2015 IEEE 15th International
Conference on Advanced
Learning Technologies
(ICALT 2015)

Hualien, Taiwan
6-9 July 2015
Invited Papers

Educational Games and the Design Based Research Approach ................................................................. 1
Miguel Nussbaum

Advancing the State of the Art in Advanced Learning Technologies: [Re-]Connecting Theory, Research, Practice and Policy ......................................................................................................................... 2
J. Michael Spector

Technology and Knowledge Creation ........................................................................................................ 4
Seng Chee Tan

Track 1. Digital Systems for Open Access to Education and Learning

SangeetKosh: An Open Web Platform for Music Education ........................................................................ 5
Tejaswinee Kelkar, Anon Ray, and Venkatesh Choppella

Exploring Different Routes from LMS Towards PLE: A Dialectical Perspective ........................................ 10
Vladimir Tomberg, Mart Laanpere, and Hans Põldoja

Designing and Developing Cloud-Based eBooks for Solving Teachers’ Usage Barriers ............................. 13
I-Ching Chao, Po-Sheng Chiu, Chih-Chien Kao, Ying-Hung Pu, Aihua Wang, and Yueh-Ming Huang

Assessing Students’ Learning Experience and Achievements in a Medium-Sized Massively Open Online Course ....................................................................................................................... 15
Weichao Chen, Jiyou Jia, Jingmin Miao, Xiaomeng Wu, Aihua Wang, and Baijie Yang

Understanding Student Disaffection in Large-Scale Online Learning .......................................................... 17
Khe Foon Hew

Classification-Based Approach to Concept Map Generation in Adaptive Learning .................................................. 19
  Xiaopeng Huang, Kyeong Yang, and Victor Lawrence

Towards an Integrative Learning Environment for Java Programming ................................................................. 24
  Sebastian Gross and Niels Pinkwart

Online Tests Based on Contributions Provided by Teachers and Students during Face to Face Lectures ................................................................. 29
  Franck Silvestre, Philippe Vidal, and Julien Broisin

Constructing Collaborative Learning Groups with Maximum Diversity Requirements ................................................. 34
  Yulei Pang, Raymond Mugno, Xiaozhen Xue, and Huaying Wang

Indexing Learning Scenarios by the Most Adapted Contexts: An approach Based on the Observation of Scenario Progress in Session .................................................. 39
  Mariem Chaabouni, Claudine Piau-Toffolon, Mona Laroussi, Christophe Choquet, and Henda Ben Ghezala

Towards a Web-Based Adaptive Problem-Based Learning Application .............................................................. 44
  Yongwu Miao, Disi Wang, Mbombui Nongho Fon-Pah, Mohammed Samaka, and Ulrich Hoppe

Modeling Learner’s Emotions with PAD .................................................................................................................. 49
  Matthias Chan Yong Shun, Miaoshun Yan, An Bo, and Leung Cyril

Eye-Tracking Assisted Self-Directed Learning System .............................................................................................. 52
  Eman Yasser Daraghmi, Chih-Tien Fan, Wei-Jun Lin, Zih-You Peng, and Shyan Ming Yuan

Students’ Satisfaction in Learning Style-Based Adaptation ...................................................................................... 55
  Mohammad Alshammari, Rachid Anane, and Robert J. Hendley

Using Knowledge Space theory to Personalize Teaching for Groups of Students ...................................................... 58
  Rim Zakaria and Imran A. Zualkernan

Improving Communication and Project Management through an Adaptive Collaborative Learning System ................................................................. 61
  Jeffrey M. Kurcz, Ting-Wen Chang, and Sabine Graf

On Generic Communication Patterns between Courseware Objects in Extensible Learning Support System Architecture for Self- and Group Learning .............................................................................. 64
  Kiyoshi Nakabayashi and Yosuke Morimoto

Modelling Learner’s Personality Profile through Analysis of Annotation Digital Traces in Learning Environment ........................................................................ 66
  Nizar Omheni, Anis Kalboussi, Omar Mazhoud, and Ahmed Hadjkacem

Student Daily Practices Identification Algorithm for Mobile Learning Application ...................................................... 68
  Neculai Ivascu, Maiga Chang, and Kristin Garn

