jondral (Karlsruhe Institute of Technology, Germany) ................................................................................................. 1831

Small Cell In-Band Wireless Backhaul in Massive Multiple-Input Multiple-Output Systems
Boyu Li (RF DSP Inc., USA), Dengkui Zhu (RF DSP Inc., USA), Ping Liang (University of California, Riverside, USA) ........................................................................................................ 1838

A Framework for Energy-Efficient Design of 5G Technologies
Alessio Zappone (TU Dresden, Germany), Luca Sanguinetti (Supélec & University of Pisa, Italy), Giacomo Bacci (University of Pisa, Italy), Eduard Jorswieck (TU Dresden, Germany), Mérouane Debbah (Huawei France, France) ............................................................... 1845

Joint Spectrum-Sharing and Base-Station-Sleep Model for Improving Energy Efficiency of HetNet
Xiaomeng Chai (University of Science and Technology Beijing (USTB), P.R. China), Yang Li (University of Science and Technology Beijing (USTB), P.R. China), Yan Lv (University of Science and Technology Beijing (USTB), P.R. China), Zhongshan Zhang (University of Science and Technology Beijing (USTB), P.R. China) ........................................................................ 1851

Local Delay and Energy Efficiency Analysis in HetNets with Random DTX Scheme
Weili Nie (Southeast University, P.R. China), Yi Zhong (University of Science and Technology of China, P.R. China), Fu-Chun Zheng (The University of Reading, United Kingdom), Wenyi Zhang (University of Science and Technology of China, P.R. China) .............................................................. 1857
MIMO

Asymptotic Analysis of Asymmetric MIMO Links: EVM Limits for Joint Decoding of PSK and QAM
Mikko Vehkaperä (Aalto University, Finland), Taneli Riihonen (Aalto University School of Electrical Engineering, Finland), Maksym A. Grynok (KTH Royal Institute of Technology, Sweden), Emil Björnson (Linköping University, Sweden), Meroouane Debbah (Huawei, France), Lars K. Rasmussen (KTH Royal Institute of Technology, Sweden), Risto Wichman (Aalto University School of Electrical Engineering, Finland) .......................................................... 1869

Performance Analysis of Downlink Multiuser MIMO with Wiener Precoding
Ahmed Hesham Mehana (Samsung Telecom America & System Engineer, USA) ........................................ 1874

A Two-Way Training Method for Defending Against Pilot Spoofing Attack in MISO Systems
Qi Xiong (Nanyang Technological University, Singapore), Ying-Chang Liang (Institute for Infocomm Research, Singapore), Kwok Hung Li (Nanyang Technological University, Singapore), Yi Gong (South University of Science and Technology of China, P.R. China) .................... 1880

Group Sparse Beamforming for Multicast Green Cloud-RAN via Parallel Semidefinite Programming
Jinkun Cheng (Tsinghua University, P.R. China), Yuanming Shi (The Hong Kong University of Science and Technology, Hong Kong), Bo Bai (Tsinghua University, P.R. China), Wei Chen (Tsinghua University, P.R. China), Jun Zhang (The Hong Kong University of Science and Technology, Hong Kong), Khaled B. Letaief (The Hong Kong University of Science and Technology, Hong Kong) .......................................................... 1886

Management of channel quality reporting in highly loaded LTE networks
Peter Legg (Huawei Technologies Sweden AB, Sweden), Gunnar Peters (Huawei, Sweden) .......... 1892

Energy Efficient Precoder Design for MIMO-OFDM with Rate-dependent Circuit Power
Zijian Wang (Université Catholique de Louvain, Belgium), Ivan Stupia (Université Catholique de Louvain, Belgium), Luc Vandendorpe (Université catholique de Louvain, Belgium) ............. 1897

Full Duplex

Investigation on DL and UL Power Control in Full-Duplex Systems
Rongqing Zhang (Colorado State University, USA), Meng Ma (Peking University, P.R. China), Do Li (Peking University, P.R. China), Bingli Jiao (Peking University, P.R. China) ........................................ 1903

Full-Duplex Radio for Uplink/Downlink Transmission with Spatial Randomness
Mohammadali Mohammad (Shahrekord University, Iran), Himal A Suraweera (University of Peradeniya, Sri Lanka), Ioannis Krikidis (University of Cyprus, Cyprus), Chinthia Tellambura (University of Alberta, Canada) .................................................................................. 1908

Utility-Based Interference Management for Full-Duplex Multicell Networks
Thien Nguyen (University of Newcastle, Australia), Duy T Ngo (University of Newcastle, Australia), Ali A Nasir (Australian National University, Australia), Jamil Y Khan (The University of Newcastle, Australia) ....................................................... 1914

Robust MMSE Design for Full-Duplex Decode-and-Forward SC-FDE Relay Systems
Peiran Wu (University of British Columbia, Canada), Robert Schober (University of British Columbia, Canada), Vijay Bhargava (University of British Columbia, Canada) ........................................ 1920

Throughput Maximization for Buffer-Aided Hybrid Half-/Full-Duplex Relaying with Self-Interference
Mohammad Galal Khafagy (King Abdullah University of Science and Technology (KAUST), Saudi Arabia), Ahmed El Shafie (University of Texas at Dallas, USA), Ahmed Sultan (KAUST, Saudi Arabia), Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia) .......................................................... 1926
Almost as Good as Single-Hop Full-Duplex: Bidirectional End-To-End Known Interference Cancellation
Fanzhao Wang (Northeastern University China, P.R. China), Lei Guo (Northeastern University, P.R. China), Shiqiang Wang (Imperial College London, United Kingdom), Yao Yu (Northeastern University, P.R. China), Qingyang Song (Northeastern University, P.R. China), Abbas Jamalipour (University of Sydney, Australia) .............................................................. 1932

Massive MIMO

Energy-Spectral Efficiency Trade-off for a Massive SU-MIMO System with Transceiver Power Consumption
Sudarshan Mukherjee (Indian Institute of Technology Delhi (IITD), India), Saif Khan Mohammed (Indian Institute of Technology (I. I. T. ) Delhi, India) .............................................................. 1938

Spatial Modulation for Massive MIMO
Dushyantha Basnayaka (The University of Edinburgh, United Kingdom), Harald Haas (The University of Edinburgh, United Kingdom) .............................................................. 1945

Impact of Channel Aging in Multi-Way Relay Networks With Massive MIMO
Gayan Amarasuriya (Princeton University, USA), H. Vincent Poor (Princeton University, USA) ...... 1951

Graph-based Framework for Flexible Baseband Function Splitting and Placement in C-RAN
Jingchu Liu (Tsinghua University, P.R. China), Sheng Zhou (Tsinghua University, P.R. China), Jie Gong (Tsinghua University, P.R. China), Zhisheng Niu (Tsinghua University, P.R. China), Shugong Xu (Intel Labs, P.R. China) .................................................................................................................. 1958

Block diagonalization and user selection for MIMO broadcast channels with limited feedback
Moonsik Min (POSTECH, Korea), Yo-Seb Jeon (POSTECH, Korea), Gi-Hong Im (POSTECH, Korea) .................................................................................................................. 1964

Beam Division Multiple Access for Massive MIMO Downlink Transmission
Chen Sun (Southeast University, P.R. China), Xiqi Gao (Southeast University, P.R. China), Shi Jin (Southeast University, P.R. China), Michail Matthaiou (Queen's University Belfast, United Kingdom), Zhi Ding (University of California at Davis, USA), Chengshan Xiao (Missouri University of Science and Technology, USA) .............................................................. 1970

Cooperative networks and relaying

Joint Power and Rate Adaptation aided Network-Coded PSK for Two-way Relaying over Fading Channels
Yanping Yang (National Digital Switching System Engineering and Technological R&D Center, P.R. China), Wei Chen (Tsinghua University, P.R. China), Ou Li (National Digital Switching System Engineering and Technological R&D Center, P.R. China), Ke Ke (National Digital Switching System Engineering and Technological R&D Center, P.R. China), Lajos Hanzo (University of Southampton, United Kingdom) .................................................................................................................. 1976

Buffer-Aided Diamond Relay Network with Block Fading
Renato Simoni (University of Florence, Italy), Vahid Jamali (Friedrich-Alexander-University Erlangen-N"urnberg, Germany), Nikola Zlatanov (University of British Columbia, Canada), Robert Schober (University of British Columbia, Canada), Laura Pierucci (University of Florence, Italy), Romano Fantacci (University of Florence, Italy) .................................................................................................................. 1982

A Stochastic Geometry Analysis of Cooperative Wireless Networks Powered by Energy Harvesting
Talha Ahmed Khan (The University of Texas at Austin & Wireless Networking and Communications Group, USA), Philip Orlik (Mitsubishi Electric Research Laboratories, USA), Kyeong Jin Kim (Mitsubishi Electric Research Laboratories (MERL), USA) .............................................................. 1988

Relay Selection for Average Throughput Maximization in Buffer-aided Relay Networks
Shiwei Huang (University of Manitoba, Canada), Jun Cai (University of Manitoba, Canada), Hong Zhang (University of Manitoba, Canada) .............................................................. 1994
Massive MIMO

Downlink Spectral Efficiency of Multi-Cell Multi-User Large-Scale DAS with Pilot Contamination
Jiamin Li (National Mobile Communications Research Lab., Southeast University, P.R. China), Dongming Wang (Southeast University & National Mobile Communications Research Lab., P.R. China), Pengcheng Zhu (National Mobile Communications Research Laboratory, Southeast University, P.R. China), Xiaohu You (National Mobile Communication Research Lab., Southeast University, P.R. China) ................................................................................................................................. 2011

Multi-user Relay Networks With Massive MIMO
Gayan Amarasuriya (Princeton University, USA), H. Vincent Poor (Princeton University, USA) ...... 2017

Large-Scale Antenna System with Massive One-bit Integrated Energy and Information Receivers
Wang Shengchu (Tsinghua University, P.R. China), Yunzhou Li (Tsinghua University, P.R. China), Jing Wang (Tsinghua University, P.R. China) ................................................................................................................................. 2024

On the Impact of Antenna Topologies for Massive MIMO Systems
Callum Neil (Victoria University of Wellington, New Zealand), Mansoor Shafi (Spark New Zealand Ltd & Victoria University, Wellington, New Zealand), Peter J Smith (Victoria University of Wellington, New Zealand), Pawel A. Dmochowski (Victoria University of Wellington, New Zealand) ................................................................................................................................. 2030

Energy Efficient Cell Load-aware Coverage Optimization for Small-Cell Networks
Adrian Agustin (Universitat Politècnica de Catalunya (UPC), Spain), Sandra Lagen (Universitat Politècnica de Catalunya, Spain), Josep Vidal (Universitat Politècnica de Catalunya, Spain) ............ 2036

Experimental Investigation of Space Division Multiplexing on Massive Antenna Systems

Network Coding

Reliable Broadcast to A User Group with Limited Source Transmissions
Xiaoli Xu (Nanyang Technological University, Singapore), Praveen Kumar Meenakshi Sundaram Gandhi (Nanyang Technological University, Singapore), Yong Liang Guan (Nanyang Technological University, Singapore) ................................................................................................................................. 2048

LDPC Code Design for Noncoherent Physical Layer Network Coding
Terry Ferrett (West Virginia University, USA), Matthew Valenti (West Virginia University, USA) ................................................................................................................................. 2054

Complex Low Density Lattice Codes to Physical Layer Network Coding
Yi Wang (University of York, United Kingdom), Alister G. Burr (University of York, United Kingdom), Dong Fang (Bell Labs & Alcatel Lucent, Ireland) ................................................................................................................................. 2060
Device-to-Device Communications

Energy-Aware Revenue Optimization for Cellular Networks via Device-to-Device Communication
Yuan Wu (Zhejiang University of Technology, P.R. China), Jiaheng Wang (Southeast University & National Mobile Communications Research Lab, P.R. China), Liping Qian (Zhejiang University of Technology, P.R. China), Robert Schober (Universität Erlangen-Nürnberg, Germany) ................................................................. 2085

Joint Channel Allocation and Power Control for Underlay D2D Transmission
Setareh Maghsudi (Technische Universität Berlin, Germany), Slawomir Stanczak (Fraunhofer Heinrich Hertz Institute & Technische Universität Berlin, Germany) ................................................................. 2091

On Antenna Selection for D2D Communication Underlaying Cellular Networks
Yuyang Wang (Southeast University, P.R. China), Dan Qiao (Southeast University, P.R. China), Shi Jin (Southeast University, P.R. China), Yongming Huang (Southeast University, P.R. China), Kai-Kit Wong (University College London, United Kingdom) ................................................................. 2097

Analysis of Transmission Capacity Region in D2D Integrated Cellular Networks with Power Control
Junyu Liu (Xidian University, P.R. China), Min Sheng (Xidian University, P.R. China), Xijun Wang (Xidian University, P.R. China), Yan Zhang (Xidian University, P.R. China), Hongguang Sun (Xidian University, P.R. China), Jiadong Li (Xidian University, P.R. China) ................................................................. 2103

A Guard Zone Based Scalable Mode Selection Scheme in D2D Underlaid Cellular Networks
Junhong Ye (The Chinese University of Hong Kong, Hong Kong), Ying Jun (Angela) Zhang (The Chinese University of Hong Kong, Hong Kong) ................................................................. 2110

Analytical Modeling of D2D Communications over Cellular Networks
Ashraf Al-Rimawi (University of Bologna, Italy), Davide Dardari (University of Bologna, Italy) ...... 2117

MIMO

An Effective Self-Interference Cancellation Scheme for Spatial Modulated Full Duplex Systems
Peizhong Ju (Peking University, P.R. China), Miaowen Wen (South China University of Technology, P.R. China), Xiang Cheng (Peking University, P.R. China), Liqing Yang (Colorado State University, USA) ........................................................................ 2123

Optimized Training Design for Multi-Antenna Wireless Energy Transfer in Frequency-Selective Channel
Yong Zeng (National University of Singapore, Singapore), Rui Zhang (National University of Singapore, Singapore) ........................................................................ 2129
Small cells and heterogeneous Networks

Pricing-based Distributed Beamforming for Weighted Sum Energy-Efficiency in MISO Ad Hoc Networks
Cunhua Pan (Southeast University, P.R. China), Wence Zhang (Southeast University, P.R. China), Nuo Huang (Southeast University, P.R. China), Houyu Wang (Southeast University, P.R. China), Jian-xin Dai (Nanjing University of Posts and Telecommunications, P.R. China), Ming Chen (Southeast University, P.R. China) ...................................................... 2135

Online Resource Allocation for Energy Harvesting Downlink MIMO Systems with Finite-Alphabet Inputs
Weiliang Zeng (Qualcomm Research, USA), Yahong Rosa Zheng (Missouri University of Science and Technology, USA), Robert Schober (Universität Erlangen-Nürnberg, Germany) ............. 2142

Layered Space Shift Keying Modulation over MIMO Channels
Shu Fang (University of Electronic Sci. & Tech. of China, P.R. China), Lei Li (Department of National key Laboratory on Communications, P.R. China), Su Hu (University of Electronic Science and Technology of China, P.R. China), Gang Feng (University of Electronic Science and Technology of China, P.R. China) ....................................................................................... 2148

Client-AP Association for Multiuser MIMO Networks
Yu-Cheng Hsu (National Tsing Hua University, Taiwan), Kate Ching-Ju Lin (Academia Sinica, Taiwan), Wen-Tsuen Chen (Academia Sinica, Taiwan) .......................................................................................... 2154

Small cells and heterogeneous Networks

Auction-based Spectrum Sharing Among Heterogeneous Secondary Networks
Shun-Cheng Zhan (National Taiwan University, Taiwan), Chun-Ting Chou (National Taiwan University, Taiwan), Shi-Chung Chang (National Taiwan University, Taiwan) ...................................................... 2160

Indoor Wireless Femtocell Measurements
Yunchi Shi (University of Kent, United Kingdom), Hassan Osman (University of Kent, United Kingdom), Erol Hepsaydir (Hutchison 3G, United Kingdom), Jiangzhou Wang (University of Kent, United Kingdom) ............................................................................................... 2166

A Completely Distributed Algorithm For User Association in HetSNets
Zoubeir Mlika (University of Quebec at Montreal, Canada), Elmahdi Driouch (Universite du Quebec à Montreal, Canada), Wessam Ajib (Université du Québec à Montréal, Canada), Halima Elbiaze (University of Quebec at Montreal, Canada) ..................................................................................... 2172

A Load Fairness Aware Cell Association for Centralized Heterogeneous Networks
Hongyan Du (University of Chinese Academy of Sciences & Wireless Communication Technology Research Center, Institute of Computing Technology, P.R. China), Yiqing Zhou (Chinese Academy of Science, P.R. China), Lin Tian (Institute of Computing Technology, Chinese Academy of Sciences, P.R. China), Xiaodong Wang (Columbia University, USA), Zhengang Pan (University of Hong Kong, Hong Kong), Jinglin Shi (Institute of Computing Technology, Chinese Academy of Sciences, P.R. China), Yuan Yao (Institute of Computing Technology, Chinese Academy of Sciences, P.R. China) .................................................................................. 2178

Energy Harvesting Personal Cells - Traffic Offloading and Network Throughput
Pei-Shan Yu (National Tsing Hua University, Taiwan), Jemin Lee (Singapore University of Technology and Design (SUTD), Singapore), Tony Q. S. Quek (Singapore University of Technology and Design, Singapore), Yao-Win Peter Hong (National Tsing Hua University, Taiwan) ................................................................................................. 2184

Performance Analysis of Wireless Heterogeneous Networks with Pushing and Caching
Chenchen Yang (Shanghai Jiao Tong University, P.R. China), Zhiyong Chen (Shanghai Jiao Tong University, P.R. China), Yao Yao (Huawei Technologies Co., Ltd., P.R. China), Bin Xia (Shanghai Jiao Tong University, P.R. China) ............................................................................................... 2190
**Cooperative Networks and Relaying**

*Sum Throughput Maximization for Heterogeneous Multicell Networks with RF-Powered Relays*
Ali A Nasir (Australian National University, Australia), Duy T Ngo (University of Newcastle, Australia), Xiangyun Zhou (The Australian National University, Australia), Rodney Andrew Kennedy (The Australian National University, Australia), Salman Durrani (The Australian National University, Australia) .......................................................................................................................... 2196

*Joint Link-and-User Scheduling for Buffer-Aided Relaying System with Adaptive Rate Transmission*
Sheng Luo (Nanyang Technological University, Singapore, Singapore), Kah Chan Teh (Nanyang Technological University, Singapore) .......................................................................................................................... 2203

*An LTE implementation of a Novel Strategy for the Gaussian Half-Duplex Relay Channel*
Robin Thomas (Eurecom, France), Martina Cardone (University of California, Los Angeles, USA), Raymond Knopp (Institut Eurecom, France), Daniela Tuninetti (University of Illinois at Chicago, USA), Bodhaswar TJ Maharaj (University of Pretoria, South Africa) .......................................................................................................................... 2209

*Capacity Comparison of Opportunistic Relaying System with Outdated Channel Information*
Daesik Hong (Yonsei University, Korea), Seok Jung Kim (Yonsei University, Korea), Hyunsoo Kim (Yonsei University, Korea) .......................................................................................................................... 2215

*Direct Link-Aware Relay Selection for Average Interference-Constrained Underlay Cognitive Radio*
Priyanka Das (Indian Institute of Science, India), Neelesh B. Mehta (Indian Institute of Science, India) .......................................................................................................................... 2221

*Optimal Relay Selection with Non-negligible Probing Time*
Yang Liu (University of Michigan, Ann Arbor, USA), Yi Ouyang (University of Michigan, Ann Arbor, USA), Mingyan Liu (University of Michigan, USA) .......................................................................................................................... 2227

**Mobile and Cellular Networks**

*Correlation-based Adaptive Pilot Pattern in Control/Data Separation Architecture*
Abdelrahim Mohamed (University of Surrey & Centre for Communication Systems Research, United Kingdom), Oluwakayode Onireti (University of Surrey, United Kingdom), Muhammad Ali Imran (University of Surrey, United Kingdom), Ali Imran (University of Oklahoma, USA), Rahim Tafazolli (University of Surrey, United Kingdom) .......................................................................................................................... 2233

*Impact of User Mobility on Optimal Linear Receivers in Cellular Networks*
Anastasios Papazafeiropoulos (Imperial College London, United Kingdom) .......................................................................................................................... 2239

*Correlated Shadow Fading for Cellular Network System-Level Simulations with Wrap-Around*
Ming Ding (National Information and Communications Technology Australia, Australia), Meng Zhang (Sharp Laboratories of China (SLC), P.R. China), David López-Pérez (Bell Labs Alcatel-Lucent, Ireland), Holger Claussen (Bell Labs, Alcatel-Lucent, Ireland) .......................................................................................................................... 2245

*Energy-Efficient Resource Allocation for D2D Communications in Cellular Networks*
Tuong Duc Hoang (University of Quebec, Canada), Long Bao Le (INRS, University of Quebec, Canada), Tho Le-Ngoc (McGill University, Canada) .......................................................................................................................... 2251

*Low Latency Random Access with TTI Bundling in LTE/LTE-A*
Kaijie Zhou (Huawei Technologies Co., Ltd., P.R. China), Navid Nikaein (Eurecom, France) .......................................................................................................................... 2257

*Non-orthogonal Direct Access for Small Data Transmission in Cellular MTC Networks*
Keng-Te Liao (Academia Sinica, Taiwan), Chia-Han Lee (Academia Sinica, Taiwan), Tzu-Ming Lin (ITRI, Taiwan), Chien-Min Lee (ITRI, Taiwan), Wen-Tsuen Chen (Academia Sinica, Taiwan) .......................................................................................................................... 2264
Cooperative networks and relaying

Secure Wireless Energy Harvesting-Enabled AF-Relaying SWIPT Networks
Hong Xing (King’s College London, United Kingdom), Kai Kit Wong (University College London, United Kingdom), Arumugam Nallanathan (King’s College London, United Kingdom) .................................................. 2307

Energy Efficiency Maximization for Secure Data Transmission over DF Relay Networks
Dong Wang (Tsinghua University, P.R. China), Bo Bai (Tsinghua University, P.R. China), Wei Chen (Tsinghua University, P.R. China), Zhu Han (University of Houston, USA) .................................................. 2313

Code Design for Multiple-Access Multiple-Relay Wireless Channels with Non-Orthogonal Transmission
Abdulaziz Mohamad (Supélec & Orange Labs, France), Raphael Visoz (Orange Labs, France), Antoine O. Berthet (CentraleSupélec, France) .................................................. 2318

Performance Analysis of DF Relaying with Optimum Combining in a Poisson Field of Interferers
Navod Suraweera (University of Alberta, Canada), Norman C Beaulieu (Beijing University of Posts and Telecommunications BUPT, P.R. China) .................................................. 2325

Optimum Decode-and-Forward Relay-Assisted Combining Scheme with Relay Decision Information
Rawan Alkurd (Khalifa University, UAE), Raed Shubair (Khalifa University, UAE), Ibrahim Abualhaol (Carleton University, Canada) .................................................. 2331

Lattice-Based Cooperative Communications for Two-Path Relay Channels With Direct Link
Tian Ding (Chinese University of Hong Kong, Hong Kong), Xiaojun Yuan (ShanghaiTech University, P.R. China), Feifei Gao (Tsinghua University, P.R. China) .................................................. 2338
MIMO

Hybrid Structure in Massive MIMO: Achieving Large Sum Rate with Fewer RF Chains
Dawei Ying (Purdue University, USA), Frederick W. Vook (Nokia Networks, USA), Timothy A. Thomas (Nokia, USA), David Love (Purdue University, USA) ................................................................. 2344

Benefits of Coding in a Noncoherent Massive SIMO System
Brian Knott (Stanford University, USA), Mainak Chowdhury (Stanford University, USA), Alexandros Manolakos (Stanford University, USA), Andrea Goldsmith (Stanford University, USA) ........................................................................................................... 2350

Scaling wideband distributed transmit beamforming via aggregate feedback
Muhammed Faruk Gencel (University of California, Santa Barbara, USA), Maryam Eslami Rasekh (University of California, Santa Barbara, USA), Upamanyu Madhow (University of California, Santa Barbara, USA) .................................................................................................................. 2356

Energy Efficiency Optimization with Non-linear Precoding in Multi-cell MISO Broadcast Channels
Gui Xin (Samsung R&D Center-Beijing, P.R. China), Kyoung-Jae Lee (Hanbat National University, Korea), Zheng-yu Zhu (Zhengzhou University, P.R. China), Jaehoon Jung (Korea University, Korea), Inkyu Lee (Korea University, Korea) ................................................................................................................................. 2362

Study on Effect of Training for Downlink Massive MIMO Systems With Outdated Channel
Taehyoung Kim (Yonsei University, Korea), Kyoungsik Min (Yonsei University, Korea), Sooyong Choi (Yonsei University, Korea) ................................................................................................................................. 2369

Spatial Modulation with Dual-Polarized Antennas
Golara Zafari (Bogazici University, Turkey), Mutlu Koca (Bogazici University, Turkey), Hikmet Sari (École Supérieure d’Électricité (SUPELEC), France) .................................................................................................................. 2375

MIMO

Simple Energy Efficiency Maximization Methods for MU-MISO Systems based on Saturation Power
Jaehoon Jung (Korea University, Korea), Sang-Rim Lee (Korea University, Korea), Inkyu Lee (Korea University, Korea) ................................................................................................................................. 2381

Beam Allocation and Performance Evaluation in Switched-Beam based Massive MIMO Systems
Junyuan Wang (University of Kent, United Kingdom), Huiling Zhu (University of Kent, United Kingdom) ................................................................................................................................. 2387

Enhanced Space-Shift Keying (SSK) with Reconfigurable Antennas
Zied Bouida (Texas A&J University at Qatar, Qatar), Hassan El-Sallabi (TAMUQ, Qatar), Ali Ghrayeb (Texas A&M University at Qatar, Qatar), Khalid A. Qaraqe (Texas A&M University at Qatar, USA) ................................................................................................................................. 2393

Iterative Precoding of OFDM-MISO with Nonlinear Power Amplifiers
Ilia Iofedov (Ben Gurion University of the Negev, Israel), Dov Wulich (Ben Gurion University, Israel), Igor Gutman (Qualcomm & Qualcomm, Israel) ................................................................................................................................. 2399

Leakage-Based Multicast Transmit Beamforming
Stefan Schwarz (TU Wien, Austria), Tal Philosof (General Motors, Israel), Markus Rupp (TU Wien, Austria) ................................................................................................................................. 2405

Diagonal Precoder Designs for Spatial Modulation
Wei Wang (The University of New South Wales, Australia), Wei Zhang (The University of New South Wales, Australia) ................................................................................................................................. 2411

Millimeter Wave Communications

Exploiting Directionality for Millimeter-Wave Wireless System Improvement
George R MacCartney, Jr. (NYU WIRELESS & NYU-Poly, USA), Mathew Samimi (NYU WIRELESS, USA), Theodore Rappaport (New York University & NYU WIRELESS, USA) ....... 2416
The Human Body and Millimeter-Wave Wireless Communication Systems: Interactions and Implications
Ting Wu (NYU Polytechnic School of Engineering, USA), Theodore Rappaport (New York University & NYU WIRELESS, USA), Christopher Collins (New York University, USA) .......................................................... 2423

3-D Statistical Channel Model for Millimeter-Wave Outdoor Mobile Broadband Communications
Mathew Samimi (NYU WIRELESS, USA), Theodore Rappaport (New York University & NYU WIRELESS, USA) ................................................................................................................................. 2430

Multi-user MIMO Strategies for a Millimeter Wave Communication System using Hybrid Beam-forming
Richard A. Stirling-Gallacher (Huawei, USA), Md Saifur Rahman (Samsung Research America - Dallas & Samsung Information Systems America, USA) ...................................................................................................................... 2437

A Study on the Coexistence of Fixed Satellite Service and Cellular Networks in a mmWave Scenario
Francesco Guidolin (Università degli studi di Padova, Italy), Maziar Nekovee (Samsung Electronics, United Kingdom), Leonardo Badia (Università degli Studi di Padova, Italy), Michele Zorzi (Università degli Studi di Padova, Italy) ................................................................................................................................. 2444

Angular Characteristics of a Unified 3-D Scattering Model for Emerging Cellular Networks
Abcar Ahmed (COMSATS Institute of Information Technology, Pakistan), Junaid Nawaz Syed (COMSATS Institute of Information Technology, Islamabad, Pakistan), Noor M. Khan (Mohammad Ali Jinnah University, Islamabad, Pakistan), Mohammad N Patwary (Staffordshire University, Stafford, United Kingdom), Mohamed Abdel-Maguid (University Campus Suffolk, United Kingdom) ................................................................................................................................. 2450

Interference management and resource allocation

Analysis and Optimization of Interference Nulling in Downlink Multi-Antenna HetNets with Offloading
Yueping Wu (The University of Hong Kong, Hong Kong), Ying Cui (Shanghai Jiao Tong University, P.R. China), Bruno Clerckx (Imperial College London & Korea University, United Kingdom) ................................................................................................................................. 2457

Channel Access-Aware User Association in Two-tier Cellular Networks
Uzma Siddique (University of Manitoba, Canada), Hina Tabassum (University of Manitoba, Canada), Ekram Hossain (University of Manitoba, Canada) ................................................................................................................................. 2463

Performance Analysis of Wireless Powered Communication with Finite/Infinite Energy Storage
Rania Morsi (Friedrich-Alexander-University Erlangen-Nuremberg, Germany), Diomidis S. Michalopoulos (University of Erlangen-Nuremberg & Institute for Digital Communications, Germany), Robert Schober (University of British Columbia, Canada) ................................................................................................................................. 2469

Joint Tx/Rx Energy-Efficient Scheduling in Multi-Radio Networks: A Divide-and-Conquer Approach
Qimei Chen (Zhejiang University, P.R. China), Guanding Yu (Zhejiang University, P.R. China), Rui Yin (Zhejiang Gongshang University & Georgia Institute of Technology, P.R. China), Geoffrey Li (Georgia Tech, USA) ................................................................................................................................. 2476

Joint User Association and Resource Allocation for Energy-Efficient Multi-Stream Aggregation
Qimei Chen (Zhejiang University, P.R. China), Guanding Yu (Zhejiang University, P.R. China), Rui Yin (Zhejiang Gongshang University & Georgia Institute of Technology, P.R. China), Geoffrey Li (Georgia Tech, USA) ................................................................................................................................. 2482

Localization in the Unknown Environments and the Principle of Anchor Placement
Watcharapan Suwansantisuk (King Mongkut's University of Technology Thonburi, Thailand), Henghui Lu (Huawei Technologies Co., Ltd., P.R. China) ................................................................................................................................. 2488

Cooperative networks and relaying

MIMO Relaying with Interference via the CMGF Transform
Imene Trigui (INRS - Centre Energie, Materiaux et Telecommunications, Canada), Sofiene Affes (INRS-EMT, Canada), Alex Stéphenne (Ericsson & INRS-EMT, Canada) ................................................................................................................................. 2495
Optimal Cooperative Relay Beamforming for Interference Minimization
Ali Ramezani-Kebrya (University of Toronto, Canada), Min Dong (University of Ontario Institute of Technology, Canada), Ben Liang (University of Toronto, Canada), Gary Boudreau (Ericsson, Canada), Ronald Casselman (Ericsson, Canada) ................................................................. 2500

Information and Energy Cooperation in OFDM Relaying
Yuan Liu (South China University of Technology, P.R. China), Xiaodong Wang (Columbia University, USA) .................................................................................................................. 2506

Frequency Scheduling for Cascaded Wireless Relay Networks with Half Duplex
Feng Liu (Shanghai Maritime University, P.R. China), Liansun Zeng (Shanghai Maritime University, P.R. China), Shengming Jiang (Shanghai Maritime University, P.R. China) .......................................................... 2512

A Non-Coherent Multi-User Large Scale SIMO System Relaying on M-ary DPSK
Ana Garcia Armada (Universidad Carlos III de Madrid, Spain), Lajos Hanzo (University of Southampton, United Kingdom) ................................................................................................................ 2517

A Hybrid DF and CF Scheme with Adaptive Power Allocation for Half-duplex Relay Channel
Zhengchuan Chen (Tsinghua University, P.R. China), Pingyi Fan (Tsinghua University, P.R. China), Dapeng Oliver Wu (University of Florida, USA) ................................................................. 2523

Device-to-Device Communications

Comparison of location-based and CSI-based resource allocation in D2D-enabled cellular networks
Mladen Botsov (BMW Group Research and Technology & Technische Universität Berlin, Germany), Sławomir Stanczak (Fraunhofer Heinrich Hertz Institute & Technische Universität Berlin, Germany), Peter Fertil (BMW Group Research and Technology, Germany) .................................................................................. 2529

Resource Sharing Optimization for Device-to-Device Wireless System With Femtocells
Yan Han (Shanghai Jiao Tong University, P.R. China), Lingge Jiang (Shanghai Jiao Tong University, P.R. China), Chen He (Shanghai Jiaotong University, P.R. China) ....................................................................... 2535

Operational Region of Overlay D2D Communications
Stelios Stefanatos (University of Piraeus, Greece), Antonis G Gotsis (University of Piraeus, Greece), Angeliki Alexiou (University of Piraeus, Greece) ......................................................................................... 2541

Joint Power Loading and Mode Selection for Network-assisted Device-to-Device Communication
Amin Ghazanfari (University of Manitoba, Canada), Antti Tölli (University of Oulu, Finland), Jarkko Kaleva (University of Oulu, Finland) ........................................................................................................... 2548

Resource Allocation in Mixed Mode Device-to-Device Communications
Huan Tang (University of California, Davis, USA), Zhi Ding (UC Davis, USA) ............................................................................................................................... 2554

Cooperative networks and relaying

Joint Clustering and Inter-cell Resource Allocation for CoMP in Ultra Dense Cellular Networks
Ling Liu (ICT/CAS, P.R. China), Virgile Garcia (Ericsson Research, P.R. China), Lin Tian (Institute of Computing Technology, Chinese Academy of Sciences, P.R. China), Zhengang Pan (University of Hong Kong, Hong Kong), Jinglin Shi (Institute of Computing Technology, Chinese Academy of Sciences, P.R. China) ........................................................................................................... 2560

Interference Aware Resource Allocation for D2D communication: a Two-Level Approach
Luca Rose (Huawei FRC, France), Aref Feki (France Research Center, Huawei Technologies, France) ............................................................................................................................... 2565

Impact of Noise Frequency Selectivity Into the Performance of AF Relaying Systems
Ahmed M Almradi (The University of Manchester, United Kingdom), Khairi A. Hamdi (University of Manchester, United Kingdom) ........................................................................................................ 2571

Exploiting Partial Packets in Random Linear Codes using Sparse Error Recovery
Mohammad Sadegh Mohammadi (Aarhus University & Macquarie University, Denmark), Qi Zhang (Aarhus University, Denmark), Eryk Dutkiewicz (Macquarie University, Australia) .................. 2577
Multiuser Scheduling on Downlink Communications by Using Adaptive Hierarchical Modulation
Hamidreza Khakzad (Qatar University, Iran), Reza Shakeri (Imam Khomeini International University (IKIU), Iran), Abbas Taherpour (Imam Khomeini International University, Iran), Tamer Khattab (Qatar University, Qatar) ................................................................. 2583

Detection and estimation

On the Impact of Antenna Correlation on the Pilot-Data Balance in Multiple Antenna Systems
Gabor Fodor (Ericsson Research & Royal Institute of Technology (KTH), Sweden), Piergiuseppe Di Marco (Ericsson, Sweden), Miklos Telek (Technical University of Budapest, Hungary) .......................................................................................................................... 2590

Optimal Detection in Training Assisted SIMO Systems with Phase Noise Impairments
Antonios Pitarokoilis (Linköping University, Sweden), Emil Björnson (Linköping University, Sweden), Erik G. Larsson (Linköping University, Sweden) .......................................................................................................................... 2597

Adaptive Iterative Detection for Expediting the Convergence of an Iterative JSCC, and Demodulator
Matthew F Brejza (University of Southampton, United Kingdom), Wenbo Zhang (UOS, United Kingdom), Robert G Maunder (University of Southampton, United Kingdom), Bashir Al-Hashimi (University of Southampton, United Kingdom), Lajos Hanzo (University of Southampton, United Kingdom) .......................................................................................................................... 2603

ML estimation of timing, integer frequency and primary sequence index in LTE systems
Marco Moretti (Università di Pisa, Italy), Michele Morelli (University of Pisa, Italy) ...................... 2609

Joint Channel Estimation and Data Recovery of Communication Systems with Sub-Nyquist Receiver
Feibai Zhu (Hong Kong University of Science and Technology, Hong Kong), An Liu (Hong Kong University of Science and Technology, Hong Kong), Vincent Lau (Hong Kong University of Science and Technology, Hong Kong) .......................................................................................................................... 2614

