2013 Taibah University International Conference on Advances in Information Technology for the Holy Quran and Its Sciences (NOORIC 2013)

Al-Madinah, Saudi Arabia
22-25 December 2013
2013 Taibah University
International Conference
on Advances in Information
Technology for the Holy Quran
and Its Sciences

NOORIC 2013

Table of Contents

Preface........................................................................................................................................................xiv
Message from President of Taibah University.........................................................................................xv
Message from Vice-President for Postgraduate Studies and Research......................................................xvi
Message from Organizing Committee Chair..........................................................................................xvii
Message from Scientific Committee Chair............................................................................................xviii
Conference Organization..........................................................................................................................xix
Reviewers.................................................................................................................................................xxiv
Keynotes...................................................................................................................................................xxv

Quran Security and Authentication

Protection Enhancement for Data in Quran Applications from Unauthorized Modifications

Omer Mohammad Ahmad Abu Shqeer and Mohammad Ali Moh'd Bani Younes

A Framework for Quranic Verses Authenticity Detection in Online Forum

Thabit Sabbah and Ali Selamat

Real-Time Interactive Verification of Quran Words in the Web Contents

T.M. El-Sakka

Azah Anir Norman and Norizan Mohd Yasin
Localization Watermarking for Authentication of Text Images in Quran
with Spiral Manner Numbering .................................................................24

Syifak Izhar Hisham, Afifah Nailah Muhammad, Jasni Mohamad Zain,
and Gran Badshah

Exploiting Digital Watermarking to Preserve Integrity of the Digital Holy Quran
Images ................................................................................................................30

Fajri Kurniawan, Mohammed S. Khalil, Muhammad Khurram Khan,
and Yasser M. Alginahi

A Watermarking Application for Authentication of Holy Quran ........................................................37

T. Tuncer, F. Ertam, and E. Avci

A Zero-Watermarking Verification Approach for Quranic Verses in Online Text
Documents ........................................................................................................42

Yasser M. Alginahi, Omar Tayan, and Muhammad N. Kabir

Secure Data Transmission of Holy Quran Using Controlled Chaotic Dynamics ...................47

Abdelkrim Boukabou and Mohamed Amine Khelifa

Techniques to Preserve the Integrity of the Electronic Versions of the Nobel
Quran ..................................................................................................................52

Izzat M. Alsmadi

Securing the Digital Script of the Holy Quran on the Internet ........................................57

Mostafa G.M. Mostafa and Ibrahim M. Ibrahim

Authentication of Electronic Version of the Holy Quran: An Information Security
Perspective ........................................................................................................61

Mohd Faiz Hilmi, Mohammed Fadzil Haron, Omar Majid, and Yanti Mustapha

Learning Technologies for the Holy Quran and Its Sciences I

MOQEU: A Moodle-Based Quran E-University .....................................................66

El-Shaimaa Nada, Ahmed A. Ahmed, and Mahmoud Abd-Allah

Offering a Guided Learning of Quranic Knowledge to the Seekers through
the Internet .........................................................................................................72

Shamim Ahmad and Tameem Ahmad

Collaborative Learning Environment with Think-Pair-Share Method
and Learning Tools for Learning Arabic Online .............................................77

Omar Bin Majid, Mohd Faiz Hilmi, Nuraini Abdul Rashid,
Sharifah Mashita Syed-Mohammad, Nurul Malim, and Zurinahni Zainol

A Model for Implementing E-Teaching Objects for the Holy Quran and Related
Sciences Using Animations .............................................................................83

Abdullah Ahmad Basuhail
Designing Instructional Materials for Teaching Surahs and Duas for Elementary School Students in Turkey

Yalin Kilic Turel, Cigdem Gulmez, and Rahime Kavak

Intelligent Systems for Qur'anic Learning Environment: A Pedagogical Framework for Futuristic Qur'anic Classroom

Raja-Jamilah Raja-Yusof and Zulkifli Mohd Yusoff

Learning System for the Holy Quran and Its Sciences for Blind, Illiterate and Manual-Disabled People