PECALE: An Environment for Enhancing Personalization and Learner Engagement in an Online Learning Platform ........................................................................................................... 70
  Betty Mayeku, Sviatoslav Edelev, Sunaina Prasad, Hemanth Karnal, and Dieter Hogrefe

A Boosting Algorithm for Auto-Generating Quiz for Traffic Education ...................................................................... 72
  Jinn-Tser Lin, Wen-Ling Chen, Yu-Chieh Wu, and Jie-Chi Yang
Towards an Educator-Centred Digital Teaching Platform: The Ground Conditions for
a Data-Driven Approach ........................................................................................................74
Andrew Koster, Tiago Primo, Fernando Koch, Allysson Oliveira, and Hyunkwon Chung

An Analysis of Goal Orientation Pattern and Self-Efficacy for Explanation of Programming
Plans ........................................................................................................................................76
Chung-Cheng Tseng, Po-Yao Chao, and K. Robert Lai

Track 3. Wireless, Mobile, and Ubiquitous Technologies for Learning

Career Support for International Students in Japan Using Ubiquitous Learning Log System ..........................................................78
Noriko Uosaki, Hiroaki Ogata, Kousuke Mouri, and Erdenesaikhan Lkhagvasuren

Systematic Fusion of Gesture Sensors for Practical Learning in Virtual Environments ..........................................................83
Matthias Weise, Raphael Zender, and Ulrike Lucke

A Web-Based Framework to Design and Deploy Mobile Learning Activities: Evaluating Its
usability, Learnability and Acceptance ..................................................................................88
Janosch Zbick, Isabella Nake, Marcelo Milrad, and Marc Jansen

Preliminary Research on Self-Regulated Learning and Learning Logs in a Ubiquitous Learning
Environment ................................................................................................................................93
Masanori Yamada, Chengjiu Yin, Atsushi Shimada, Kentaro Kojima, Fumiya Okubo,
and Hiroaki Ogata

Analysis of Ubiquitous-Learning Logs Using Spatio-Temporal Data Mining ..........................................................96
Kousuke Mouri, Hiroaki Ogata, and Noriko Uosaki

Mobile Devices in English Language Instruction: Facilitation and Benefits ..........................................................99
Gloria Shu Mei Chwo

A Dictionary of Gestures for Multitouch-Based Interactive Geometry Software ..........................................................102
Helena M. Reis, Seiji Isotani, Isabela Gasparini, and Riichiro Mizoguchi

Technical Description of Equation Sensei: A Mobile-Assisted Learning Application
in Mathematics ................................................................................................................................105
Rex P. Bringula, John Nikko S. Alvarez, Maron Angelo C. Evangelista, Richard B. So,
and Marivic M. Gatus

ContactJS—A Cross-Platform Context Detection Framework ..................................................................................108
Tobias Moebert, Stefanie Lemcke, and Ulrike Lucke

A Low Cost, Portable Platform for Information Assurance and Security Education ..........................................................111
Dan Chia-Tien Lo, Kai Qian, Wei Chen, and Tamara Rogers

The Development of a Decision Support System for Successful Mobile Learning ..........................................................114
Po-Sheng Chiu, Chih-Chien Kao, Ying-Hung Pu, Pei-Fang Lo, and Yueh-Ming Huang

Informal Learning Behavior Analysis Using Action Logs and Slide Features in E-Textbooks ..........................................................116
Atsushi Shimada, Fumiya Okubo, Chengjiu Yin, Kentaro Kojima, Masanori Yamada,
and Hiroaki Ogata

The Effect of Signals in Hypertext Reading by Tablet Computers ..................................................................................118
Xiaoxia Zheng, Wei Cheng, Zhengcheng Fan, and Guang Chen
Baby Boomers’ Behaviors and Attitudes of Newspaper Reading: A Comparison among Three Layouts ..........................................................................................................................................................................................120

Lin-Chao Fu and Hsiu-Ping Yueh

Track 4. Digital Game and Intelligent Toy Enhanced Learning

Math Detective: Digital Game-Based Mathematical Error Detection, Correction and Explanation ..........................................................................................................................................................................122

Hercy N.H. Cheng, Yi-Ju Lin, Meng Wang, and Tak-Wai Chan

Participatory Design in EU-TOPIA: A Serious Game for Intercultural Competences during Work Mobility .....................................................................................................................................................................127