Broadband Wireless Channel Measurements for High Speed Trains
Florian Kaltenberger (Eurecom, France), Auguste Byiringiro (Eurecom, France), George Arvanitakis (Eurecom, France), Riadh Ghadhab (EURECOM, France), Dominique Nussbaum (Eurecom, France), Raymond Knopp (Institut Eurecom, France), Marion Berbineau (IFSTTAR, LEOST & University Lille Nord de France, France), Yann Cocheril (IFSTTAR, France), Henri Philippe (SNCF, France), Eric P. Simon (University of Lille, France) ................................................................. 2620

Interference management and resource allocation

Decentralized Interference Coordination for D2D Communication Underlying Cellular Networks
Rui Yin (Zhejiang Gongshang University & Georgia Institute of Technology, P.R. China), Guanding Yu (Zhejiang University, P.R. China), Huazi Zhang (Zhejiang University, P.R. China), Zhaoyang Zhang (Zhejiang University, P.R. China), Geoffrey Li (Georgia Tech, USA) ....... 2626

Energy Efficient Incentive Resource Allocation in D2D Cooperative Communications
Qian Sun (Beijing Jiaotong University, P.R. China), Lin Tian (Institute of Computing Technology, Chinese Academy of Sciences, P.R. China), Yiqing Zhou (Chinese Academy of Science, P.R. China), Yao Yuan (ICT, P.R. China), Jinglin Shi (Institute of Computing Technology, Chinese Academy of Sciences, P.R. China), Xiaodong Wang (Columbia University, USA) .......................................................................................................................... 2632

Ziyang Wang (Carleton University, Canada), Rainer Schoenen (RWTH Aachen University, Faculty 6, Germany), Halim Yanikomeroglu (Carleton University, Canada), Marc St-Hilaire (Carleton University, Canada) .......................................................................................................................... 2638

Impact and Mitigation of Narrow-band Radar Interference in Down-link LTE
Hossein-Ali Safavi-Naeini (University of Washington, USA), Chittabrata Ghosh (Nokia Research Center, USA), Eugene Visotsky (Nokia Networks, USA), Rapeepat Ratasuk (Nokia Networks, USA), Sumit Roy (University of Washington, USA) .......................................................................................................................... 2644
**Robust Precoder Design for Frequency Selective Interference Channels**
Ahmed Ali (University of Texas at Dallas, USA), Murat Torlak (The University of Texas at Dallas, USA) ................................................................. 2650

**Probabilistic based TX-beamformer design under partial CSIT using optimized SINR estimate**
Yohannes Jote Tolossa (Jacobs University Bremen, Germany), Giuseppe Abreu (Jacobs University Bremen, Germany) ................................................................. 2656

**Multiple access**

SER analysis by Gaussian interference approximation for FBMC system in the presence of phase error
Rostom Zakaria (CNAM, France), Didier Le Ruyet (CNAM, France) ................................................................. 2662

**Energy Efficiency Optimization for Fading MIMO Non-Orthogonal Multiple Access Systems**
Qi Sun (China Mobile Research Institute, P.R. China), Shuangfeng Han (China Mobile, P.R. China), Chih-Lin I (China Mobile Research Institute, P.R. China), Zhengang Pan (University of Hong Kong, Hong Kong) ................................................................. 2668

**Linearization-based Cross-Layer Design for Throughput Maximization in OFDMA Wireless Ad-hoc Networks**
Hao Feng (University of Southern California, USA), Andreas Molisch (University of Southern California, USA), Stark Draper (University of Toronto, Canada) ................................................................. 2674

**Derivation of GFDM Based on OFDM Principles**
Behrouz Farhang-Boroujeny (University of Utah, USA), Hussein Moradi (Idaho National Laboratory, USA) ................................................................. 2680

**Widely-linear frequency-shift compensation of CFO and I/Q imbalance in OFDMA/SC-FDMA systems**
Donatella Darsena (University of Napoli Parthenope, Italy), Luca Di Virgilio (Università degli Studi di Napoli Federico II, Italy), Giacinto Gelli (University of Napoli - Federico II, Italy), Francesco Verde (University of Napoli Federico II & National Inter-University Consortium for Telecommunications, Italy) ................................................................. 2686

**Circular-Shift Division Multiple Access with Oversampling Receivers**
Ali Alqatawneh (University of Arkansas, USA), Jingxian Wu (University of Arkansas, USA), Hai Lin (Osaka Prefecture University, Japan) ................................................................. 2692

**Detection and estimation**

Impact of frequency synchronization errors on BER performance of MB-OFDM UWB in Nakagami channels
Fouzia Boukour Elbahhar (IFSTTAR, France), Babar Aziz (IFSTTAR, LEOST, Villeneuve D’Ascq, France) ................................................................. 2698

**Cooperative-cum-Constrained Maximum Likelihood Algorithm for UWB-based Localization in Wireless BANs**
Gia-Minh Hoang (University of Rennes, IRISA, INRIA, France), Matthieu Gautier (University of Rennes, IRISA, INRIA, France), Antoine Courtay (IRISA, France) ................................................................. 2704

**Cosine Similarity Based Fingerprinting Algorithm in WLAN Indoor Positioning Against Device Diversity**
Shuai Han (Harbin Institute of Technology, P.R. China), Cong Zhao (Harbin Institute of Technology, P.R. China), Weixiao Meng (Harbin Institute of Technology, P.R. China), Cheng Li (Memorial University of Newfoundland, Canada) ................................................................. 2710

**A Measurement-Based Study on the Use of Spatial Interpolation for Propagation Estimation**
Nikos Perpinias (RWTH Aachen University, Germany), Alexandros Palaios (RWTH Aachen University, Germany), Janne Riihijärvi (RWTH Aachen University, Germany), Petri Mähönen (RWTH Aachen University, Germany) ................................................................. 2715
Cubic-complexity Optimal Noncoherent OOK Sequence Detection in Flat Fading
George N. Karystinos (Technical University of Crete, Greece), Aggelos Bletsas (Technical University of Crete, Greece) .......................................................... 2721

Detection and estimation

Active User Detection and Channel Estimation in Uplink CRAN Systems
Xiao Xu (Tsinghua University, P.R. China), Xiongbin Rao (the Hong Kong University of Science and Technology, Hong Kong), Vincent Lau (Hong Kong University of Science and Technology, Hong Kong) .......................................................... 2727

Less-Calibration Wi-Fi-Based Indoor Positioning
Abdullah Alonazi (University of Surrey & Faculty of Engineering and Physical Sciences, United Kingdom), Yi Ma (University of Surrey, United Kingdom), Rahim Tafazolli (University of Surrey, United Kingdom) .......................................................... 2733

Constellation Design for Spatial Modulation
Mehdi Maleki (The University of Akron, USA), Hamid Reza Bahrami (The University of Akron, USA), Ardalan Alizadeh (University of Akron, USA) .......................................................... 2739

60 GHz UWB Rake Receivers in a Realistic Scenario for Wireless Home Entertainment
Nikola Rendevski (University of L’Aquila, Italy), Dajana Cassioli (University of L’Aquila, Italy) .......................................................... 2744

Performance of Spatial Modulation with constant transmitted power under LOS and NLOS scenarios
Jiliang Zhang (Harbin Institute of Technology, P.R. China), Wang Yang (Harbin Institute of Technology, P.R. China), Jie Zhang (University of Sheffield, Dept. of Electronic and Electrical Engineering, United Kingdom), Liqin Ding (Harbin Institute of Technology, P.R. China) .......................................................... 2750

Detection and estimation

Impact of correlation on outage performance of FSO system with switch-and-stay diversity receiver
Milica Petkovic (Faculty of Electronic Engineering, Serbia), Jelena Anastasov (Faculty of Electronic Engineering, Serbia), Goran T Djordjevic (University of Nis, Serbia), Predrag N. Ivanis (School of Electrical Engineering, University of Belgrade, Serbia) .......................................................... 2756

A Low-Complexity 2D Signal Space Diversity Solution for Future Broadcasting Systems
Jianxiao Yang (ENSTA ParisTech, France), Kai Wan (L2S - CNRS - Supelec - Univ Paris-Sud, France), Benoît Geller (ENSTA ParisTech, France), Charbel Abdel Nour (Institut Telecom - Telecom Bretagne, France), Olivier Rioul (Telecom ParisTech & Ecole Polytechnique, France), Catherine Douillard (Institut Mines Telecom - Telecom Bretagne, France) .......................................................... 2762

Shuffled Iterative Receiver for LDPC-Coded MIMO Systems
Peiyao Zhao (Tsinghua University, P.R. China), Chen Qian (Tsinghua University, P.R. China), Zhaocheng Wang (Tsinghua University, P.R. China), Linglong Dai (Tsinghua University, P.R. China), Sheng Chen (University of Southampton, United Kingdom) .......................................................... 2768

Frequency Spreading Doppler Scaling Compensation in Underwater Acoustic Multicarrier Communications
Amir Aminjavaheri (University of Utah, USA), Ahmad RezazadehReyhani (University of Utah, USA), Behrouz Farhang-Boroujeny (University of Utah, USA) .......................................................... 2774

On Localization for Magnetic Induction-based Wireless Sensor Networks in Pipeline Environments
Xin Tan (State University of New York at Buffalo, USA), Zhi Sun (State University of New York at Buffalo, USA), Pu Wang (Wichita State University, USA) .......................................................... 2780

Towards an Enhanced Frequency Reuse: Base Station Cooperation with Turbo Frequency Domain Receivers
João Gante (Instituto de Telecomunicações - University of Coimbra, Portugal), Marco A. C. Gomes (University of Coimbra, Portugal), Rui Dinis (Instituto de Telecomunicacoes & FCT-UNL, Portugal), Vitor Silva (Institute of Telecommunications, Portugal) .......................................................... 2786
Interference management and resource allocation

Roya Arab Loodaricheh (University of British Columbia, Canada), Shankhanaad Mallick (University of British Columbia, Canada), Vijay Bhargava (University of British Columbia, Canada) ........................................................................................................ 2791

A Practical Scheme to Achieve Sum Capacity for Strong Interference-limited Scenarios
Guangxia Zhou (Intel Mobile Communications & Hamburg University of Technology, Germany), Wen Xu (Intel & Intel Mobile Communications, Germany), Gerhard Bauch (Hamburg University of Technology, Germany) ........................................................................................................ 2797

Dimensioning Microwave Wireless Networks
Alvinice Kodjo (INRIA, I3S & CNRS, Université de Nice Sophia Antipolis, France), Brigitte Jaumard (Concordia University, Canada), Napoleao Nepomuceno (University of Fortaleza (UNIFOR), Brazil), Mejdi Kaddour (University of Oran 1 & Laboratoire de l'Informatique et des Technologies d'Information, Algeria), David Coudert (INRIA, I3S, CNRS, Université de Nice Sophia, France) ........................................................................................................ 2803

Joint Channel-Buffer Aware Energy-Efficient Scheduling over Fading Channels with Short Coherent Time
Xiang Chen (Tsinghua University, P.R. China), Wei Chen (Tsinghua University, P.R. China) ........................................................................................................ 2810

Random Cell Association and Void Probability in Poisson-Distributed Cellular Networks
Chun-Hung Liu (National Chiao Tung University, Taiwan), Li-Chun Wang (National Chiao Tung University, Taiwan) ........................................................................................................ 2816

Small cells and heterogeneous Networks

Interference Mitigation in Femtocell Networks using Single-Radio Parasitic Antennas
Rongrong Qian (Heriot-Watt University, United Kingdom), Mathini Sellathurai (Heriot-Watt University, United Kingdom) ........................................................................................................ 2828

Spatial Heterogeneity of Users in Wireless Cellular Networks Based on Open Urban Maps
Meisam Mirahsan (Carleton University, Canada), Rainer Schoenen (RWTH Aachen University, Faculty 6, Germany), Sebastian S Szyszkołowicz (Carleton University, Canada), Halim Yanikomeroglu (Carleton University, Canada) ........................................................................................................ 2834

Analysis of Area Spectral Efficiency and Link Reliability in Multiuser MIMO HetNets
Chang Li (Hong Kong University of Science and Technology & Massachusetts Institute of Technology, Hong Kong), Jun Zhang (The Hong Kong University of Science and Technology, Hong Kong), Shenghui Song (The Hong Kong University of Science and Technology, Hong Kong), Khaled B. Letaief (The Hong Kong University of Science and Technology, Hong Kong) ........................................................................................................ 2839

Rate Analysis and Pilot Reuse Design for Dense Small Cell Networks
Qiang Sun (Nantong University, P.R. China), Jue Wang (Nantong University, P.R. China), Shi Jin (Southeast University, P.R. China), Chen Xu (Nantong University, P.R. China), Xiqi Gao (Southeast University, P.R. China), Kai Kit Wong (University College London, United Kingdom) ........................................................................................................ 2845

A Stochastic Geometry Framework for LOS/NLOS Propagation in Dense Small Cell Networks
Carlo Galiotto (CTVR, Trinity College Dublin, Ireland), Nuno K Pratas (Aalborg University, Denmark), Nicola Marchetti (CTVR Trinity College, Ireland), Linda Doyle (Trinity College Dublin, Ireland) ........................................................................................................ 2851

Stochastic Geometry Analysis of Error Probability in Interference Limited Wireless Networks
Yamuna Dhungana (University of Alberta, Canada), Chintha Tellambura (University of Alberta, Canada) ........................................................................................................ 2857
Wireless Optical technology based Body Area Network for Health Monitoring Application
Ludovic Chevalier (University of Limoges, France), Stephanie Sahuguede (University of Limoges, France), Anne Julien-Vergonjaanne (University of Limoges, France) 2863

A Threshold-Based Approach for Joint Active User Selection and Feedback in MISO Downlink Systems
Apostolos Destounis (Huawei Technologies France Research Center, France), Mohamad Assaad (CentraleSupelec, France), Mérouane Debbah (Huawei, France), Bessem Sayadi (Alcatel-Lucent Bell-Labs, France) 2869

Design of Three-Dimensional Constellations for Wireless Communication Systems
Bo Chen (Sun Yat-sen University, P.R. China), Ming Jiang (Sun Yat-sen University, P.R. China) 2876

An energy- and time-efficient M-ary detecting tree RFID MAC protocol
Lijuan Zhang (the School of Mechanical and Electrical Engineering, Australia), Wei Xiang (University of Southern Queenslan, Australia) 2882

On Performance of I/Q Column-wise Complementary Coded CDMA Communication Systems
Guodong Li (Harbin Institute of Technology, P.R. China), Weixiao Meng (Harbin Institute of Technology, P.R. China), Hsiao-Hwa Chen (National Cheng Kung University, Taiwan) 2888

AdaptCast: An Integrated Source to Transmission Scheme for Wireless Sensor Networks
Georgios Angelopoulos (Massachusetts Institute of Technology, USA), Muriel Médard (MIT, USA), Anantha Chandrakasan (Massachusetts Institute of Technology, USA) 2894

Opportunistic Polling for Capacity-Region-Aware MAC in Wireless Networks with Partial CSI
Yi-Shing Liou (National Chiao Tung University, Taiwan), Rung-Hung Gau (National Chiao Tung University, Taiwan), Chung-Ju Chang (National Chiao Tung University, Taiwan) 2900

Coordinated Scheduling for the Downlink of Cloud Radio-Access Networks
Ahmed Douik (California Institute of Technology, USA), Hayssam Dahrouj (Effat University, Canada), Tareq Y. Al-Naffouri (King Abdullah University of Science and Technology, USA), Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia) 2906

Performance of Non-orthogonal Multiple Access with a Novel Interference Cancellation Method
Huseyin Haci (Cyprus Near East University, Cyprus), Huiling Zhu (University of Kent, United Kingdom) 2912

Iterative Multiuser Receiver in Sparse Code Multiple Access Systems
Yiqun Wu (Huawei, P.R. China), Shunqing Zhang (Huawei Technologies Co., Ltd., P.R. China), Yan Chen (Huawei, P.R. China) 2918

On the Spatial Characterization of 3-D Air-to-Ground Radio Communication Channels
Sardar Muhammad Gulafam (Comsats Institute of Information Technology, Pakistan), Junaid Nawaz Syed (COMSATS Institute of Information Technology, Islamabad, Pakistan), Mohammad N. Patwary (Staffordshire University, Stafford, United Kingdom), Mohamed Abdel-Maguid (University Campus Suffolk, United Kingdom) 2924

Social-Aware Content Downloading Mode Selection for D2D Communications
Yueming Cai (Institute of Communications Engineering, PLAUST, P.R. China), Dan Wu (Institute of Communications Engineering, PLAUST, P.R. China), Weiwei Yang (PLAUST, P.R. China) 2931
Joint Channel and Power Allocation in Underlay Multicast Device-to-Device Communications
Hadi Meshgi (McMaster University, Canada), Dongmei Zhao (McMaster University, Canada),
Rong Zheng (McMaster University, Canada) ........................................................................................................ 2937

Energy Efficient Resource Allocation for D2D Communication Underlaying Cellular Networks
Xue Chen (Utah State University, USA), Rose Qingyang Hu (Utah State University, USA),
Jeongho Jeon (Intel Corporation, USA), Geng Wu (Intel Corporation, USA) ....................................................... 2943

Distributed Resource Allocation in D2D-Enabled Multi-tier Cellular Networks: An Auction Approach
Monowar Hasan (University of Manitoba, Canada), Ekram Hossain (University of Manitoba, Canada) ........................................................................................................ 2949

Resource Allocation for Multiple-pair D2D Communications in Cellular Networks
Yuan Kai (University of Kent, United Kingdom), Huiling Zhu (University of Kent, United Kingdom) .......................................................... 2955

Social Community Aware Long-Range Link Establishment for Multi-hop D2D Communication Networks
Zhao Yulei (Tsinghua University, P.R. China), Yong Li (Tsinghua University, P.R. China),
Hongliang Mao (Tsinghua University, P.R. China), Ning Ge (Tsinghua University, P.R. China) ....... 2961

Machine to Machine Communications

Prioritized Random Access for Machine-to-Machine Communications in OFDMA Based Systems
Taehoon Kim (Korea Advanced Institute of Science and Technology, Korea), Kab Seok Ko
(KAIST, Korea), Dan Keun Sung (Korea Advanced Institute of Science and Technology, Korea) ........................................................................................................ 2967

Aggregation and Trunking of M2M Traffic via D2D Connections
Giovanni Rigazzi (University of Florence, Italy), Nuno K Pratas (Aalborg University, Denmark),
Petar Popovski (Aalborg University, Denmark), Romano Fantacci (University of Florence, Italy) ........................................................................................................ 2973

Energy-Aware Waiting-Line Based Resource Allocation in Cellular Network with M2M/H2H Co-existence
Mei-Ju Shih (National Taiwan University, Taiwan), Chia-Yi Yeh (National Taiwan University,
Taiwan), Dowhon Kevin Huang (National Taiwan University, Taiwan), Hung-Yu Wei (National
Taiwan University, Taiwan) ........................................................................................................ 2979

A Random Channel Access Scheme for Massive Machine Devices in LTE Cellular Networks
Ayoade Ilori (Aston University, United Kingdom), Zuoyin Tang (Aston University, United
Kingdom), Jianhua He (Aston University, United Kingdom), Keith James Blow (Aston
University, United Kingdom), Hsiao-Hwa Chen (National Cheng Kung University, Taiwan) .......... 2985

Smart Meter Packet Transmission via the Control Signal of LTE Networks
Chalakorn Karupongsiri (The University of Sydney, Australia), Kumudu S Munasinghe
(University of Canberra, Australia), Abbas Jamalipour (University of Sydney, Australia) ......... 2991

Massive M2M Access with Reliability Guarantees in LTE Systems
German Corrales Madueño (Aalborg University, Denmark), Nuno K Pratas (Aalborg University,
Denmark), Čedomir Stefanović (Aalborg University & University of Novi Sad, Denmark), Petar
Popovski (Aalborg University, Denmark) ........................................................................................................ 2997

Security, Privacy and Trust

A Delay-Aware and Secure Data Forwarding Scheme for Urban Sensing Networks
Di Tang (The Third Research Institute of Ministry of Public Security, P.R. China), Jian Ren
(Michigan State University, USA) ........................................................................................................ 3003

WicLoc: An Indoor Localization System based on WiFi Fingerprints and Crowdsourcing
Jianwei Niu (Beihang University, P.R. China), Bowei Wang (Beihang University, P.R. China),
Long Cheng (Beihang University, USA), Joel J. P. C. Rodrigues (Instituto de
Telecomunicações, University of Beira Interior, Portugal) ........................................................................... 3008
Preventing Denial of Service Attacks in Wireless Sensor Networks
Djamel Mansouri (USTHB, Algeria), Lynda Mokdad (Université de Paris 12 & Laboratoire LACL, France), Jalel Ben-Othman (University of Paris 13, France), Malika Ioualalen (USTHB, Algeria) ........................................................................................................................................ 3014

GAHAP: A Group-based Anonymity Handover Authentication Protocol for MTC in LTE-A Networks
Jin Cao (Xidian University, P.R. China), Hui Li (Xidian University, P.R. China), Maode Ma (Nanyang Technological University, Singapore) .................................................................................................................................................. 3020

RC-NDN: Raptor Codes Enabled Named Data Networking
Carlos Anastasiades (University of Bern, Switzerland), Nikolaos Thomos (University of Essex, United Kingdom), Alexander Strifeler (University of Bern, Switzerland), Torsten Ingo Braun (University of Bern, Switzerland) ........................................................................................................................................ 3026

Game Theory

Game Theory Based Multi-tier Spectrum Sharing for LTE-A Heterogeneous Networks
Tiantian Ran (Beijing University of Posts and Telecommunications, P.R. China), Sun Songlin (Beijing University of Posts and Telecommunications, P.R. China), Bo Rong (Communications Research Center Canada, Canada), Kadoch Michel (ETS University of Quebec, Canada) .......... 3033

Game Theoretic Resource Allocation for Multicell D2D Communications with Incomplete Information
Jun Huang (Chongqing University of Posts and Telecommunications, P.R. China), Yin Ying (Chongqing University of Posts and Telecommunications, P.R. China), Yi Sun (Chongqing University of Posts and Telecommunications, P.R. China), Yanxiao Zhao (South Dakota School of Mines and Technology, USA), Cong-cong Xing (Nicholls State University, USA), Qiang Duan (The Pennsylvania State University, USA) ........................................................................................................................................ 3039

Markov Approximation for Multi-RAT Selection
Siwei Chen (Shanghai Jiao Tong University, P.R. China), Xiaoying Gan (Shanghai Jiao Tong University, P.R. China), Xiaohua Tian (Shanghai Jiao Tong University, P.R. China), Weijie Wu (Huawei Technologies Investment Co., Ltd, Hong Kong), Jing Liu (Shanghai Jiao Tong University, P.R. China) .......... 3045

Pricing Equilibrium for Data Redistribution Market in Wireless Networks
Yanyao Shen (Tsinghua University, Beijing, P.R. China), Chunxiao Jiang (Tsinghua University, Beijing, P.R. China), Tony Q. S. Quek (Singapore University of Technology and Design, Singapore), Haijun Zhang (The University of British Columbia, Canada), Yong Ren (Tsinghua University, Beijing, P.R. China) ........................................................................................................................................ 3051

Resource Allocation in Pollution Attack and Defense: A Game-Theoretic Perspective
Wei Tong (Nanjing University, P.R. China), Sheng Zhong (Nanjing University, P.R. China) .......... 3057

A Distributed Market Framework for Mobile Data Offloading
Kehao Wang (WHUT, P.R. China), Francis C.M. Lau (The Hong Kong Polytechnic University, Hong Kong), Lin Chen (The University of Paris-Sud, France), Robert Schober (Universität Erlangen-Nürnberg, Germany) ........................................................................................................................................ 3063

Multimedia Communications

Optimized Network-coded Scalable Video Multicasting over eMBMS Networks
Andrea Tassi (Lancaster University, United Kingdom), Ioannis Chatzigeorgiou (Lancaster University, United Kingdom), Dejan Vukobratović (University of Novi Sad, Serbia), Andrew L. Jones (Lancaster University, United Kingdom) ........................................................................................................................................ 3069

Bitrate Adaptation for Mobile Video Streaming Based on Buffer and Channel State
Wei Bao (University of Toronto, Canada), Stefan Valentin (Huawei Technologies, France) .......... 3076
Match to Cache: Joint User Association and Backhaul Allocation in Cache-aware Small Cell Networks
Francesco Pantisano (European Commission - Joint Research Centre, Italy), Mehdi Bennis (Centre of Wireless Communications, University of Oulu, Finland), Walid Saad (Virginia Tech, USA), Mérouane Debbah (Huawei, France) .......................................................... 3082

QoS Oriented Heterogeneous Traffic Scheduling in LTE Downlink
Xuanli Wu (Communication Research Center, Harbin Institute of Technology, P.R. China), Xingling Han (Harbin Institute of Technology, P.R. China), Xiaodong Lin (University of Ontario Institute of Technology, Canada) .......................................................... 3088

Adaptive Learning for Scalable Video Transmission with HARQ over Dynamic Wireless Channels
Wenbo Wang (Rochester Institute of Technology, USA), Andres Kwasinski (Rochester Institute of Technology, USA) .......................................................... 3094

Network Side Lightweight and Scalable YouTube QoE Estimation
Péter Szilágyi (Nokia Solutions and Networks, Hungary), Csaba Vulkán (Nokia Siemens Networks, Hungary) .......................................................... 3100

LTE Networks I

A Novel D2D Data Offloading Scheme for LTE Networks
Zehua Wang (University of British Columbia, Canada), Vincent W.S. Wong (University of British Columbia, Canada) .......................................................... 3107

Coordinated Radio Resource Allocation in LTE Femtocell Cluster Considering Transport Limitations
Ming Li (Hamburg University of Technology, Germany), Phuong Nga Tran (NTT R&D Center, Japan), Hüseyin K Tütüncüoğlu (Hamburg University of Technology, Germany), Andreas Timm-Giel (Hamburg University of Technology, Germany) .......................................................... 3113

A Fair Uplink Scheduling Algorithm to Achieve Higher MAC Layer Throughput in LTE
Atri Mukhopadhyay (Indian Institute of Technology Kharagpur, India), Goutam Das (IIT Kharagpur, India), Vangala Sudheer Kumar Reddy (IIT Kharagpur, India) .......................................................... 3119

Performance Optimization of Aircraft In-Cabin LTE Deployment Using Taguchi's Method
Tezcan Cogalan (University of Edinburgh, United Kingdom), Stefan Videv (University of Edinburgh, United Kingdom), Harald Haas (The University of Edinburgh, United Kingdom) .......................................................... 3125

Impact of Inactivity Timer on Performance of Control Plane in LTE Core Network under Burst Traffic
Yoshiyuki Yamada (NEC Corporation, Japan), Yasuhiro Miyao (NEC Corporation, Japan) .......................................................... 3131

LTE Networks II

Interference Cancellation based on Blindly-Detected Interference Parameters for LTE-Advanced UE
Heunchul Lee (Modem Development, Samsung Electronics, Korea), Jong-Han Lim (Samsung Electronics, Korea), Sungyoon Cho (Samsung Electronics & Yonsei University, Korea), Sungssoo Kim (Samsung Electronics Co., Ltd, Korea) .......................................................... 3143

Utility based QoS aware Uplink Scheduler Scheme for LTE Small Cell Network
Saptarshi Chaudhuri (Wipro Technologies, India), Irfan Baig (Wipro Limited & International Institute of Information Technology - Bangalore, India), Debabrata Das (International Institute of Information Technology - Bangalore, India) .......................................................... 3149

Exploiting Multicast in LTE Networks for Smart Grids Demand Response
Navrati Saxena (Sungkyunkwan University & School of Information and Communication Eng., Korea), Abhishek Roy (Samsung Electronics, Korea) .......................................................... 3155
Soft Frequency Reuse Schemes for Heterogeneous LTE Systems
Giovanni Giambene (University of Siena, Italy), Van Anh Le (University of Siena, Italy), Thomas Bourgeau (Université Pierre et Marie Curie - Paris Universitas, France), Hakima Chaouchi (Telecom Sud Paris-Institut Mines Telecom & CNRS SAMOVAR, France) .................................................. 3161

Traffic Aware Power Allocation and Frequency Reuse for Green LTE-A Heterogeneous Networks
Yuhan Zheng (Beijing University of Posts and Telecommunications, P.R. China), Sun Songlin (Beijing University of Posts and Telecommunications, P.R. China), Bo Rong (Communications Research Center Canada, Canada), Kadoch Michel (ETS University of Quebec, Canada), Yasushi Yamao (The University of Electro-Communications, Japan) .................................................. 3167

A performance comparison of LTE downlink scheduling algorithms in time and frequency domains
Mattia Carpin (University of Padova, Italy), Andrea Zanella (University of Padova, Italy), Jawad Rasool (Telenor ASA, Norway), Kashif Mahmood (Telenor, Norway), Ole Grøndalen (Telenor, Norway), Olav Norvald Østerbø (Telenor Corporate Development, Norway) .......... 3173

Energy Efficiency

Energy-Efficient Dynamic Event Detection by Participatory Sensing
Jianxin Zhao (Beijing Institute of Technology, P.R. China), Chi Harold Liu (Beijing Institute of Technology, P.R. China), Min Chen (Huazhong University of Science and Technology, P.R. China), Xue Liu (McGill University, Canada), Kin K. Leung (Imperial College, United Kingdom) ........................................................................................................ 3180

Optimal Energy-Efficient Regular Delivery of Packets in Cyber-physical Systems
Xueying Guo (Tsinghua University, P.R. China), Rahul Singh (Texas A&M University, USA), P R Kumar (Texas A&M University, USA), Zhisheng Niu (Tsinghua University, P.R. China) .......... 3186

Energy Efficient Offloading for Competing Users on a Shared Communication Channel
Erfan Meskar (McMaster University, Canada), George Karakostas (McMaster University, Canada), Terence D. Todd (McMaster University, Canada), Dongmei Zhao (McMaster University, Canada) ........................................................................................................ 3192

Novel Retransmission Scheme for Energy Harvesting Transmitter and Receiver
Animesh Yadav (UQAM, Canada), Mathew Pradeep Goonewardena (University of Quebec & École de Technologie Supérieure, Canada), Wessam Ajib (Université du Québec à Montréal, Canada), Halima Elbiaze (University of Quebec at Montreal, Canada) .................................................. 3198

Optimal Energy Allocation Policy for Wireless Networks in the Sky
Hoang Thai Dinh (Nanyang Technological University, Singapore), Dusit Niyato (Nanyang Technological University, Singapore), Nguyen Tai Hung (Hanoi University of Technology, Vietnam) ........................................................................................................ 3204

Improving the performance of spatial modulation by phase-only pre-scaling
Longzhuang He (Tsinghua University, P.R. China), Jintao Wang (Tsinghua University, P.R. China), Chao Zhang (Tsinghua University, P.R. China), Jian Song (Tsinghua University, P.R. China) ........................................................................................................ 3210

Mobile Social Networks

Profit Maximization in Mobile Crowdsourcing: A Truthful Auction Mechanism
Hamed Shah-Mansouri (University of British Columbia, Canada), Vincent W.S. Wong (University of British Columbia, Canada) ........................................................................................................ 3216

Evaluating the Performance of Infrastructure Sharing in Mobile Radio Networks
Lorela Cano (Politecnico di Milano, Italy), Giuliana Carello (Politecnico di Milano, Italy), Antonio Capone (Politecnico di Milano, Italy), Matteo Cesana (Politecnico di Milano, Italy) .......... 3222
### Disseminating Real-time Messages in Opportunistic Mobile Social Networks: A Ranking Perspective

Qingsong Cai (Beijing Technology and Business University & Institute of Information Engineering, Chinese Academy of Sciences, P.R. China), Limin Sun (Institute of Information Engineering, China Academy of Science, Beijing, P.R. China), Jianwei Niu (Beihang University, P.R. China), Yan Liu (Peking University, P.R. China), Junshan Zhang (Arizona State University, USA)

#### VIRO: A Virtual Routing Method for Eliminating Dead End in Opportunistic Mobile Social Network

Konglin Zhu (Beijing University of Posts and Telecommunications, P.R. China), Wenzhong Li (Nanjing University, P.R. China), Xiaoming Fu (University of Goettingen, Germany), Lin Zhang (Beijing University of Posts and Telecommunications, P.R. China)

#### Finding the Best Friend in Mobile Social Energy Networks

Dusit Niyato (Nanyang Technological University, Singapore), Ping Wang (Nanyang Technological University, Singapore), Dong In Kim (Sungkyunkwan University (SKKU), Korea), Walid Saad (Virginia Tech, USA)

#### Efficient Private Matching based on Blind Signature for Proximity-based Mobile Social Networks

Shunrong Jiang (Xidian University, P.R. China), Xiaoyan Zhu (Xidian University, P.R. China), Linke Guo (Binghamton University, USA), Jie Liu (Xidian University, P.R. China), Ripei Hao (Xidian University, P.R. China), Bo Yang (Shaanxi Normal University, P.R. China)

### Localization

#### Optimum Reference Node Deployment for TOA-based Localization

Kejun Tong (Western University, Canada), Xianbin Wang (Western University, Canada), Arash Khabbazibasmenj (Western University, Canada), Anestis Dounavis (University of Western Ontario, Canada)

#### On Optimal Anchor Placement for Efficient Area-based Localization in Wireless Networks

Noureddine Lasla (Research Center on Scientific and Technical Information (CERIST), Algeria), Mohamed Younis (University of Maryland Baltimore County, USA), Abdelraouf Ouadjaout (Research Center on Scientific and Technical Information (CERIST), Algeria), Nadjib Badache (University of Sciences and Technology Houari Boumediane (USTHB), Algeria)

#### Space Division and Dimensional Reduction Methods for Indoor Positioning System

Yun Mo (Harbin Institute of Technology, P.R. China), Zhongzhao Zhang (Harbin Institute of Technology, P.R. China), Weixiao Meng (Harbin Institute of Technology, P.R. China), Gul Agha (University of Illinois at Urbana-Champaign, USA)

#### Voronoi Diagram based Indoor Localization in Wireless Sensor Networks

Chunrong He (Southwest University, P.R. China), Songtao Guo (Southwest University, P.R. China), Yuanyuan Yang (Stony Brook University, USA)

#### Locating 3G Small Cells Using Geolocated UE Measurement Reports & RF Fingerprinting

Robert M Joyce (University of Leeds & University of Leeds, United Kingdom), Li Zhang (University of Leeds, United Kingdom)

### Wireless Relay Networks

#### Virtual Gradient based Back-Pressure Scheduling in Wireless Multi-Hop Networks

Meng Zhou (China Mobile, P.R. China), Zhenzhen Jiao (University of Chinese Academy of Sciences, P.R. China), Wei Gong (University of the Chinese Academy of Sciences, P.R. China), Cheng Li (Memorial University of Newfoundland, Canada), Baoxian Zhang (University of Chinese Academy of Sciences, P.R. China)

#### Analysis of Hop Limit in Opportunistic Networks by Static and Time-Aggregated Graphs

Suzan Bayhan (University of Helsinki, Finland), Esa Hyt"{a}i"{a} (Aalto University, Finland), Jussi Kangasharju (University of Helsinki, Finland), Joerg Ott (Aalto University, Finland)
A Power-Efficient Method to Increase Common Rate in AF Multi-Way Relay Channels
Moslem Noori (University of Alberta, Canada), Masoud Ardakani (University of Alberta, Canada) ................................................................. 3293

Resource Allocation for Multiuser Two-Way Full-Duplex Relay Networks
Zexu Li (Beijing University of Posts and Telecommunications, P.R. China), Yong Li (Beijing University of Posts and Telecommunications, P.R. China), Jun Wang (Beijing University of Posts and Telecommunications, P.R. China), Tingting Wang (Beijing University of Posts and Telecommunications, P.R. China), Mugen Peng (Beijing University of Posts & Telecommunications, P.R. China), Wenbo Wang (Beijing University of Posts and Telecommunications, P.R. China) ................................................................. 3299

Connectivity-aware Medium Access Control in Platoon-based Vehicular Ad Hoc Networks
Caixing Shao (University of Electronic Science and Technology of China, P.R. China), Supeng Leng (University of Electronic Science and Technology of China, P.R. China), Bo Fan (University of Electronic Science and Technology of China, P.R. China), Yan Zhang (Simula Research Laboratory and University of Oslo, Norway), Alexey Vinel (Halmstad University, Sweden), Magnus Jonsson (Halmstad University, Sweden) ......................................................................................................................... 3305