Samir A. Elsagheer Mohamed, Allam Shehata Hassanin, and Mohamed Tahar Ben Othman

Virtual Learning System (Miqra'ah) for Quran Recitations Targeting Blind, Illiterate, and Manual-Disabled Students

Samir A. Elsagheer Mohamed, Allam Shehata Hassanin, and Mohamed Tahar Ben Othman

Enhancing Computer Accessibility for Disabled Users: A Kinect-Based Approach for Users with Motor Skills Disorder

Loay Alzubaidi, Ammar Elhassan, and Jaafar Alghazo

Quran Player Based on Brain Computer Interface

Mohammed J. Alhaddad, Mahmoud I. Kamel, and Dalal M. Bakheet

Spoken Arabic Digits Recognition Based on (GMM) for E-Quran Voice Browsing: Application for Blind Category

Nacereddine Hammami, Mouldi Bedda, Nadir Farah, and Raouf Ouanis Lakehal-Ayat

Towards Improving Quran Memorization Using Mind Maps

Entesar A. Al-Mosallam

Video Replacement with Audio Plus Kinect-Based Gestures for Qur'an E-Learning to Reduce Network Traffic

Saqib Rasool, Muhammad Suhaib Amir, Usman Asghar, Hafiz Tariq, Mudassar Iqbal, and Arooj Ejaz

### Web, Mobile, and Game Applications for Quran I

Towards a Comprehensive Online Portal and Mobile Friendly Qur'an Application

Zameer Ahmed Adhoni, Husam Al Hamad, Abdul Ahad Siddiqi, and Latifa El Mortaji

Tajweed Race Online Game via Facebook Platform

Syarilla Iryani A. Saany, M. Nordin, A. Rahman, Norkhairani Abd Rawi, and A. Izzuddin Yusof
A Framework for Motivating Children to Learn Reading Al-Quran Using Persuasive Mobile Game Technology ................................................................. 149
  Amirah Mohamed Shahiri and Wahidah Husain

Easy Learning of Quran Using Mobile Devices for Blind and Visually Impaired ................................................................. 155
  Wafa Basit and Nuzhat Sultan

A Study of Users’ Perceptions Toward Mobile Dua and Zikr for Hajj (MDZ4H) Usability ........................................................................................................ 159
  Ahmed Sheikh Al-Aidaroos, Abdul Nasir Zulkifli, and Anifin Abdul Mutalib

Role of 3D as a Tool for the Holy Quran Education ................................................................................................................. 165
  Manswr Alasmari, Sarah Ali, and Nor Rofebeh Bt. Abdallah

A Serious Game for Inculcating Islamic Values in Children ............................................................................................................ 172
  Samiullah Paracha, Sania Jehanzeb, and Osamu Yoshie

Random Animated Transition Using Quranic Verses ............................................................................................................... 178
  Fakhirul Hazman Yusoff, Marina Ismail, and Mohd Yunus Mohad Yussof

Digital Game-Based Learning for Low Functioning Autism Children in Learning Al-Quran ..................................................................................... 184
  Nurul Nadhrah Kamaruzaman and Nazeen Jomhari

NOOR eMashaf Application for Android-Based Tablets: Concept and Design ............................................................................. 190
  Mohamed Menacer, Amar Arbaoui, and Billel Arbaoui

Feature Analysis of Android-Based Holy Quran Applications .............................................................................................................. 194
  Kamal Z. Zamli, Rozlina Mohamed, Rohani Abu Bakar,
  and Abdulrahman Al-Sewari

Natural Language Processing for Quran and Its Sciences I

Word Sense Disambiguation for English Quranic IR System ........................................................................................................... 199
  Sabrina Tiun, Hamed Zakr, Masnizah Mohd, Norazlinda Zainal Abidin,
  and Ahmad Irfan Ikmal Hisham

Quranic Computation: A Review of Research and Application ........................................................................................................ 203
  Rahmath Safeena and Abdullah Kammani

Using Active Learning in Text Classification of Quranic Sciences ......................................................................................................... 209
  Mohamed Goudjil, Mouldi Bedda, Mouloud Kouiti, and Noureddine Ghoggi