Hassina El Kechaï and Laëtitia Pierrot

Augmented Reality Laboratory for High School Electrochemistry Course .....................................................................................................................................................................132

Ming-Puu Chen and Ban-Chieh Liao

Make and Play: Card Games as Tangible and Playable Knowledge Representation Boundary Objects .............................................................................................................................................................................................137

Andrea Valente and Emanuela Marchetti

Musikinésia—An Educational Adventure Game for Keyboard Learning ....................................................................................................................................................................................142

Towards a Service-Oriented Architecture Framework for Educational Serious Games .....................................................................................................................................................................147

Maira B. Carvalho, Francesco Bellotti, Jun Hu, Jannicke Baalsrud Hauge, Riccardo Berta, Alessandro De Gloria, and Matthias Rauterberg

Effectiveness of MMORPGS in Enhancing Student Interaction .......................................................................................................................................................................................152

Wong Seng Yue and H. Yeong Tze

An Investigation of a Game-Based Anti-Drug System: Addictive Learners vs. Non-addictive Learners ..........................................................................................................................................................................................155

Chang-Mai Huang, Jen-Hang Wang, and Sherry Y. Chen

Effects of Gesture-Based Fitness Games on Functional Fitness of the Elders .......................................................................................................................................................................................158

Feng-Ru Sheu, Yun-Lin Lee, Hsiu-Tao Hsu, and Nian-Shing Chen

A Mobile Educational Game for Teaching Computer Architecture .......................................................................................................................................................................................161

Ahmed Tlili, Fathi Essalmi, and Mohamed Jemni

Urban Data Games: Creating Smart Citizens for Smart Cities ..........................................................................................................................................................................................164

Annika Wolff, Gerd Kortuem, and Jose Cavero

Using NAO Humanoid Robot in Kindergarten: A Proposed System ..........................................................................................................................................................................................166

Atheer Alkhalifah, Bashayer Alsalman, Deema Alnuhait, Ohoud Meldah, Sara Aloud, Hend S. Al-Khalifa, and Hind M. Al-Otaibi

A Mobile-Phone Camera Text-Recognition Game as an Alternative Assessment in Vocabulary Instruction for Learning Indonesian as a Foreign Language Classroom ..........................................................................................................................................................................................168

Melissa Mustika, Chi-Te Kao, Antonius Siswanto, Shein-Yung Cheng, Jia-Sheng Heh, and Cheng-Yuan Chang
Track 5. Computer Supported Collaborative Learning

Towards Designing a Mobile Social Learning Application with Meaningful Gamification
Strategies ........................................................................................................................................170
Sei-Young Kim, Hyo-Jeong So, Soonmo Kwon, Seungjae Oh, Kyudong Park, Minjin Ko,
Jaewon Yoo, and Gyuhwan Oh

The Impact of Cross-Age Peer Tutors on Knowledge Elaboration, Knowledge Convergence,
and Group Performance in Computer Supported Collaborative Learning .........................................................175
Lanqin Zheng

The Empirical Study on Self-Regulation, Co-Regulation, and Socially Shared Regulation
in Computer-Supported Collaborative Learning ..........................................................................................180
Lanqin Zheng and Junhui Yu

Making Explicit the Moodle Instructional Design Language ......................................................................185
Nour El Mawas, Lahcen Oubahssi, and Pierre Laforcade

Here’s Looking at you, Kid—Can Gaze Awareness Help to Learn to Learn Together
in Collaborative Problem Solving? ..............................................................................................................190
Andreas Harrer, Christian Schlösser, Philipp Schlieker-Steens, and Andrea Kienle

A Qualitative Analysis on Mutual Engagement in CSCL Scenarios Using Eye-Tracking Technology .........................................................................................................................195
Andreas Lingnau and Andreas Harrer

A Study on Collaborative and Competitive Strategies of Learners Used in an Educational Game ..........................200
Vanessa Sissi Herbst

Online Peer Learning: What Influences the Students’ Learning Experience ......................................................205
Songlak Sakulwichitsintu, Douglas Colbeck, Leonie Ellis, and Paul Turner

