Nigeria Annual International Conference & Exhibition (NAICE 2015)

Natural Gas Development and Exploitation in an Emerging Economy – Strategies, Infrastructure and Policy Framework

Victoria Island, Lagos, Nigeria
4-6 August 2015

Volume 1 of 3

ISBN: 978-1-5108-1185-0
TABLE OF CONTENTS

VOLUME 1

Impact of Structural Discontinuities on Fluid Flow and Production Behaviour: Case Study of the Yowi Field, Offshore Niger Delta, Nigeria ................................................................. 1
Prince S. Monta, Minapuye I. Odigi

Drilling Deeper to Access More Hydrocarbon Potentials in the Yowi Oilfield, Offshore Niger Delta, Nigeria .............................................................................................................. 16
Prince S. Monta, Minapuye I. Odigi

Estimation of Net Pay in Unconventional Gas Reservoirs ................................................................................................................................. 32
Paul Fekele, Adeyale Dosunmu, Richard Espekedumo, Daniel Ayalu, Ediri Borwe, Sitiamas Ajidahun

Evaluation of the Cuttings Carrying Capacity of a Formulated Synthetic-Based Drilling Mud ...................................................................................... 49
Anietie N. Okon, Okorie E. Agwu, Francis D. Udoh

A Review of Nigerian Bentonitic Clays as Drilling Mud ............................................. 59
Okorie E. Agwu, Anietie N. Okon, Francis D. Udoh

Cost Benefit Analysis of Vegetable Oils Used As Alternatives to Diesel in the Formulation of Oil-Based Drilling Muds ................................................................. 77
Anietie N. Okon, Isemin A. Isemin, Moses G. Akpabio

Analysis of Lateral and Torsional Vibrations Models and their Effect on Drilling Efficiency Using PDC Bits in Directional and Multilateral Wells .............................................................................. 96
David E. Odeke, Dosunmu Adekale

The Effect of Wellbore Stability in Naturally Fractured Reservoirs ........................................... 114
Paul Fekele, Lopez A. Bruno, Samuel Odagne, Adekale Samwui, Ediri Borwe

The Synergy Effect of Microwave Heat and Demulsifier in Resolving Water-in-Oil Emulsions .............................................................................................................. 129
Adeyeye Adebayo Salawon, Etinmhi Bassey Umoh, Bamidele Joshua Adeyemo

Local Content Policy and Entrepreneurship: Implications for Small and Medium Scale Industries in the Nigerian Oil and Gas Sector ......................................................... 144
I. M. Auwalu, I. Z. Zahra, M. B. Adamu, A. L. Usman, A. D. I Sulaiman

Adekoya J. Akinlawon, Omonwumi O. Iedare

Computation Of Dimensionless Pressure in a Vertical Well Using Gauss-Chebyshev Quadrature, Gauss-Kronrod Quadrature and Runge-Kutta Fourth Order .............................................................................................................. 216
J. Olori, E. Olol

Optimization of Wax Deposition in Sub-Cooled Pipeline Using Response Surface Methodology ............................................................................................................ 232
Adeyose A. Adeyewu, Lawoye O. Oyekunle

Modeling and Simulation of Wellbore Hydraulics In Underbalanced Drilling .............................................................................................................. 245
Y. B. Adebowo, L. O. Oyekunle

Integrated Reservoir Modeling and Uncertainty Assessment of a Reservoir Complex in the Niger Delta ................................................................................................. 261
Chinedu Anyanwu, Daniel Afekhum, Collins Onohlakpeya, Ademike Owoyele, Omagbemi Kakaoy

Modeling Petrophysical Property Variations in Reservoir Sand Bodies Using Artificial Neural Network and Object Based Techniques .............................................................................................................. 289
Augustine Uwanoni Ogarajaghon, Chimba Cyril Udeze, Imomotie Jude Imorame

Mechanistic Models for Predicting Sand Production: A Case Study of Niger Delta Wells .............................................................................................................. 304
Dickson O. Udehnhu, David O. Obie

A Proposed Simpler Technique for Accurate Measurement and Calculation of Flared Gas Volume for Nigerian Oil Fields ................................................................. 324
Umeh Ebuka, Abinyi Chukwuemene, Nwanna Nnacemeka, Beka Princewill

Effectiveness of Simulations on Well Control During HPHT Well Drilling .............................................................................................................. 338
F. A. Dala, Aladu, A. B. Usman, A. D. Ibrahim

Determination of Pressure Drop in a Natural Flowing Gas Well using Nodal Analysis .............................................................................................................. 349
J. A. Dala, O. O. Agbaka, O. A. Olayoj, E. S. Adewole

A New Method for Permeability Stress-sensitivity Quantification and Stimulate Efficiency Evaluation .............................................................................................................. 360
Xiangyi Dou, Xinwei Liao, Xianman He, Tianyi Zhao, Zhiming Chen, Weiyan Ren, Rui Zhang