AARC: Cross-layer Wireless Rate Control Driven by Fine-grained Channel Assessment
Lixing Song (University of Notre Dame, USA), Shaoen Wu (Ball State University, USA) ................................................................. 3311

Cellular Networks I

A Distributed Base Station On/Off Control Mechanism for Energy Efficiency of Small Cell Networks
Qi Wang (Southeast University, P.R. China), Jun Zheng (Southeast University, P.R. China) .......... 3317

Multi-Armed Bandit for Distributed Inter-Cell Interference Coordination
Pierre Coucheny (University of Versailles, France), Kinda Khawam (Université de Versailles, France), Johanne Cohen (LRI-CNRS & PRISM-CNRS, France) ......................................................................................................................... 3323

Joint Spectrum Access and Power Allocation in Full-Duplex Cognitive Cellular Networks
Tianyu Wang (Peking University, P.R. China), Yun Liao (Peking University, P.R. China), Baoxian Zhang (University of Chinese Academy of Sciences, P.R. China), Lingyang Song (Peking University, P.R. China) ......................................................................................................................... 3329

Auction Based Spectrum Sharing for Hybrid Access in Macro-Femtocell Networks under QoS Requirements
Fei Shen (TU Dresden, Germany), Dongnan Li (TU Dresden, Germany), Pin-Hsun Lin (TU Dresden, Germany), Eduard Jorswieck (TU Dresden, Germany) ......................................................................................................................... 3335

Context-Aware Wireless Small Cell Networks: How to Exploit User Information for Resource Allocation
Ali Khanafer (University of Illinois at Urbana-Champaign, USA), Walid Saad (Virginia Tech, USA), Tamer Başar (University of Illinois at Urbana-Champaign, USA) ......................................................................................................................... 3341

A Learning Approach for Traffic Offloading in Stochastic Heterogeneous Cellular Networks
Xianfu Chen (VTT Technical Research Centre of Finland, Finland), Celimeuge Wu (University of Electro-Communications, Japan), Yifan Zhou (Zhejiang University, P.R. China), Honggang Zhang (Université Européenne de Bretagne (UEB) and Supelec & Zhejiang University, France) ......................................................................................................................... 3347

Cellular Networks II

Distributed Power Control with Active Cell Protection in Future Cellular Systems
Zhe Ren (BMW Group Research and Technology, Germany), Markus Jäger (Technische Universität München, Germany), Slawomir Stanczak (Fraunhofer Heinrich Hertz Institute & Technische Universität Berlin, Germany), Peter Fertl (BMW Group Research and Technology, Germany) ......................................................................................................................... 3352
Routing in Wireless Networks

**Optimal Geographic Caching In Cellular Networks**
Bartlomiej Błaszczyszyn (Inria-Ens, France), Anastasios Giovanidis (CNRS - Télécom Paristech, France) .......................................................... 3358

**Joint Caching and Base Station Activation for Green Heterogeneous Cellular Networks**
Konstantinos Poularakis (University of Thessaly, Greece), George Iosifidis (Yale University, USA), Leandros Tassiulas (Yale University, USA) .......................................................... 3364

**Upper and Lower Bounds of Choice Number for Successful Channel Assignment in Cellular Networks**
Ran Wang (Arizona State University, USA), Chenyang Zhou (Arizona State University, USA), Anisha Mazumder (Arizona State University, USA), Arun Das (Arizona State University, USA), Hal Kierstead (Arizona State University, USA), Arunabha Sen (ASU, USA) .......................................................... 3370

**Average Rate Analysis for a D2D Overlaying Two-Tier Downlink Cellular Network**
Shangwei Zhang (Xi’an Jiaotong University, P.R. China), Jiajia Liu (Xi’an Jiaotong University, P.R. China), Nei Kato (Tohoku University, Japan), Hirotaka Ujikawa (NTT, Japan), Ken-Ichi Suzuki (NTT, Japan) .......................................................... 3376

**Improving Queue Stability in Wireless Multicast with Network Coding**
Nadieh Moghadam (University of Louisville, USA), Hongxiang Li (University of Louisville, USA) .......................................................... 3382

**Incentive mechanism design for delayed WiFi offloading**
Shijie Cai (Tsinghua University & Department of Electronic Engineering, P.R. China), Lingjie Duan (Singapore University of Technology and Design (SUTD), Singapore), Jing Wang (EE. Tsinghua University, P.R. China), Shidong Zhou (Tsinghua University, P.R. China), Rui Zhang (National University of Singapore, Singapore) .......................................................... 3388

**Stable Infrastructure-based Routing for Intelligent Transportation Systems**
Gubran Al-Kubati (University of Glasgow, United Kingdom), Lewis M. Mackenzie (University of Glasgow, United Kingdom), Ahmed Y Al-Dubai (Edinburgh Napier University, United Kingdom), Dimitrios P Pezaros (University of Glasgow, United Kingdom) .......................................................... 3394

**A Framework for Modeling Delay Performance of Network Coding based Epidemic Routing**
Cheng Zhao (University of Chinese Academy of Sciences & Shanghai Research Center for Wireless Communications, P.R. China), Sha Yao (Shanghai Research Center for Wireless Communications, P.R. China), Wuxiong Zhang (Shanghai Research Center for Wireless Communications, P.R. China), Yang Yang (Chinese Academy of Science, P.R. China) .......................................................... 3400

**Geo-Social: Routing with Location and Social Metrics in Mobile Opportunistic Networks**
Ying Zhu (Samsung, USA), Chao Zhang (University of North Carolina at Charlotte, USA), Fan Li (Beijing Institute of Technology, P.R. China), Yu Wang (University of North Carolina at Charlotte, USA) .......................................................... 3405

**Cross-Layer Traffic Engineering for Software-Defined Radio Access Networks**
Hamid Farmanbar (Huawei Technologies Canada Co., Ltd., Canada), Hang Zhang (Huawei, Canada) .......................................................... 3411

Small Cell and HetNet I

**User Association as a Stochastic Game for Enhanced Performance in Heterogeneous Networks**
Xiao Tang (Xi’an Jiaotong University, P.R. China), Pinyi Ren (Xi’an Jiaotong University, P.R. China), Yichen Wang (Xi’an Jiaotong University, P.R. China), Qinghe Du (Xi’an Jiaotong University, P.R. China), Li Sun (Xi’an Jiaotong University, P.R. China) .......................................................... 3417

**Pass Go and Collect $200: The Profitable Union of Facilities and Small-Cells**
Malcolm Egan (Czech Technical University in Prague, Czech Republic), Gareth Peters (University College London London, United Kingdom), Ido Nevat (Institute for Infocomm Research, Singapore), Iain B. Collings (Macquarie University, Australia) .......................................................... 3423
Cross-tier Handover Analyses in Small Cell Networks: A Stochastic Geometry Approach
Yateng Hong (Beijing University of Posts and Telecommunications, P.R. China), Xiaodong Xu (Beijing University of Posts and Telecommunications & Wireless Technology Innovation Institute, P.R. China), Mingliang Tao (Beijing University of Posts and Telecommunications, P.R. China), Jingya Li (Chalmers University of Technology, Sweden), Tommy Svensson (Chalmers University of Technology, Sweden) ................................................................. 3429

Demand Estimation in Dense and Efficient Small Cell Architectures
Ulas Can Kozat (Ozyegin University, USA), Guanfeng Liang (Linkedin, USA) ........................................... 3435

Homology-based Metaheuristics for Cell Planning with Macroscopic Diversity using Sector Antennas
Yasuhiro Ikeda (NTT, Japan), Ryoichi Kawahara (NTT, Japan), Hiroshi Saito (NTT & NTT Network Technology Laboratories, Japan) .............................................................................. 3442

Optimized Handoff with Mobility Prediction Scheme Using HMM for Femtocell Networks
Ahlam Ben Cheikh (UPMC, France), Mouna Ayari (University of La Manouba - Tunisia & LIP6 - UPMC- Paris 6 - France, Tunisia), Rami Langar (UPMC - University of Paris 6, France), Guy Pujolle (University Pierre et Marie Curie - Paris 6, France), Leila Azouz Saidane (ENSI, University of Manouba, Tunisia) ...................................................................... 3448

Small Cell and HetNet II

Double Spectrum Small Cell (DSSC) for Discovering Inter-Frequency Small Cell in HetNet
Ali Mahbas (University of Kent, United Kingdom) ................................................................................. 3454

Matching Theory for Backhaul Management in Small Cell Networks with mmWave Capabilities
Omid Semiari (Virginia Tech, USA), Walid Saad (Virginia Tech, USA), Zaher Dawy (American University of Beirut, Lebanon), Mehdi Benni (Centre of Wireless Communications, University of Oulu, Finland) ......................................................................................................................... 3460

Best-fit Cell Attachment for Decoupling DL/UL to Promote Traffic Offloading in HetNets
Hemin Yang (Peking University, P.R. China), Anpeng Huang (Peking University, P.R. China), LinZhen Xie (Peking University, P.R. China) ................................................................. 3466

Distributed Optimization for Downlink Broadband Small Cell Networks
Shaozhen Guo (Beijing Institute of Technology, P.R. China), Chengwen Xing (Beijing Institute of Technology, P.R. China), Zesong Fei (Beijing Institute of Technology, P.R. China), Hualei Wang (China Mobile Research Institution, P.R. China), Zhengang Pan (University of Hong Kong, Hong Kong) ......................................................................................................................... 3472

Temporal Coverage Based Content Distribution in Heterogeneous Smart Device Networks
Wei Peng (Indiana University-Purdue University Indianapolis, USA), Feng Li (Indiana University-Purdue University Indianapolis, USA), Xukai Zou (School of Science, Purdue University-Indianapolis, USA) ......................................................................................................................... 3477

Tradeoffs in Video Transmission over Wireless Heterogeneous Networks: Energy, Bandwidth and QoE
Yiran Xu (Utah State University, USA), Rose Qingyang Hu (Utah State University, USA), Yi Qian (University of Nebraska–Lincoln, USA), Taieb Znati (University of Pittsburgh, USA) ................................................. 3483

Wireless Scheduling

Distributed Throughput Optimal Scheduling in the Presence of Heavy-Tailed Traffic
Shuang Xia (Wichita State University, USA), Pu Wang (Wichita State University, USA) ....................... 3490

Virtual Frame Aggregation: Clustered Channel Access in Wireless Networks
Xuan Dong (National University of Defense Technology, P.R. China), Shaohe Lv (National University of Defense Technology, P.R. China), Chunsheng Zhu (The University of British Columbia, Canada), Rukhsana Ruby (University of British Columbia, Canada), Xiaodong Wang (National University of Defense Technology, P.R. China), XingMing Zhou (School of Computer, National University of Defense Technology, P.R. China), Victor C.M. Leung (The University of British Columbia, Canada) ......................................................................................................................... 3497
Effective Task Scheduling in Proximate Mobile Device based Communication Systems
Longfei Wu (Temple University, USA), Xiaojiang Du (Temple University, USA), Hongli Zhang (Harbin Institute of Technology, P.R. China), Wei Yu (Towson University, USA), Chonggang Wang (InterDigital Communications, USA) ................................................................. 3503

Dynamic TDD Enhancement through Distributed Interference Coordination
Yi Zhong (University of Science and Technology of China, P.R. China), Peng Cheng (QUALCOMM, P.R. China), Neng Wang (QUALCOMM, P.R. China), Wenyi Zhang (University of Science and Technology of China, P.R. China) ................................................................. 3509

Multicast Resource Allocation with Side Information in Multicarrier Wireless Networks
Yuan Qi (Shanghai Jiao Tong University, P.R. China), Cunqing Hua (Shanghai Jiao Tong University, P.R. China) ................................................................. 3516

Opportunistic Multicast Scheduling for Unicast Transmission in MIMO-OFDM System
Peng Hui Tan (Institute for Infocomm Research, Singapore), Jingon Joung (Institute for Infocomm Research, Singapore), Sumei Sun (Institute for Infocomm Research, Singapore) .......................... 3522

Sensor Networks

Energy Harvesting Sensor Networks with a Mobile Control Center: Optimal Transmission Policy
Tao Li (Tsinghua University, P.R. China), Pingyi Fan (Tsinghua University, P.R. China), Khaled B. Letaief (The Hong Kong University of Science and Technology, Hong Kong) ................................................................. 3528

RM-MAC: A Routing-Enhanced Multi-Channel MAC Protocol in Duty-Cycle Sensor Networks
Ye Liu (Southeast University, P.R. China), Liu Hao (Southeast University, P.R. China), Qing Yang (Montana State University, USA), Shaoen Wu (Ball State University, USA) ................................................................. 3534

Bayesian Coalition Game-Based Optimized Clustering in Wireless Sensor Networks
Sudhanshu Tyagi (JPIET, Meerut, India), Sudeep Tanwar (BIT Meerut, India), Sumit Gupta (IIIT, Meerut, India), Neeraj Kumar (Thapar University Patiala, India), Sudip Misra (Indian Institute of Technology-Kharagpur, India), Joel J. P. C. Rodrigues (Instituto de Telecomunicações, University of Beira Interior, Portugal), Sana Ullah (Polytechnic Institute of Porto, Portugal) ................................................................. 3540

Crowdsourcing with Trembles: Incentive Mechanisms for Mobile Phones with Uncertain Sensing Time
Shiyu Ji (Oklahoma State University, USA), Tingting Chen (California State Polytechnic University, Pomona, USA), Fan Wu (Shanghai Jiao Tong University, P.R. China) ................................................................. 3546

An Improved Spray and Wait Algorithm based on RVNS in Delay Tolerant Mobile Sensor Networks
Kun Wang (Nanjing University of Posts and Telecommunications, P.R. China), Yun Shao (Nanjing University of Posts and Telecommunications, P.R. China), Lei Shu (Guangdong University of Petrochemical Technology, P.R. China), Yanfei Sun (Nanjing University of Posts and Telecommunications, P.R. China), Lei He (University of California, Los Angeles, USA) ................................................................. 3552

Modeling and Performance Analysis I

On Cyclostationary Analysis of WiFi Signals for Direction Estimation
Changlai Du (Virginia Tech, USA), Huacheng Zeng (Virginia Tech, USA), Wenjing Lou (Virginia Tech & National Science Foundation, USA), Thomas Hou (Virginia Tech, USA) ................................................................. 3557

Analysis of Network Navigation with Scheduling Strategies
Tianheng Wang (MIT, USA), Yuan Shen (Tsinghua University & Massachusetts Institute of Technology, P.R. China), Andrea Conti (ENDIF University of Ferrara, WiLAB University of Bologna, Italy), Moe Win (Massachusetts Institute of Technology, USA) ................................................................. 3562

Radio-as-a-Service: Auction-based Model and Mechanisms
Jing Wang (Syracuse University, USA), Dejun Yang (Colorado School of Mines, USA), Jian Tang (Syracuse University, USA), M. Cenk Gursoy (Syracuse University, USA) ................................................................. 3567
**Modeling and Performance Analysis II**

### Wireless Mesh Networks

**Ads Dissemination in Vehicular Ad Hoc Networks**
Chao Wang (Beijing Institute of Technology, P.R. China), Yingwen Chen (National University of Defense Technology, P.R. China), Xiuzhen Cheng (George Washington Univ, USA), Fan Xiumei (Xi'an University of Technology, P.R. China) ................................................................. 3640

**Performance Modeling and Analysis of the ADHOC MAC Protocol for VANETs**
Qiong Wu (Southeast University, P.R. China), Jun Zheng (Southeast University, P.R. China) .......... 3646

**An Emergency Message Dissemination Protocol using N-way Search with Power Control for VANETs**
Yen-Da Chen (Lunghwa University of Science and Technology, Taiwan), Yi-Ping Shih (University of Tamkang, Taiwan), Kuei-Ping Shih (Tamkang University, Taiwan) .................................................. 3653

**A Dynamic Hierarchical VANET Architecture for Named Data Networking Applications**
Cristina De Castro (CNR - IEIIT, Italy), Carla Raffaelli (University of Bologna, Italy), Oreste Andrisano (University of Bologna, Italy) .................................................................................................................. 3659

**Performance Modeling and Analysis of the ADHOC MAC Protocol for VANETs**
Qiong Wu (Southeast University, P.R. China), Jun Zheng (Southeast University, P.R. China) .......... 3646

**INCOR: Inter-flow Network Coding based Opportunistic Routing in Wireless Mesh Networks**
Donghai Zhu (Xi'an Jiaotong University, P.R. China), Xinyu Yang (Xi'an Jiaotong University, P.R. China), Wei Yu (Towson University, USA), Chao Lu (Towson University, USA), Xinwen Fu (University of Massachusetts Lowell, USA) ................................................................. 3666

**Network Coding with Link Layer Cooperation in Wireless Mesh Networks**
Somayeh Kafaie (Memorial University, Canada), Yuanzhu Chen (Memorial University of Newfoundland, Canada), Mohamed Hossam Ahmed (Memorial University, Canada), Octavia A. Dobre (Memorial University of Newfoundland, Canada) .................................................................................................................. 3672

**Making a Case for Flexible 802.11 Architectures**
Pablo Salvador (Institute IMDEA Networks & University Carlos III of Madrid, Spain), Francesco Gringoli (University of Brescia, Italy), Pablo Serrano (Universidad Carlos III de Madrid, Spain), Nicolò Facchi (University of Brescia, Italy), Stefano Paris (Huawei Technologies Co. Ltd. & Université Paris Descartes, France) .................................................................................................................. 3678

**Support of TCP in Wireless Mesh with Unstable Packet Forwarding Capacity**
Chen Zhang (Memorial University of Newfoundland, Canada), Yuanzhu Chen (Memorial University of Newfoundland, Canada), Cheng Li (Memorial University of Newfoundland, Canada) .................................................................................................................. 3685

**Channel Vector: An Overhead Reduced Broadcast in Multichannel Wireless Mesh Networks**
Tu Xiaoyu (PLA University of Science and Technology, P.R. China), Hai Wang (Nanjing Institute of Communications Engineering, P.R. China), Zhimin Li (PLA University of Science and Technology, P.R. China) .................................................................................................................. 3690

**SINR-Based Connectivity Enhancement In Wireless Ad Hoc Networks**
Maggie Cheng (Missouri University of Science and Technology, USA), Yi Ling (Missouri University of Science and Technology, USA), Brian Sadler (Army Research Laboratory, USA) .......... 3696

### Cognitive Radio Networks

**Enhancing Channel Rendezvous in Cognitive Radio Networks with Directional Antennas**
Yi Song (Wichita State University, USA), Linda Jiang Xie (University of North Carolina at Charlotte, USA) .................................................................................................................. 3702

**A Uniform Framework for Network Selection in Cognitive Radio Networks**
Ye Wang (Harbin Institute of Technology Shenzhen Graduate School, P.R. China), Jia Yu (Harbin Institute of Technology Shenzhen Graduate School, P.R. China), Xiaodong Lin (University of Ontario Institute of Technology, Canada), Qinyu Zhang (Shenzhen Graduate School, Harbin Institute of Technology, P.R. China) .................................................................................................................. 3708
On the Impact of Delay Constraint on the Multicast Outage in Wireless Fading Environment
Mohammad Ghadir Khoshkholgh Dashtaki (UBC, Canada), Keivan Navaie (Lancaster University, United Kingdom), Kang G. Shin (University of Michigan, USA), Chun-Hung Liu (National Chiao Tung University, Taiwan), Yan Zhang (Simula Research Laboratory and University of Oslo, Norway), Victor C.M. Leung (The University of British Columbia, Canada), Stein Gjessing (University of Oslo & Simula Research Lab., Norway) .................................................. 3714

Distributed User Matching and Power Allocation in Cooperative Cognitive Networks
Bahareh Nazari (University of Sydney, Australia), Abbas Jamalipour (University of Sydney, Australia) .................................................................................................................. 3720

TSA: A Framework of Truthful Spectrum Auctions under the Physical Interference Model
Xiang Zhang (Arizona State University, USA), Guoliang Xue (Arizona State University, USA), Dejun Yang (Colorado School of Mines, USA), Ruozhou Yu (Arizona State University, USA), Xiaoyan Huang (University of Electronic Science and Technology of China, P.R. China) .............. 3726

Power Allocation Analysis for Dynamic Power Utility in Cognitive Radio Systems
Mahdi Ben Ghorbel (Qatar University, Qatar), Bassem Khalfi (Oregon State University, USA), Bechir Hamdaoui (Oregon State University, USA), Mohsen Guizani (QU, USA) ................................................................. 3732

Mobile Network Applications I

Targeted Emergency Network Services Deployment Algorithm for Disaster Relief Agencies
Hengky Susanto (Hong Kong University of Science and Technology, Hong Kong), Jonatan Lassa (Nanyang Technology University, Singapore), Benyuan Liu (University of Massachusetts Lowell, USA), Byung-Guk Kim (University of Massachusetts at Lowell, USA) .................................................. 3738

On Capacity Optimization in Multi-Radio Multi-Channel Wireless Networks with Directional Antennas
Lei Zhou (Illinois Institute of Technology, USA), Xianghui Cao (Illinois Institute of Technology, USA), Lu Liu (Illinois Institute of Technology, USA), Lin X. Cai (Illinois Institute of Technology, USA), Xiaohua Tian (Shanghai Jiao Tong University, P.R. China), Yu Cheng (Illinois Institute of Technology, USA) ................................................................. 3745

Circa: Offloading Collaboratively in the Same Vicinity with iBeacons
Xueling Lin (Hong Kong University of Science and Technology, Hong Kong), Jingjie Jiang (Hong Kong University of Science and Technology, Hong Kong), Bo Li (Hong Kong University of Science and Technology, Hong Kong), Baohun Li (University of Toronto, Canada) ........................................ 3751

Towards Experimental Evaluation of Intelligent Transportation System Safety and Traffic Efficiency
Nnanna Ekedebe (Towson University, USA), Chao Lu (Towson University, USA), Wei Yu (Towson University, USA) ................................................................. 3757

HARQ in LTE Uplink: a Simple and Effective Modification Suitable for Low Mobility Users
Lorenzo Vangelista (University of Padova, Italy), Marco Centenaro (University of Padova, Italy) ................................................................. 3763

A reliability-based resource sharing scheduler for mobile and fixed users in Community Networks
Pasquale Pace (University of Calabria, Italy), Fabrizio Vitelli (University of Calabria, Italy) ............ 3770

Mobile Network Applications II

Wireless Power Transfer Based on Angle Switching in Interference Alignment Wireless Networks
Nan Zhao (Dalian University of Technology, P.R. China), F. Richard Yu (Carleton University, Canada), Victor C.M. Leung (The University of British Columbia, Canada) .................................................. 3776

Eco-Inspired Low Latency Performance for Smart Grid Applications in Wireless Networks
Robert Webster (University of Sydney, Australia), Kumudu S Munasinghe (University of Canberra, Australia), Abbas Jamalipour (University of Sydney, Australia) ................................................................. 3782
Delay Tolerant Networks

Dynamic Beaconing Control in Energy-Constrained Delay Tolerant Networks
En Wang (Jilin University & Temple University, P.R. China), Yongjian Yang (Jilin University, P.R. China), Jie Wu (Temple University, USA) ................................................................. 3813

Relay Placement for Latency Minimization in Delay Tolerant Networks
Peng Li (The University of Aizu, Japan), Toshiaki Miyazaki (The University of Aizu, Japan), Song Guo (The University of Aizu, Japan) .................................................................................. 3819

Two-Stage Radio Access for Group-Based Machine Type Communication in LTE-A
HungWei Kao (National Cheng Kung University, Taiwan), You-Huei Ju (National Cheng Kung University, Taiwan), Meng-Hsun Tsai (National Cheng Kung University, Taiwan) ........................................... 3825

Content Messenger Selection and Wireless Energy Transfer Policy in Mobile Social Networks
Dusit Niyato (Nanyang Technological University, Singapore), Ping Wang (Nanyang Technological University, Singapore), Dong In Kim (Sungkyunkwan University (SKKU), Korea), Zhi Han (University of Houston, USA) ........................................................................... 3831

Knowing who and when to deliver: An Optimal Stopping method for Maritime Data Scheduling
Tingting Yang (Dalian Maritime University, P.R. China), Nan Cheng (University of Waterloo, Canada), Chao Yu (Dalian Maritime University, P.R. China), Hailong Feng (Dalian Maritime University, P.R. China), Sherman Shen (University of Waterloo, Canada) ................................................................. 3837

Resource Allocations

Solving the Performance Puzzle of DSRC Multi-Channel Operations
Kai Xiong (McGill University, Canada), Xi Chen (McGill University, Canada), Lei Rao (General Motors Research Lab, USA), Xue Liu (McGill University, Canada), Yuan Yao (Northwestern Polytechnical University, P.R. China) ........................................................................ 3843

Distributed Resource Allocation for Power Beacon-Assisted Wireless-Powered Communications
Yuanye Ma (University of Sydney, Australia), He Chen (The University of Sydney, Australia), Zihuai Lin (University of Sydney, Australia), Yonghui Li (University of Sydney, Australia), Branka Vucetic (The University of Sydney, Australia) ...................................................................... 3849

Wireless Capacity Maximization: A Constrained Genetic Approach
Mohamed Saad (University of Sharjah, UAE) ......................................................................................... 3855

Resource Optimization in Realistic Mobile Backhaul Networks
Johannes Lessmann (NEC Laboratories Europe, Germany) ................................................................. 3861
5G networks I

Competitive Cell Association and Antenna Allocation in 5G Massive MIMO Networks
Dusit Niyato (Nanyang Technological University, Singapore), Fumiyuki Adachi (Tohoku University, Japan), Ping Wang (Nanyang Technological University, Singapore), Dong In Kim (Sungkyunkwan University (SKKU), Korea) .......................................................... 3867

Reduced Space Channel Feedback for FD-MIMO
Eko Onggosanusi (Samsung, USA), Yang Li (University of Texas at Dallas, USA), Md Saifur Rahman (Samsung Research America - Dallas & Samsung Information Systems America, USA), Young-Han Nam (Samsung Research America, USA), Jianzhong Zhang (Samsung, USA), Ji-Yun Seol (Samsung Electronics, Korea), Taeyoung Kim (Samsung Electronics, Korea) .......................................................... 3873

User Mobility-Aware Virtual Network Function Placement for Virtual 5G Network Infrastructure
Tarik Taleb (Aalto University, Finland), Miloud Bagaa (Norwegian University of Science and Technology (NTNU), Norway), Adlen Ksentini (University of Rennes 1 / IRISA Lab, France) ........... 3879

Radio Resource Allocation with Inter-node Interference in Full-Duplex OFDMA Networks
Changwon Nam (Seoul National University, Korea), Changhee Joo (Ulsan National Institute of Science and Technology, Korea), Saewoong Bahk (Seoul National University, Korea) .......................................................... 3885

Multimedia Traffic Placement under 5G Radio Access Techniques in Indoor Environments
Quanxin Zhao (University of Electronic Science and Technology of China, P.R. China), Yuming Mao (SCIE, P.R. China), Supeng Leng (University of Electronic Science and Technology of China, P.R. China), Honggang Wang (University of Massachusetts, Dartmouth & College of Engineering, USA) .................................................................................. 3891

SDN Wireless Backhauling for Small Cells
Daniel Camps-Mur (i2CAT Foundation, Spain), Sebastia Sallent (Universitat Politecnica de Catalunya, Spain), Anna Hurtado-Borras (i2CAT Foundation, Spain), Jordi Pala-Sole (i2CAT Foundation, Spain) .................................................................................. 3897

5G networks II

Zhongyuan Zhao (Beijing University of Posts and Telecommunications, P.R. China), Mugen Peng (Beijing University of Posts & Telecommunications, P.R. China), Zhiguo Ding (Lancaster University, United Kingdom), Chonggang Wang (InterDigital Communications, USA), H. Vincent Poor (Princeton University, USA) .................................................................................. 3903

Towards Power Consumption-Delay Tradeoff by Workload Allocation in Cloud-Fog Computing
Ruilong Deng (Nanyang Technological University, Singapore), Rongxing Lu (Nanyang Technological University, Singapore), Chengzhe Lai (Xi’an University of Posts and Telecommunications, P.R. China), Tom H. Luan (School of Information Technology & Deakin University, Australia) .................................................................................. 3909

Virtual Resource Allocation in Information-Centric Wireless Virtual Networks
Chengchao Liang (Carleton University, Canada), F. Richard Yu (Carleton University, Canada) ........ 3915

Optimal Radio Access for Fully Packet-Switching 5G Networks
Shao-Yu Lien (National Formosa University, Taiwan), Shao-Chou Hung (National Taiwan University, Taiwan), Kwang-Cheng Chen (National Taiwan University, Taiwan) .......................................................... 3921

A Novel Approach for Back-haul Self Healing in 4G/5G HetNets
Mohamed Selim (Suez Canal University & Iowa State University, USA), Ahmed E. Kamal (Iowa State University, USA), Khaled Elsayed (Cairo University, Egypt), Heba Atty (Portsaid University, Egypt), M A Alnuem (King Saud University & College of Computer and Information Science, Saudi Arabia) .................................................................................. 3927

Performance Analysis of Full-Duplex Visible Light Communication Networks
Zaichen Zhang (Southeast University, P.R. China), Xutao Yu (Southeast University & National Mobile Communications Research Laboratory, P.R. China), Liang Wu (Southeast University, P.R. China), Jian Dang (Southeast University & National Mobile Communications Research Laboratory, P.R. China), Victor O. K. Li (University of Hong Kong, P.R. China) .................................................................................. 3933
Mobility Management

Mobility Prediction for Handover Management in Cellular Networks with Control/Data Separation
Abdelrahim Mohamed (University of Surrey & Centre for Communication Systems Research, United Kingdom), Oluwakayode Onireti (University of Surrey, United Kingdom), Seyed Amir Hoseinitabatabaei (University of Surrey, United Kingdom), Muhammad Ali Imran (University of Surrey, United Kingdom), Ali Imran (University of Oklahoma, USA), Rahim Tafazolli (University of Surrey, United Kingdom) ................................................................. 3939

A Hybrid Centralized-Distributed Mobility Management for Supporting Highly Mobile Users
Tien-Thinh Nguyen (EURECOM, France), Christian Bonnet (Institut Eurecom, France) ................. 3945

NASH: Navigation-Assisted Seamless Handover Scheme for LTE-A Smallcell Networks
Ming-Chin Chuang (Academia Sinica, Taiwan), Meng Chang Chen (Academia Sinica, Taiwan) ........ 3952

Cooperative and Cognitive Wireless Networks for Communication-based Train Control (CBTC) Systems
Kaicheng Li (Beijing Jiaotong University, P.R. China), Li Zhu (Carleton University, Canada), F. Richard Yu (Carleton University, Canada), Tao Tang (Beijing Jiaotong University, P.R. China), Bin Ning (State Key Laboratory of Rail Traffic Control and Safety, P.R. China) .................................................... 3958

Co-existence of Enhanced Inter Cell Interference Co-ordination and Mobility Robustness Optimization
Fasil Tesema (Nokia Solutions and Networks & Technical University of Dresden, Germany), Ingo Viering (Nomor Research GmbH, Germany), Paolo Zanier (Nokia Solutions and Networks GmbH, Germany), Meryem Simsek (Technische Universität Dresden, Germany), Gerhard Fettweis (Technische Universität Dresden, Germany) ......................................................... 3963

The Impact of Inter-Site Distance and Time-to-Trigger on Handover Performance in LTE-A HetNets
Georgios Kollias (Iquadrat Informatica, Spain), Ferran Adelantado (Universitat Oberta de Catalunya, Spain), Christos Verikoukis (Telecommunications Technological Centre of Catalonia, Spain) ........................................................................................................... 3969

ICC’15 (04) CTS: IEEE ICC 2015 - Communication Theory Symposium

Fundamentals and Optimization of Cellular Networks

Downlink Cellular Network Analysis with a Dual-slope Path Loss Model
Xinchen Zhang (The University of Texas at Austin & Qualcomm Inc., USA), Jeffrey Andrews (The University of Texas at Austin, USA) ........................................................................................................... 3975

Performance Analysis of Pair-wise Dynamic Multi-User Joint Transmission
Jeonghun Park (The University of Texas at Austin, USA), Namyoung Lee (The University of Texas at Austin, USA), Robert Heath (The University of Texas at Austin, USA) ..................................................... 3981

Distributed Optimization of Multi-Cell Uplink Co-operation with Backhaul Constraints
Shirish Nagaraj (Nokia Networks, USA), Michael Honig (Northwestern University, USA), Khalid Zeineddine (Northwestern University & Nokia Networks, USA) ................................................................. 3987

Outage Performance of Uplink Two-tier Networks Under Backhaul Constraint
Shirin Jalali (Princeton University, USA), Zolfi Zeinalpour (Yazd University, Iran), H. Vincent Poor (Princeton University, USA) ........................................................................................................... 3993

Delay-Optimal Fronthaul Allocation via Perturbation Analysis in Cloud Radio Access Networks
Wei Wang (Zhejiang University, P.R. China), Vincent Lau (Hong Kong University of Science and Technology, Hong Kong), Mugen Peng (Beijing University of Posts & Telecommunications, P.R. China) ........................................................................................................... 3999

Delay Minimizing User Association in Cellular Networks via Hierarchically Well-Separated Trees
Jeffrey Wildman (Drexel University, USA), Yusuf Osmanlioglu (Drexel University, USA), Steven Weber (Drexel University, USA), Shokoufandeh (Drexel University, USA) .................................................. 4005
Channel Capacity

High-SNR Capacity of Multiple-Antenna Phase-Noise Channels with Common/Separate RF Oscillators
M. Reza Khanzadi (Chalmers University of Technology, Sweden), Giuseppe Durisi (Chalmers University of Technology, Sweden), Thomas Eriksson (Chalmers University of Technology, Sweden) ................................................................. 4012

Approximating the Constellation Constrained Capacity of the MIMO Channel with Discrete Input
Metodi Yankov (Technical University of Denmark, Denmark), Lars P. B. Christensen (Fingerprint Cards, Denmark), Knud Larsen (Technical University of Denmark, Denmark), Soren Forchhammer (Technical University of Denmark, Denmark) ................................................................. 4018

Delay-Limited Capacity of Fading Multiple Access and Broadcast Channels in the Low Power Regime
Zouheir Rezki (King Abdullah University of Science and Technology (KAUST), Saudi Arabia), Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia) ................................................................. 4024

On the Capacity of Vector Gaussian Channels With Bounded Inputs
Borzoo Rassouli (Imperial College London, United Kingdom), Bruno Clerckx (Imperial College London & Korea University, United Kingdom) ................................................................................................. 4030

On Achievable Rates for Analog Computing Real-Valued Functions Over the Wireless Channel
Mario Goldenbaum (Technische Universität Berlin, Germany), Slawomir Stanczak (Fraunhofer Heinrich Hertz Institute & Technische Universität Berlin, Germany), Holger Boche (Technical University Munich, Germany) ................................................................................................. 4036

Capacity-Achieving Distributions of Impulsive Ambient Noise Channels
Hung Vu (McGill University, Canada), Nghi H Tran (University of Akron, USA), M. Cenk Gursoy (Syracuse University, USA), Tho Le-Ngoc (McGill University, Canada), Subramaniya Hariharan (University of Akron, USA) ................................................................. 4042

Coding Theory

Protograph-Based Anytime Reliable Channel Coding Design
Nan Zhang (University of South Australia, Australia), Md Noor-A-Rahim (University of South Australia, Australia), Badri N Vellambi (New Jersey Institute of Technology, USA), Khoa D. Nguyen (University of South Australia, Australia) ................................................................................................. 4048

Anytime Reliable Bilayer Codes with Uncoded Relaying
Md Noor-A-Rahim (University of South Australia, Australia), Khoa D. Nguyen (University of South Australia, Australia), Gottfried Lechner (University of South Australia, Australia) ................. 4054

Non-binary Classical Error-correcting Codes for Quantum Communication
Christopher Boyd (Aalto University, Finland), Renaud-Alexandre Pitaval (Aalto University, Finland), Ulo Parts (Aalto University, Finland), Olav Tirkkonen (Aalto University, Finland) ................. 4060

Error Correcting Functional Source Coding with Decoder Side Information using Row-Latin Rectangles
Anindya Gupta (Indian Institute of Science, India), B. Sundar Rajan (Indian Institute of Science, India) ................................................................................................. 4066

Low Error-Floor Majority-Logic Decoding Based Algorithm for Non-Binary LDPC Codes
Liuyuan Song (Beihang University, P.R. China), Mu Zhang (Beihang University, P.R. China), Qin Huang (Beihang University, Beijing, P.R. China), Zulin Wang (Beihang University, P.R. China) ................................................................................................. 4072

Improved Bit Error Rate Performance of Convolutional Codes with Synchronization Errors
Victor Buttigieg (University of Malta, Malta), Noel Farrugia (University of Malta, Malta) ................. 4077
Estimation and Detection