A Design Proposal for Learner-Centered Visualisations of Learning Analytics in Collaborative Scenarios ................208
Andreas Harrer

Formalization of Recurrent Uses of e-Learning Tools as Reusable Pedagogical Activities .................................211
Esteban Loiseau, Nour El Mawas, and Pierre Laforcade

Online Collaborative Learning for Improving Argumentation of Student with Different Levels
of Science Prior Knowledge ..........................................................................................................................214
Yu-Ren Lin, Hsiao-Ching She, Wen-Tsung Yang, and Kai-Yi Huang

Helping Strategy Support in Synchronous Peer Tutoring System for Children ....................................................216
Mengping Tsuei

Track 6. Technology-Enhanced Assessment in Formal and Informal Education

Integrating Assessment into Augmented Reality-Based Learning Environments .................................................218
María-Blanca Ibáñez, Diego Villarán, and Carlos Delgado-Kloos

Exploring Constructive Learning Activity in Online Programming Discussion Forums ........................................223
I. Han Hsiao

Effects of Group and Task Size in Computer Supported Collaborative Marking ..................................................228
Manuel Matas and Jorge Villalon
What Happened to Non-linear Narrative? A Pedagogical Reflection .................................................................233
Emanuela Marchetti and Andrea Valente

A Preliminary Study of Integrating Flipped Classroom Strategy for Classical Chinese Learning .................................................................238
Yi Hsuan Wang

Combining Mobile Devices with NFC Technology in a Test Assessment System .................................................................241
Tsung-Sheng Cheng, Yu-Chun Lu, Chun-Chieh Chang, and Chu-Sing Yang

Students’ Perceptions about Assessment Using an e-Learning Platform .................................................................244
Rosalina Bessa Babo, Ana Isabel Azevedo, and Jarkko Suhonen

Correlation of Grade Prediction Performance with Characteristics of Lesson Subject .................................................................247
Shaymaa E. Sorour, Jingyi Luo, Kazumasa Goda, and Tsunenori Mine

Quality Evaluation of Web-Based Educational Software: A Systematic Mapping .................................................................250
Aparecida M. Zem Lopes, Lais Z. Pedro, Seiji Isotani, and Ig I. Bittencourt

A Formative Assessment Ontology for Students’ Lab Reports in Lab Book .................................................................253
Hakim Mokeddem, Cyrille Desmoulins, and Chalal Rachid

Understanding Undergraduates’ Information Literacy from their Facebook Usage .................................................................256
Kan Min Lin

Application of Combination Weighting Method to Weight Calculation in Performance Evaluation .................................................................258
Chun Lu, Lili Li, and Di Wu

**Track 7. Big Data in Education and Learning Analytics**

Towards Textual Reporting in Learning Analytics Dashboards .................................................................260
A. Ramos-Soto, M. Lama, B. Vázquez-Barreiros, A. Bugarín, and M. Mucientes. S. Barro

Can You Tell If they’re Learning? Using a Pedagogical Framework to Measure Pedagogical Activity .................................................................265
Tim O’Riordan, David E. Millard, and John Schulz

Semantic Description of the Experience API Specification ........................................................................268
Juan C. Vidal, Thomas Rabelo, and Manuel Lama

**Track 8. Technology-Enhanced Science, Technology, Engineering, and Math Education**

Equality: A Tool for Free-form Equation Editing .................................................................................................270
Stephen Cummins, Ian Davies, Andrew Rice, and Alastair R. Beresford

A Conductive Chemistry Online Argumentation Courseware with Website Exploring Support .................................................................275
Kai-Yi Huang, Yi-Lin Cheng, Hsiao-Ching She, and Yu-Ren Lin

Stickipedia: A Search Engine and Repository for Explanatory Analogies ........................................................................280
Varun Kumar, Savita Bhat, and Niranjan Pedanekar

Applying the Formal Concept Analysis to Introduce Guidance in an Inquiry-Based Learning Environment .................................................................................................285
Michael A. Bedek, Simone Kopeinik, Bernd Prünster, and Dietrich Albert
Assessing the Impact of Virtual Labs: A Case Study with the Lab on Advanced VLSI
Garima Ahuja, Anubha Gupta, Harsh Wardhan, and Venkatesh Choppella