Analysis on Traditional Reserve Estimation Methods in Stress-sensitive Gas Reservoir: Error Analysis and Modification .............................................................................................................. 373
Xiangyi Dou, Xinwei Liao, Xiaosuang Zhuo, Tianyi Zhao, Zhiming Chen, Weiyan Ren, Rui Zhang

A New Method to Determine and Forecast Deliverability Equation for Fractured Horizontal Well in Tight Gas Reservoir .............................................................................................................. 383
Xiangyi Dou, Xinwei Liao, Huaweizhao, Tianyi Zhao, Zhiming Chen, Weiyan Ren, Rui Zhang

Fracture Optimization for Multi-stage Fractured Horizontal Well with Time & Stress-Sensitive Parameters .............................................................................................................. 393
Xiangyi Dou, Xinwei Liao, Tengfei Hou, Tianyi Zhao, Zhiming Chen, Weiyan Ren, Rui Zhang
Entrenching Process Safety Culture in The Face of Shifting Demography – A Key to Sustaining Goal Zero

Performance in Well Operations .......................................................................................................................... 1120

Wellbore Strengthening through Squeeze Cementing: A Case Study ................................................................. 1128

Benyeogor Ogochukwu

Developing a Framework for Maximizing Marginal Oil and Gas Field Economics ........................................... 1138

Oyebimpe Adegun

Petroleum Source Rock Potential of Upper Benue Trough, Nigeria: Implication for Hydrocarbon Exploration ...... 1156

Jamisudeen Kayode Bajije, Osipamolu Oluwadada, Richard A. Ehikie, Philip Oyewale

Laboratory Investigation of the Effects of Monovalent and Divalent Salts on Gum Arabic Solutions .................. 1166

D. O. Oniuwa, O. A. Olaifey, J. Ogbonna

Strategic Management of Health Safety and Environment Risks in Down-Trodden Oil Dependence Economy ........ 1175

Tabusee Fagbe

An Investment Matrix Model for Marginal Field Operators in Nigeria ................................................................. 1183

Utomakoh Ashore, Odunwa Oniuwa, Olalekan Olaifey, Rasak Sumonu

Take or Pay Obligation in Long Term Gas Contract: Risk Mitigation Options for Off-taker ................................. 1199

Osunda Green, Omowumi Iledare

Overcoming Limitations of Empirical Steady State Models using Multi Rate Testing, MRT .............................. 1206

Michaels Ihechuku, Oladepe David Adebowale

A P/Z Plot for Estimating Original Gas in Place in a Geo-Pressured Gas Reservoir by the Use of a Modified Material Balance Equation ........................................................................................................................................ 1224

I.O. Obieicie, P. U. Giegebenswos, P. O. Oghibe

A Simple Aggregate Parameter for Comparing Waterflood Reservoirs ............................................................. 1239

Gerrard Tetegun, Kasme A. Lawal, Fidelse Tendu

Steam-Alternating-CO2 for Heavy-Oil Recovery ....................................................................................................... 1253

Kasme A. Lawal, Fudles Tendu

Reservoir Permeability Evolution in Sand Producing Wells................................................................................. 1266

Opeyemi Ibiun, Juan Tovar, Niklas Heinemann, Frances Chalmers, Belkhir Mokdad, Kisa Katsoei

Application of Interconencted Fibre-Network to Improve Sand-Control In Water Injectors: Preliminary Insights from Field Data .......................................................................................................................................................... 1277

Kazem A. Lawal, Joshua Okonu, Idriss Olatunji, Paulinus Okonko, Ijuliso Horsfall, Ademola Ademogho, Oluseye Ogunsina, Abraham Ekebfe, Edith Mbanafo, Fidelis Tendu, Sophie Pokima, Saeed Bapoo

Benefit of Data Integration (Biostratigraphic Data) in Field Development -B4 Gas Reservoir Case Study .......... 1300

Andrew Ogbeli, Omogbemi Kakaoy, Alia Bahry, Yaqub Adepoju, Chukwunweke Awa, Olalekan Balogun

The Analysis of String Stability Affected by Earthquake in The Shallow of Deep-water Drilling ......................... 1309

Y. Zhou, H. Fan, S. Deng, W. Shen, W. Li

An Investigation of the Effects of High Temperature and High Pressure (HTHP) on the Stability of Wellbore Casing using Finite Element (FE) Method ........................................................................................................................................ 1315

S.O. Ohengwonza, A. O. Olaifey, E. Nwankwo, K. O. Bello

Displacement Calculation of Dynamic Killing Drilling in Deepwater .................................................................. 1324