Distributed LMMSE Estimation in Cooperative Cellular Networks
Rajitha Senanayake (University of Melbourne, Australia), Phee Lep Yeoh (University of Melbourne, Australia), Jamie Evans (Monash University, Australia) ......................................................... 4083

Optimizing Pilot Length for a Go/No-Go Decision in Two-State Block Fading Channels with Feedback
Chung-Yu Lou (University of California, Los Angeles, USA), Babak Daneshrad (University of California, Los Angeles, USA), Richard Wesel (University of California, Los Angeles, USA) .............. 4089

Segment Training Based Channel Estimation and Training Design in Cloud Radio Access Networks
Qiang Hu (Beijing University of Posts & Telecommunications, P.R. China), Mugen Peng (Beijing University of Posts & Telecommunications, P.R. China), Xinqian Xie (Beijing University of Posts and Telecommunications, P.R. China), Feifei Gao (Tsinghua University, P.R. China), Dongming Wang (Southeast University & National Mobile Communications Research Lab., P.R. China) ........................................................................................................ 4095

On the Age of Channel Information for a Finite-State Markov Model
Maice Costa (University of Maryland at College Park, USA), Stefan Valentin (Huawei Technologies, France), Anthony Ephremides (University of Maryland at College Park, USA) .............. 4101

Delay Constrained Linear Transmission of a Mixture of Gaussian Measurements over a Fading Channel
Onur Tan (Centre Tecnològic de Telecomunicacions de Catalunya (CTTC), Spain), Deniz Gündüz (Imperial College London, United Kingdom), Jesús Gómez-Vilardebo (CTTC, Spain) ............. 4107

Interference Management and Power Control

Topological Interference Management with just Retransmission: What are the "Best" Topologies?
Navid NaderiAlizadeh (University of Southern California, USA), Aly El Gamal (University of Southern California, USA), Salman Avestimehr (University of Southern California, USA) .............. 4113

Interference Shaping for Device-to-Device Communication in Cellular Networks
Michael Newinger (Technische Universität München, Germany), Andreas Dotzler (Technische Universität München, Germany), Wolfgang Utschick (Technische Universität München, Germany) ........................................................................................................ 4120

Joint Interference Alignment and Bi-Directional Scheduling for MIMO Two-Way Multi-Link Networks
Ali Mohammad Fouladgar (New Jersey Institute of Technology, USA), Osvaldo Simeone (New Jersey Institute of Technology, USA), Onur Sahin (InterDigital, Inc., USA), Petar Popovski (Aalborg University, Denmark), Shlomo (Shitz) Shamai (The Technion, Israel) ................................. 4126

Best-Response Team Power Control for the Interference Channel with Local CSI
Paul de Kerret (EURECOM, France), Samson E Lasaulce (CNRS - Supelec, France), David Gesbert (Eurecom Institute, France), Umer Salim (Intel Mobile Communications, France) .............. 4132

Uplink Performance of Large Optimum-Combining Antenna Arrays in Power-Controlled Cellular Networks
Siddhantan Govindasamy (F. W. Olin College of Engineering, USA) ......................................................... 4137

Retrospective Interference Alignment for Two-Cell Uplink MIMO Cellular Networks with Delayed CSIT
Wonjae Shin (Seoul National University, Korea), Yonghee Han (Seoul National University, Korea), Jungwoo Lee (Seoul National University, Korea), Namyoun Lee (The University of Texas at Austin, USA), Robert Heath (The University of Texas at Austin, USA) ......................................................... 4144
Physical-Layer Security

On Secret-Key Generation Using Wideband Channels in Mobile Networks
Yuan Shen (Tsinghua University & Massachusetts Institute of Technology, P.R. China), Moe Win (Massachusetts Institute of Technology, USA) ................................................................. 4151

Secrecy for MISO Broadcast Channels via Alternating CSIT
Pritam Mukherjee (University of Maryland, USA), Ravi Tandon (Virginia Tech, USA), Sennur Ulukus (University of Maryland, USA) ........................................................................................................ 4157

On the Continuity of the Secrecy Capacity of Wiretap Channels Under Channel Uncertainty
Holger Boche (Technical University Munich, Germany), Rafael F. Schaefer (Princeton University, USA), H. Vincent Poor (Princeton University, USA) ................................................................. 4163

Secure Degrees of Freedom of N × N × M Wiretap Channel with a K-Antenna Cooperative Jammer
Mohamed Nafea (The Pennsylvania State University, USA), Aylin Yener (Pennsylvania State University, USA) ....................................................................................................................... 4169

Unshared Secret Key Cryptography: Finite Constellation Inputs and Ideal Secrecy Outage
Shulyin Liu (Monash University, Australia), Yi Hong (Monash University, Australia), Emanuele Viterbo (Monash University, Australia) ........................................................................................................ 4175

The Individual Secrecy Capacity of Degraded Multi-Receiver Wiretap Broadcast Channels
Ahmed Mansour (Technische Universität München, Germany), Rafael F. Schaefer (Princeton University, USA), Holger Boche (Technical University Munich, Germany) ................................................................. 4181

Network Information Theory

Three-User MISO Broadcast Channel: How Much Can CSIT Heterogeneity Help?
Sina Lashgari (Cornell University, USA), Ravi Tandon (Virginia Tech, USA), Salman Avestimehr (University of Southern California, USA) ....................................................................................................................... 4187

An Achievable Rate Region of Broadcast Relay Channel with State Feedback
Chao He (SUPELEC, France), Sheng Yang (Supelec, France), Pablo Piantanida (SUPELEC, France) ................................................................................................................................. 4193

DoF Analysis of the K-user MISO Broadcast Channel with Hybrid CSIT
Borzoo Rassouli (Imperial College London, United Kingdom), Bruno Clerckx (Imperial College London & Korea University, United Kingdom), Chenxi Hao (Imperial College London, United Kingdom) ....................................................................................................................... 4199

On User Scheduling for Maximum Throughput in K-user MISO Broadcast Channels
Martina Cardone (University of Califonia, Los Angeles, USA), Daniela Tuninetti (University of Illinois at Chicago, USA), Raymond Knopp (Institut Eurecom, France) ....................................................................................................................... 4205

Deterministic IMAC Revisited: Constant-Gap Capacity in the Weak Interference Case
Rick Fritschek (Berlin Institute of Technology, Germany), Gerhard Wunder (Heinrich-Hertz-Institut, Germany) ................................................................................................................................. 4211

Degrees-of-Freedom of the K-User MISO Interference Channel with Delayed Local CSIT
Chenxi Hao (Imperial College London, United Kingdom), Bruno Clerckx (Imperial College London & Korea University, United Kingdom) ....................................................................................................................... 4217

Energy Constrained Communications

An Adaptive Transmission Protocol for Wireless-Powered Cooperative Communications
Yifan Gu (The University of Sydney, Australia), He Chen (The University of Sydney, Australia), Yonghui Li (University of Sydney, Australia), Branka Vucetic (The University of Sydney, Australia) ....................................................................................................................... 4223
Performance Analysis Techniques

A Fast Simulation Method for the Log-Normal Sum Distribution Using a Hazard Rate Twisting Technique

Nadhir Ben Rached (King Abdullah University of Science and Technology, Saudi Arabia), Fatma Benkhelifa (King Abdullah University of Science and Technology, Tunisia), Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia), Raul Tempone (King Abdullah University of Science and Technology (KAUST), Saudi Arabia) 4259

Numerically Efficient Generation of Exponentially Correlated Two-Dimensional Shadowing

Tariq M Ali (University of Texas at Dallas, USA), Mohammad Saquib (University of Texas at Dallas, USA) 4265

Bit Error Rate Analysis of Convolutionally Coded BICM with Specific Interleaver Structures

Yuta Hori (Yokohama National University, Japan), Hideki Ochiai (Yokohama National University, Japan) 4272

MGF Approach to the Capacity Analysis of Generalized Two-Ray Fading Models

Milind Rao (Stanford University, USA), Francisco Javier Lopez-Martinez (Universidad de Malaga, Spain), Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia), Andrea Goldsmith (Stanford University, USA) 4278

On The Statistics of SINR in Cellular Networks

Arman Shojaeifard (University of Manchester, United Kingdom), Khairi A. Hamdi (University of Manchester, United Kingdom), Emad Alsusa (Manchester University, United Kingdom), Daniel K. C. So (University of Manchester, United Kingdom), Jie Tang (University of Manchester, United Kingdom) 4285

PHY-Layer Advances in Communications I

MUDRI: A Fault-Tolerant Decoding Algorithm

Predrag N. Ivanis (School of Electrical Engineering, University of Belgrade, Serbia), Omran Rasheed (School of Electrical Engineering, University of Belgrade, Serbia), Bane Vasić (University of Arizona, USA) 4291

Semiconductor Optical Amplifier-Assisted Optical Wireless Links: The Effect of Noise and Turbulence

Konstantinos Yiannopoulos (University of Peloponnese, Greece), Nikos C. Sagias (University of Peloponnese, Greece), Anthony Boucouvalas (University of Peloponnese, Greece) 4297
Self-Coherent OFDM for Wireless Communications
Qianyu Jin (Monash University, Australia), Yi Hong (Monash University, Australia), Emanuele Viterbo (Monash University, Australia) .......................................................... 4303

Secure D2D Communication in Large-Scale Cognitive Cellular Networks with Wireless Power Transfer
Yuanwei Liu (Queen Mary, University of London, United Kingdom), Lifeng Wang (University College London, United Kingdom), Syed Ali Raza Zaidi (University of Leeds, United Kingdom), Maged Elkashlan (Queen Mary, University of London, United Kingdom), Trung Q. Duong (Queen's University Belfast, United Kingdom) .......................................................... 4309

Secure encoder designs based on turbo codes
Alexandros Katsiotis (National and Kapodistrian University of Athens, Greece), Nicholas Kolokotronis (University of Peloponnesse, Greece), Nicholas Kalouptsidis (National and Kapodistrian University of Athens, Greece) .......................................................... 4315

MIMO and Massive MIMO

Optimized MIMO Transmission and Compression for Interference Mitigation with Cooperative Relay
Seyedarvin Ayoughi (University of Toronto, Canada), Wei Yu (University of Toronto, Canada) ............ 4321

On Capacity of Two-Way Massive MIMO Full-Duplex Relay Systems
Zhanzhan Zhang (Shanghai Jiao Tong University, P.R. China), Zhiyong Chen (Shanghai Jiao Tong University, P.R. China), Manyuan Shen (Shanghai Jiao Tong University, P.R. China), Bin Xia (Shanghai Jiao Tong University, P.R. China) .......................................................... 4327

High Frequency Differential MIMO: Basic Theory and Transceiver Architectures
Akbar Sayeed (University of Wisconsin-Madison, USA), John Brady (University of Wisconsin-Madison, USA) ........................................................................................................ 4333

Error Probability Minimization for MIMO Systems with Imperfect Channel State Information
Hieu Duy Nguyen (Institute for Infocomm Research (I2R), The Agency for Science, Technology and Research (ASTAR), Singapore), Boon Sim Thian (Institute for Infocomm Research, Singapore), Sumei Sun (Institute for Infocomm Research, Singapore) .......................................................... 4339

Spectral Efficiency of Massive MIMO Systems with D2D Underlay
Xingqin Lin (Ericsson Research, USA), Robert Heath (The University of Texas at Austin, USA), Jeffrey Andrews (The University of Texas at Austin, USA) .......................................................... 4345

Optimal Signaling of MISO Full-Duplex Two-Way Wireless Channel
Shuqiao Jia (Rice University, USA), Behnaam Aazhang (Rice University, USA) ................................. 4351

Cooperative and Relay Communications

Secrecy in the Two-Way Untrusted Relay Channel with Compute-and-Forward
Johannes Richter (Dresden University of Technology, Germany), Christian Scheunert (TU Dresden, Germany), Sabrina Engelmann (Dresden University of Technology, Germany), Eduard Jorswieck (TU Dresden, Germany) .......................................................... 4357

On the Optimality of Network Coding in Two-Way Decode-and-Forward MIMO Relay Channel
Jianjun Peng (Tsinghua University, P.R. China), Wei Chen (Tsinghua University, P.R. China) ............ 4363

Diversity-Multiplexing Tradeoff for Network Coded Cooperative OFDMA Systems
Ali Reza Heidarpour (Ozyegin University, Turkey), Gunes Karabulut Kurt (Istanbul Technical University, Turkey), Murat Uysal (Ozyegin University, Turkey) .......................................................... 4368

Distributed MIMO Multiway Relaying: Joint Signal Alignment and Interference Neutralization
Rui Wang (Tongji University, P.R. China), Xiaojun Yuan (ShanghaiTech University, P.R. China), Raymond W. Yeung (The Chinese University of Hong Kong, Hong Kong) .......................................................... 4374
Cooperative Communication for High-Reliability Low-Latency Wireless Control
Vasuki Narasimha Swamy (University of California, Berkeley, USA), Sahaana Suri (University of California, Berkeley, USA), Paul Rigge (University of California, Berkeley, USA), Matthew Weiner (University of California at Berkeley, USA), Gireeja Ranade (University of California, Berkeley, USA), Anant Sahai (UC Berkeley, USA), Borivoje Nikolić (UC Berkeley, USA) ................................................. 4380

Communications Using Ubiquitous Antennas: Free-Space Propagation
Kaibin Huang (Dept. of Electrical and Electronic Engineering, The University of Hong Kong, Hong Kong), Jiayi Chen (Shenzhen University, P.R. China), Vincent Lau (Hong Kong University of Science and Technology, Hong Kong) ................................................................. 4387

Source and Channel Coding

On Locally Decodable Source Coding
Ali Makhdoumi (MIT, USA), Shao-Lun Huang (Massachusetts Institute of Technology, USA), Muriel Médard (MIT, USA), Yury Polyanskiy (MIT, USA) ................................................................. 4394

Zero-Delay Joint Source-Channel Coding in the Presence of Interference Known at the Encoder
Morteza Varasteh (Imperial College, United Kingdom), Deniz Gündüz (Imperial College London, United Kingdom), Ertem Tuncel (UC Riverside, USA) ................................................................. 4400

Joint Binary Field Transform and Polar Coding
Mohammad Sadegh Mohammadi (Aarhus University & Macquary University, Denmark), Qi Zhang (Aarhus University, Denmark), Eryk Dutkiewicz (Macquarie University, Australia) ................................................. 4406

Construction of Protographs for Large-Girth Structured LDPC Convolutional Codes
Junho Cho (Bell Labs, Alcatel-Lucent, USA), Laurent Schmalen (Alcatel-Lucent, Bell Laboratories, Germany) .................................................................................................................. 4412

Oblivious Lattice Codes for Gaussian Relay Channels
Arash Behboodi (RWTH Aachen University, Germany) ............................................................................................................... 4418

Identifying Block Codes using Groebner Bases
Saravanan Vijayakumaran (IIT Bombay, India) .................................................................................................................. 4424

PHY-Layer Advances in Communications II

On the Maximum Doppler Diversity of High Mobility Systems with Imperfect Channel State Information
Weixi Zhou (Southwest Jiaotong University, P.R. China), Jingxian Wu (University of Arkansas, USA), Pingzhi Fan (Southwest Jiaotong University, P.R. China) ................................................. 4431

A Necessary and Sufficient Closure Property for Two-Stage Constructions of Switching Networks
Ching-Min Lien (National Tsing Hua University, Taiwan), Cheng-Shang Chang (National Tsing Hua University, Taiwan), Duan-Shin Lee (National Tsing Hua University, Taiwan) ................................................. 4437

Channel Feedback Reduction for Wireless Multimedia Broadcast Multicast Service Systems
Yu-Yun Chang (National Taiwan University, Taiwan), Wei-Shun Liao (National Taiwan University, Taiwan), Jin-Hao Li (National Taiwan University, Taiwan), Hsuan-Jung Su (National Taiwan University, Taiwan) ................................................. 4443

Noncoherent Composite Hypothesis Testing Receivers for Extended Range Bistatic Scatter Radio WSNs
Panos N. Alevizos (Technical University of Crete, Greece), Aggelos Bletsas (Technical University of Crete, Greece) ................................................................. 4448

Protograph-Based LDPC Convolutional Codes for Continuous Phase Modulation
Tarik Benaddi (IRIT & CNES, France), Charly Poulliat (INP - ENSEEIHT Toulouse, France), Marie-Laure Boucheret (University of Toulouse IRIT Enseehit, France), Benjamin Gadat (Thales Alenia Space, France), Guy Lesthievent (CNES, France) ................................................. 4454
Network-Layer Advances for Communications

On the Synergistic Benefits of Alternating CSIT for X Channel within a Four-symbol Channel Extension
Ahmed Wagdy Shaban (Qatar University & Wireless Intelligent Networks Center, Nile University, Qatar), Amr El-Keyi (Nile University, Egypt), Tamer Khattab (Qatar University, Qatar), Mohammed Nafie (Cairo University & Nile University, Egypt) .......................................................... 4461

Secure Green Communication for Amplify-and-Forward Relaying with Eavesdroppers
Dong Wang (Tsinghua University, P.R. China), Bo Bai (Tsinghua University, P.R. China), Wei Chen (Tsinghua University, P.R. China), Zhu Han (University of Houston, USA) .......................................................... 4468

On the Push-based Converged Network with Limited Storage
Hao Feng (Shanghai Jiao Tong University, P.R. China), Zhiyong Chen (Shanghai Jiao Tong University, P.R. China), Hui Liu (Shanghai JiaoTong University, P.R. China) .......................................................... 4474

Diversity-Security Tradeoff for Compound Channels
Joseph Jean Boutros (Texas A&M University at Qatar, Qatar), Volkan Dedeoglu (Texas A&M University at Qatar, Qatar) .................................................................................................................. 4480

Distributed Algorithm for Nonconvex Power Optimization: Achieving Global Weighted Sum-Rate Maximum
Haiyou Guo (Bell Labs China, R&I, Alcatel-Lucent Shanghai Bell, Shanghai, China, P.R. China), Shuqin Li (Bell Labs China, Alcatel-Lucent Shanghai Bell Co., Ltd., Hong Kong), Liyu Cai (Alcatel-Lucent Shanghai Bell Co., Ltd, P.R. China) .......................................................... 4486

Network Coding

Optimization-Based Linear Network Coding for General Connections of Continuous Flows
Ying Cui (Shanghai Jiaotong University, P.R. China), Muriel Médard (MIT, USA), Edmund Yeh (Northeastern University, USA), Douglas Leith (Trinity College Dublin, Ireland), Ken R. Duffy (National University of Ireland Maynooth, Ireland) .................................................................................................................. 4492

Binary Systematic Network Coding for Progressive Packet Decoding
Andrew L. Jones (Lancaster University, United Kingdom), Ioannis Chatzigeorgiou (Lancaster University, United Kingdom), Andrea Tassi (Lancaster University, United Kingdom) .................................................................................................................. 4499

Composite Extension Finite Fields for Low Overhead Network Coding: Telescopic Codes
Janus Heide (Steinwurf, Denmark), Daniel E. Lucani (Aalborg University, Denmark) .................................................................................................................. 4505

On Vector Linear Solvability of Multicast Networks
Qifu T Sun (University of Science and Technology Beijing, P.R. China), Xiaolong Yang (University of Science & Technology Beijing, P.R. China), Ke ping Long (University of Science and Technology Beijing, P.R. China), Xunrui Yin (University of Calgary, Canada), Zongpeng Li (University of Calgary, Canada) .................................................................................................................. 4511

Network Reduction for Coded Multiple-hop Networks
Jinfeng Du (MIT, USA), Naomi Sweeting (MIT, USA), David Adams (MIT, USA), Muriel Médard (MIT, USA) .................................................................................................................. 4518

Performance Analysis of Queueing Systems with Systematic Packet-Level Coding
Giuseppe Cocco (German Aerospace Center (DLR), Germany), Tomaso De Cola (German Aerospace Center (DLR), Germany), Matteo Berioli (TriaGnoSys GmbH & Zodiac Aerospace, Germany) .................................................................................................................. 4524
Compressed sensing

Narrowband Interference Parameterization for Sparse Bayesian Recovery
Anum Ali (KAUST, Saudi Arabia), Hesham ElSawy (King Abdullah University of Science and Technology (KAUST), Saudi Arabia), Tareq Y. Al-Naffouri (King Abdullah University of Science and Technology, USA), Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia) ............................................................. 4530

Compressive Sensing based Detector for Sparse Signal Modulation in Precoded OFDM
Jinho Choi (Gwangju Institute of Science and Technology (GIST), Korea), Youngwook Ko (Queen's University Belfast, United Kingdom) ............................................................. 4536

Energy-Efficient Spatial Modulation in Massive MIMO Systems by Means of Compressive Sensing
Adrian Garcia-Rodriguez (University College London, United Kingdom), Christos Masouros (University College London, United Kingdom) ............................................................. 4541

Optimized Compressed Sensing Matrix Design for Noisy Communication Channels
Amirpasha Shirazinia (Signals & Systems Division, Uppsala University, Sweden), Subhrakanti Dey (Uppsala University, Sweden) ............................................................. 4547

Compressed Channel Estimation for High-Mobility OFDM Systems: Pilot Symbol and Pilot Pattern Design
Xiang Ren (Shanghai Jiao Tong University, P.R. China), Xiaofei Shao (Shanghai Jiao Tong University, P.R. China), Meixia Tao (Shanghai Jiao Tong University, P.R. China), Wen Chen (Shanghai Jiao Tong University, P.R. China) ............................................................. 4553

Sparse Channel Estimation Based on Compressed Sensing for Massive MIMO Systems
Chenhao Qi (Southeast University, P.R. China), Yongming Huang (Southeast University, P.R. China), Shi Jin (Southeast University, P.R. China), Lenan Wu (Southeast University, P.R. China) ............................................................. 4558

Massive MIMO

Atomic Norm Denoising-based Channel Estimation for Massive Multiuser MIMO Systems
Peng Zhang (Imperial College London, United Kingdom), Lu Gan (Brunel University, United Kingdom), Sumei Sun (Institute for Infocomm Research, Singapore), Cong Ling (Imperial College London, United Kingdom) ............................................................. 4564

Design of Downlink Training Sequences for FDD Massive MIMO Systems
Dong Wang (Southeast University, P.R. China), Xiangyang Wang (Southeast University, P.R. China), XiHui Yang (China Telecom, P.R. China), Yang Zhao (Southeast University, P.R. China), Wangtao Wan (Southeast University, P.R. China) ............................................................. 4570

Multiuser Detection in Massive MIMO with Quantized Phase-Only Measurements
Wang Shengchu (Tsinghua University, P.R. China), Yuzhuo Li (Tsinghua University, P.R. China), Jing Wang (Tsinghua University, P.R. China) ............................................................. 4576

Compressive Sensing aided Data Detection for GSM Systems in MIMO ISI Wireless Channels
Zeeshan Shaikh (Macquarie University, Australia), Iain B. Collings (Macquarie University, Australia), Stephen Hanly (Macquarie University, Australia), Philip Whiting (Macquarie University, Australia) ............................................................. 4582

Non-asymptotic Analysis of Secrecy Capacity in Massive MIMO System
Yin Long (University of Electronic Science and Technology of China, P.R. China), Zhi Chen (University of Electronic Science and Technology of China & University of California, Riverside, P.R. China), Lingxiang Li (University of Electronic Science and Technology of China, P.R. China), Jun Fang (Stevens Institute of Technology, USA) ............................................................. 4587
Localization

RF transmitter geolocation based on signal periodicity: concept and implementation
François Quitin (Nanyang Technological University, Singapore), Zahra Madadi (Nanyang Technological University, Singapore), Wee Peng Tay (Nanyang Technological University, Singapore) .............................................. 4593

A Time-based Passive Source Localization System for Narrow-band Signal
Zan Li (University of Bern, Switzerland), Torsten Ingo Braun (University of Bern, Switzerland), Desislava Dimitrova (ETH Zurich, Switzerland) ......................................................... 4599

Hidden Markov Model based Graph Matching for Calibration of Localization Maps
Shervin Shahidi (University of Toronto, Canada), Shahrokh Valaee (University of Toronto, Canada) .......................................................... 4606

Time of Arrival Estimation and Interference Mitigation based on Bayesian Compressive Sensing
Chang Kyung Sung (CSIRO, Australia), Frank de Hoog (CSIRO, Australia), Zhuo Chen (CSIRO ICT Centre, Australia), Cheng Peng (CSIRO Computational Informatics, Australia), Dan C Popescu (CSIRO, Australia) ................................................................. 4612

Self-Calibration Method for TOA based Localization Systems with Generic Synchronization Requirement
Zemene Walle Mekonnen (ETH Zurich, Switzerland), Armin Wittneben (ETH Zurich, Switzerland) ......................................................... 4618

Multiuser communications

Robust MSE-based Transceiver Optimization for Downlink Cellular Interference Alignment
Md. Jahidur Rahman (University of British Columbia, Canada), Lutz Lampe (University of British Columbia, Canada) ......................................................... 4624

Suppressing Alignment: An Approach for Out-of-Band Interference Reduction in OFDM Systems
Anas Tom (University of South Florida, USA), Alphan Şahin (InterDigital & University Of South Florida, USA), Huseyin Arslan (University of South Florida, USA) ......................................................... 4630

Weighted Sum Rate Maximization with Multiple Linear Conic Constraints
Hans H. Brunner (Technische Universität München, Germany), Andreas Dotzler (Technische Universität München, Germany), Wolfgang Utschick (Technische Universität München, Germany), Josef A. Nossek (TU Munich, Germany) ......................................................... 4635

On the Coverage and Power Allocation for Downlink in Heterogeneous Wireless Cellular Networks
Quoc-Tuan Vien (Middlesex University, United Kingdom), Tayo Akinbote (Middlesex University, United Kingdom), Huan X Nguyen (Middlesex University, United Kingdom), Ramona Trestian (Middlesex University, United Kingdom), Orhan Gemikonakli (Middlesex University, United Kingdom) ......................................................... 4641

Increasing Capacity of Multi-Cell Cooperative Cellular Networks with Nested Deployment
Qiong Wu (University of Texas at Arlington, USA), Qilian Liang (University of Texas at Arlington, USA) ......................................................... 4647

Oversampling Diversity for Uncoded Transmission of Bandlimited Sources Over Parallel Fading Channels
Reza Parseh (Norwegian University of Science and Technology, Norway), Dirk Slock (EURECOM, France), Kimmo Kansanen (Norwegian University of Science and Technology, Norway) ......................................................... 4653

Green Communications

On the Energy Efficiency and Total Bandwidth in Channel-Aware Random Access for WSNs
Jinho Choi (Gwangju Institute of Science and Technology (GIST), Korea) ......................................................... 4659
Optimal Design of Energy-Efficient HetNets: Joint Precoding and Load Balancing
Jingya Li (Chalmers University of Technology, Sweden), Emil Björnson (Linköping University, Sweden), Tommy Svensson (Chalmers University of Technology, Sweden), Thomas Eriksson (Chalmers University of Technology, Sweden), Mérouane Debbah (Huawei, France) ........................................ 4664

Variable-Rate Variable-Power MQAM for Energy Harvesting Communications with 1-Bit Feedback
Rui Ma (The University of New South Wales, Australia), Wei Zhang (The University of New South Wales, Australia) ........................................................................................................... 4670

A SDP Based Design of Relay Precoding for the Power Minimization of MIMO AF-Relay Networks
Anlei Rao (King Abdullah University of Science and Technology, Saudi Arabia), Ki-Hong Park (King Abdullah University of Science and Technology (KAUST), Saudi Arabia), Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia) ........................................... 4675

Nonlinear Joint Transceiver Design for Coordinated Multi-cell Systems with Energy Cooperation
Zhirui Hu (Beijing University of Post and Telecommunication, P.R. China), Chunyan Feng (Beijing University of Posts and Telecommunications, P.R. China), Tiankui Zhang (Beijing University of Posts and Telecommunications, P.R. China), Qin Niu (Beijing University of Posts and Telecommunications, P.R. China) ........................................................................................................... 4680

Energy Efficient Relay Antenna Selection for AF MIMO Two-Way Relay Channels
Xingyu Zhou (Tsinghua University, P.R. China), Bo Bai (Tsinghua University, P.R. China), Wei Chen (Tsinghua University, P.R. China) ........................................................................................................... 4686

Channel Estimation and synchronization

Doubly-Selective MMSE Channel Estimation and ICI Mitigation for OFDM Systems
Ronald Nissel (TU Wien, Austria), Markus Rupp (TU Wien, Austria) ........................................................................................................... 4692

An Efficient Blind Estimator of Carrier Frequency Offset for MIMO-OFDM Systems
Welle Zhang (Xi’an Jiaotong University, P.R. China), Qinye Yin (School of Electronics and Information Engineering Xi’an Jiaotong University, P.R. China), Hui-Ming Wang (Xi’an Jiaotong University, P.R. China), Pengcheng Mu (Xi’an Jiaotong University, P.R. China) ........................................................................................................... 4698

Joint TX/RX IQ Imbalance Parameter Estimation Using a Generalized System Model
Wence Zhang (Southeast University, P.R. China), Rodrigo C. de Lamare (Pontificial Catholic University of Rio de Janeiro & University of York, Brazil), Cunhua Pan (Southeast University, P.R. China), Ming Chen (Southeast University, P.R. China) ........................................................................................................... 4704

Bandwidth Efficient Channel Estimation for Full Duplex Communication Systems
Abbas Koohian (Australian National University, Australia), Hani Mehrpouyan (Boise State University, USA), Mahmoud Ahmadian (K N Toosi University of Technology, Iran), Mohammad Azarbad (University of Tehran, Iran) ........................................................................................................... 4710

Modelling and Estimation of Carrier Frequency and Phase Uncertainties in Large Aperture Arrays
Akinbiyi Akindoyin (Imperial College London, United Kingdom) ........................................... 4715

Reduced-Complexity Synchronization for High-Order Coded Modulations
Marco Martalò (University of Parma & Ecampus University, Italy), Gianluigi Ferrari (University of Parma, Italy), Muhammad Asim (University of Parma, Italy), Jonathan Gambini (Huawei Technologies, European Research Center, Italy), Christian Mazzucco (Huawei Technologies, European Research Center, Italy), Giacomo Cannalire (Huawei Technologies, European Research Center, Italy), Sergio Bianchi (Huawei Technologies, European Research Center, Italy), Riccardo Raheli (University of Parma, Italy) ........................................................................................................... 4721

MISO Communications

Optimal transmission rate for MISO channels with joint sum and per-antenna power constraints
Phuong L. Cao (KTH Royal Institute of Technology, Sweden), Tobias J. Oechtering (KTH Royal Institute of Technology & School of Electrical Engineering, EE, Sweden), Rafael F. Schaefer (Princeton University, USA), Mikael Skoglund (KTH Royal Institute of Technology, Sweden) .......... 4727
Sum Rate Maximization for MU-MISO with Partial CSIT using Joint Multicasting and Broadcasting
Hamdi Joudeh (Imperial College London, United Kingdom), Bruno Clerckx (Imperial College London & Korea University, United Kingdom) ................................................................. 4733

Achieving Max-Min Fairness for MU-MISO with Partial CSIT: A Multicast Assisted Transmission
Hamdi Joudeh (Imperial College London, United Kingdom), Bruno Clerckx (Imperial College London & Korea University, United Kingdom) ................................................................. 4739

Tight Probabilistic MSE Constrained Multiuser MISO Transceiver Design under Channel Uncertainty
Xin He (The University of Hong Kong, Hong Kong), Yik-Chung Wu (The University of Hong Kong, Hong Kong) ........................................................................................................... 4745

Robust Downlink Beamforming Design for Multiuser MISO Communication System with SWIPT
Wu Wei (Nanjing University of Posts and Telecommunications, P.R. China), Baoyun Wang (College of Automation, Nanjing University of Posts and Telecommunications, P.R. China) .......... 4751

OFDM, FBMC and GFDM

Potency of Trellis-based SLM over symbol-by-symbol approach in reducing PAPR for FBMC-OQAM Signals
S S Krishna Chaitanya Bulusu (Conservatoire National des Arts et Metiers, France), Hmaied Shaiek (CNAM, France), Daniel Roviras (Cnam, France) ........................................................................................................................ 4757

Towards a non-error floor multi-stream beamforming design for FBMC/OQAM
Márius Caus (Centre Tecnològic de Telecomunicacions de Catalunya (CTTC), Spain), Ana Perez-Neira (UPC, Spain), Yao Cheng (TU Ilmenau, Germany), Martin Haardt (Ilmenau University of Technology, Germany) ........................................................................................................ 4763

Eigenvector Precoding for FBMC Modulations under Strong Channel Frequency Selectivity
Xavier Mestre (CTTC, Spain), David Gregoratti (Centre Tecnològic de Telecomunicacions de Catalunya (CTTC), Spain) ........................................................................................................ 4769

Low Complexity GFDM Receiver Design: A New Approach
Arman Farhang (CTVR Trinity College, Ireland), Nicola Marchetti (CTVR Trinity College, Ireland), Linda Doyle (Trinity College Dublin, Ireland) ........................................................................................................ 4775

POPS-OFDM: Ping-pong Optimized Pulse Shaping-OFDM for 5G systems
Zeineb Hraiech (SUP’COM, Tunisia), Fatma Abdelkafi (High School of Communications of Tunis (SUPCOM), Tunisia), Mohamed Siala (Sup’Com, Tunisia) ........................................................................................................ 4781

An efficient FTN implementation of the OFDM/OQAM system
Hao Lin (France Telecom, France), Naila Lahbabi (TELECOM BRETAGNE, France), Pierre Siohan (Orange Labs, France), Xiwen Jiang (EURECOM, France) ........................................................................................................ 4787

Spectrum sensing and interference

Deep Sensing for 5G Spectrum Sharing: A Random Finite Set Approach
Bin Li (Beijing University of Posts and Telecommunications & Key Lab of Universal Wireless Communications, MOE, P.R. China), Chenglin Zhao (Beijing University of Posts and Telecommunications, P.R. China), Yijiang Nan (Beijing University of Posts and Telecommunications, P.R. China), Arumugam Nallanathan (King’s College London, United Kingdom) ........................................................................................................ 4793

A Stochastic Multi-channel Spectrum Access Game with Incomplete Information
Xiaofan He (North Carolina State University, USA), Huaiyu Dai (NC State University, USA), Peng Ning (North Carolina State University, USA), Rudra Dutta (North Carolina State University, USA) ........................................................................................................ 4799

Enhancing Physical Layer Security of Cognitive Radio Transceiver via Chaotic OFDM
Ali Al Talabani (Kings College London - University of London, United Kingdom), Arumugam Nallanathan (King’s College London, United Kingdom), Huan X Nguyen (Middlesex University, United Kingdom) ........................................................................................................ 4805
Detection and decoding

Construct Asterisk 16QAM with a Low Complexity Scheme
Xian Liu (University of Arkansas at Little Rock, USA), Hsiao-Chun Wu (Louisiana State University, USA) .................................................................................................................. 4828

Asymptotic SEP Analysis for Optimally Precoded Large MIMO Channels with ZF Detection
Zheng Dong (McMaster University, Canada), Jian-Kang Zhang (McMaster University, Canada) .... 4834

Iterative decoding of Gold sequences
Mathieu des Noes (CEA -LETI Minatce, France), Jean-Marc Brossier (GIPSA-lab/DIS - BP 46 Saint-Martin-d’Hères, France), Valentin Savin (CEA LETI, France), Laurent Ros (GIPSA-lab & INPG & CNRS organisation, France) ........................................................................................................... 4840

Markov Chain Monte Carlo Based Multiuser/MIMO Detector: 802.11ac Implementation and Measurement
Jonathan C Hedstrom (University of Utah, USA), Chung Him (George) Yuen (University of Utah, USA), Behrouz Farhang-Boroujeny (University of Utah, USA) .................................................................................................................. 4846

Soft Detection Constrained Achievable Rates for Nonlinear MIMO-BICM Receivers
Alexander Krebs (Technische Universität München, Germany), Michael Joham (Technische Universität München, Germany), Wolfgang Utschick (Technische Universität München, Germany) ........................................................................................................... 4853

Coded Full-Duplex MIMO with Iterative Detection and Decoding
Mohamad A. Ahmed (Newcastle University /UK & University of Mosul / IRAQ, United Kingdom), Charalampos C. Tsimenidis (Newcastle University, United Kingdom) .................................................................................................................. 4859

Networks and network processing

Wind Storm Estimation using a Heterogeneous Sensor Network with High and Low Resolution Sensors
Ido Nevat (Institute for Infocomm Research, Singapore), Gareth Peters (University College London London, United Kingdom), François Septier (Institut Mines-Telecom/Telecom Lille/CRISTAL UMR CNRS 9189, France), Tomoko Matsui (The Institute of Statistical Mathematics, Japan) .................................................................................................................. 4865