A Case Study on LEGO Activity in Physics Class: Taking the “Rotational Kinetic Energy” for Example
Qianxia Jing, Lingyu Yang, Menglu Jiang, Ruiying Huai, and Feng-Kuang Chiang

The Development of Simulation-Based Learning System for Binary Tree of Data Structures
Ah-Fur Lai and Pei-Jeng Wu

Social Media as a Teaching and Learning Tool for In-class Q&A Activities to Promote Learning and Transform College Engineering Classroom Dynamics: The Case of Facebook
Fu-Yun Yu and Yu-Hsin Liu

A Feedback Effectiveness Oriented Math Word Problem E-Tutor for E-Learning Environment
Kyle Morton and Yanzhen Qu

Explore College Students’ Cognitive Processing during Scientific Literacy Online Assessments with the Use of Eye Tracking Technology
Pei-Yi Tsai, Ting-Ting Yang, and Hsiao-Ching She

Explore the Eye Movement Regarding the Cognitive Process of Online Optic Reasoning Learning
Chou Wen-Chi and She Hsiao-Ching

A Generic Model for the Group Formation Problem Using Constraint Logic Programming
Grace S. Tacadao and Ramon Prudencio S. Toledo S.J.

Track 9. Technology Enhanced Language Learning

A Preliminary Study on Taiwanese EFL Adolescents’ Perceptions of Mobile-Assisted Post-Reading Tasks
Ya-Wen Ho and Chih-Cheng Lin

Intelligent Tutoring System for Voice Conversion in English
Deepika P. Vinchurkar and M. Sasikumar

Construction of a Voice-Based Asynchronous Communication System Utilizing Speech Recognition and Its Potential for EFL Learners’ Speaking Ability: A Pilot Study
Yuichi Ono, Takumi Ishii, and Akio Ohnishi

Using Smartphone to Facilitate English Communication and Willingness to Communicate in a Communicative Language Teaching Classroom
Bo-Ru Luo, Yu-Lun Lin, Nian-Shing Chen, and Wei-Chieh Fang

A Domain-Specific Modeling Specification of Visual Instructional Design Languages: A Moodle Experimentation
Aymen Abedmouleh

L3MS: A Lightweight Language Learning Management System Using Mobile Web Technologies
Reem A. Alamer, Hind M. Al-Otaibi, and Hend S. Al-Khalifa

Middle School English Teachers’ Attitude and Motivation Towards ICT-Enabled Teaching in China
Kwan C.M. Ming and Sophia H.X. Liu

Towards a Japanese Language Learning Process Based on Japanese Dubbing—A Case Study on University Students .................................................................................................................. 330

Chun-Chia Wang

Affective States in CSCL Environments: A Systematic Mapping of the Literature ................................................................. 335

Rachel Carlos Duque Reis, Carla Lopes Rodriguez, Kamila Takayama Lyra, Patricia Augustin Jaques, Ig Ibert Bittencourt, and Seiji Isotani

Enhancing Student Engagement through Personalized Motivations .......................................................................................... 340

Athanasios Staikopoulos, Ian O’Keeffe, Bilal Yousuf, Owen Conlan, Eddie Walsh, and Vincent Wade

Learners’ Level of Metacognitive Awareness and Its Relationship with Listening Performance .................................................. 345

Yajun Zeng and Christine Goh

An Affective Learning Environment for Java .............................................................................................................................. 350

Ramón Zatarain Cabada, María Lucía Barrón Estrada, Francisco González Hernández, and Raúl Oramas Bustillos

Learning Personality Modeling for Regulating Learning Feedback .......................................................................................................................... 355

Matthias Chan Yong Shun, Miao Chun Yan, Shen Zhiqi, and An Bo

An Evaluation of the Learning Attitude and Motivation in a Language Learning Support System .................................................. 358

Jingyun Wang and Takahiko Mendori

Validation of the Teacher Readiness for Online Learning Measure .......................................................................................... 361

Min-Ling Hung

Developing Successful Novice International Faculty through a Mentoring Program ................................................................ 364

Gloria Robles and Ana Lidia Franzoni

The Effect of Using a Talking Head in Academic Videos: An EEG Study .......................................................................................... 367