W. Ren, H. Fan, S. Deng, C. Cui, Q. Peng, X. Liu, X. Dou

A Comparative Study of the Mechanism ASP Flooding for Light Oil Recovery in Strongly Water Wet Cores Using Sodium Hydroxide, Lauryl Sulphate and Gum Arabic .................................................................................................................................................. 1334

Kharama Biebor, Taiwo Olumese, Olalekan Balogun

O. Ofili, T. Temisanren, O. Olaifey

VOLUME 3

Finite Element Analysis of Induced Stresses on Injection Wells using Plane Stress and Strain Elements ............... 1355

U. B. Ekomnwoosa, E. Nwankwo, K. O. Bello, A. O. Olaifey

Alkaline-Surface-Polymer Flooding for Heavy Oil from Strongly Water Wet Cores Using Sodium Hydroxide, Lauryl Sulphate, Shell Enordet 0242, Gum Arabic and Xanthan Gum .............................................................. 1363

Ujumwab Solomon, Taiwo Okwusema, Olajeyi Olalekan

Surfactant-Polymer Flooding Schemes (A Comparative Analysis) ...................................................................... 1373

Usuru Felix, Taiwo Okwusema Ayodele, Olajeyi Olalekan

Use of Water Injection Surveillance as an Effective Reservoir Management Tool .............................................. 1381

Sumonu Rasak Mayonde, Shokoye Yewande, Okwudiafo Paul, Jabar Sheriff

Field Application of a Real-Time Integration of 3D’ Geo-Mechanical Model to Optimize Mud Weight Across Weak Bedding Plane .................................................................................................................................................. 1406

Bahagbemi S. Adetoye, Adegbe Dosaunna, Orifi J. Boniface

5-Hydroxytryptophan: A Novel Eco-Friendly Corrosion and Oilfield Microbial Inhibitor ................................ 1422

E. B. Issac, O. Akaranta, O. A. James

Substantiation of Reservoir Lateral Hydraulic Connectivity Based on Integrated Subsurface and Production Test Result - Niger Delta Field Experience ................................................................. 1432

Yaquh Adepoju, James Anyaechie, Andrew Ogbeli, Olalekan Balogun, Chukwunweke Awa, Miguel Mora-Blakstad, Omogbemi Kakayor

Ranking of C6+ Composition Split Schemes of Pipeline Gas for Hydrocarbon Dewpoint Determination ............ 1439

Livinus Aniefiok
Optimization of Hole Cleaning using Dynamic Real-time Cuttings Monitoring Tools .................................................. 1449

Saturation Height Modelling in a Partially Appraised Gas Field using Analogue Field Core Data: An Optimisation Case Study of ZAN Field in the Niger Delta ......................................................................................................... 1458

Detection of Water Encroachment into a Marginal Field Oil Reservoir for Ultimate Recovery ............................. 1468

Anthony Oso Bisong

Utilizing Early Time Boundary-Dominated Flow Data to Make an Initial Estimate of Gas-in-Place: An Aid to Computing Material Balance Pseudotime .......................................................................................... 1481

Formulation of Demulsifiers from Locally Sourced Raw Materials for Treatment of a Typical Nigerian Crude Oil Emulsion .............................................................................................................................. 1496

A. D. I. Sulaiman, S. Abdulsalam, A. O. Francis

Slug Flow and its Mitigation Techniques in the Oil and Gas Industry ..................................................................... 1513

B. T Eniari, F. Kura

A Model to Determine the Effect of Pore Pressure and Fracture Gradient on Stuck Pipe Management .............. 1532

Oriji A. Boniface, N. M. Marcus

Multiple Zones Completion Using a Proactive Algorithm for a Liquid Rich Deep-water Gas Well ..................... 1541

Y. Nasir, M. B. Adamu, A. M. Auwali, A. D. I. Sulaiman

Emulsion Treatment in the Oil Industry: A Case Study of Oredo Field Crude Oil Emulsion .............................. 1551

Augustina Orueva, Sylvester Okolie

Hydrocarbon Resource Development Decision Analysis for Gas Reservoir with 10ft Oil Rim: Niger Delta Case Study ............................................................................................................................................... 1562

Olatekan Balogun, Yaqub Adepoya, Andrew Obidi, Awa Chuksunye

Subsidence Prediction using Analytical Approach .................................................................................................. 1572

Amit Awasthi, Omolara Williams

IPS M Plays Key Role in Maximising Oil Production and Minimising Gas Flare in the Re-opening of A Swamp Field in Niger Delta ........................................................................................................................................ 1580

O. Femi Obahen, Ersamus Nnanna, Miebaka Wakama, Nwoke Linnus

An Integrated Multi-Disciplinary Approach to Predict Fluid Contacts in a Partially Appraised Field - A Case Study of Yoko Field in Niger Delta ........................................................................................................ 1588

Orekoyo Adeyemi, Eshakpakun Ezenbong, Ahmed Sulaiman, Prabhat Basu, Jude Ekeowor, Nworie Ejeora, Ugboaja Remmy, Kayyoor George, Kachi Onyeka