Efficient Learning of Statistical Primary Patterns via Bayesian Network
Weijia Han (Xidian University, P.R. China), Huiyian Sang (Texas A&M University, USA), Min Sheng (Xidian University, P.R. China), Jiandong Li (Xidian University, P.R. China), Shuguang Cui (Texas A&M University, USA) .................................................................................................................. 4871
### Selected topics in signal processing for communications

**On the Security of Large Scale Spectrum Sharing Networks**
Yansha Deng (King's College London, United Kingdom), Lifeng Wang (University College London, United Kingdom), Syed Ali Raza Zaidi (University of Leeds, United Kingdom), Jinhong Yuan (University of New South Wales, Australia), Maged Elkashlan (Queen Mary, University of London, United Kingdom) ................................................................. 4877

**Designing ITC Selection Algorithms for Wireless Sources Enumeration**
Andrea Mariani (University of Bologna, Italy), Andrea Giorgetti (University of Bologna, Italy), Marco Chiani (University of Bologna, Italy) ................................................................. 4883

**Variational Bayesian Algorithm For Distributed Compressive Sensing**
Wei Chen (Beijing Jiaotong University, P.R. China), Ian James Wassell (University of Cambridge, United Kingdom) ................................................................. 4889

**Coherent Detection and Channel Coding for Bistatic Scatter Radio Sensor Networking**
Nikos Fasarakis-Hilliard (University of Alberta, Canada), Panos N. Alevizos (Technical University of Crete, Greece), Aggelos Bletsas (Technical University of Crete, Greece) ................................................................. 4895

---

**MIMO communications I**

**MIMO AF Relaying Security: Robust Transceiver Design in the Presence of Multiple Eavesdroppers**
Jiaxin Yang (McGill University, Canada), Benoit Champagne (McGill University, Canada), Yulong Zou (Nanjing University of Posts and Telecommunications, P.R. China), Lajos Hanzo (University of Southampton, United Kingdom) ................................................................. 4937
Wireless MIMO Switching with Trusted and Untrusted Relays: Degrees of Freedom Perspective
Fanggang Wang (Beijing Jiaotong University, P.R. China), Xiaojun Yuan (ShanghaiTech University, P.R. China), Jemin Lee (Singapore University of Technology and Design (SUTD), Singapore), Tony Q. S. Quek (Singapore University of Technology and Design, Singapore) .......... 4943

MIMO-TDD Reciprocity under Hardware Imbalances: Experimental Results
Xiwen Jiang (EURECOM, France), Mirsad Ćirkić (Linköping University, Sweden), Florian Kaltenberger (Eurecom, France), Erik G. Larsson (Linköping University, Sweden), Luc Deneire (University of Nice, France), Raymond Knopp (Institut Eurecom, France) ................................................................. 4949

A Digital Subspace-Based Self-Interference Cancellation in Full-Duplex MIMO Transceivers
Ahmed Masmoudi (McGill University, Canada), Tho Le-Ngoc (McGill University, Canada) .......... 4954

A New DoF Upper Bound and Its Achievability for K-User MIMO Y Channels
Kangqi Liu (Shanghai Jiao Tong University, P.R. China), Meixia Tao (Shanghai Jiao Tong University, P.R. China) ................................................................. 4960

Optimal Joint Base Station Association and Beamforming Design for Downlink Transmission
Duy H. N. Nguyen (McGill University, Canada), Long Bao Le (INRS, University of Quebec, Canada), Tho Le-Ngoc (McGill University, Canada) .......... 4966

Second-Order Correlation-Based Algorithm for STBC-OFDM Signal Identification
Yahia Eldemerdash (Memorial University of Newfoundland, Canada), Octavia A. Dobre (Memorial University of Newfoundland, Canada) ................................................................. 4972

Linear MIMO Equalization for High-Speed Chip-to-Chip Communication
Lennert Jacobs (Ghent University, Belgium), Mamoun Guenach (Bell Laboratories, Alcatel-Lucent, Antwerp, Belgium), Marc Moeneclaey (Ghent University, Belgium) ................................................................. 4978

A Sequential Antenna-Hopping Scheme for High Mobility MIMO Communications
Chunxu Jiao (Zhejiang University, P.R. China), Zhaoyang Zhang (Zhejiang University, P.R. China), Huazi Zhang (Zhejiang University, P.R. China), Lianliang Zhu (Zhejiang University, P.R. China), Caijun Zhong (Zhejiang University, P.R. China) ................................................................. 4984

Channel quantization for limited feedback-based block diagonalization in MIMO broadcast channels
Moonsik Min (POSTECH, Korea), Gi-Hong Im (POSTECH, Korea) ................................................................. 4990

Space Time Block Code Classification for MIMO Signals Exploiting Cyclostationarity
Merve Turan (Istanbul Technical University, Turkey), Menguc Oner (Isik University, Turkey), Hakan A. Çırpan (Istanbul Technical University, Turkey) ................................................................. 4996

Green Virtual Base Station in Optical-Access-Enabled Cloud-RAN
Xinbo Wang (University of California, Davis, USA), Saigopal Thota (University of California, Davis, USA), Massimo Tornatore (Politecnico di Milano & University of California, Davis, Italy), Sang Soo Lee (ETRI, Korea), Han Hyub Lee (ETRI, Korea), Soomyung Park (ETRI, Korea), Biswanath Mukherjee (University of California, Davis, USA) ................................................................. 5002

Adaptive rate-based MAC Protocols Design and Analysis for Integrated FSO/PON Networks
Vuqng Mai (The University of Aizu, Japan), Anh T. Pham (The University of Aizu, Japan) ................................................................. 5007

Full-duplex Analog WiFi Transport over RSOA-based Wavelength-reused Digital Passive Optical Networks
Zhihui Cao (Center of Optics Photonics and Laser, Universite Laval, Canada), Truong An Nguyen (Laval University, Canada), Leslie Rusch (Université Laval, Canada) ................................................................. 5013
Optical wireless

Offline Energy-Efficient Dynamic Wavelength and Bandwidth Allocation Algorithm for TWDM-PONs
Maluge Pubuduni Imali Dias (NICTA Victoria Research Laboratory, Australia), Dung Pham Van (Institut National de la Recherche Scientifique (INRS), Canada), Luca Valcarenghi (Scuola Superiore Sant'Anna, Italy), Elaine Wong (Dept of Electrical and Electronic Engineering & The University of Melbourne, Australia) ................................................................. 5018

Parallel dynamic subcarrier and time allocation protocol for long-reach OFDMA-PONs
Wansu Lim (Kumoh National Institute of Technology, Korea), Pandelis Kourtessis (University of Hertfordshire, United Kingdom), Milos Milosavljevic (University of Hertfordshire, United Kingdom), John Michael Senior (University of Hertfordshire, United Kingdom), Hojong Choi (Kumoh National Institute of Technology, Korea) ................................................................. 5024

Accurate Emulation of Fast Optical Circuit Switches
Henrique Rodrigues (University of California, San Diego & UCSD, USA), Tajana Simunic Rosing (UCSD, USA), Richard Strong (UC San Diego, USA) ................................................................. 5030

Optical wireless

Performance Comparison of Binary Modulation Schemes for Visible Light Communication
Ki-Hong Park (King Abdullah University of Science and Technology (KAUST), Saudi Arabia), Changping Li (King Abdullah University of Science and Technology, Saudi Arabia), Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia) .......... 5036

On Slot Sensing for Optical Wireless Scattering Communications
Chen Gong (University of Science and Technology of China, P.R. China), Zhengyuan Xu (University of Science and Technology of China, P.R. China), Baiyang Chen (University of Science and Technology of China, P.R. China) .................................................................................. 5042

Layered Space-Time Coding Using LED Array for Image-Sensor-Based Visible Light Communications
Katsunori Ebihara (Chiba Institute of Technology, Japan), Koji Kamakura (Chiba Institute of Technology, Japan), Takaya Yamazato (Nagoya University, Japan) ................................................................. 5048

An Energy Efficient High-speed Digital LED Driver for Visible Light Communications
Aravind Venugopalan Nair Jalajakumari (University of Edinburgh, United Kingdom), Dobroslav A. Tsonyev (University of Edinburgh, United Kingdom), Katherine Cameron (University of Edinburgh, United Kingdom), Harald Haas (The University of Edinburgh, United Kingdom), Robert Henderson (University of Edinburgh, United Kingdom) ................................................................. 5054

Line Scan Sampling for Visible Light Communication: Theory and Practice
Hideki Aoyama (Panasonic Corporation, Japan), Mitsuaki Oshima (Panasonic Corporation, Japan) .................................................................................................................. 5060

Angular Diversity for Indoor MIMO Optical Wireless Communications
Thomas Wang (Monash University, Australia), Cuiwei He (Monash University, Australia), Jean Armstrong (Monash University, Australia) .................................................................................. 5066

Free space optics

On the Asymptotic Ergodic Capacity of FSO Links with Generalized Pointing Error Model
Hessa M Al-Quwaiee (King Abdullah University of Science and Technology, Saudi Arabia), Hong-Chuan Yang (University of Victoria, Canada), Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia) .................................................................................. 5072

Free-Space Optical Communication in the Presence of Atmospheric Angular Spread
Shenjie Huang (the University of Edinburgh, United Kingdom), Majid Safari (University of Edinburgh, United Kingdom) ................................................................. 5078

Performance Evaluation of FSO MIMO Links in Gamma-Gamma Fading with Pointing Errors
Manav Bhatnagar (Indian Institute of Technology Delhi, India), Zabih Ghassemlooy (Northumbria University, United Kingdom) .................................................................................. 5084
Performance Analysis of a Fiber-Bundle Based FSO Link  
Peter LoPresti (Tulsa University, USA), M. Fahd Babelli (University of Oklahoma, USA), Hazem Refai (Oklahoma University, USA), Steven Kohrmann (University of Tulsa, USA), David Buchheim (University of Tulsa, USA), Joshua Rodriguez (University of Tulsa, USA) ........................................ 5091

All-Optical AF Relaying FSO Systems using EDFA combined with OHL over Gamma-Gamma Channels  
Phuc Trinh (The University of Aizu, Japan), Ngoc Dang (Posts and Telecommunications Institute of Technology, Vietnam), Anh T. Pham (The University of Aizu, Japan) ........................................ 5098

DF Cooperation Over Gamma-Gamma Fading FSO Links with an Erroneous Relay  
Ankur Bansal (Netaji Subhas Institute of Technology, University of Delhi, New Delhi, India), Prabhat Kumar Sharma (Visvesvaraya National Institute of Technology & Visvesvaraya National Institute of Technology, India), Manav Bhatnagar (Indian Institute of Technology Delhi, India)  ........................................................................................................ 5104

Performance of FSO Links under Exponentiated Weibull Turbulence Fading with Misalignment Errors  
Prabhat Kumar Sharma (Visvesvaraya National Institute of Technology & Visvesvaraya National Institute of Technology, India), Ankur Bansal (Netaji Subhas Institute of Technology, University of Delhi, New Delhi, India), Parul Garg (Netaji Subhas Institute of Technology, New Delhi, India), Theodoros Tsiftsis (Technological Educational Institute of Central Greece, Greece), Ricardo Barrios (German Aerospace Center (DLR), Germany) ........................................................................................................ 5110

Space Division Multiple Access in Visible Light Communications  
Zhe Chen (University of Edinburgh, United Kingdom), Harald Haas (The University of Edinburgh, United Kingdom) ........................................................................................................ 5115

Cell-Centric and User-Centric Multi-User Scheduling in Visible Light Communication aided Networks  
Xuan Li (University of Southampton, United Kingdom), Rong Zhang (University of Southampton, United Kingdom), Jiaheng Wang (Southeast University, P.R. China), Lajos Hanzo (University of Southampton, United Kingdom) ........................................................................................................ 5120

A Generalized Solution to the Spectral Efficiency Loss in Unipolar Optical OFDM-based Systems  
Mohamed Sufyan Islim (University of Edinburgh, United Kingdom), Dobroslav A. Tsonev (University of Edinburgh, United Kingdom), Harald Haas (The University of Edinburgh, United Kingdom) ........................................................................................................ 5126

Coefficients Separation MIMO-OFDM Optical Wireless Communication System in Diffuse Fading Channels  
Liang Wu (Southeast University, P.R. China), Zaichen Zhang (Southeast University, P.R. China), Jian Dang (Southeast University & National Mobile Communications Research Laboratory, P.R. China), Huaping Liu (Oregon State University, USA) ........................................................................................................ 5132

Adaptive Modulation and Regenerator-Aware Dynamic Routing Algorithm in Elastic Optical Networks  
Michał Aibin (Wroclaw University Of Technology, Poland), Krzysztof Walkowiak (Wroclaw University of Technology, Poland) ........................................................................................................ 5138

On the Performance of MIMO FSO Communications over Double Generalized Gamma Fading Channels  
Mohammadreza Aminikashani (The Pennsylvania State University, USA), Murat Uysal (Ozyegin University, Turkey), Mohsen Kavehrad (The Pennsylvania State University -- University Park, USA) ........................................................................................................ 5144
Elastic optical networks

Survivable Virtual Topology Design in IP over WDM Multi-Domain Networks
Sangjin Hong (University of Texas at Dallas, USA), Jason P. Jue (University of Texas at Dallas, USA), PyungKoo Park (ETRI, Korea), HoSun Yoon (ETRI, Korea), Ho Yong Ryu (ETRI, Korea), Sungback Hong (ETRI, Korea) ................................................................. 5150

Power and Rate Optimization for Visible Light Communication System with Lighting Constraints
Chen Gong (University of Science and Technology of China, P.R. China), Shangbin Li (USTC, P.R. China), Qian Gao (University of Science and Technology of China, P.R. China), Zhengyuan Xu (University of Science and Technology of China, P.R. China) ............................................................. 5156

System Design for Wavelet Packet Division Multiplexing-based Visible Light Communications
Wei Huang (University of Science and Technology of China, P.R. China), Chen Gong (University of Science and Technology of China, P.R. China), Zhengyuan Xu (University of Science and Technology of China, P.R. China) .................................................................................................................. 5162

Next generation optical networks

Direct-Detection 16-QAM Nyquist-Shaped Subcarrier Modulation with SSBI Mitigation
Zhe Li (University College London, United Kingdom), M. Sezer Erkilinc (University College London, United Kingdom), Stephan Pachnicke (ADVA Optical Networking SE, Germany), Helmut Griesser (ADVA Optical Networking SE, Germany), Benn C Thomsen (University College London, United Kingdom), Polina Bayvel (University College London, United Kingdom), Robert I Killey (University College London, United Kingdom) .................................................................................................................. 5204
Linear Network Coding and Parallel Transmission Increase Fault Tolerance and Optical Reach
Xiaomin Chen (Technische Universität Carolo-Wilhelmina zu Braunschweig, Germany), Admela Jukan (Technische Universität Carolo-Wilhelmina zu Braunschweig, Germany), Muriel Médard (MIT, USA) .................................................................................................................................................. 5210

A Study of Statistical Capacity Sharing in Elastic Optical Networks
Fahim Khandaker (University of Texas at Dallas, USA), Jason P. Jue (University of Texas at Dallas, USA), Xi Wang (Fujitsu Laboratories of America, USA), Qiong Zhang (Fujitsu Laboratories of America, USA), Qingya She (Fujitsu Network Communications, USA), Hakki Candan Cankaya (Fujitsu Network Communications & Southern Methodist University, USA), Paparao Palacharla (FLA, USA), Motoyoshi Sekiya (Fujitsu Laboratories Limited, Japan) .......... 5216

A Study of Statistical Capacity Sharing in Elastic Optical Networks
Yue Fei (University of Texas at Dallas, USA), Andrea Fumagalli (UTD, USA), Miquel Garrich (Centro de Pesquisa e Desenvolvimento em Telecomunicações, Brazil), Benjamin Sarti (CpqD Foundation & State University of Campinas, Brazil), Uiara de Moura (CpqD & University of São Paulo, Brazil), Neil Guerrero Gonzalez (Tyn dall National Institute, Ireland), Juliano Rodrigues Fernandes de Oliveira (CpqD Foundation & University of São Paulo, Brazil) ........................................................................................................... 5222

Space-Time Coding and Optimal Scrambling for Mode Multiplexed Optical Fiber Systems
Elie Awwad (Alcatel-Lucent Bell Labs, France), Ghaya Rekaya-Ben Othman (TELECOM ParisTech, France), Yves Jaouën (TELECOM ParisTech, France) ......................................................................................................................................... 5228

Throughput analysis of distant-adaptive, fixed-length, variable-capacity packets in OPS networks
Pablo Jesus Argibay-Losada (SUNY at Buffalo, USA), Yuki Yoshida (Osaka University, Japan), Akihiro Maruta (Osaka University, Japan), Michael Schlosser (Fraunhofer-Institute for Telecommunications Heinrich-Hertz-Institut, Germany), Ken’ichi Kitayama (Osaka University, Japan) ........................................................................................................................................ 5235

A proactive transport mechanism with explicit congestion notification for NDN
Jianer Zhou (Institute of Computing Technology, Chinese Academy of Sciences, P.R. China), Qinghua Wu (Institute of Computing Technology, Chinese Academy of Sciences, P.R. China), Zhenyu Li (Institute of Computing Technology, Chinese Academy of Sciences, P.R. China), Mohamed-Ali Kaafar (INRIA France & NICTA Australia, France), Gaogang Xie (Institute of Computing Technology, Chinese Academy of Sciences, P.R. China) .................................................................................................................. 5242

Evaluating the SDN control traffic in large ISP networks
Andrea Bianco (Politecnico di Torino, Italy), Paolo Giaccone (Politecnico di Torino, Italy), Ahsan Mahmood (Politecnico di Torino, Italy), Mario Ullio (Telecom Italia, Italy), Vinicio Vercellone (Telecom Italia, Italy) ........................................................................................................................................ 5248

FlowRanger: A Request Prioritizing Algorithm for Controller DoS Attacks in Software Defined Networks
Lei Wei (Nanyang Technological University, Singapore), Carol J Fung (Virginia Commonwealth University, USA) ........................................................................................................................................ 5254

Location and Identity Privacy for LISP-MN
Alberto Rodriguez-Natal (Universitat Politècnica de Catalunya, Spain), Loránd Jakab (Cisco, USA), Vina Ermagan (Cisco Systems Inc., USA), Preethi Natarajan (Cisco, USA), Fabio Maino (Cisco Research, USA), Albert Cabellos-Aparicio (Universitat Politècnica de Catalunya, Spain) .......... 5260

Group Bidding for Guaranteed Quality of Energy in V2G Smart Grid Networks
Ming Zeng (University of Electronic Science and Technology of China, P.R. China), Supeng Leng (University of Electronic Science and Technology of China, P.R. China), Sabita Maharjan (Simula Research Laboratory, Norway), Yan Zhang (Simula Research Laboratory and University of Oslo, Norway), Stein Gjessing (University of Oslo & Simula Research Lab., Norway) ........................................................................................................................................ 5266
Software Defined Networking

SDN-inspired, Real-time Botnet Detection and Flow-blocking at ISP and Enterprise-level
Osama Haq (Tufts University, USA), Zainab Abaid (University of New South Wales, Australia), Naveed Anwar Bhatti (SysNet Research Lab, National University of Computer and Emerging Sciences, Pakistan), Zaafer Ahmed (SysNet Research Lab, National University of Computer and Emerging Sciences, Pakistan), Afzaan Syed (National University of Computer and Emerging Sciences (NUCES), Islamabad, Pakistan) .......................................................... 5278

Boosting the OpenFlow Control-Plane Message Exchange Performance of OpenvSwitch
Hung-Wei Chiu (National Chiao Tung University, Taiwan), Shie-Yuan Wang (National Chiao Tung University, Taiwan) ........................................................................................................ 5284

Efficient NFV Deployment in Data Center Networks
Po-Wen Chi (National Taiwan University, Taiwan), Yu-Cheng Huang (National Taiwan University, Taiwan), Chin-Laung Lei (National Taiwan University, Taiwan) .......................................................... 5290

Responsive Multipath TCP in SDN-based Datacenters
Jingpu Duan (University of Hong Kong, Hong Kong), Zhi Wang (Tsinghua University, P.R. China), Chuan Wu (The University of Hong Kong, Hong Kong) ........................................................................................................ 5296

A Mechanism for Reducing Flow Tables in Software Defined Network
Bing Leng (University of Science and Technology of China, P.R. China), Liusheng Huang (University of Science and Technology of China, P.R. China), Xinglong Wang (University of Science and Technology of China, P.R. China), Hongli Xu (University of Science and Technology of China, P.R. China), Ying Zhang (EF Education First Kids & Teens Owned School, P.R. China) ........................................................................................................ 5302

Off the Wire Control: Improving the Control Plane Resilience through Cellular Networks
Tobias Brignol Petry (Federal University of Rio Grande do Sul, Brazil), Rafael da Fonte Lopes da Silva (Federal University of Rio Grande do Sul, Brazil), Marina P. Barcellos (Federal University of Rio Grande do Sul, Brazil) ........................................................................................................ 5308

QoS and QoE in next-generation networks

LB-MSNC: A Load-balanced Multicast Switching Fabric with Network Coding
Fuxing Chen (Peking University, P.R. China), Hui Li (Peking University Shenzhen Graduate School, P.R. China), Weiyang Liu (Peking University, P.R. China), Shuo-Yen Robert Li (The Chinese University of Hong Kong, Hong Kong) ........................................................................................................ 5314

Locality- and Quality-Awareness for P2PTV Systems Based on Scalable Video Coding (SVC)
Piotr Wydrych (AGH University of Science and Technology, Poland), Piotr A Cholda (AGH University of Science and Technology, Poland) ........................................................................................................ 5319

An efficient transmitting strategy for image fusion in WMSN
Mohamed Lamine Laouira (USTHB, Algeria), Jalel Ben-Othman (University of Paris 13, France), Abdelkrim Abdelli (USTHB University- Algiers, Algeria), Lynda Mokdad (Université de Paris 12 & Laboratoire LACL, France) ........................................................................................................ 5325

RaptorQP2P: Maximize the Performance of P2P File Distribution with RaptorQ Coding
Zeyang Su (University of Mississippi, USA), Feng Wang (The University of Mississippi, USA), John N. Daigle (University of Mississippi, USA), Haiyang Wang (University of Minnesota at Duluth, USA), Tong Shan (University of Mississippi, USA) ........................................................................................................ 5331

Network Tomography: A Novel Algorithm for Probing Path Selection
Teresa Pepe (Ericsson, Italy), Marzio Puleri (ERICSSON, Italy) ........................................................................................................ 5337

Bandwidth Allocation and Pricing for SDN-enabled Home Networks
Homa Eghbali (University of British Columbia, Canada), Vincent W.S. Wong (University of British Columbia, Canada) ........................................................................................................ 5342
Insights on SDN Migration Trajectory
Tamal Dinesh Das (Technische Universität Carolo-Wilhelmina zu Braunschweig, Germany), Marcel Caria (Technische Universität Braunschweig, Germany), Admela Jukan (Technische Universität Carolo-Wilhelmina zu Braunschweig, Germany), Marco Hoffmann (Nokia, Germany) ................................................................. 5348

Design of a Protocol to Enable Economic Transactions for Network Services
Xinming Chen (University of Massachusetts, Amherst, USA), Tilman Wolf (University of Massachusetts, USA), James Griffioen (University of Kentucky, USA), Onur Ascigil (University of Kentucky, USA), Rudra Dutta (North Carolina State University, USA), George N. Rouskas (North Carolina State University, USA), Shireesh Bhat (North Carolina State University, USA), Ilya Baldin (RENCI/UNC Chapel Hill, USA), Ken Calvert (University of Kentucky, USA) .................................................. 5354

Modeling Virtualized Downlink Cellular Networks with Ultra-dense Small cells
Hazem Ibrahim (York University, Canada), Hesham ElSawy (King Abdullah University of Science and Technology (KAUST), Saudi Arabia), Uyen Trang Nguyen (York University, Canada), Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia) ................................................................. 5360

Achieving Secure and Scalable Data Access Control in Information-Centric Networking
Qingji Zheng (Huawei Research, USA), Guoqiang Wang (Huawei, USA), Ravishankar Ravindran (Huawei & Huawei, USA), Aytac Azgin (Huawei Research, USA) ................................................................. 5367

On Optimal Hierarchical SDN
Yalin Liu (Huawei Technologies, P.R. China), Artur Hecker (Huawei Technologies, Germany), Riccardo Guerzoni (Huawei Technologies Co., Ltd. & European Research Center, Germany), Zoran Despotovic (Huawei Technologies, Germany), Sergio A. Beker (DOCOMO Euro-Labs, Germany) .......................................................................................................................... 5374

Load & Backhaul Aware Decoupled Downlink/Uplink Access in 5G Systems
Hisham ElShaer (King's College & Vodafone Group Services Limited, United Kingdom), Federico Boccardi (Ofcom, United Kingdom), Mischa Dohler (King's College London, United Kingdom), Ralf Irmer (Vodafone Group, United Kingdom) ................................................................. 5380

Energy-efficient green communications

Energy Aware Virtual Network Embedding with Dynamic Demands
Zhongbao Zhang (Beijing University of Posts and Telecommunications, P.R. China), Sen Su (Beijing University of Posts & Telecommunications (BUPT), P.R. China), Junchi Zhang (Beijing University of Posts and Telecommunications, P.R. China), Kai Shuang (Beijing University of Posts and Telecommunications, P.R. China), Peng Xu (Beijing University of Posts and Telecommunications, P.R. China) .......................................................................................................................... 5386

Wireless Energy Harvesting and Information Processing in Cooperative Wireless Sensor Networks
Songtao Guo (Southwest University, P.R. China), Yang Yang (Southwest University, P.R. China), Yuanyuan Yang (Stony Brook University, USA) ................................................................. 5392

Bayesian Reinforcement Learning for Energy Harvesting Communication Systems with Uncertainty
Yong Xiao (University of Houston, USA), Zhu Han (University of Houston, USA), Dusit Niyato (Nanyang Technological University, Singapore), Chau Yuen (Singapore University of Technology and Design, Singapore) .......................................................................................................................... 5398

Mode Selection for Energy Efficient D2D Communications in Dynamic TDD Systems
Demia Della Penda (KTH Royal Institute of Technology, Sweden), Liqun Fu (Royal Institute of Technology (KTH), Sweden), Mikael Johansson (Royal Institute of Technology, Sweden) .......................... 5404

Energy and Spectrum Efficiency Trade-off for Green Small Cell Networks
Haris Pervaiz (Lancaster University, United Kingdom), Leila Musavian (Lancaster University, United Kingdom), Qiang Ni (Lancaster University, United Kingdom) ................................................................. 5410
Internet of Things

Tim-Switching Energy Harvesting in Relay Networks
Saman Atapattu (Monash University, Australia), Hai Jiang (University of Alberta, Canada), Jamie Evans (Monash University, Australia), Chintha Tellambura (University of Alberta, Canada) ................................................................. 5416

A Time Division Scheduling Resource Allocation Algorithm for D2D Communication in Cellular Networks
Biwei Chen (Southeast University, P.R. China), Jun Zheng (Southeast University, P.R. China), Yuan Zhang (Southeast University, P.R. China) ................................................................................................................................. 5422

A Graph-Coloring Based Resource Allocation Algorithm for D2D Communication in Cellular Networks
Xuejia Cai (Southeast University, P.R. China), Jun Zheng (Southeast University, P.R. China), Yuan Zhang (Southeast University, P.R. China) ................................................................................................................................. 5429

A Method for Collecting Uniform Amount of Fresh Data from Areas with Varying Population Density
Yuichi Kawamoto (Tohoku University, Japan), Takayuki Nakazawa (Tohoku University, Japan), Hiromi Nishiyama (Tohoku University, Japan), Nei Kato (Tohoku University, Japan), Yoshitaka Shimizu (NTT, Japan), Tingting Jiang (Virginia Tech, USA) ................................................................................................................................. 5435

Optimal Device-to-Device Cell Association and Load Balancing
Christoforos Vlachos (King’s College London, United Kingdom), Vasilis Friderikos (King’s College London, United Kingdom) ................................................................................................................................. 5441

An Energy Efficient Routing Protocol for Device-to-Device Based Multihop Smartphone Networks
Aurobinda Laha (Illinois Institute of Technology, USA), Xianghui Cao (Illinois Institute of Technology, USA), Wenlong Shen (Illinois Institute of Technology, USA), Xiaohua Tian (Shanghai Jiao Tong University, P.R. China), Yu Cheng (Illinois Institute of Technology, USA) .......... 5448

Spectrum Allocation for Multi-Operator Device-to-Device Communication
Byungjin Cho (Aalto University, Finland), Konstantinos Koufos (Aalto University, Finland), Riku Jäntti (Aalto University School of Electrical Engineering, Finland), Zexian Li (Nokia Networks, Finland), Mikko A Uusitalo (Nokia Technologies, Finland) ................................................................................................................................. 5454

Cloud-based networking I

Permutation Generation for Routing in BCube Connected Crossbars
Zhenhua Li (Stony Brook University, USA), Yuanxuan Yang (Stony Brook University, USA) ............. 5460

Cost-Efficient Virtual Server Provisioning and Selection in Distributed Data Centers
Jielong Xu (Syracuse University, USA), Jian Tang (Syracuse University, USA), Brendan Mumey (Montana State University, USA), Weiyi Zhang (AT&T Labs Research, USA), Kevin Kwiat (Air Force Research Laboratory, USA), Charles A Kamhoua (Air Force Research Laboratory & Information Directorate, USA) ................................................................................................................................. 5466

Cloud Offloading for Multi-Radio Enabled Mobile Devices
S. Eman Mahmoodi (Stevens Institute of Technology, USA), Koduvayur P Subbalakshmi (Stevens Institute of Technology, USA), Vidiya Sagar (Stevens Institute of Technology, USA) ............. 5473

CLOT: A Cost-effective Low-latency Overlaid Torus-based Network Architecture for Data Centers
Ting Wang (Hong Kong University of Science and Technology, Hong Kong), Zhiyang Su (Hong Kong University of Science and Technology, Hong Kong), Yu Xia (Hong Kong University of Science and Technology, P.R. China), Mouin Hamdi (Hong Kong University of Science and Technology, P.R. China) ................................................................................................................................. 5479

Ultra-large Feedback-based Switch Implementation for Data Center Networks
Chunzhi He (The University of Hong Kong, Hong Kong), Lawrence Kwan Yeung (The University of Hong Kong, Hong Kong) ........................................................................................ 5485
Survivable Cloud Network Mapping with Multiple Failures
Zhili Zhou (IBM Research & IBM, Singapore), Tachun Lin (United States & Bradley University, USA), Krishnaiyan Thulasiraman (University of Oklahoma, USA) ................................................................. 5491

Cloud-based networking II

IoNCloud: exploring application affinity to improve utilization and predictability in datacenters
Daniel Stefani Marcon (Federal University of Rio Grande do Sul, Brazil), Miguel Neves (Federal University of Rio Grande do Sul (UFRGS), Brazil), Rodrigo Ruas Oliveira (Federal University of Rio Grande do Sul (UFRGS), Brazil), Leonardo R Bays (Federal University of Rio Grande do Sul, Brazil), Raouf Boutaba (University of Waterloo, Canada), Luciano Paschoal Gaspary (Federal University of Rio Grande do Sul, Brazil), Marinho P. Barcellos (Federal University of Rio Grande do Sul, Brazil) ................................................................. 5497

Dynamic Service Placement for Mobile Micro-Clouds with Predicted Future Costs
Shiqiang Wang (Imperial College London, United Kingdom), Rahul Urgaonkar (IBM Research, USA), Kevin S Chan (US Army Research Laboratory, USA), Ting He (IBM Research, USA), Murtaza Zafer (Nyansa Inc., USA), Kin K. Leung (Imperial College, United Kingdom) ................. 5504

Enhanced DCTCP to Explicitly Inform of Packet Loss
Yucong Huang (Zhejiang University, P.R. China), Bing Hu (Zhejiang University, P.R. China) ............. 5511

Conflict Free Network Coding for Distributed Storage Networks
Ahmed Al-habob (King Fahd University of Petroleum and Minerals (KFUPM) & Taiz University, Saudi Arabia), Sameh Sorour (King Fahd University of Petroleum and Minerals (KFUPM), Saudi Arabia), Neda Aboutorab (The Australian National University, Australia), Parastoo Sadeghi (The Australian National University, Australia) ................................................................. 5517

Critical Issues of Centralized and Cloudified LTE-FDD Radio Access Networks
Islam Alyafawi (University of Bern, Switzerland), Eryk Schiller (University of Bern, Switzerland), Torsten Ingo Braun (University of Bern, Switzerland), Desislava Dimitrova (ETH Zurich, Switzerland), Andre Gomes (University of Bern, Switzerland), Navid Nikaein (Eurecom, France) .................................................................................................................. 5523

Joint resource allocation and offloading strategies in cloud enabled cellular networks
Mohamed Kamoun (CEA LIST, France), Wael Labidi (CEA-List, France), Mireille Sarkiss (CEA LIST, France) .................................................................................................................. 5529

Content-based networking I

Design and Evaluation of a Utility-based Caching Mechanism for Information-centric Networks
Aifang Xu (University of Science and Technology of China, P.R. China), Xiaodong Tan (University of Science and Technology of China, P.R. China), Ye Tian (University of Science and Technology of China, P.R. China) .................................................................................................................. 5535

A Novel Stochastic-Encryption-Based P2P Digital Rights Management Scheme
Majing Su (Harbin Institute of Technology, P.R. China), Hongli Zhang (Harbin Institute of Technology, P.R. China), Xiaojiang Du (Temple University, USA), Qiong Dai (Institute of Information Engineering, Chinese Academy of Sciences, P.R. China) .................................................................................................................. 5541

A Distributed Energy-Efficient Algorithm in Green Content-Centric Networks
Chao Fang (Beijing University of Posts and Telecommunications, P.R. China), F. Richard Yu (Carleton University, Canada), Tao Huang (Beijing University of Posts and Telecommunications, P.R. China), Jiang Liu (Beijing University of Posts and Telecommunications, P.R. China), Yunjie Liu (Beijing University of Posts and Telecommunications, P.R. China) .................................................................................................................. 5546

A Flow-driven Fast Forwarding Architecture for Content Centric Networks
Aytac Azgin (Huawei Research, USA), Ravishankar Ravindran (Huawei & Huawei, USA), Guoqiang Wang (Huawei, USA) .................................................................................................................. 5552
Traffic engineering

Coded Caching for Delay-Sensitive Content
Urs Niesen (Bell Labs, Alcatel-Lucent, USA), Mohammad Ali Maddah-Ali (Bell Labs, Alcatel
Lucent, USA) .................................................................................................................. 5559

Cache Storage Optimization for Locality-Aware Peer-to-Peer Multimedia Distribution
Emanuele Di Pascale (CTVR - Trinity College Dublin, Ireland), Marco Ruffini (CTVR, Trinity
College Dublin, Ireland) .................................................................................................. 5565

Next-generation access networking

OFLOPS-Turbo: Testing the Next-Generation OpenFlow switch
Charalampos Rotsos (University of Cambridge, United Kingdom), Gianni Antichi (University of
Cambridge, United Kingdom), Marc Bruyere (Universite de Toulouse, France), Philippe
Owezarski (LAAS-CNRS, France), Andrew W. Moore (University of Cambridge, United
Kingdom) .......................................................................................................................... 5571

Global and Individual Mobility Pattern Discovery Based on Hotspots
Jie Yang (Beijing University of Posts and Telecommunications, P.R. China), Xinyu Zhang
(Beijing University of Posts and Telecommunications, P.R. China), Yuanyuan Qiao (Beijing
University of Posts and Telecommunications, P.R. China), Zubair Fadlullah (Tohoku
University, Japan), Nei Kato (Tohoku University, Japan) .................................................. 5577

Toward Online Profit-Driven Scheduling of Inter-DC Data-Transfers for Cloud Applications
Ping Lu (University of Science and Technology of China, P.R. China), Kaiyue Wu (University of
Science and Technology of China, P.R. China), Quanying Sun (University of Science and
Technology of China, P.R. China), Zuqing Zhu (University of Science and Technology of China,
P.R. China) ........................................................................................................................ 5583

Dynamic Demand Balance in Vehicle-to-Grid Mobile Energy Networks
Weifeng Zhong (Guangdong University of Technology, P.R. China), Rong Yu (Guangdong
University of Technology, P.R. China), Yan Zhang (Simula Research Laboratory and University
of Oslo, Norway), Jiawen Kang (Guangdong University of Technology, P.R. China), Haochuan
Zhang (Guangdong University of Technology, P.R. China), Shengli Xie (Guangdong University
of Technology, P.R. China) ............................................................................................... 5589