Diana Díaz, Rafael Ramírez, and Davinia Hernández-Leo

Track 11. Technology Enabled Learning of Thinking Skills

Impact of Blender Based 3D Mental Rotation Ability Training on Engineering Drawing Skills .................................................. 370

Kapil Kadam and Sridhar Iyer

Using an Automatic Approach to Classify Reflective Language Learning Skills of ESL Students .................................................. 375

Gary Cheng and Juliana Chau

Development of Engineering Design Competencies Using TELE-EDesC: Do the Competencies Transfer? .................................................. 380

Madhuri Mavinkurve and Sahana Murthy

Academic Writing Support System Using Bayesian Networks ........................................................................................................... 385

Masaki Uto and Maomi Ueno

Using Eye-Tracking to Investigate the Different 3D Representation on Students’ Mental Model Construction .................................................. 388

Sheng-Chang Chen, Hsiao-Ching She, and Mi-Shan Hsiao
Track 12. Recommender Systems for Learning

Enhancing Learning Object Recommendations for Teachers Using Adaptive Neighbor Selection ........................................391
   Stylianos Sergis and Demetrios G. Sampson

A Utility-Based Semantic Recommender for Technology-Enhanced Learning .............................................................394
   Andrea Zielinski

Would Linked MOOC Courseware Enhance Information Search? ................................................................................397
   Shang-Wen Li and Victor Zue

Towards the Effective Use of Available Educational Resources: Designing Adaptive
Hypermedia Environments for the Engineering Sciences ..........................................................400
   Simon Carolan, Guillaume Moreau, Morgan Magnin, and Francisco Chinesta

Knowledge Recommender: An Application Based on the Social Knowledge Network
for Knowledge Recommendation ..................................................................................................403
   Shan Li, Juan Zheng, and Qianxia Jing

Social Analytics Framework to Boost Recommendation in Online Learning Communities ...........................................405
   Yanyan Li, Haogang Bao, Yafeng Zheng, and Zhinan Huang

Towards a Multi-label Classification of Open Educational Resources ..........................................................................407
   Marcos Mouriño García, Roberto Pérez Rodríguez, Luis Anido Rifón, and Manuel Vilares Ferro

An Interactive Annotation System to Support the Learner with Web Services Assistance .............................................409
   Anis Kalboussi, Nizar Omheni, Omar Mazhoud, and Ahmed Hadj Kacem

Learnersourced Recommendations for Remediation ...................................................................................................411
   Shang-Wen “Daniel” Li and Piotr Mitros

Track 13. Technology Supported Education for People with Disabilities

Alternative Concepts for Accessible Virtual Classrooms for Blind Users .................................................................413
   Wiebke Köhlmann and Ulrike Lucke

A Learning Game for Deaf Learners ..........................................................................................................................418
   Mohamed Ali Khenissi, Yosra Bouzid, Fathi Essalmi, and Mohamed Jemni

Effectiveness of an Immersive Virtual Environment (CAVE) for Teaching Pedestrian Crossing
to Children with PDD-NOS ..........................................................................................................................423
   Aimilia Tzanavari, Nefi Charalambous-Darden, Kyriakos Herakleous, and Charalambos Poullis

Effects of Somatosensory Video Games on Simple Reactions of Institutional-Dwelling Older
Adults with Mild-Cognitive Impairments ..................................................................................................................428
   Mao Liou, Shang-Ti Chen, Hsiu-Chi Fu, and I-Tsun Chiang

A Series of Leap Motion-Based Matching Games for Enhancing the Fine Motor Skills
of Children with Autism ..........................................................................................................................................430
   Gaoxia Zhu, Su Cai, Yuying Ma, and Enrui Liu

Making Linear Equations Accessible for Visually Impaired Students Using 3D Printing ..................................................432
   Noha Al-Rajhi, Amal Al-Abdulkarim, Hend S. Al-Khalifa, and Hind M. Al-Otaibi

A Teacher Professional Development Program for Designing Inclusive Learning Experiences ........................................434
   Silvia Margarita Baldiris Navarro, Panagiotis Zervas, Ramón Fabregat, and Demetrios G. Sampson
Track 14. Smart Learning Environments