Micro-state Storage and Adsorption Behavior of Shale Gas ..................................................................................... 1598

Tianshi Zhao, Jiangfang Li, Huawei Zhao, Xiangdi Dou

Deploying Continuous Improvement Methodologies To Improve Efficiency: A Way of Responding To Emerging Industry Challenges ........................................................................................................... 1607

Adetunmu Mustapha, Nnemeka Umeh, Akindemi Adepaja

The Seamless Startup of the Ofon Phase 2 Project: A Demonstration of Strong Commitment to Eliminating Continuous Gas Flaring in Nigeria ........................................................................................................... 1612

Yeghenat Eke, Emmanuel Hyest, Philippe Durque, Lamin Sallaly, Abel Odumudia

Drilling Through a Fault in the Niger Delta Sedimentary Basin - Integrating a Geo-steering Application with Borehole Imaging ............................................................................................................................................... 1629

Chidie Nkocha, Victor Okwos, Nkee Deokuma, Jerome Caudron, Leith Jefford, Joseph Otevwe, Xiaodong Fang, Maaji Idris

Effective Monitoring of Green House Gas Emission – A Laboratory Approach ......................................................... 1644

Uche Ibenere, Bella Mnata, Mike Onyekonwu

Design of a Coordinates Aware Remote Module for Effective Oil and Gas Pipeline Monitoring Using GPRS, GPS and Google Maps on Android Devices ...................................................................................... 1657

Ochicha Patrick Iceanwa, Ezeanyagu Obiabuiwu Ngozi, Udach Paschal Chigoezie, Abu Abu Eyo

A New Solution Methodology to the Material Balance Equation, for Saturated Reservoirs .............................. 1669

Olatunde O. Mosobalaje, Charles Y. Onah, Ifeminne N. Eseweobot

Experimental Investigation of A Niger Delta Hydrocarbon Field For Reservoir Sourcing Tendency ....................... 1681

Bella Mnata, Olorunfemi Osuolabi, Ito Uka, Mike Onyekonwu

The Role of Natural Gas in Nigeria Power Generation: Empirical Analysis of Challenges, Constraints and Opportunities ....................................................................................................................................................... 1688

Alphas O. Igbokeori, Abija Nigeria, Omowami Ibedare

Case Study: Planning and Execution of a Subsea HPHT Well in the Niger-Delta ...................................................... 1701

Olayinka Nwagha

Optimality Test of Marginal Field Development Financing Arrangements in Nigeria .............................................. 1715

Chibuzee Eke, Ayodele Adekomeh

Economics of Heat Loss Material Design in Transportation of Stranded Gases as Hydrates ............................... 1754

Adewale Dosunmu, Nse-Ongbor Udoh, Evelyn Ekeinde, Chimaroke Anyanwua, Emeka Okoro

Fluid Contact Movement Monitoring in Gas Reservoirs using Pressure Transient Data: Obigbo North Field Example ................................................................................................................................................. 1763

Magneh Nnadi, Rotimi Osho, Emelle Chima

HSE Training Evaluation and Effectiveness of Sustaining HSE Culture .................................................................. 1774

A. J. Bada, A. S. Adejoboeye

Real Time Borehole Stability Monitoring and Pre-drill Model Calibration using LWD Sonic - A Case Highlight .... 1787

Sophia Weaver, Xiaohui Xiao, Rob Vines
Application of Computational Intelligence in Generating Synthetic Reservoir Rock Mechanical Parameters for Building Geo-Models

A Field Study of Surface Sampling in Well Testing. A New Approach

Development of Cost Effective Surfactants From Local Materials for Enhanced Oil Recovery

Surfactants Selections Criteria for Enhanced Oil Recovery in High Temperature and High Salinity Environment

Full-Field History-Match of Stacked Reservoirs across Fault Blocks to Investigate Cross-Fault Block Communication

Deployment of Remotely Operated Aerial Vehicles: Managing Asset Integrity in the 21st Century

Pore Pressure Prediction in Stacked Intercaletation of Hydrostatic and Depleted Reservoirs

A Time Function Havlena and Odeh MBE Straight Line Equation

From Exploration to Development: The Value of Formation Pressure While Drilling Applications

Impact of the National Content Act on Deep Water Offshore Development in Nigeria

Reduction of Uncertainty in Material Balance Derived Original Hydrocarbon in Place Estimate by the Inclusion of Fluid Contact History Matching

Improved Data-Driven Models for Forecasting Production Performance with Uncertainty Analysis

Petrophysical Properties of the Nigeria Tar Sand Revisited

Low Salinity Water Injection for EOR

Theoretical Model for the Transportation of Stranded Gases as Hydrates

While-Drilling Productivity Evaluation of Horizontal Wells