Network Function Virtualization Enabled Multicast Routing on SDN
Sai Qian Zhang (University of Toronto, Canada), Qi Zhang (University of Toronto & University
of Waterloo, Canada), Hadi Bannazadeh (University of Toronto, Canada), Alberto Leon-Garcia
(University of Toronto, Canada) .......................................................................................... 5595

Towards a Distributed TCP Improvement through Individual Contention Control in Wireless
Networks
Hengheng Xie (Paradise Research Lab, Canada), Azzedine Boukerche (University of Ottawa,
Canada), Robson De Grande (University of Ottawa, Canada), F. Richard Yu (Carleton
University, Canada) ......................................................................................................... 5602

Next-generation access networking

A Reinforcement Learning-based Cognitive MAC Protocol
Ioanna Kakalou (Aristotle University of Thessaloniki, Greece), Georgios Papadimitriou
(Aristotle University, Greece), Petros Nicopolitidis (Aristotle University, Greece), Panagiotis
Sarigiannidis (University of Western Macedonia, Greece), Mohammad S. Obaidat (Fordham
University, USA) ............................................................................................................. 5608

Transition to IPv6 with Realm Gateway 64
Jesus Llorente Santos (Aalto University, Finland), Raimo Kantola (Aalto University, Finland) .......... 5614

Timely Throughput of Heterogeneous Cellular Networks
Gongzheng Zhang (Zhejiang University, P.R. China), Aiping Huang (Zhejiang University, P.R.
China), Tony Q. S. Quek (Singapore University of Technology and Design, Singapore),
Hangguan Shan (Zhejiang University, P.R. China) ............................................................ 5621
Content-based networking II

H^2N4: Packet Forwarding on Hierarchical Hash-based Names for Content Centric Networks
Aytac Azgin (Huawei Research, USA), Ravishankar Ravindran (Huawei & Huawei, USA), Guoqiang Wang (Huawei, USA) .......................................................................................................................... 5639

MBP: a Max-Benefit Probability-based Caching Strategy in Information-Centric Networking
Haibo Wu (Computer Network Information Center, Chinese Academy of Sciences, P.R. China), Jun Li (Computer Network Information Center, Chinese Academy of Sciences, P.R. China), Jiang Zhi (Computer Network Information Center, Chinese Academy of Sciences, P.R. China) ................................................................. 5646

Delay Performance Analysis of Cooperative Cell Caching in Future Mobile Networks
Xiuhua Li (The University of British Columbia, Canada), Xiaofei Wang (The University of British Columbia, Canada), Shijie Xiao (Nanyang Technological University, Singapore), Victor C.M. Leung (The University of British Columbia, Canada) ................................................................................................. 5652

A Content-Centric Networking Forwarding Design for a Network Processor
Marc Mosko (Palo Alto Research Center, USA) .......................................................................................................................... 5658

An Entropy-based Probabilistic Forwarding Strategy in Named Data Networking
Kai Lei (Peking University, P.R. China), Jiawei Wang (Peking University, P.R. China), Jie Yuan (Peking University, P.R. China) .......................................................................................................................... 5665

Enhancing In-network Caching by Coupling Cache Placement, Replacement and Location
Xiaoyan Hu (Southeast University, P.R. China), Jian Gong (Southeast University, P.R. China), Guang Cheng (Southeast University, P.R. China), Chengyu Fan (Colorado State University, USA) .......................................................................................... 5672

Network service and resource management

A Practical Mechanism for Network Utility Maximization for Unicast Flows on the Internet
Abhinav Sinha (University of Michigan, USA), Achilleas Anastasopoulos (University of Michigan, USA) .......................................................................................................................... 5679

Optimal virtualization of functionality for customer premise equipment
Kalika Suksomboon (KDDI R&D Laboratories Inc., Japan), Masaki Fukushima (KDDI R&D Laboratories Inc., Japan), Michiaki Hayashi (KDDI R&D Laboratories Inc., Japan) .................................................................................. 5685

Detective: Automatically Identify and Analyze Malware Processes in Forensic Scenarios via DLLs
Yiheng Duan (Nanjing University, P.R. China), Xiao Fu (Nanjing University, P.R. China), Luo Bin (Nanjing University, P.R. China), Ziqi Wang (Nanjing University, P.R. China), Jin Shi (Nanjing University, P.R. China), Xiaojiang Du (Temple University, USA) .......................................................................................... 5691

A Novel Spectrum Sensing Scheduling Scheme for PU and SU Signal Differentiation in CR Networks
Dan Wang (Wichita State University, USA), Zhitao Yang (Wichita State University, USA), Yi Song (Wichita State University, USA) .......................................................................................................................... 5697

Network Coding and Coding-Aware Scheduling for Multicast in Wireless Networks
Maggie Cheng (Missouri University of Science and Technology, USA), Quanmin Ye (Missouri University of Science and Technology, USA), Xiaochnun Cheng (Middlesex University, United Kingdom), Robert F Ebacher (Army Research Laboratory, USA) .................................................................................. 5703
Content-based networking III

CoNAT: A Network Coding-based Interest Aggregation in Content Centric Networks
Dinh Nguyen (KDDI R&D Laboratories, Japan), Masaki Fukushima (KDDI R&D Laboratories Inc., Japan), Kohei Sugiyama (KDDI R&D Laboratories, Inc., Japan), Atsushi Tagami (KDDI R&D Laboratories, Japan) ................................................................. 5715

Critical Resource Multicast Protection in Data Center Networks
Dylan A.P. Davis (University of Massachusetts Lowell, USA), Jeremy M. Plante (University of Massachusetts Lowell, USA), Vinod M. Vokkarane (University of Massachusetts Lowell, USA) ........ 5721

Rate-matched Regenerating Code in Hostile Networks
Jian Li (Michigan State University, USA), Tongtong Li (Michigan State University, USA), Jian Ren (Michigan State University, USA) .................................................................................. 5728

Towards Optimal Content Replication and Request Routing In Content Delivery Networks
Payam Amani (Lund University, Sweden), Saeed Bastani (Lund University, Sweden), Bjorn Landfeldt (Lund University, Sweden) ................................................................. 5733

Cooperative Caching for Shared Spectrum Networks
Dibakar Das (Rensselaer Polytechnic Institute, USA), Alhussein A. Abouzeid (Rensselaer Polytechnic Institute, USA) .................................................................................. 5740

Dynamic Adaptive Streaming over Popularity-driven Caching in Information-Centric Networks
Wenjie Li (Queen's University, Canada), Sharief M.A. Oteafy (Queen's University, Canada), Hossam S. Hassanein (Queen's University, Canada) ................................................................. 5747

Next-generation network management and control

Multi-Flow Oriented Packets Scheduling in OpenFlow Enabled Networks
Huawei Huang (The University of Aizu, Japan), Song Guo (The University of Aizu, Japan) ........ 5753

Monitoring Traffic in Computer Networks with Dynamic Distributed Remote Packet Capturing
Ruediger Gad (Frankfurt University of Applied Sciences, Germany), Martin Kappes (Frankfurt University of Applied Sciences, Germany), Inmaculada Medina-Bulo (University of Cádiz, Spain) .................................................................................. 5759

Guidance Model for EV Charging Service
Dhaou Said (University of Sherbrooke & INTERLAB Research Laboratory, Canada), Soumaya Cherkaoui (Université de Sherbrooke, Canada), Lyes Khoukhi (University of Technology of Troyes, France) .................................................................................. 5765

QoS-Aware Virtualization-Enabled Routing in Software-Defined Networks
Alba Xifra Porxas (Georgia Tech, USA), Shih-Chun Lin (Georgia Tech, USA), Min Luo (Huawei Technologies, USA) .................................................................................. 5771

FDRC: Flow-Driven Rule Caching Optimization in Software Defined Networking
He Li (University of Aizu, Japan), Song Guo (The University of Aizu, Japan), Chentao Wu (Shanghai Jiao Tong University & Virginia Commonwealth University, P.R. China), Jie Li (Shanghai Jiao Tong University, Japan) ................................................................. 5777

An Efficient Fault Tolerant Distributed Path Recommendation Protocol for Vehicular Networks
Maram Bani Younes (University of Ottawa & Philadelphia University, Jordan), Azzedine Boukerche (University of Ottawa, Canada), Robson De Grande (University of Ottawa, Canada), Hengheng Xie (Paradise Research Lab, Canada) .................................................................................. 5783
Next-generation Flow Management

Load Balancing for Multicast Traffic in SDN using Real-Time Link Cost Modification
Alexander Craig (Carleton University, Canada), Biswajit Nandy (Carleton University, Canada), Ioannis Lambadaris (Carleton University, Canada), Peter Ashwood-Smith (Huawei Canada, Canada) .................................................................................................................. 5789

Multi-View 3D Video Delivery for Broadband IP Networks
Ting-Yu Ho (University of Washington, Taiwan), Yi-Nung Yeh (National Taiwan University, Taiwan), De-Nian Yang (Academia Sinica, Taiwan) .................................................................................................................. 5796

Fast Lossless Traffic Migration for SDN Updates
Long Luo (University of Electronic Science and Technology of China, P.R. China), Hongfang Yu (University of Electronic Science and Technology of China, P.R. China), Shouxing Luo (University of Electronic Science and Technology of China, P.R. China), Mingui Zhang (Huawei Technologies, Co., Ltd., P.R. China) .................................................................................................................. 5803

Sliding Mode-like Congestion Control for Communication Networks with Heterogeneous Applications
Jiong Jin (Swinburne University of Technology, Australia), Dong Yuan (Swinburne University of Technology, Australia), Jinchuan Zheng (Swinburne University of Technology, Australia), Yu-ning Dong (Nanjing University of Posts and Telecommunications, P.R. China) .................................................................................................................. 5809

Congestion Control for Bursty M2M Traffic in LTE Networks
Morteza Tavana (University of Tehran, Iran), Vahid Shah-Mansouri (University of Tehran, Iran), Vincent W.S. Wong (University of British Columbia, Canada) .................................................................................................................. 5815

Design of a Buffer and Channel Adaptive LTE Semi-Persistent Scheduler for M2M Communications
Nusrat Afrin (University of Newcastle, Australia), Jason Brown (University of Newcastle, Australia), Jamil Y Khan (The University of Newcastle, Australia) .................................................................................................................. 5821

ICC’15 (08) CQRM: IEEE ICC 2015 - Communications QoS, Reliability and Modeling Symposium

SDN and Virtualization

Towards an SDN Network Control Application for Differentiated Traffic Routing
Davide Adami (CNIT Pisa Research Unit, University of Pisa, Italy), Gianni Antichi (University of Cambridge, United Kingdom), Rosario G. Garroppi (University of Pisa, Italy), Stefano Giordano (University of Pisa, Italy), Andrew W. Moore (University of Cambridge, United Kingdom) .................................................................................................................. 5827

Network-Assisted Offloading for Mobile Cloud Applications
Claudio Fiandrino (University of Luxembourg, Luxemburg), Dzmitry Kliazovich (University of Luxembourg, Luxemburg), Pascal Bouvry (University of Luxembourg, Luxemburg), Albert Zomaya (The University of Sydney, Australia) .................................................................................................................. 5833

An Analytical Model for Electricity-Price-Aware Resource Allocation in Virtualized Data Centers
Giovanni Schembra (University of Catania, Italy), Giuseppe Faraci (University of Catania, Italy) .................................................................................................................. 5839

Mobility Aware Virtual Network Embedding
Giorgos Chochlidakis (King's College London, United Kingdom), Vasilis Friderikos (King's College London, United Kingdom) .................................................................................................................. 5846

Availability-aware Energy-efficient Virtual Machine Placement
Zhouhan Yang (State University of New York at Buffalo, USA), Liu Liu (University of Electronic Science and Technology of China, P.R. China), Chunming Qiao (State University of New York at Buffalo, USA), Sanjukta Das (SUNY at Buffalo & School of Management, USA), Ram Ramesh (State University of New York at Buffalo, USA), Anna Ye Du (University at Buffalo (SUNY), Buffalo, USA) .................................................................................................................. 5853
Wireless Networks Virtualisation: Traffic Modeling and Spectrum Sharing
Obada Al Khatib (The University of Sydney, Australia), Wibowo Hardjawana (The University of Sydney, Australia), Branka Vucetic (The University of Sydney, Australia) ................................................................. 5859

Networks and Demands

Sampling and Censoring in Estimation of Flow Distributions
Nelson Antunes (University of Algarve, Portugal), Vladas Pipiras (University of North Carolina, USA) .......................................................................................................................... 5865

Clustered Content Replication for Hierarchical Content Delivery Networks
Lazaros Gkatzikis (Mathematical and Algorithmic Sciences Lab, France Research Center, Huawei Technologies Co. Ltd., France), Vasilis Sourlas (University College London, United Kingdom), Carlo Fischione (KTH, Sweden), Iordanis Koutsopoulos (Athens University of Economics and Business and CERTH & CERTH, Greece), György Dán (KTH Royal Institute of Technology, Sweden) .................................................................................................................. 5872

Content Recommendation and Service Costs in Swarming Systems
Diogo Vieira (Federal University of Rio de Janeiro, Brazil), Carla Delgado (Federal University of Rio de Janeiro, Brazil), Daniel Menasché (Federal University of Rio de Janeiro, Brazil) ......................................................... 5878

Guyot: a Hybrid Learning- and Model-based RTT Predictive Approach
Wen Hu (Tsinghua University, P.R. China), Zhi Wang (Tsinghua University, P.R. China), Sun Lifeng (Tsinghua University, P.R. China) ......................................................................................................................... 5884

Interaction Between A Content Provider and A Service Provider and Its Efficiency
Ramy ElDelgawy (University of Maryland, College Park, USA), Richard J La (University of Maryland at College Park, USA) ................................................................................................................... 5890

Coalition Formation Algorithm of Prosumers in a Smart Grid Environment
Nicolas Gensollen (Telecom SudParis/Institut Mines Telecom & CNRS SAMOVAR UMR 5157, France), Monique Becker (Institut TELECOM; Telecom SudParis, France), Vincent Gauthier (Institut TELECOM; Telecom SudParis; SAMOVAR UMR, France), Michel Marot (Institut TELECOM Telecom SudParis, France) ........................................................................................................ 5896

Resources Management

Resource Usage Prediction Algorithms for Optimal Selection of Multimedia Content Delivery Methods
Yiannos Kryftis (University of Nicosia, Cyprus), Constandinos X. Mavromoustakis (University of Nicosia, Cyprus), George Mastorakis (Technological Educational Institute of Crete, Greece), Evangelos Pallis (Technological Educational Institute of Crete, Greece), Jordi Mongay Batalla (National Institute of Telecommunications & Warsaw University of Technology, Poland), Joel J. P. C. Rodrigues (Instituto de Telecomunicações, University of Beira Interior, Portugal), Ciprian Dobre (University Politechnica of Bucharest, Romania), Georgios Kormentzas (University of the Aegean, Greece) ........................................................................................................... 5903

A Hybrid System to Stimulate Selfish Nodes to Cooperate in Vehicular Delay-Tolerant Networks
João Dias (Instituto de Telecomunicações, University of Beira Interior, Portugal), Joel J. P. C. Rodrigues (Instituto de Telecomunicações, University of Beira Interior, Portugal), Neeraj Kumar (Thapar University, India), Constandinos X. Mavromoustakis (University of Nicosia, Cyprus) .................................................................................................................... 5910

Exploring Communication and Mobility Behavior of 3G Network Users and Its Temporal Consistency
Andrea Hess (Trinity College Dublin, Ireland), Ian Marsh (SICS, Sweden), Daniel Gillblad (Swedish Institute of Computer Science, Sweden) ......................................................................................... 5916

A Cooperative Framework Towards Self-Protection and Self-Organization in Mobile Ad Hoc Networks
Christos Tselikis (HAI S.A., Greece) .................................................................................................................. 5922
Energy Efficiency

Analysis of an Energy-Efficient MAC Protocol Based on Polling for IEEE 802.11 WLAN
Raul Palacios-Trujillo (University of Campinas, Brazil), Gedlu Mekonnen (University of Trento, Italy), Jesus Alonso-Zarate (Centre Tecnologic de Telecomunicacions de Catalunya - CTTC, Spain), Dzmitry Kliazovich (University of Luxembourg, Luxembourg), Fabrizio Granelli (University of Trento, Italy) 5941

Energy Efficient Scheduling in Data Centers
Debdeep Paul (Nanyang Technological University, Singapore), Wen-De Zhong (Nanyang Technological University, Singapore), Sanjay Kumar Bose (I.I.T. Guwahati, India) 5948

QoS Aware Energy-Efficient Resource Scheduling for HetNet CoMP
Kazi Mohammed Saidul Huq (Instituto de Telecomunicacões, Portugal), Shahid Mumtaz (Instituto de Telecomunicacões, Portugal), Jonathan Rodriguez (Instituto de Telecomunicacões, Portugal) 5954

Algorithm for Energy Efficient Routing, Modulation and Spectrum Assignment
Pedro Moura (State University of Campinas, Brazil), Rafael Scaraficci (University of Campinas, Brazil), Nelson L. S. da Fonseca (State University of Campinas, Brazil) 5961

QoS and Energy Efficient Resource Allocation in Downlink OFDMA systems
Dionysia Triantafyllopoulou (University of Surrey, United Kingdom), Klaus Moessner (University of Surrey, United Kingdom) 5967

Maximization of Energy-Efficiency under Convergence Constraint in Wireless Networked Control Systems
Mustafa Ozger (Koc University, Turkey), Ozgur B. Akan (Koc University, Turkey) 5973

Heterogeneous Networks

Random Access Mechanism for RAN Overload Control in LTE/LTE-A Networks
Tiago Andrade (State University of Campinas, Brazil), Carlos A. Astudillo (State University of Campinas & Computer Networks Laboratory, Brazil), Nelson L. S. da Fonseca (State University of Campinas, Brazil) 5979

Reservation Dynamic Frame Slotted-ALOHA for Wireless M2M Networks with Energy Harvesting
Francisco Vázquez-Gallego (Centre Tecnològic de Telecomunicacions de Catalunya (CTTC), Spain), Jesus Alonso-Zarate (Centre Tecnologic de Telecomunicacions de Catalunya - CTTC, Spain), Luis Alonso (Universidad Politecnica de Catalunya-BarcelonaTECH & Telecommunications and Aerospatial Engineering School of Castelldefels, Spain) 5985

Stochastic Geometry Modeling and Performance Evaluation of mmWave Cellular Communications
Marco Di Renzo (French National Center for Scientific Research (CNRS), France) 5992

On the Recursive Nature of End-to-End Delay Bound for Heterogeneous Wireless Networks
Neda Petreska (Fraunhofer Institute for Embedded Systems and Communication Technologies ESK, Germany), Hussein Al-Zubaidy (Royal Institute of Technology (KTH), Sweden), Rudi Knorr (Fraunhofer Institute for Embedded Systems and Communication Technologies (ESK), Germany), James Gross (Royal Institute of Technology (KTH), Sweden) 5998
**LTE Traffic Analysis for Signalling Load and Energy Consumption trade-off in Mobile Networks**
Gianluca Foddis (Telecom Italia LAB, Italy), Rosario G. Garroppo (University of Pisa, Italy), Stefano Giordano (University of Pisa, Italy), Gregorio Procissi (University of Pisa, Italy), Simone Roma (University of Pisa & Telecom Italia, Italy), Simone Topazzi (Telecom Italia Lab, Italy)

---

**Heterogeneous Wireless Network RAT Selection with Multiple Operators and Service Contracts**
Jason Ernst (University of Guelph, Canada), Stefan Kremer (University of Guelph, Canada), Joel J. P. C. Rodrigues (Instituto de Telecomunicações, University of Beira Interior, Portugal)

---

**Patterns and Protections**

---

**Game Theoretic Modeling of Jamming Attack in Wireless Powered Communication Networks**
Dusit Niyato (Nanyang Technological University, Singapore), Ping Wang (Nanyang Technological University, Singapore), Dong In Kim (Sungkyunkwan University (SKKU), Korea), Zhu Han (University of Houston, USA), Lu Xiao (Nanyang Technological University, Singapore)

---

**An Efficient Link Protection Scheme for Link-state Routing Networks**
Haijun Geng (Tsinghua University, P.R. China), Xingang Shi (Tsinghua University, P.R. China), Yin Xia (Tsinghua University, P.R. China), Zhiliang Wang (Tsinghua University, P.R. China), Han Zhang (Tsinghua University, Beijing, P.R. China)

---

**Lagrangian relaxation for the time-dependent combined network design and routing problem**
Dimitri Papadimitriou (Alcatel-Lucent & UGent, Belgium), Bernard Fortz (Université Libre de Bruxelles, Belgium), Enrico Gorgone (ULB, Belgium)

---

**The Impact of Mobility Patterns on the Efficiency of Data Forwarding in MANETs**
Thomas Lagkas (The University of Sheffield International Faculty, CITY College, Greece), Argyro Lamproudi (Chalmers University of Technology, Greece), Panagiotis Sarigiannidis (University of Western Macedonia, Greece), Harry Skianis (University of the Aegean, Greece)

---

**Characterizing ICMP Rate Limitation on Routers**
Riccardo Ravaioli (I3S/CNRS UMR 7271 Sophia Antipolis, France), Guillaume Urvoy-Keller (Université de Nice Sophia-Antipolis, France), Chadi Barakat (INRIA Sophia Antipolis, France)

---

**Decodability Analysis of Finite Memory Random Linear Coding in Line Networks**
Nima Torabkhani (Georgia Institute of Technology, USA), Faramarz Fekri (Georgia Institute of Technology, USA)

---

**Models for Efficient Data Replication in Cloud Computing Datacenters**
Dejene Boru Oljira (Karlstad University, Sweden), Dzmitry Kliazovich (University of Luxembourg, Luxembourg), Fabrizio Granelli (University of Trento, Italy), Pascal Bouvry (University of Luxembourg, Luxembourg), Albert Zomaya (The University of Sydney, Australia)

---

**Analogues between tuning TCP for Data Acquisition and Datacenter Networks**
Grzegorz Jereczek (CERN & Maynooth University, Switzerland), Giovanna Lehmann-Miotto (CERN, Switzerland), David Malone (Maynooth University, Ireland)

---

**Deadline-aware Envy-free Admission Control in Shared Datacenter Networks**
Jiann-Min Ho (National Taiwan University, Taiwan), Pi-Cheng Hsiu (Academia Sinica, Taiwan), Ming-Syan Chen (National Taiwan University, Taiwan)

---

**A Network Control Application enabling Software-Defined Quality of Service**
Davide Adami (CNIT Pisa Research Unit, University of Pisa, Italy), Lisa Donatini (University of Pisa, Italy), Stefano Giordano (University of Pisa, Italy), Michele Pagano (University of Pisa, Italy)

---

**Algorithm for the placement of groups of virtual machines in data centers**
Rodrigo Augusto Cardoso da Silva (Universidade Estadual de Campinas, Brazil), Nelson L. S. da Fonseca (State University of Campinas, Brazil)
Towards a Model for Global-Scale Backbone Networks
Michael Grey (TU Ilmenau, Germany), Markus Theil (TU Ilmenau, Germany), Michael Rossberg (Technische Universität Ilmenau, Germany), Günter Schaefer (Technische Universität Ilmenau, Germany) .................................................. 6086

Loss, Latency, and Demand

An Erlang Multirate Loss Model Supporting Elastic Traffic under the Threshold Policy
Ioannis Moscholios (University of Peloponnese, Greece), Michael D. Logothetis (University of Patras, Greece), Anthony Boucouvalas (University of Peloponnese, Greece), Vassilios G. Vassilakis (University of Cambridge, United Kingdom) ........................................................................ 6092

Analyzing the impact of bufferbloat on latency-sensitive applications
Nuruddeen M Iya (University of Aberdeen, United Kingdom), Nicolas Kuhn (Telecom Bretagne, France), Fabio Verdicchio (University of Aberdeen, United Kingdom), Gorry Fairhurst (University of Aberdeen, United Kingdom) ........................................................................ 6098

Impatience in mobile networks and its application to data pricing
Fabrice M. Guillemin (Orange Labs, France), Salah Eddine Elayoubi (Orange Labs & IRT SystemX, France), Philippe Robert (INRIA, France), Christine Fricker (INRIA, France), Bruno Sericola (INRIA Rennes - Bretagne Atlantique, France) ........................................................................ 6104

An SU Traffic Controller for the TCP/AQM Networks
Navin Haghighizadeh (University of Ottawa, Canada), Oliver Yang (University of Ottawa, Canada) ........................................................................ 6110

QoE-aware Video Rate Adaptation algorithms in multi-user IEEE 802.11 wireless networks
Federico Chiariotti (Università di Padova, Italy), Chiara Pielli (Università di Padova, Italy), Andrea Zanella (University of Padova, Italy), Michele Zorzi (University of Padova, Italy) ........................................................................ 6116

Topology Model to Generate Realistic Latency for Simulations
Arne Schwabe (University of Paderborn, Germany), Holger Karl (University of Paderborn, Germany) ........................................................................ 6122

Performance Analysis

Frames in Outdoor 802.11 WLANs Provide a Hybrid Binary-Symmetric/Packet-Erasure Channel
Douglas Leith (Trinity College Dublin, Ireland), Xiaomin Chen (Hamilton Institute, NUIM, Ireland) ........................................................................ 6128

Optimizing the Number of Samples for Multi-Channel Spectrum Sensing
Saud Althunibat (University of Trento, Italy), Tung Manh Vuong (University of Trento, Italy), Fabrizio Granelli (University of Trento, Italy) ........................................................................ 6133

Experimental Evaluation of Reverse Direction Transmissions in WLAN Using the WARP Platform
Raul Palacios-Trujillo (University of Campinas, Brazil), Francesco Franch (University of Trento, Italy), Francisco Vázquez-Gallego (Centre Tecnològic de Telecomunicacions de Catalunya (CTTC), Spain), Jesús Alonso-Zarate (Centre Tecnològic de Telecomunicacions de Catalunya - CTTC, Spain), Fabrizio Granelli (University of Trento, Italy) ........................................................................ 6139

Performance Analysis of IEEE 802.15.6 Contention-based MAC Protocol
Sana Ullah (Polytechnic Institute of Porto, Portugal), Eduardo Tovar (Polytechnic Institute of Porto, Portugal) ........................................................................ 6146

Cognitive Prediction of End-to-End Bandwidth Utilisation in a non QoS Video Conference
Sudip Misra (Indian Institute of Technology-Kharagpur, India), Sumit Goswami (Defence Research and Development Organisation, Ministry of Defence, India) ........................................................................ 6152

Optimized Network Coding Efficiency under QoS Constraints in Two-Way Relay Networks with Timeouts
Eleni Constantina Davri (NCSR Demokritos, Greece), Kimon Kontovasilis (NCSR Demokritos, Greece), Harry Skianis (University of the Aegean, Greece) ........................................................................ 6157
Demand and Scheduling

Distributed Demand-Side Management in Smart Grid: how Imitation improves Power Scheduling
Antimo Barbato (Politecnico di Milano, Italy), Antonio Capone (Politecnico di Milano, Italy), Lin Chen (The University of Paris-Sud, France), Fabio Martignon (Université Paris-Sud, France), Stefano Paris (Huawei Technologies Co. Ltd. & Université Paris Descartes, France) .................................. 6163

Intrusiveness-aware Estimation for High Quantiles of a Packet Delay Distribution
Kohei Watabe (Nagaoka University of Technology, Japan), Kenji Nakagawa (Nagaoka University of Technology, Japan) ........................................................................................................ 6169

On the Impact of Scheduler Settings on the Performance of Multi-Threaded SIP Servers
Ramesh Krishnamurthy (North Carolina State University, USA), George N. Rouskas (North Carolina State University, USA) ........................................................................................................ 6175

Serial, Parallel or Hybrid: Towards a Highly Reliable Transmission in RF/FSO Network Systems
Anna Engelmann (Technische Universität Carolo-Wilhelmina zu Braunschweig, Germany), Admela Jukan (Technische Universität Carolo-Wilhelmina zu Braunschweig, Germany) .................................. 6181

OCPS: Offset Compensation based Packet Scheduling Mechanism for Multipath TCP
Dan Ni (University of Science and Technology of China, P.R. China), Kaiping Xue (University of Science and Technology of China, P.R. China), Peilin Hong (Dept. EEIS & USTC, P.R. China), Hong Zhang (University of Science and Technology of China, P.R. China), Hao Lu (University of Science and Technology of China, P.R. China) ........................................................................................................ 6187

Angle-Based Time Fingerprint Positioning Technique for Indoor UWB Systems
Eleni Bogdani (University of the Aegean, Greece), Demosthenes Vouyioukas (University of the Aegean, Greece), Nikolaos Nomikos (University of the Aegean, Greece), Dimitrios N Skoutas (University of the Aegean, Greece), Harry Skianis (University of the Aegean, Greece) .................................. 6193

Physical Layer Design

Set-Membership Affine Projection Channel Estimation for Wireless Sensor Networks
Pouya Ghofrani (RWTH Aachen University, Germany), Tong Wang (RWTH Aachen University, Germany), Anke Schmeink (RWTH Aachen University, Germany) .................................. 6199

Experimental Demonstration of Nanosecond-Accuracy Wireless Network Synchronization
Marcelo Segura (University of Southern California & National University of San Juan, USA), Somasundaram Niranjayan (University of Southern California, USA), Hossein Hashemi (University of Southern California, USA), Andreas Molisch (University of Southern California, USA) ........................................................................................................ 6205

PiPNC: Piggybacking Physical Layer Network Coding for Multihop Wireless Networks
Haoyuan Zhang (UVic, Canada), Lei Zheng (UVic, Canada), Lin Cai (University of Victoria, Canada) ........................................................................................................ 6211

Energy Efficient Quantization of Correlated Noisy Observations of a Sensor
Muhammad Hafeez Chaudhary (Royal Military Academy, Belgium), Bart Scheers (Royal Military Academy, Belgium) ........................................................................................................ 6217

Forwarding Interfering Signals in Wireless Ad Hoc Networks under MRC Receiver Processing
Antonios Argyriou (University of Thessaly, Greece) ........................................................................................................ 6222

Bit Error Rate Analysis of Cooperative Beamforming for Transmitting Individual Data Streams
Spyros Vassilaras (Huawei Technologies, France), George C. Alexandropoulos (France Research Center, Huawei Technologies Co. Ltd., France), Antonis A. Kalis (AIT - Athens Information Technology, Greece) ........................................................................................................ 6228
### Scheduling

**On a Throughput-Efficient Look-Forward Channel-Aware Scheduling**  
Karim Hammad (University of Western Ontario, Canada), Maysam Mirahmadi (The University of Western Ontario, Canada), Serguei Primak (University of Western Ontario, Canada), Abdallah Shami (The University of Western Ontario, Canada) .................................................. 6234  

**Half-Duplex Scheduling in Distributed Synchronization**  
Maria Alvarez (Politecnico di Milano & Escuela Superior Politecnica del Litoral, Italy), Umberto Spagnolini (Politecnico di Milano, Italy) ................................................................. 6240  

**EPLA: Energy-balancing Packets Scheduling for Airborne Relaying Networks**  
Kai Li (Singapore University of Technology and Design, Singapore), Wei Ni (CSIRO, Australia), Xin Wang (Fudan University, P.R. China), Ren Ping Liu (CSIRO, Australia), Salil S Kanhere (The University of New South Wales, Australia), Sanjay Jha (University of NSW, Australia) .................................................................................................................. 6246  

**SINR-Based Scheduling for Minimum Latency Broadcast**  
Clement Kam (Naval Research Laboratory, USA), Sastry Kompella (Naval Research Laboratory, USA), Anthony Ephremides (University of Maryland at College Park, USA), Ira Moskowitz (Naval Research Laboratory, USA) .................................................................................................................. 6252  

**Energy-Efficient Scheduled Directional Medium Access Control Protocol for Wireless Sensor Networks**  
Asif Akbar (Ryerson University, Canada), Muhammad Jaseemuddin (Ryerson University, Canada), Xavier N Fernando (Ryerson University, Canada), Wisam Farjow (Ryerson University & The PBE Group, Canada) .................................................. 6258  

**Hybrid Policy to Determine Awaking Sensor Nodes**  
Max do Val Machado (Pontificial Catholic University of Minas Gerais, Brazil), Raquel A. F. Mini (PUC Minas, Brazil), Antonio A.F. Loureiro (Federal University of Minas Gerais, Brazil) .......................... 6265

### Security and Privacy

**Reliable Privacy-Preserving Communications for Wireless Ad Hoc Networks**  
Jing Yang Koh (National University of Singapore, Singapore), Joseph Chee Ming Teo (Institute for Infocomm Research, Singapore), Derek Leong (Institute for Infocomm Research, Singapore), Wai-Choong Wong (National University of Singapore, Singapore) .............................................. 6271  

**Designing secure and reliable wireless sensor networks under a pairwise key predistribution scheme**  
Faruk Yavuz (Carnegie Mellon University, USA), Jun Zhao (Carnegie Mellon University, USA), Osman Yağan (Carnegie Mellon University & CyLab, USA), Virgil Gligor (Carnegie Mellon University, USA) .................................................. 6277  

**All-in-One Binary Word Solution for IP Traceback in Wireless Mesh Network**  
Mouna Gassara (Sfax University, Tunisia), Imen El bouabidi (University of Sfax, Tunisia), Faouzi Zarai (Sfax University, Tunisia), Mohammad S. Obaidat (Fordham University, USA) ........... 6284  

**Enable Privacy Preservation for k-NN Query in Two-tiered Wireless Sensor Networks**  
Hui Peng (Renmin University of China, P.R. China), Xiaoying Zhang (Renmin University of China, P.R. China), Hong Chen (Renmin University of China, P.R. China), Yao Wu (Renmin University of China, P.R. China), Juru Zeng (RUC, P.R. China), Deying Li (Renmin University of China, P.R. China) ................................................................. 6289  

**Secrecy Outage of Nakagami-m MISO Channels with Randomly Located Receivers**  
Satyanarayana Vuppala (University of Edinburgh, United Kingdom), Weigang Liu (The University of Edinburgh, United Kingdom), Giuseppe Abreu (Jacobs University Bremen, Germany), Tharmalingam Ratnarajah (The University of Edinburgh, United Kingdom) ........................................ 6295  

**Location-Dependent Key Management Protocol for a WSN with a Random Selected Cell Reporter**  
Harith Fakhrey (Newcastle University, United Kingdom), Said Boussaka (Newcastle University, United Kingdom), Rajesh Tiwari (Newcastle University, United Kingdom), Yasir Ahmed Al-Mathehaji (Newcastle University, United Kingdom), Alex Bystrov (Newcastle University, United Kingdom) ........................................ 6300
Delay tolerant networks and opportunistic networking

A Game Theoretic Approach to Sensor Data Communications in an Opportunistic Network
Hjalmar Wennerström (Uppsala University, Sweden), David B Smith (National ICT Australia, Australia) ............................................................ 6306

Data Sweeping in Deterministic Trajectories-covered Wireless Sensor Networks
Jun Tao (Southeast University, P.R. China), Yaodan Hu (Southeast University, P.R. China), Fei Tong (University of Victoria, Canada), Jianping Pan (University of Victoria, Canada) ....................... 6312

Opportunistic Forwarding based on the Weighted Social Characteristics in MSNs
Jun Tao (Southeast University, P.R. China), Chengwei Tan (Southeast University, P.R. China), Ziyi Zhang (Southeast University, P.R. China), Jian He (Southeast University, P.R. China), Yifan Xu (Southeast University, P.R. China) ............................................................ 6318

Ruifeng Zhang (Letterkenny Institute of Technology, Ireland), Nick Francis Timmons (Letterkenny Institute of Technology, Ireland), Jim Morrison (Letterkenny Institute of Technology, Ireland) ............................................................ 6324

Trust Management in Delay Tolerant Networks Utilizing Erasure Coding
Thomas Babbitt (RPI, USA), Boleslaw K Szymanski (Rensselaer Polytechnic Institute, USA) .... 6331

Wireless Network Applications

NeCoRPIA: Network Coding with Random Packet-Index Assignment for Mobile Crowdsensing
Claudio Greco (INRIA, France), Michel Kieffer (L2S - CNRS - SUPELEC - University Paris-Sud, France), Cedric Adjih (INRIA, France) .............................................................................................................. 6338

Falko Dressler (University of Paderborn, Germany), Bastian Bloessl (University of Paderborn, Germany), Martin Hierold (University of Erlangen-Nuremberg, Germany), Chia-Yu Hsieh (University of Erlangen-Nuremberg, Germany), Thorsten Nowak (University of Erlangen-Nürnberg, Germany), Robert Weigel (Institute for Electronics Engineering, Erlangen-Nuremberg Uni., Germany), Alexander Koelpin (University of Erlangen-Nuremberg & Institute f. Electronics Engineering, Germany) .............................................................................................................. 6345