Integrating SERVQUAL and Importance-Performance Analysis for Assessing Smart Campus Service Quality: A Case Study of an English Training Programme in Vietnam ........................................... 436
I-Chang Tsai and Chung-Han Yeh

Investigating the Effectiveness of Speech-to-Text Recognition Application on Learning Performance in Traditional Learning Environment .................................................. 441
Rustam Shadiev, Yueh-Min Huang, Wu-Yuin Hwang, and Narzikul Shadiev

Performance Analysis of Parallel Particle Swarm Optimization Based Clustering of Students ........................................................ 446
Kannan Govindarajan, David Boulanger, Jérémie Seanosky, Jason Bell, Colin Pinnell, Vivekanandan Suresh Kumar, Kinshuk, and Thamarai Selvi Somasundaram

A Framework of Teaching and Learning with e-Textbooks in Smart Learning Environment ........................................... 451
Lei Fan, Ting-Wen Chang, Ronghuaui Huang, and Wei Cheng

e-Schoolbag in China—Exploring Research Evidence for Large Scale Deployment of e-Textbooks and Services .................................................. 454
Tore Hoel

A Framework of Teaching and Learning with e-Textbooks in Smart Learning Environment ........................................... 451
Lei Fan, Ting-Wen Chang, Ronghuaui Huang, and Wei Cheng

Design of Attention-Based Recommendation Learning Mechanism in the Cloud Computing Environment .................................................. 456
Hong-Ren Chen and Ju-Hong Chen

Heuristic-Based Automatic Online Proctoring System ......................................................................................... 458
R.S. Vishnu Raj, S. Athi Narayanan, and Kamal Bijlani

Supporting Cognitive Skills of People Suffering from Dementia through a Sensor-Based System .................................................. 460
Anastasios Karakostas, Ioulietta Lazarou, Georgios Meditskos, Thanos G. Stavropoulos, Ioannis Kompatsiaris, and Magda Tsolaki

Towards Bringing Adaptive Micro Learning into MOOC Courses ............................................................ 462
Geng Sun, Tingru Cui, Kuan-Ching Li, Dongming Xu, Shiping Chen, Jun Shen, and William Guo

Track 15. Virtual Worlds in Education and Training

Teaching Interpersonal Problem Solving Skills Using Roleplay in a 3D Virtual World for Special Education: A Case Study in Second Life .......................................................... 464
Anders I. Mørch, Melissa D. Hartley, and Valentina Caruso

Mind and Body Learn Together: Embodied Cognition and Language Learning .................................................. 469
Yu-Ju Lan, Nian-Shing Chen, Yao-Ting Sung, and Tzu-Chien Liu

Teaching Renewable Energy Sources Using 3D Virtual World Technology .......................................................... 472
Foteini Grivokostopoulou, Isidoros Perikos, Kovas Konstantinos, and Ioannis Hatzilygeroudis

Track 16. Knowledge Management in e-Learning

Validating Algorithmic Optimization of Patient Allocation at Medical Schools: Which Patient is the Best Fit for Undergraduate Training? ............................................................... 475
Felix Balzer, Martin Dittmar, Olaf Ahlers, and Niels Pinkwart

Exploring the Key Factors for Cooperate Implementation of Mobile Technology .................................................. 480
Ming-Hsiao Lu, Hsio-Ping Yueh, and Weijane Lin
Trends in E-Learning Research from 2002-2013: A Co-citation Analysis ..........................................................483

Xiao-Fan Lin and Qintai Hu

A Competency-Based Model to Bridge the Gap between Academic Trainings and Industrial Trades .................................................................................................................................486

Rémi Venant, Césdric Teyssié, Daniel Marquié, Philippe Vidal, and Julien Broisin

Track 17. Large Scale Implementation of Technology Supported Educational Innovations

Flipping, Engaging, and Teaming, Oh My! Lessons Learned from a Large Scale Curriculum
Reform at a US Medical School ..........................................................................................................................488

Weichao Chen, Mary Kate Worden, and Elizabeth Bradley

Track 18. Doctoral Consortium on Advanced Learning Technologies

The Effects of Progress Bars on Diverse Learning Styles in Web-Based Learning ..............................................493

Te-Lien Chou and Sufen Chen

Author Index ......................................................................................................................................................495