Code Rate, Frequency and SNR Optimization for Energy Efficient Underwater Acoustic Communications
Fabio Alexandre de Souza (IFSC, Brazil), Richard Demo Souza (Federal University of Technology - Paraná (UTFPR), Brazil), Glauber Brante (Federal University of Technology - Paraná (UTFPR), Brazil), Marcelo Eduardo Pellenz (Pontifical Catholic University of Paraná, Brazil), Fernando Rosas (KU Leuven, Belgium) .............................................................................................................. 6351

Distributed Connectivity Restoration in Underwater Acoustic Sensor Networks via Depth Adjustment
Erkay Uzun (METU, Turkey), Fatih Senel (Antalya International University, Turkey), Kemal Akkaya (Florida International University, USA), Adnan Yazici (Middle East Technical University, Turkey) .............................................................................................................. 6357

A Spatio-Temporal Incentive Scheme with Consumer Demand Awareness for Participatory Sensing
Wen Sun (National University of Singapore, Singapore), Chen-Khong Tham (National University of Singapore, Singapore) .............................................................................................................. 6363

An environment-friendly spectrum decision strategy for underwater wireless sensor networks
Guidan Yao (Tianjin University, P.R. China), Zhigang Jin (Tianjin University, P.R. China), Yishan Su (School of Electronic Information Engineering, Tianjin University, P.R. China) .... 6370
Topological control and management

On Selecting a Reliable Topology in Wireless Sensor Networks
Israat Tanzeena Haque (University of California, Riverside, USA), Mohammad Saiful Islam (National Oilwell Varco, Canada), Janelle Harms (University of Alberta, Canada) .......................... 6376

A Novel Mechanism for Restoring Actor Connected Coverage in Wireless Sensor and Actor Networks
Noman Haider (Universiti Teknologi PETRONAS, Malaysia), Muhammad Imran (KSU, Saudi Arabia), Mohamed Younis (University of Maryland Baltimore County, USA), Mohamad Naufal Mohamad Saad (Universiti Teknologi Petronas, Malaysia), Mohsen Guizani (QU, USA) .................. 6383

Temperature MAC Plug-in for Large Scale WSN
Walid Bechkit (Université de Lyon, INRIA, INSYS-IMAGE & INRIA, France), Yacine Challal (University of Technology of Compiegne & Heudiasyc lab. UMR CNRS, France), Abdelmalek Bachir (Biskra University, Algeria), Abdelmajid Bouabdallah (Universite de Technologie - Compiegne, France) ........................................................................................................ 6389

Obstacle-avoidance Connectivity Restoration for Mobile Sensor Systems with local information
Zhenqiang Mi (University of Science and Technology Beijing, P.R. China), James Yang (University of Illinois at Urbana-Champaign, USA) ............................................................... 6395

Symmetric Connectivity in Wireless Sensor Networks with Directional Antennas
Tien Tran (University of Texas at Dallas, USA), Min Kyung An (Sam Houston State University, USA), Dung Huynh (University of Texas at Dallas, USA) ...................................................................................... 6400

A Distributed Algorithm to Construct Multicast Trees in Wireless Multi-hop Networks
Hongyu Gong (Shanghai Jiao Tong University, P.R. China), Lutian Zhao (Shanghai Jiao Tong University, P.R. China), Kainan Wang (Shanghai Jiao Tong University, P.R. China), Weijie Wu (Huawei Technologies Investment Co., Ltd, Hong Kong), Xinbing Wang (Shanghai Jiao Tong University, P.R. China) .................................................................................................................. 6406

Resource Management I

CFPP: Collision-free Path Planning for Wireless Mobile Sensors Deployment
Ting-Yu Lin (National Chiao Tung University, Taiwan), Hendro Agus Santoso (National Chiao Tung University, Taiwan), Chung-An Lin (National Chiao Tung University, Taiwan), Gui-Liu (Kyaw Kyaw Naing) Wang (National Chiao Tung University, Taiwan) ............................................................... 6412

Throughput Optimization with Fairness Consideration for Coexisting WBANs
Ming Li (Shanghai JiaoTong University, P.R. China), Jing Liu (Shanghai Jiao Tong University, P.R. China), Zhichao Ma (Shanghai Institute of Measurement and Testing Technology, P.R. China), Chongwei Yuan (Shanghai Jiao Tong University, P.R. China), Bin Yuan (Shanghai Jiao Tong University, P.R. China) .................................................................................................................. 6418

Routing-based Multi-Channel Allocation with Fault Recovery for Wireless Sensor Networks
Samira Chouikhi (National School of Computer Science, Université Paris-Est, Tunisia), Inès El Korbi (University of Manouba, Tunisia), Yacine Ghamri-Doudane (University of la Rochelle, France), Leila Azouz Saïdane (ENSi, University of Manouba, Tunisia) .......................................................... 6424

Distributed User Association and Interference Coordination in HetNets Using Stackelberg Game
Xiong Zhou (South China University of Technology, P.R. China), Suili Feng (South China University of Technology, P.R. China), Zhu Han (University of Houston, USA), Yuan Liu (South China University of Technology, P.R. China) .......................................................... 6431

A Cross-Layer Framework for Spectrum Management in Mobile Ad Hoc Networks
Giovanni Geraci (Singapore University of Technology and Design, Singapore), Athipat Limmanee (Singapore University of Technology and Design, Singapore), Wen Huang (Singapore University of Technology and Design, Singapore), Marco Maso (Mathematical and Algorithmic Sciences Lab, Huawei France Research Center, France), Tony Q. S. Quek (Singapore University of Technology and Design, Singapore) .......................................................... 6437

Hole Plastic Scheme for Geographic Routing in Wireless Sensor Networks
Fucai Yu (University of Electronic Science and Technology of China, P.R. China), Shengli Pan (University of Electronic Science and Technology of China, P.R. China), Guangmin Hu (University of Electronic Science and Technology of China, P.R. China) .......................................................... 6444
Betweenness Centrality in Dense Random Geometric Networks
Alexander P Giles (University of Bristol, United Kingdom), Orestis Georgiou (Toshiba Telecommunications Research Laboratory, United Kingdom), Carl P Dettmann (University of Bristol, United Kingdom) .................................................. 6450

Guarding an Area of Interest in Sensor Grids with Unreliable Nodes
Mohammed Elmorsy (University of Alberta, Canada), Ehab S. Elmallah (University of Alberta, Canada) ................................................................. 6456

Composite Event Detection and Identification for WSNs using General Hebbian Algorithm
Kamran Ali (Michigan State University, USA, USA), Talha Anwar (Rensselaer Polytechnic Institute, USA), Ijaz Haider Naqvi (LUMS School of Science and Engineering (SSE) & LUMS SSE, Pakistan), Muhammad H Jafry (LUMS School of Science and Engineering, Pakistan) .............. 6463

Transmission of Real-time Traffic in TDMA Multi-hop Wireless Ad-hoc Networks
Pavel Nekrasov (JSC Telum, Russia), Denis Fakhriev (Telum JSC, Russia) ................................................................. 6469

Minimum Cost Flow Solution for Tolerating Multiple Node Failures in Wireless Sensor Networks
Heba Essam (Ain-Shams University, USA), Mohamed Younis (University of Maryland Baltimore County, USA), Eman Shaaban (Ain Shams University, Egypt) ........................................ 6475

Delivery Latency Minimization in Wireless Sensor Networks with Mobile Sink
Jiqiang Tang (Chongqing University, P.R. China), Songtao Guo (Southwest University, P.R. China), Yuanyuan Yang (Stony Brook University, USA) ................................................................. 6481

Resource Management II

Joint Optimization of Communication and Controller Components of Wireless Networked Control Systems
Yalcin Sadi (Koç University, Turkey), Sinem Coleri Ergen (Koc University & University of California Berkeley, Turkey) ........................................................................ 6487

Practical Frequency Hopping Sequence Design for Interference Avoidance in 802.15.4e TSCH Networks
Chao-Fang Shih (Georgia Institute of Technology, USA), Ariton Xhafa (Texas Instruments Inc., USA), Jianwei Zhou (Texas Instruments Inc., USA) ................................................................. 6494

Group Paging Optimization For Machine-Type-Communications
Osama Arouk (University of Rennes 1 & IRISA / INRIA Rennes, France), Adlen Ksentini (University of Rennes 1 / IRISA Lab, France), Tarik Taleb (Aalto University, Finland) ...................... 6500

Energy Efficient Tour Planning for Mobile Actor in Rendezvous Point Selection Scheme
Samir Kumar D. Trapasiya (GCET, Gujarat Technological University, India), Himanshu Soni (GCET, Gujarat Technological University, India) ................................................................. 6506

Li Chen (University of Rochester, USA), Jeremy Warner (University of Rochester, USA), Wendi Heinzelman (University of Rochester, USA), Ilker Demirkol (Universitat Politecnica de Catalunya & i2CAT Foundation, Spain) ................................................................. 6512

Graph-theoretic Critical Sensor Determination and Partition Elimination in Mobile Sensor Networks
Zhenqiang Mi (University of Science and Technology Beijing, P.R. China), Yang Yang (University of Science and Technology, P.R. China), James Yang (University of Illinois at Urbana-Champaign, USA) ................................................................. 6519

Low-latency Mobile Data Collection for Wireless Rechargeable Sensor Networks
Cong Wang (Stony Brook University, USA), Ji Li (Stony Brook University, USA), Yuanyuan Yang (Stony Brook University, USA) ................................................................. 6524
On The Performance Analysis of Finite Wireless Network
Vahid Naghshin (University of New South Wales, Australia), Mark C Reed (University of New South Wales, Australia), Yuan Liu (South China University of Technology, P.R. China) 6530

Traffic Flow Modeling and Limitation on the Coexistence of WAVE and WLAN
Wuxiong Zhang (Shanghai Research Center for Wireless Communications, P.R. China), Tingting Zhang (ShanghaiTech University, P.R. China), Yang Yang (ShanghaiTech University, P.R. China), Hua Qian (Chinese Academy of Sciences, P.R. China), Yiqing Sun (Shanghai Jiao Tong University, P.R. China), Fei Qin (Chinese Academy of Sciences, P.R. China) 6536

On Capacity of Active Relaying in Magnetic Induction based Wireless Underground Sensor Networks
Steven Kisseleff (Friedrich-Alexander-University Erlangen-Nürnberg (FAU), Germany), Benjamin Sackenreuter (Fraunhofer IIS, Germany), Ian F. Akyildiz (Georgia Institute of Technology, USA), Wolfgang Gerstacker (University of Erlangen-Nuernberg, Germany) 6541

Interference-Robust Packet Transmission in Wireless Sensor Networks
Jin-Seok Han (Seoul national university, Korea), Yong-Hwan Lee (Seoul National University, Korea) 6547

Connectivity of Large-Scale WSNs in Fading Environments under Different Routing Mechanisms
Prodromos-Vasileios Mekikis (Universitat Politècnica de Catalunya (UPC), Spain), Elli Kartsakli (Universitat Politècnica de Catalunya (UPC), Spain), Aris S. Lalos (University of Patras, Greece), Angelos Antonopoulos (Telecommunications Technological Centre of Catalonia (CTTC), Spain), Luis Alonso (Universidad Politecnica de Catalunya-BarcelonaTECH & Telecommunications and Aerial Engineering School of Casteldefels, Spain), Christos Verikoukis (Telecommunications Technological Centre of Catalonia, Spain) 6553

Mobile and Vehicular Ad Hoc Networks

A Software Defined Network Architecture for GeoBroadcast in VANETs
YuChun Liu (National Chiao Tung University, Taiwan), Chien Chen (National Chiao Tung University, Taiwan), Suchandra Chakraborty (National Chiao Tung University, Taiwan) 6559

A Routing Protocol for VANETs with Adaptive Frame Aggregation and Packet Size Awareness
Celimuge Wu (University of Electro-Communications, Japan), Yusheng Ji (National Institute of Informatics, Japan), Satoshi Ohzahata (The University of Electro-Communications & Graduate School of Information Systems, Japan), Toshihiko Kato (University of Electro-Communications, Japan) 6565

Density-Based Optimal Transmission for Throughput Enhancement in Vehicular Ad-Hoc Networks
Giorgia V Rossi (Imperial College London, United Kingdom), Kin K. Leung (Imperial College, United Kingdom), Athanasios Gkelias (Imperial College London, United Kingdom) 6571

Minimum-Energy Broadcasting for Cross Wireless Ad-Hoc Networks
Mohammad Reza Ataei (Carleton University, Canada), Amir Banihashemi (Carleton University, Canada), Thomas Kunz (Carleton University, Canada) 6577

Context Aware Clustering in VANETs: a Game Theoretic Perspective
Francesco Chiti (Università degli Studi di Firenze, Italy), Romano Fantacci (University of Florence, Italy), Enrico Dei (University of Florence, Italy), Zhu Han (University of Houston, USA) 6584

Delay-bounded Minimal Cost Placement of Roadside Units in Vehicular Ad hoc Networks
Peng Li (Wuhan University, P.R. China), Qin Liu (School of Computer, Wuhan University, P.R. China), Chuanhe Huang (Wuhan University, P.R. China), Jinhai Wang (Wuhan University, P.R. China), Xiaohua Jia (City University of Hong Kong, Hong Kong) 6589
Localization, Tracking and Mobility I

**Improving Mobile Node Tracking Performance in NLOS Environments Using Cooperation**
Reza Monir Vaghefi (Virginia Tech, USA), SairDhiraj Amuru (Virginia Tech, USA), Michael Buehrer (Virginia Tech, USA) ........................................................................................................ 6595

**Cost-effective and Accurate Nodes Localization in Heterogeneous Wireless Sensor Networks**
Ahmad El Assaf (INRS, Canada), Slim Zaidi (University of Quebec, INRS-EMT, Canada), Sofiene Affes (INRS-EMT, Canada), Nahi Kandil (Université du Québec en Abitibi-Témiscamingue, Canada) .......................................................................................................... 6601

**MDS-based Localization Scheme for Large-Scale WSNs within Sparse Anchor Nodes**
Xizhe Wang (Hangzhou Dianzi University, P.R. China), Jian Qiu (Hangzhou Dianzi University, P.R. China), Jin Fan (Hangzhou Dianzi University, P.R. China), Guojun Dai (Hangzhou Dianzi University, P.R. China) ........................................................................................................ 6609

**Multiple Target Tracking under Occlusions Using Modified Joint Probabilistic Data Association**
Xiufang Shi (Zhejiang University, P.R. China), Ye-Qiong Song (LORIA, France), Zaiyue Yang (Zhejiang University, P.R. China), Jiming Chen (Zhejiang University, P.R. China) ........................................................................................................ 6615

**A Probability-Based Acoustic Source Localization Scheme Using Dual-Microphone Smartphones**
Sanfeng Zhu (Dalian University of Technology, P.R. China), Naigao Jin (Dalian University of Technology, P.R. China), Xueshu Zheng (Dalian University of Technology, P.R. China), Han Yao (Dalian University of Technology, P.R. China), Shuailing Yang (Dalian University of Technology, P.R. China), Lei Wang (Dalian University of Technology, P.R. China) ........................................................................................................ 6621

**Localization in Non-Homogeneous One-Dimensional Wireless Ad-Hoc Networks**
Mohammad Reza Ataei (Carleton University, Canada), Thomas Kunz (Carleton University, Canada), Amir Banihashemi (Carleton University, Canada) ........................................................................................................ 6627

Localization, Tracking and Mobility II

**Cooperative Fault-Tolerant Target Tracking in Camera Sensor Networks**
Christos Laoudias (University of Cyprus, Cyprus), Panagiotis Tsangaridis (University of Cyprus, Cyprus), Marios Polycarpou (University of Cyprus, Cyprus), Christos Panayiotou (University of Cyprus, Cyprus), Christos Kyrkou (University of Cyprus, Cyprus), Theocaris G. Theocharides (University of Cyprus, Greece) ........................................................................................................ 6634

**HandButton: Gesture Recognition of Transceiver-free Object by Using Wireless Networks**
WeiLing Zheng (ShenZhen University, P.R. China), Dian Zhang (ShenZhen University, P.R. China) ........................................................................................................ 6640

**Joint Synchronization and Localization based on Gaussian Belief Propagation in Sensor Networks**
Weijie Yuan (Beijing Institute of Technology, P.R. China), Nan Wu (Beijing Institute of Technology, P.R. China), Hua Wang (Modern Comm. Lab, P.R. China), Bin Li (China, P.R. China), Jingming Kuan (Beijing Institute of Technology, P.R. China) ........................................................................................................ 6646

**Hybrid Maximum Depth-kNN Method for Real Time Node Tracking using Multi-Sensor Data**
Sudhir Kumar (Indian Institute of Technology Kanpur, India), Abhay Kumar (Indian Institute of Technology, Kanpur, India), Akshay Kumar (Indian Institute of Technology Kanpur, India), Rajesh M Hegde (Indian Institute of Technology Kanpur, India) ........................................................................................................ 6652

**Cubature Belief Propagation for Self-localization of Wireless Networks**
Wenyun Gao (tsinghua university, P.R. China), Xi Chen (Tsinghua University, P.R. China), Jianhua Lu (Tsinghua University, P.R. China) ........................................................................................................ 6658

**Maximum Likelihood based Multihop Localization in Wireless Sensor Networks**
Orestis Georgiou (Toshiba Telecommunications Research Laboratory, United Kingdom), CamLy Nguyen (Corporate Research & Development Center, Toshiba, Japan), Yusuke Doi (Corporate R&D Center, Toshiba Corporation, Japan) ........................................................................................................ 6663
Sensing and Recovery

Adaptive Duty Cycling in Sensor Networks via Continuous Time Markov Chain Modelling
Wai Hong Ronald Chan (Institute for Infocomm Research, Singapore), Pengfei Zhang (Institute for Infocomm Research, Singapore), Wenyu Zhang (Cornell University, USA), Ido Nevat (Institute for Infocomm Research, Singapore), Alvin C Valera (Institute for Infocomm Research, Singapore), Hwee-Xian Tan (Singapore Management University & SMU-TCS iCity Lab, Singapore), Natarajan Gautam (Texas A&M University, USA) ........................................... 6669

Sparsity-fused Kalman Filtering for Reconstruction of Dynamic Sparse Signals
Xin Ding (University of Cambridge, United Kingdom), Wei Chen (Beijing Jiaotong University, P.R. China), Ian James Wassell (University of Cambridge, United Kingdom) ........................................... 6675

Energy Efficient Monitoring of Water Distribution Networks via Compressive Sensing
Rong Du (KTH Royal Institute of Technology, Sweden), Lazaros Gkatzikis (Mathematical and Algorithmic Sciences Lab, France Research Center, Huawei Technologies Co. Ltd., France), Carlo Fischione (KTH, Sweden), Ming Xiao (Royal Institute of Technology, Sweden) ........................................... 6681

Target Counting Using Binary Proximity Sensors via Cluster Identification
Shigeo Shioda (Chiba University, Japan) ........................................... 6687

A Link Quality Estimation Model for Energy-Efficient Wireless Sensor Networks
Jianjun Wen (Technische Universität Dresden, Germany), Zeeshan Ansar (TU Dresden Germany, Germany), Waltenegus Dargie (Technische Universität Dresden, Germany) ........................................... 6694

Distributed Object Recognition in Visual Sensor Networks
Stefano Paris (Huawei Technologies Co. Ltd. & Université Paris Descartes, France), Alessandro E. C. Redondi (Politecnico di Milano, Italy), Matteo Cesana (Politecnico di Milano, Italy), Marco Tagliasacchi (Politecnico di Milano, Italy) ........................................... 6701

Distributed Algorithms

Nonlinear Diffusion Adaptation with Bounded Transmission over Distributed Networks
Jongmin Lee (Arizona State University, USA), Cihan Tepedelenlioglu (Arizona State University, USA), Mahesh Banavar (Clarkson University, USA), Andreas Spanias (ASU / SensIP Center / School of ECEE, USA) ........................................... 6707

Low-complexity distributed fault detection for wireless sensor networks
Wenjie Li (Laboratoire des Signaux et Systèmes & Université Paris-Sud, France), Francesca Bassi (LSS-CNRS-Supelec, France), Davide Dardari (University of Bologna, Italy), Michel Kieffer (L2S - CNRS - SUPELEC - UniversityParis-Sud, France), Gianni Pasolini (University of Bologna, Italy) ........................................... 6712

Guiding Sensor-Node Deployment Over 2.5D Terrain
Kerry Veenstra (University of California Santa Cruz, USA), Katia Obrazcka (University of California, Santa Cruz, USA) ........................................... 6719

Game Theoretic Approach for Joint Power Control and Routing in Wireless Sensor Networks
Asis Nasipuri (University of North Carolina at Charlotte, USA), Natwar Darak (The University of North Carolina at Charlotte, USA), Sarbani Roy (Jadavpur University, India) ........................................... 6726

Caching in Wireless Multihop Device-to-Device Networks
Sang-Woon Jeon (Andong National University, Korea), SongNam Hong (Ericsson Research, USA), Mingyue Ji (University of Southern California, USA), Giuseppe Caire (Technische Universität Berlin, Germany) ........................................... 6732

Constructing Load-balanced Degree-constrained Data Gathering Trees in Wireless Sensor Networks
Zhi Chen (Beijing University of Posts and Telecommunications, P.R. China), Lin Kang (School of Electronic Engineering, Beijing University of Posts and Telecommunications & School of Electronic Information Engineering, Taiyuan University of Science and Technology, P.R. China), Xiuhua Li (Beijing University of Posts and Telecommunications, P.R. China), Jinlan Li (Beijing University of Posts and Telecommunications, P.R. China), Yinghai Zhang (Beijing University of Posts and Telecommunications, P.R. China) ........................................... 6738
Energy-Efficient Networks

**Energy-Efficient Barrier Coverage in Bistatic Radar Sensor Networks**
Ruiqi Wang (Zhejiang University, P.R. China), Shibo He (Zhejiang University, P.R. China), Jiming Chen (Zhejiang University, P.R. China), Zhiguo Shi (Zhejiang University, P.R. China), Fen Hou (University of Macau, Macao) ............................................................ 6743

**Tee: Traffic-based Energy Estimators for duty cycled Wireless Sensor Networks**
Rémy Leone (TELECOM ParisTech & Thales Communications & Security, France), Jeremie Leguay (Huawei Technologies Co. Ltd., France), Paolo Medagliani (Huawei Technologies Co. Ltd., France), Claude Chaudet (Telecom Paristech, France) ............................................................ 6749

**Power-Efficient Estimation in IEEE 802.11ah Wireless Sensor Networks with a Cooperative Relay**
Antonios Argyriou (University of Thessaly, Greece) ............................................................ 6755

**Fault-Tolerant Topology for Energy-Harvesting Heterogeneous Wireless Sensor Networks**
Zhiyuan Yin (Beijing Institute of Technology, P.R. China), Fan Li (Beijing Institute of Technology, P.R. China), Meng Shen (Beijing Institute of Technology, P.R. China), Yu Wang (University of North Carolina at Charlotte, USA) ............................................................ 6761

**User's Deception Mechanisms against Jammers in Wireless Energy Harvesting Networks**
Dusit Niyato (Nanyang Technological University, Singapore), Ping Wang (Nanyang Technological University, Singapore), Dong In Kim (Sungkyunkwan University (SKKU), Korea), Zhu Han (University of Houston, USA), Joseph Chee Ming Teo (Institute for Infocomm Research, Singapore) ............................................................ 6767

**Optimal Energy Efficient Design for Passive Distributed Radar Systems**
Omid Taghizadeh (RWTH Aachen University, Germany), Gholamreza Alirezaei (RWTH Aachen University, Germany), Rudolf Mathar (RWTH Aachen University, Germany) ............................................................ 6773

---

**ICC'15 (10) CSSMA: IEEE ICC 2015 - Communications Software, Services and Multimedia Applications Symposium**

**Adaptive video streaming**

**A QoE-Based APP Layer Scheduling Scheme for Scalable Video Transmissions over Multi-RAT Systems**
Xiang Chen (University of Washington, USA), Jenq-Neng Hwang (University of Washington, USA), Cheng-Ju Wu (National Tsing Hua University, Taiwan), Shun-Ren Yang (NTHU, Taiwan), Chung-Nan Lee (University of Yat-sen, Taiwan) ............................................................ 6779

**Transmit Power Aware Cross-Layer Optimization for LTE Uplink Video Streaming**
Pinghua Zhao (Institute of Information Engineering, Chinese Academy of Sciences, P.R. China), Yanwei Liu (Institute of Information Engineering, Chinese Academy of Sciences, P.R. China), Jinxia Liu (Zhejiang Wanli University, P.R. China), Ruixiao Yao (Institute of Information Engineering, Chinese Academy of Sciences, P.R. China), Song Ci (University of Nebraska-Lincoln, USA), Antonios Argyriou (University of Thessaly, Greece) ............................................................ 6785

**Energy-Aware Rate and Description Allocation Optimized Video Streaming for Mobile D2D Communications**
Trung Q. Duong (Queen's University Belfast, United Kingdom), Nguyen-Son Vo (Duy Tan University, Vietnam), Thanh-Hieu Nguyen (Duy Tan University, Vietnam), Mohsen Guizani (QU, USA), Lei Shu (Guangdong University of Petrochemical Technology, P.R. China) ............................................................ 6791

**A Cross-Layer Controller for Adaptive Video Streaming over IEEE 802.11 Networks**
Abdallah S. Abdallah (Virginia Tech, USA), Allen B. MacKenzie (Virginia Tech, USA) ............................................................ 6797

**A Combined Path Selection and Admission Control Scheme for IPTV in IEEE 802.16j MMR Networks**
Mohamed-El-Amine Brahmia (LUSINE - CESI, France), Abdu Syarif (University of Haute Alsace, France), Abdelhafid Abouaissa (University of Haute Alsace, France), Pascal Lorenz (University of Haute Alsace, France) ............................................................ 6803
Engineering the media cloud services

An Adaptive Real Time Mechanism For IaaS Cloud Provider Selection based on QoE aspects
Mohamed Souidi (University of Paris Est, France), Sami Souihi (University Paris Est UPEC, France), Said Hoceini (University Paris Est UPEC, France), Abdelhamid Mellouk (UPEC, University Paris-Est Creteil Val de Marne, France) 6809

Cloud-assisted Collaborative Execution for Mobile Applications with General Task Topology
Weiwen Zhang (Nanyang Technological University, Singapore), Yonggang Wen (Nanyang Technological University, Singapore) 6815

High Availability-Aware Optimization Digest for Applications Deployment in Cloud
Manar Jammal (University of Western Ontario, Canada), Ali Kanso (Ericsson, Canada), Abdallah Shami (The University of Western Ontario, Canada) 6822

Cross-Layer Service To Network Orchestration
Giuseppe Carella (TU Berlin / Fraunhofer FOKUS, Germany), Junnosuke Yamada (NTT, Japan), Niklas Blum (Fraunhofer FOKUS, Germany), Christian Lueck (TU Berlin / Fraunhofer FOKUS, Germany), Naoyoshi Kanamaru (NTT Corporation, Japan), Naoki Uchida (NTT Advanced Technology Corp., Japan), Thomas Magedanz (Fraunhofer Institute FOKUS / TU Berlin, Germany) 6829

QoE-Aware Dynamic Virtual Network Resource Adaptation for EaaS Environment
Rafael Gomes (University of Campinas (UNICAMP) & UCLA, Brazil), Luiz F. Bittencourt (University of Campinas, Brazil), Edmundo Madeira (State University of Campinas, Brazil), Eduardo Cerqueira (Federal University of Para & UCLA & UFPA & UCLA, Brazil), Mario Gerla (University of California at Los Angeles, USA) 6836

Optimizing Cloud Mobile 3D Display Gaming User Experience by Asymmetric Object of Interest Rendering
Yao Lu (University of California, San Diego, USA), Yao Liu (UC San Diego, USA), Sujit Dey (University of California, San Diego, USA) 6842

HTTP video streaming

Presto: Towards Fair and Efficient HTTP Adaptive Streaming from Multiple Servers
Shengkai Zhang (Hong Kong University of Science and Technology, Hong Kong), Bo Li (Hong Kong University of Science and Technology, Hong Kong), Baochun Li (University of Toronto, Canada) 6849

Regulating QoE for Adaptive Video Streaming using BBF Method
Muhammad Sajid Mushtaq (University of Paris-Est Creteil (UPEC) & Image, Signal and Intelligent Systems Laboratory-LISSI, France), Brice Augustin (UPEC, University Paris-Est, France), Abdelhamid Mellouk (UPEC, University Paris-Est Creteil Val de Marne, France) 6855

Network-Aware Video Level Encoding for Uplink Adaptive HTTP Streaming
Christian Lottermann (BMW Group, Germany), Serhan Guel (BMW Group, Germany), Damien Schroeder (Technische Universität München, Germany), Eckehard Steinbach (Technische Universität München, Germany) 6861

On delimiting video rebuffering for stream-switching adaptive applications
Piotr Wiśniewski (Warsaw University of Technology & National Institute of Telecommunications, Poland), Andrzej Beben (Warsaw University of Technology, Poland), Jordi Mongay Batalla (National Institute of Telecommunications & Warsaw University of Technology, Poland), Piotr Krawiec (Warsaw University of Technology & National Institute of Telecommunications, Poland) 6867

OLAC: an Open-Loop Controller for Low-Latency Adaptive Video Streaming
Yongtao Shuai (Saarland University, Germany), Goran Petrovic (Saarland University, Germany), Thorsten Herfet (Saarland University & Intel Visual Computing Institute, Germany) 6874
Service Traffic Engineering

Cost-efficient and QoS-aware Content Management in Media Cloud: Implementation and Evaluation
Guanyu Gao (Nanyang Technological University (NTU), Singapore), Yonggang Wen (Nanyang Technological University, Singapore), Weiwen Zhang (Nanyang Technological University, Singapore), Han Hu (Nanyang Technological University, Singapore) ................................................................. 6880

QoS-Aware Flexible Traffic Engineering with OpenFlow-Assisted Agile IP-Forwarding Interchanging
Shoujiang Ma (University of Science and Technology of China, P.R. China), Daoyun Hu (University of Science and Technology of China, P.R. China), Shengru Li (University of Science and Technology of China, P.R. China), Nana Xue (University of Science and Technology of China, P.R. China), Suoheng Li (University of Science and Technology of China, P.R. China), Yan Shao (University of Science and Technology of China, P.R. China), Zuqing Zhu (University of Science and Technology of China, P.R. China) ................................................................. 6887

A novel learning mechanism for traffic offloading with Small Cell as a Service
Panagiotis Trakas (Open University of Catalonina (UOC), Spain), Ferran Adelantado (Universitat Oberta de Catalunya, Spain), Christos Verikoukis (Telecommunications Technological Centre of Catalonia, Spain) ................................................................. 6893

A Novel Methodology for Efficient Throughput Evaluation in Virtualized Routers
Jordi Mongay Batalla (National Institute of Telecommunications & Warsaw University of Technology, Poland), Miroslaw Kantor (University of Luxemburg, Luxemburg), Constantinos X. Mavromoustakis (University of Nicosia, Cyprus), Georgios Skourletopoulos (University of Nicosia, Cyprus), George Mastorakis (Technological Educational Institute of Crete, Greece) .......... 6899

Finding the Shortest Path in Huge Data Traffic Networks: a Hybrid Speed Model
Yulong Duan (Xidian University, P.R. China), Changle Li (Xidian University, P.R. China), Chao Guo (Xidian University, P.R. China), Zhe Liu (Xidian University, P.R. China), Lina Zhu (Xidian University, P.R. China), Xiang Fei (KooRun Smart City Research Laboratory, P.R. China), Sana Ullah (Polytechnic Institute of Porto, Portugal) ................................................................. 6906

Media-Aware Proxy: Application Layer Filtering and L3 Mobility for Media Streaming Optimization
Charalampos Mysirlidis (Hellenic Open University & University of Patras, Greece), Asimakis Lykourgiotis (University of Patras, Greece), Tassos Dagagiuklas (Hellenic Open University & University of Patras, Greece), Ilias Politis (Hellenic Open University & University of Patras, Greece), Stavros Kotsopoulos (Wireless Telecommunications Laboratory, Greece) ................................................................. 6912

A Novel Optimization Approach for Revenue Maximization in Mobile Data Pricing
Huaying Wang (Dalian University of Technology, P.R. China), Lei Wang (Dalian University of Technology, P.R. China), Fanfu Kong (Dalian University of Technology, P.R. China), Liang Sun (Dalian University of Technology, P.R. China), Jiawei Yong (Waseda University, P.R. China) .......... 6918

Wireless multimedia

Markov Model-based Adaptive CAC Scheme for 3GPP LTE Femtocell Networks
Faouzi Zarai (Sfax University, Tunisia), Khitem Ben Ali (LETI Laboratory, University of Sfax, Tunisia), Mohammad S. Obaidat (Fordham University, USA), Lotfi Kamoun (University of Sfax, Tunisia) ................................................................. 6924

Wireless Body Area Networks with Varying Traffic in Epidemic Medical Emergency Situation
Amit Samanta (Indian Institute of Technology Kharagpur, India), Sudip Misra (Indian Institute of Technology-Kharagpur, India), Mohammad S. Obaidat (Fordham University, USA) ................................................................. 6929

QoS and Energy-Aware Dynamic Routing in Wireless Multimedia Sensor Networks
Petros Spachos (University of Toronto, Canada), Dimitris Toumpakaris (University of Patras, Greece), Dimitrios Hatzinakos (University of Toronto, Canada) ................................................................. 6935
Multimedia traffic and quality modelling

**TDuCSMA: Efficient Support for Triple-Play Services in Wireless Home Networks**
Andrea Vesco (Istituto Superiore Mario Boella, Italy), Riccardo M. Scopigno (Istituto Superiore Mario Boella, Italy), Enrico Masala (Politecnico di Torino, Italy) .......................................................... 6941

**Video-Aware Time-Domain Resource Partitioning in Heterogeneous Cellular Networks**
Antonios Argyriou (University of Thessaly, Greece), Yanwei Liu (Institute of Information Engineering, Chinese Academy of Sciences, P.R. China), Song Ci (University of Nebraska-Lincoln, USA), Dimitrios Kosmanos (University of Thessaly, Greece), Leandros Tassiulas (Yale University, USA) .......................................................................................................................... 6948

**A QoE-Driven FEC Rate Adaptation Scheme for Scalable Video Transmissions over MIMO Systems**
Xiang Chen (University of Washington, USA), Haqing Du (Beijing University of Post and Telecommunications, P.R. China), Jeng-Neng Hwang (University of Washington, USA), James A. Ritcey (University of Washington, USA), Chung-Nan Lee (University of Yat-sen, Taiwan) ........ 6953

P2P and opportunistic communications

**Adaptive Cooperative Network Coding Based MAC Protocol for Device-to-Device Communication**
Eftychia Datsika (IQUADRAT Informatica S. L., Spain), Angelos Antonopoulos (Telecommunications Technological Centre of Catalonia (CTTC), Spain), Christos Verikoukis (Telecommunications Technological Centre of Catalonia, Spain), Nizar Zorba (Qatar University, Qatar) .......................................................................................................................... 6996

**NAPR: A Node Activity-based Probabilistic Routing Algorithm in Delay Tolerant-Mobile Sensor Networks**
Kun Wang (Nanjing University of Posts and Telecommunications, P.R. China), Yuhua Zhang (Nanjing University of Posts and Telecommunications, P.R. China), Lei Shu (Guangdong University of Petrochemical Technology, P.R. China), Chunsheng Zhu (The University of British Columbia, Canada), Min Gao (University of California, Los Angeles (UCLA), USA) ........ 7002
A Social Awareness based Feedback Mechanism for Delivery Reliability in Delay Tolerant Networks
Kun Wang (Nanjing University of Posts and Telecommunications, P.R. China), Guo Huang (Nanjing University of Posts and Telecommunications, P.R. China), Lei Shu (Guangdong University of Petrochemical Technology, P.R. China), Chunsheng Zhu (The University of British Columbia, Canada), Lei He (University of California, Los Angeles, USA) .................................................. 7007

Combating Selfish Misbehavior with Reputation Based Uplink Offloading for IP Flow Mobility
Vasileios Miliotis (Universitat Politècnica de Catalunya, Spain), Luis Alonso (Universidad Politecnica de Catalunya-BarcelonaTech & Telecommunications and Aerospace Engineering School of Castelldefels, Spain), Christos Verikoukis (Telecommunications Technological Centre of Catalonia, Spain) ........................................................................................................ 7012

Alert Dissemination Protocol Using Service Discovery in Wi-Fi Direct
Ahmed Amer Shahin (University of Maryland Baltimore County & Zagazig University, USA), Mohamed Younis (University of Maryland Baltimore County, USA) ........................................................................................................ 7018

Enhanced Failover Mechanisms for Tree-based Peer-to-Peer Streaming
Konstantinos Birkos (University of Patras, Greece), Foteini Andriopoulou (University of Patras, Greece), Christos Papageorgiou (University of Patras, Greece), Tasos Dagiuklas (Hellenic Open University & University of Patras, Greece), Stavros Kotsopoulos (Wireless Telecommunications Laboratory, Greece) ........................................................................................................ 7024

Multimedia applications and security

SPECTRA: A SPEech proCessing plaTform as smaRtphone Application
Igor Bisio (University of Genoa, Italy), Fabio Lavagetto (University of Genoa, Italy), Mario Marchese (DIST- University of Genoa, Italy), Andrea Sciarrone (University of Genoa, Italy), Cristina Frà (Telecom Italia, Italy), Massimo Valla (Telecom Italia, Italy) .................................................. 7030

Wormhole Prevention using COTA Mechanism in Position Based Environment over MANETs
Vinesh Teotia (Jawahar Lal Nehru University, New Delhi, India), Sanjay Kumar Dhurandher (Netaji Subhas Institute of Technology, India), Isaac Woungang (Ryerson University, Canada), Mohammad S. Obaidat (Fordham University, USA) ........................................................................................................ 7036

Reputation-based Pseudonym Change for Location Privacy in Vehicular Networks
Bidi Ying (Zhejiang Gongshang University, P.R. China), Dimitrios Makrakis (University of Ottawa, Canada) ........................................................................................................ 7041

Efficient Privacy Preserving Security Protocol for VANETs with Sparse Infrastructure Deployment
Victor Sucasas (Instituto de Telecomunicacoes, Portugal), Firooz B. Saghezchi (Institute of Telecommunications, Portugal), Ayman Radwan (Instituto de Telecomunicaciones, Portugal), Hugo Marques (University of Aveiro, Portugal), Jonathan Rodriguez (Instituto de Telecomunicaciones, Portugal), Seiamak Vahid (University of Surrey, United Kingdom), Rahim Tafazolli (University of Surrey, United Kingdom) ........................................................................................................ 7047

A New IP Video Delivery System for Heterogeneous Networks using HTML5
Andres Lopez-Herreros (Universidad Politècnica de Valencia, Spain), Alejandro Canovas (Universidad Politècnica de Valencia, Spain), Jose M. Jimenez (Polytechnic University of Valencia, Spain), Jaime Lloret (Universidad Politècnica de Valencia, Spain) ........................................................................................................ 7053

AID: A Prototype for Agricultural Intrusion Detection Using Wireless Sensor Network
Sanku Kumar Roy (Indian Institute of Technology Kharagpur, India), Arijit Roy (Indian Institute of Technology Kharagpur, India), Sudip Misra (Indian Institute of Technology-Kharagpur, India), Narendra Singh Raghuvanshi (Indian Institute of Technology Kharagpur, India), Mohammad S. Obaidat (Fordham University, USA) ........................................................................................................ 7059
Big Data Security and Privacy

6 Million Spam Tweets: A Large Ground Truth for Timely Twitter Spam Detection
Chao Chen (Deakin University, Australia), Jun Zhang (Deakin University, Australia), Xiao Chen (Deakin University, Australia), Yang Xiang (Deakin University, Australia), Wanlei Zhou (Deakin University, Australia) ..................................................... 7065

Game Theoretic Data Privacy Preservation: Equilibrium and Pricing
Lei Xu (Tsinghua University, Beijing, P.R. China), Chunxiao Jiang (Tsinghua University, Beijing, P.R. China), Jian Wang (Tsinghua University, P.R. China), Yong Ren (Tsinghua University, Beijing, P.R. China), Jian Yuan (Tsinghua University, P.R. China), Mohsen Guizani (QU, USA) ................................................................. 7071

Limited Dictionary Builder: An Approach to Select Representative Tokens for Malicious URLs Detection
Hongzhou Sha (Beijing University of Posts and Telecommunications, P.R. China), Zhou Zhou (Institute of Information Engineering, Chinese Academy of Sciences, P.R. China), Qingyun Liu (Institute of Information Engineering, Chinese Academy of Sciences, P.R. China), Tingwen Liu (Institute of Information Engineering, Chinese Academy of Sciences, P.R. China), Chao Zheng (Institute of Information Engineering, Chinese Academy of Sciences, P.R. China) ................................................................. 7077

On Binary Decomposition based Privacy-preserving Aggregation Schemes in Real-time Monitoring Systems
Xuebin Ren (Xi'an Jiaotong University, P.R. China), Xinyu Yang (Xi'an Jiaotong University, P.R. China), Jie Lin (Xi'an Jiaotong University, P.R. China), Wei Yu (Towson University, USA) ....... 7083

SPLWAH: a bitmap index compression scheme for searching in archival Internet traffic
Jiahui Chang (Tsinghua University, P.R. China), Zhen Chen (Tsinghua University & Tsinghua National Lab for Information Science and Technologies, P.R. China), Wexun Zheng (Tsinghua University, P.R. China), Yuhao Wen (Tsinghua University, P.R. China), Guodong Peng (Tsinghua University, P.R. China), Junwei Cao (Tsinghua University, P.R. China), Wen-liang Huang (China Unicom, P.R. China) ........................................................................ 7089

Multi-Cloud Privacy Preserving Schemes for Linear Data Mining
Maria Luisa Merani (University of Modena and Reggio Emilia, Italy), Cettina Barcellona (Università degli Studi di Palermo & Università degli Studi di Modena e Reggio Emilia, Italy), Ilenia Tinnirello (University of Palermo, Italy) ................................................................. 7095

Firewall, Intrusion Detection and Other Topics

Hide-and-Seek: Face Recognition in Private
Yogachandran Rahulamathavan (City University London, United Kingdom), Muttukrishnan Rajarajan (City University London, United Kingdom) .............................................. 7102

Blurred License Plate Recognition based on Single Snapshot from Drive Recorder
Chunhe Song (University of Ontario Institute of Technology, Canada), Xiaodong Lin (University of Ontario Institute of Technology, Canada) .................................................. 7108

Matrix-based parallel pattern matching method
Hongli Zhang (Harbin Institute of Technology, P.R. China), Dongliang Xu (Harbin Institute of Technology, P.R. China), Lei Zhang (Henan University, P.R. China), Yanbin Sun (Harbin Institute of Technology, P.R. China) ................................................................. 7114

Providing Elasticity to Intrusion Detection Systems in Virtualized Software Defined Networks
Martin E. Andreoni Lopez (Federal University of Rio de Janeiro & UFRJ, Brazil), Otto Carlos M. B. Duarte (Universidade Federal do Rio de Janeiro, Brazil) .................................................. 7120
Operating Systems and Application Security

**StegoP2P: Oblivious User-driven Unobservable Communications**
Qingfeng Tan (Institute of Information Engineering, Chinese Academy of Sciences & Graduated University, Chinese Academy of Sciences, P.R. China), Jinqiao Shi (Institute of Information Engineering, Chinese Academy of Sciences, P.R. China), Binxing Fang (Institute of Information Engineering, Chinese Academy of Sciences, P.R. China), Wentao Zhang (Institute of Information Engineering, Chinese Academy of Sciences, P.R. China), Xuebin Wang (Institute of Information Engineering, Chinese Academy of Sciences, P.R. China) ........................................... 7126

**InterSec: An Interaction System for Network Security Applications**
Troy Nunnally (Georgia Institute of Technology, USA), A. Selcuk Uluagac (Florida International University & Electrical and Computer Engineering, USA), Raheem Beyah (Georgia Institute of Technology, USA) ........................................................................... 7132

**TapLock: Exploit Finger Tap Events for Enhancing Attack Resilience of Smartphone Password**
Hongji Yang (Peking University, P.R. China), Lin Chen (Yale University, USA), Kaigui Bian (Peking University, P.R. China), Yang Tian (Peking University, P.R. China), Fan Ye (Stony Brook University, USA), Wei Yan (Peking University, P.R. China), Tong Zhao (Peking University, P.R. China), Xiaoming Li (Peking University, P.R. China) ................................................................. 7139

**AppTrace: Dynamic Trace on Android Devices**
Lingzhi Qiu (Nanjing University of Posts and Telecommunications, P.R. China), Zixiong Zhang (Nanjing University of Posts and Telecommunications, P.R. China), Ziyi Shen (Nanjing University of Posts and Telecommunications, P.R. China), Guozi Sun (Nanjing University of Posts and Telecommunications, P.R. China) ................................................................................... 7145

**Dump and Analysis of Android Volatile Memory on Wechat**
Fan Zhou (Nanjing University of Posts and Telecommunications, P.R. China), Yitao Yang (Nanjing University of Posts & Telecommunications, P.R. China), Zhaokun Ding (PLA University of Science and Technology, P.R. China), Guozi Sun (Nanjing University of Posts and Telecommunications, P.R. China) ................................................................................... 7145

**Secure Mobile Crowdsensing Game**
Liang Xiao (Xiamen University, P.R. China), Jinliang Liu (Xiamen University, P.R. China), Qiangda Li (Xiamen University, P.R. China), H. Vincent Poor (Princeton University, USA) ........................................................................... 7157

Network Security Metrics and their Performance Evaluation

**A Unified Framework for Wireless Connectivity Study subject to General Interference Attack**
Yang Liu (Beijing University of Posts and Telecommunications, P.R. China), Chengzhi Li (Qualcomm, USA), Changchuan Yin (Beijing University of Posts and Telecommunications, P.R. China), Huaiyu Dai (NC State University, USA) ................................................................................... 7174

**Bayesian Mechanisms and Learning for Wireless Networks Security with QoS Requirements**
Anil Kumar Chorppath (Technical University of Munich, Germany), Fei Shen (TU Dresden, Germany), Tansu Alpcan (The University of Melbourne, Australia), Eduard Jorswieck (TU Dresden, Germany), Holger Boche (Technical University Munich, Germany) ............................................................. 7180

**Towards a Multiobjective Framework for Evaluating Network Security under Exploit Attacks**
Fangfang Dai (Information Security Center, Beijing University of Posts and Telecommunications, P.R. China), Kangfeng Zheng (Beijing University of Posts and Telecommunications, P.R. China), Shoushan Luo (Beijing University of Posts and Telecommunications, P.R. China), Bin Wu (Information Security Center, Beijing University of Posts and Telecommunications, P.R. China) ................................................................................... 7196
Towards real-time route leak events detection
Shen Su (Harbin Institute of Technology, P.R. China), Beichuan Zhang (University of Arizona, USA), Lin Ye (Harbin Institute of Technology, P.R. China), Hongli Zhang (Harbin Institute of Technology, P.R. China), Nathan Yee (University of Arizona, USA) ........................................ 7192

A Novel High-Speed IP-Timing Covert Channel: Design and Evaluation
Hermine Hovhannisyan (City University of Hong Kong, Hong Kong), Kejie Lu (University of Puerto Rico at Mayaguez, Puerto Rico), Jianping Wang (City University of Hong Kong, Hong Kong) ................................................................. 7198

Detection of DoS Attacks through Fourier Transform and Mutual Information
Maurizio Mongelli (National Research Council of Italy, Italy), Maurizio Aiello (National Research Council, CNR-IEIIT, Italy), Enrico Cambiaso (National Research Council, CNR-IEIIT & Università degli Studi di Genova, Italy), Gianluca Papaleo (National Research Council, CNR-IEIIT, Italy) ................................................................. 7204

Security of Cyber-physical Systems

A Two-Stage Attacking Scheme for Low-Sparsity Unobservable False Data Injection in Smart Grid
Junjie Yang (Gangdong University of Technology, P.R. China), Rong Yu (Gangdong University of Technology, P.R. China), Yi Liu (Gangdong University of Technology, Singapore), Shengli Xie (Gangdong University of Technology, P.R. China), Yan Zhang (Simula Research Laboratory and University of Oslo, Norway) ........................................ 7210

Smart Meter Privacy with an Energy Harvesting Device and Instantaneous Power Constraints
Giulio Giaconi (Imperial College London, United Kingdom), Deniz Gündüz (Imperial College London, United Kingdom), H. Vincent Poor (Princeton University, USA) ................................................................. 7216

On False Data Injection Attacks against the Dynamic Microgrid Partition in the Smart Grid
Xialei Zhang (Xi'an Jiaotong University, P.R. China), Xinyu Yang (Xi'an Jiaotong University, P.R. China), Jie Lin (Xi'an Jiaotong University, P.R. China), Wei Yu (Towson University, USA) .... 7222

BCGI: A Fast Approach to Detect Malicious Meters in Neighborhood Area Smart Grid
Xiaofang Xia (SIA, USA), Wei Liang (Shenyang Institute of Automation, P.R. China), Yang Xiao (The University of Alabama, USA), Meng Zheng (Shenyang Institute of Automation, Chinese Academy of Sciences, P.R. China) ......................................................... 7228

Cryptanalysis and Improvement of two RFID-OT Protocols Based on Quadratic Residues
Yongming Jin (Institute of Information Engineering, Chinese Academy of Sciences, P.R. China), Hongsong Zhu (Institute of Information Engineering, Chinese Academy of Sciences, P.R. China), Zhiqiang Shi (Institute of Information Engineering, Chinese Academy of Sciences, P.R. China), Xiang Lu (Institute of Information Engineering, CAS, P.R. China), Limin Sun (Institute of Information Engineering, China Academy of Science, Beijing, P.R. China) .......... 7234

DDPFT: Secure Data Aggregation Scheme with Differential Privacy and Fault Tolerance
Haiyong Bao (Nanyang Technological University, Singapore), Rongxing Lu (Nanyang Technological University, Singapore) ......................................................... 7240

Mobile and Wireless Network Security

UGHA:Uniform Group-based Handover Authentication for MTC within E-UTRAN in LTE-A Networks
Jin Cao (Xidian University, P.R. China), Hui Li (Xidian University, P.R. China), Maode Ma (Nanyang Technological University, Singapore), Fenghua Li (State Key Laboratory of Information Security, Institute of Information Engineering, CAS, P.R. China) ........................................ 7246

Uncoordinated Frequency Hopping for Secrecy with Broadband Jammers and Eavesdroppers
João Sousa (University of Coimbra, Portugal), Joao P. Vilela (University of Coimbra, Portugal) .... 7252
Security and Privacy of VANETs and Sensor Networks

Online Learning for Unreliable Passive Monitoring in Multi-Channel Wireless Networks
Jing Xu (Huazhong University of Science and Technology, P.R. China), Kai Zeng (George Mason University, USA), Wei Liu (Huazhong University of Science and Technology, P.R. China) ................................................................. 7257

Jammer Assisted Sum Rate and Fairness Improvement in Secure OFDMA
Ravikant Saini (Indian Institute of Technology Delhi, India), Abhishek Jindal (Indian Institute of Technology Delhi, India), Swades De (Indian Institute of Technology Delhi, India) ........................................ 7263

Reputation-based Coalitional Games for Spectrum Allocation in Distributed Cognitive Radio Networks
Qingqi Pei (Xidian University, P.R. China), Lichuan Ma (Xidian University, P.R. China), Hongning Li (Xidian University, P.R. China), Zi Li (Xidian University, P.R. China), Dingyu Yan (Xidian University, P.R. China), Zhao Li (Xidian University, P.R. China) ...................................................... 7269

Secrecy-oriented Partner Selection Based on Social Trust in Device-to-Device Communications
Li Wang (Beijing University of Posts and Telecommunications, P.R. China), Huaqing Wu (Beijing University of Posts and Telecommunications, P.R. China), Lu Liu (Illinois Institute of Technology, USA), Mei Song (Beijing University of Posts and Telecommunications, P.R. China), Yu Cheng (Illinois Institute of Technology, USA) .................................................. 7275

A Secure and Privacy-Preserving Payment System for Electric Vehicles
Tianyu Zhao (University of Science and Technology of China, P.R. China), Chi Zhang (University of Science and Technology of China, P.R. China), Lingbo Wei (Shanghai Jiao Tong University, P.R. China), Yanchao Zhang (Arizona State University, USA) ................................................................. 7280

Privacy-Preserving Route Reporting Scheme for Traffic Management in VANETs
Khaled Rabieh (Tennessee Technological University, USA), Mohamed M E A Mahmoud (Tennessee Tech University, USA), Mohamed Younis (University of Maryland Baltimore County, USA) ........................................................................................................ 7286

Pseudonym Changes Scheme based on Candidate-Location-List in Vehicular Networks
Bidi Ying (Zhejiang Gongshang University, P.R. China), Dimitrios Makrakis (University of Ottawa, Canada) ................................................................................................................................. 7292

Cross-Layer Scheme for Detecting Large-scale Colluding Sybil Attack in VANETs
Khaled Rabieh (Tennessee Technological University, USA), Mohamed M E A Mahmoud (Tennessee Tech University, USA), Terry Guo (Tennessee Tech University, USA), Mohamed Younis (University of Maryland Baltimore County, USA) ........................................................................................................ 7298

Network Steganography based on Traffic Behavior in Wireless Sensor Networks
Xiangyu Niu (University of Tennessee, USA), Jinyuan Sun (University of Tennessee, USA), Husheng Li (University of Tennessee, USA) ................................................................................................................................. 7304

A Systematic Key Management Mechanism for Practical Body Sensor Networks
Xinyu Yang (Xi’an Jiaotong University, P.R. China), Cong Zhao (Xi’an Jiaotong University, P.R. China), Shusen Yang (University of Liverpool, United Kingdom), Xinwen Fu (University of Massachusetts Lowell, USA), Julie McCann (Imperial College London, United Kingdom) ........... 7310

Privacy and Privacy Enhancing Technologies

Privacy-Preserving Distributed Cooperative Spectrum Sensing in Multi-Channel Cognitive Radio MANETs
Behzad Kasiri (Carleton University, Canada), Ioannis Lambadaris (Carleton University, Canada), F. Richard Yu (Carleton University, Canada), Helen Tang (DRDC Ottawa, Canada) ...................... 7316

Lightweight and Privacy-Preserving Agent Data Transmission for Mobile Healthcare
Shunrong Jiang (Xidian University, P.R. China), Xiaoyan Zhu (Xidian University, P.R. China), Ripei Hao (Xidian University, P.R. China), Haotian Chi (Xidian University, P.R. China), Hui Li (Xidian University, P.R. China), Liangmin Wang (Anhui University, P.R. China) .......................................................... 7322
Physical Layer Security

Performance Analysis of Secrecy Capacity for Two Hop AF Relay Networks with Zero Forcing
Abdelhamid Salem (University of Manchester, United Kingdom), Khairi A. Hamdi (University of Manchester, United Kingdom), Khaled M. Rabie (University of Manchester, United Kingdom) ................................................................. 7353

Physical Layer Security in Cognitive Relay Networks with Multiple Antennas
Pengwei Zhang (Beijing University of Posts and Telecommunications, P.R. China), Xing Zhang (Beijing University of Posts and Telecommunications, P.R. China), Yan Zhang (Simula Research Laboratory and University of Oslo, Norway), Yue Gao (Queen Mary University of London, United Kingdom), Zhenhai Zhang (Beijing University of Posts and Telecommunications, P.R. China), Wenbo Wang (Beijing University of Posts and Telecommunications, P.R. China) ................................................................. 7359

Secrecy Capacity Enhancement in Two-hop DF Relaying Systems in the Presence of Eavesdropper
Elham Nosrati (Western University, Canada), Xianbin Wang (Western University, Canada), Arash Khabbazibasmenj (Western University, Canada) ................................................................. 7365

Secrecy Analysis of Multiuser Downlink Wiretap Networks with Opportunistic Scheduling
Xin Ge (The University of British Columbia, Canada), Peiran Wu (University of British Columbia, Canada), Hu Jin (Hanyang University, Korea), Victor C.M. Leung (The University of British Columbia, Canada) ................................................................. 7370

Confidential Broadcasting via Coordinated Beamforming in Two-Cell Networks
Biao He (The Australian National University, Australia), Nan Yang (Australian National University, Australia), Xiangyun Zhou (The Australian National University, Australia), Jinhong Yuan (University of New South Wales, Australia) ................................................................. 7376

Secure MIMO Transmission via Compressive Sensing
Chia-Hua Lin (National Chiao Tung University, Taiwan), Shang-Ho Tsai (National Chiao Tung University, Taiwan), Yuan-Pei Lin (National Chiao Tung University, Taiwan) ................................................................. 7383

Cryptography and Evaluation

A Low Complexity Cryptosystem Based on Nonsystematic Turbo Codes
Kamran Ghavami (Louisiana State University, USA), Mort Naraghi-Pour (Louisiana State University, USA) ................................................................. 7388
Cloud and Large-scale System Security

Large-Scale Active Measurements of DNS Entries Related to E-Mail System Security
Ivan Gojmerac (AIT - Austrian Institute of Technology, Austria), Patrick Zwickl (University of Vienna, Austria), Gabriel Kovacs (Faculty of Computer Science, University of Vienna, Austria), Christoph Steindl (University of Vienna, Austria) ................................................................. 7426

M-NOTE: A Multi-part Ballot based E-voting System with Clash Attack Protection
Haijun Pan (New Jersey Institute of Technology, USA), Edwin Hou (New Jersey Institute of Technology, USA), Nirwan Ansari (New Jersey Institute of Technology, USA) ................................................................. 7433

An Empirical Study on Email Classification Using Supervised Machine Learning in Real Environments
Wenjuan Li (City University of Hong Kong, Hong Kong), Weizhi Meng (Institute for Infocomm Research (I2R), Singapore) .................................................................................................................. 7438

EVOC: More Efficient Verifiable Outsourced Computation from Any One-way Trapdoor Function
Jun Zhou (East China Normal University, P.R. China), Zhenfu Cao (Shanghai Jiao Tong University, P.R. China), Xiaolei Dong (Shanghai Jiao Tong University, P.R. China), Xiaodong Lin (University of Ontario Institute of Technology, Canada) .................................................................................................................. 7444

Achieving Authorized and Ranked Multi-keyword Search over Encrypted Cloud Data
Hongwei Li (University of Electronic Science and Technology of China, P.R. China), Dongxiao Liu (University of Electronic Science and Technology of China, P.R. China), Kun Jia (University of Electronic Science and Technology of China, P.R. China), Xiaodong Lin (University of Ontario Institute of Technology, Canada) .................................................................................................................. 7450

Audit Meets Game Theory: Verifying Reliable Execution of SLA for Compute-Intensive Program in Cloud
Zhigang Zhou (Harbin Institute of Technology, P.R. China), Hongli Zhang (Harbin Institute of Technology, P.R. China), Xiangzhan Yu (Harbin Institute of Technology, P.R. China), Junwu Guo (Harbin Institute of Technology, P.R. China) .................................................................................................................. 7456
Spectrum Sensing I

A Cross-layer Aware Sensing-throughput Tradeoff in Cooperative Sensing for Cognitive Radio Networks
Shaojie Zhang (National University of Defense Technology, P.R. China), Abdelhakim Hafid (University of Montreal, Canada), Haitao Zhao (National University of Defense Technology, P.R. China), Shan Wang (University of Montreal, Canada) ............................................................... 7462

Database-augmented Spectrum Sensing Algorithm for Cognitive Radio
Nan Wang (China Telecom Technology Innovation Center, P.R. China), Yue Gao (Queen Mary University of London, United Kingdom), Barry Evans (University of Surrey, United Kingdom) .... 7468

Spectrum Sensing Performance of $p$-norm Detector in Random Network Interference
Vesh Raj Sharma Banjade (University of Alberta, Canada), Chintha Tellambura (University of Alberta, Canada), Hai Jiang (University of Alberta, Canada) ............................................................... 7474

Efficient Wireless Microphone Sensing: Subband Energy Detector Principle and Measured Performance
Sener Dikmese (Tampere University of Technology, Finland), Zhenyu Zheng (Tampere University of Technology, Finland), Paschalis C. Sofotasios (Tampere University of Technology & Aristotle University of Thessaloniki, Finland), Markku K. Renfors (Tampere University of Technology, Finland), Mikko Valkama (Tampere University of Technology, Finland) ............ 7480

Centralized Cooperative Spectrum Sensing from sub-Nyquist Samples for Cognitive Radios
Deborah Cohen (Technion - Israel Institute of Technology, Israel), Alon Akiva (Technion - Israel Institute of Technology, Israel), Barak Avraham (Technion - Israel Institute of Technology, Israel), Yonina C. Eldar (Technion-Israel Institute of Technology, Israel) ............ 7486

Cooperative Spectrum Sensing for RF-Energy Harvesting Cognitive Radio Networks
Ala Abu Alkheir (University of Ottawa, Canada), Hussein T Mouftah (University of Ottawa, Canada) .......................................................................................................................... 7492

Spectrum Sensing II

Inter-Cell Collaborative Spectrum Monitoring for Cognitive Cellular Networks in Fading Environment
Deepak G c (Lancaster University, United Kingdom), Keivan Navaie (Lancaster University, United Kingdom), Qiang Ni (Lancaster University, United Kingdom) ............................................................... 7498

Multiple Antenna Based Sensing and Recognition When Primary User Has Multiple Transmit Power Levels
Qing Lv (Tsinghua University, P.R. China), Han Qian (Tsinghua University, P.R. China), Feifei Gao (Tsinghua University, P.R. China), Fengye Hu (Jilin University, P.R. China) ......................... 7504

Quickest Spectrum Sensing over Correlated Channels
Ali Tajer (Rensselaer Polytechnic Institute, USA), Javad Heydari (Rensselaer Polytechnic Institute, USA) .......................................................................................................................... 7509

Multiband Spectrum Sensing for Cognitive Radios Based on Distributed Compressed Measurements
Jonathan Bodart (Université Libre de Bruxelles, Belgium), Shahzad Gishkori (Imperial College London, United Kingdom), Jonathan Verlant-Chenet (Université Libre de Bruxelles, Belgium), Lutz Lampe (University of British Columbia, Canada), François Horlin (Université Libre de Bruxelles, Belgium) .......................................................................................................................... 7515

Distributed Nonparametric Sequential Spectrum Sensing under Electromagnetic Interference
Sahasranand K R (Indian Institute of Science, India), Vinod Sharma (Indian Institute of Science, India) .......................................................................................................................... 7521
Cognitive Radio Networks

NAPF: Percolation Driven Probabilistic Flooding For Interference Limited Cognitive Radio Networks
Osama A.H. Al-Tameemi (University of Central Florida, USA), Mainak Chatterjee (University of Central Florida, USA), Kevin Kwiat (Air Force Research Laboratory, USA), Charles A Kambhah (Air Force Research Laboratory & Information Directorate, USA) 7534

CRBP: A Broadcast Protocol for Cognitive Radio Ad Hoc Networks
Yasir Ahmed Al-Mathehaji (Newcastle University, United Kingdom), Said Boussakta (Newcastle University, United Kingdom), Martin Johnston (Newcastle University, United Kingdom), Harith Fakhrey (Newcastle University, United Kingdom) 7540

Low Price to Win: Interactive Scheme in Cooperative Cognitive Radio Networks
Qin Hu (Beijing Normal University, P.R. China), Shengling Wang (Beijing Normal University, P.R. China), Rongfang Bie (Beijing Normal University, P.R. China), Xiuzhen Cheng (George Washington Univ, USA) 7546

Decentralized Dynamic Spectrum Access in Full-Duplex Cognitive Radio Networks
Yun Liao (Peking University, P.R. China), Tianyu Wang (Peking University, P.R. China), Kaigui Bian (Peking University, P.R. China), Lingyang Song (Peking University, P.R. China), Zhu Han (University of Houston, USA) 7552

Multi-Source Multi-Relay Underlay Cognitive Radio Networks with Multiple Primary Users
Zhai Yan Huang (XiDian University, P.R. China), Zan Li (Xidian University, P.R. China), JiangBo Si (Xi’Dian, P.R. China) 7558

Multi-user Scalable Video transmission over Cognitive Radio Networks
Hadi Saki (Kingston University London & Wireless & Multimedia Networking Res. Group, United Kingdom), Maria G. Martini (Kingston University, United Kingdom), Mohammad Shikh-Bahaei (Kings college London, United Kingdom) 7564

Spectral Whitespaces, Auctions, and Leasing

Performance Evaluation of Three Dynamic Channel Access Strategies for Spectrum Leasing in CRNs
Indika A. M. Balapuwaduge (University of Agder, Norway), Amogh Rajanna (University of Minnesota, Twin Cities, USA), Mostafa Kaveh (University of Minnesota, USA), Frank Y. Li (University of Agder, Norway) 7570

Online Spectrum Auction in Cognitive Radio Networks with Uncertain Activities of Primary Users
Changyan Yi (University of Manitoba, Canada), Jun Cai (University of Manitoba, Canada), Gong Zhang (University of Winnipeg, Canada) 7576

Whitespaces after the USA’s TV incentive auction: a spectrum reallocation case study
Vidy Muthukumar (UC Berkeley, USA), Angel Daruna (Georgia Institute of Technology, USA), Vijay Kamble (University of California at Berkeley, USA), Kate Harrison (UC Berkeley, USA), Anant Sahai (UC Berkeley, USA) 7582

A more general whitespace architecture: refactoring the master-client paradigm
Kate Harrison (UC Berkeley, USA), Anant Sahai (UC Berkeley, USA) 7589

A Novel Traffic-adaptive Spectrum Leasing Scheme between Primary and Secondary Networks
Xuesong Jonathan Tan (University of Electronic Science and Technology of China, P.R. China), Wen Zhan (University of Electronic Science and Technology of China, P.R. China) 7596
Emerging Topics on Cognitive Radio

Cooperative Jamming for Secure Communications in MIMO Cooperative Cognitive Radio Networks
Zhen Li (Beijing Jiaotong University, P.R. China), Tao Jing (Beijing Jiaotong University, P.R. China), Xuizhen Cheng (George Washington Univ, USA), Yan Huo (Beijing Jiaotong University, P.R. China), Wei Zhou (Beijing Jiaotong University, P.R. China), Dechang Chen (Uniformed Services University of the Health Sciences, USA) ................................................................. 7609

Optimal power allocation for cognitive radio networks with primary user secrecy rate loss constraint
Ding Xu (Nanjing University of Posts and Telecommunications, P.R. China), Qun Li (Nanjing University of Posts and Telecommunications, P.R. China) ................................................................. 7615

Cooperative Cumulants-Based Modulation Classification Under Flat Rayleigh Fading Channels
Mahi Abdelbar (Virginia Tech & Wireless@VT, USA), Bill Tranter (Virginia Tech, USA), Tamal Bose (University of Arizona, USA) ................................................................. 7622

On Achievable Rate of Two-Way Relaying Cognitive Radio with Space Alignment
Lokman Sboui (King Abdullah University of Science and Technology (KAUST), Saudi Arabia), Hakim Ghazzai (Qatar Mobility Innovations Center & QMIC, Qatar), Zouheir Rezki (King Abdullah University of Science and Technologie (KAUST), Saudi Arabia), Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia) ................................................................. 7628

Distributed Beamforming and Autonomous Participation Decision making in Cooperative CR Systems
Mai Hassan (University of British Columbia, Canada), Md. Jahangir Hossain (University of British Columbia, Okanagan, Canada), Vijay Bhargava (University of British Columbia, Canada) ................................................................. 7633

Optimal Strategies for Defending Location Inference Attack in Database-driven CRNs
Long Zhang (Shanghai Jiao Tong University, P.R. China), Chenliaohui Fang (Shanghai Jiao Tong University, P.R. China), Yi Li (Shanghai Jiao Tong University, P.R. China), Haojin Zhu (Shanghai Jiao Tong University, P.R. China), Mianxiong Dong (Muroran Institute of Technology, Japan) ................................................................. 7640

Spectral Sharing

Packet Loss Priority of Cognitive Radio Networks with Partial Buffer Sharing
Hoc Phan (University of Reading, United Kingdom), Thi My Chinh Chu (Blekinge Institute of Technology, Sweden), Hans-Juergen Zepernick (Blekinge Institute of Technology, Sweden), Patrik Arlos (Blekinge Institute of Technology, Sweden) ................................................................. 7646

Joint Optimization Algorithm Based on Centralized Spectrum Sharing for Cognitive Radio
Junhui Zhao (Beijing Jiaotong University, P.R. China), Jiao Wang (School of Electronic and Information Engineering Beijing Jiaotong University, P.R. China) ................................................................. 7653

Multi-Tier Exclusion Zones for Dynamic Spectrum Sharing
Abid Ullah (Virginia Tech, USA), Sudeep Bhattarai (Virginia Tech, USA), Jung-Min (Jerry) Park (Virginia Tech, USA), Jeffrey Reed (Virginia Tech, USA), David Gurney (Motorola Solutions, USA), Behnam Baharak (Virginia Polytechnic Institute and State University, USA) ................................................................. 7659

Finite Block-Length Analysis of Spectrum Sharing Networks
Behrooz Makki (Chalmers University of Technology, Sweden), Tommy Svensson (Chalmers University of Technology, Sweden), Michele Zorzi (Università degli Studi di Padova, Italy) ........... 7665
### Cognitive Radio Optimization

**Response Surface Methodology for Efficient Spectrum Reuse in Cellular Networks**  
Juan Jose Alcaraz (Universidad Politécnica de Cartagena, Spain), Jose A. Ayala-Romero (Universidad Politécnica de Cartagena, Spain), Mario López-Martínez (Technical University of Cartagena, Spain), Javier Vales-Alonso (Universidad Politécnica de Cartagena, Spain) ........................................ 7671

**Multi-Armed Bandits with Dependent Arms for Cooperative Spectrum Sharing**  
Mario López-Martínez (Technical University of Cartagena, Spain), Juan Jose Alcaraz (Universidad Politécnica de Cartagena, Spain), Leonardo Badia (Università degli Studi di Padova, Italy), Michele Zorzi (Università degli Studi di Padova, Italy) ...................................................... 7677

### Cognitive Radio Resource Allocation

**Buffer-Aided Relay Selection and Secondary Power Minimization for Two-Way Cognitive Radio Networks**  
Mostafa Darabi (University of Tehran, Iran), Behrouz Maham (University of Tehran, Iran), Walid Saad (Virginia Tech, USA), Xiangyun Zhou (The Australian National University, Australia) ................................................................. 7683

**Optimal time sharing in underlay cognitive radio systems with RF energy harvesting**  
Valentin Rakovic (Ss. Cyril and Methodius University in Skopje, Macedonia, the former Yugoslav Republic of), Daniel Denkovski (Ss. Cyril and Methodius University in Skopje, Macedonia, the former Yugoslav Republic of), Zoran Hadzi-Velkov (Ss. Cyril and Methodius University in Skopje, Macedonia, the former Yugoslav Republic of), Liljana Gavrilovska (Ss Cyril and Methodius University - Skopje, Macedonia, the former Yugoslav Republic of) ................................................................. 7689

**Robust Transceiver Optimization for Underlay Device-to-Device Communications**  
Md. Jahidur Rahman (University of British Columbia, Canada), Lutz Lampe (University of British Columbia, Canada) ........................................................................................................... 7695

**Estimation-Throughput Tradeoff for Underlay Cognitive Radio Systems**  
Ankit Kaushik (Karlsruhe Institute of Technology, Germany), Shree Krishna Sharma (University of Luxembourg, Luxembourg), Symeon Chatzinotas (University of Luxembourg, Luxembourg), Björn Ottersten (University of Luxembourg, Luxembourg), Friedrich K. Jondral (Karlsruhe Institute of Technology, Germany) ........................................................................................................... 7701

**Optimizing Average-Maximum TTR Trade-off for Cognitive Radio Rendezvous**  
Lin Chen (Yale University, USA), Shuyu Shi (National Institute of Informatics, Japan), Kaigui Bian (Peking University, P.R. China), Yusheng Ji (National Institute of Informatics, Japan) ........................................................................................................... 7707

**Energy Efficiency Optimization for MIMO Cognitive Radio Network**  
Xiaohui Zhang (University of Louisville, USA), Hongxiang Li (University of Louisville, USA) ........................................................................................................... 7713
Efficient Spectrum Access Strategies for Cognitive Networks with General Idle Time Statistics
Yahia Shabara (Nile University, Egypt), Ahmed H. Zahran (Cairo University & University College Cork, Egypt), Tamer ElBatt (Faculty of Engineering, Cairo University & WINC, Nile University, Egypt)

Stochastic Resource Allocation for Hybrid Spectrum Access OFDMA-Based Cognitive Radios
Hadi Saki (Kingston University London & Wireless & Multimedia Networking Res. Group, United Kingdom), Arman Shojaeifard (University of Manchester, United Kingdom), Maria G. Martini (Kingston University, United Kingdom)