A Standard Model of Sciences around Koran ..................................................................................................................... 214
  Benaissa Khireddine and Balla Amar

Data Set Generation for the Attributes of the Words of the Holy Quran:
Information Retrieval System for E-Learning ......................................................................................................................... 224
  Haq Nawaz and Yasir Saleem

Similarity Evaluation of English Translations of the Holy Quran ............................................................................................................. 228
  Mohd Zamri Murah
Discovering the Thematic Structure of the Quran using Probabilistic Topic Model .................................................................234
    Muazzam Ahmed Siddiqui, Syed Muhammad Faraz, and Sohail Abdul Sattar

Ontology Development for Zikr and Doa Al-Ma'thur at Wisdom Level .................................................................240
    Rosilina Othman and Siti Fatimah Mohd Tawil

Using Ontology for Associating Web Multimedia Resources with the Holy Quran .................................................................246
    Yasser Abdelhamid, Mostafa Mahmoud, and Tarek M. El-Sakka

A Topical Classification of Quranic Arabic Text .................................................................................................................252
    Mohammed N. Al-Kabi, Belal M. Abu Ata, Heider A. Wahsheh, and Izzat M. Alsmadi

Context-Sensitive Arabic Spell Checker Using Context Words and N-Gram Language Models .................................................................258
    Majed M. Al-Jefri and Sabri A. Mahmoud

Keyword and Chapter Relationship Analysis in the Tafseer of Al-Quran ................................................................................264
    Puteri N.E. Nohuddin, Stephanie Chua, and Siti Rohaidah Ahmad

Mining Topical Clusters and Topical Associations from the Holy Qur'an ...........................................................................270
    Tariq Mahmood, Nauman Atique, Aimen Razzaq, Mina Kazmi, and Rida Akhtar

Mapping of Biological Sciences with Quran and Ahadith: An Ontology Approach ........................................................................276
    Mohammed Mahmood Ali, Mohammed Abdul Rasheed, and Khaja Moizuddin Mohammed

A Rule-Based Annotation System to Extract Tajweed Rules from Quran ........................................................................281
    Auhood Alfaries, Manal Albahlal, Manal Almazrua, and Amal Almazrua

Building Standard Dataset for Quran Tafseer ..................................................................................................................287
    Mohammed Bakri Bashir, Muhammed Shafie A. Latiff, and Amin Mohammed Salih

Artificial Intelligence Techniques for Extracting Individuals Recitation of the Holy Quran from Its Combinations ........................................................................292
    Mostafa Mahmoud and Iman Hassan

Referencing Qur'an Verses and Ahadith on World Wide Web Using Microdata ..............................................................................298
    Saqib Rasool, Fatima Iqbal, and Attia Ali Malik

A Qur'anic Code for Representing the Holy Qur'an (Rasm Al-'Uthmani) ...........................................................................304
    Khaled M.S. Foda, Ahmed Fahmy, Khaled Shehata, and Hanady Saleh

Approaches to Retrieve Verses of the Holy Quran Based on Full Meaning ...........................................................................310
    Fadi A. O. Najadat and Ghassan G. Kanaan

Harmony of Words of Allah in the Holy Qur'an ................................................................................................................316
    Musa Atas and Ahmet Emre Tekeli
A Framework for Unit of Interest Meta Data Analysis for Understanding the Message of Quran ..........................................................321
    Syed Marghoob Alam, Muhammed Ali, Atif Khan, Javed Khan, and Faisal Khan

Hardware and Protocols for Quran
Financing IT Tools for Protecting Islamic Literature ..........................................................325
    Mohammed Altaf Ahmed and Mohammed Abdul Samad
QrnPro: New Processor Architecture for Accelerating Quran Applications .........................331
    Mostafa I. Soliman
HQTP: Holy Quran Transfer Protocol ........................................................................339
    Heider A. Wahsheh, Yarub A. Wahsheh, and Reem A. Wahsheh
Adaptive Switching of Traffic between WebRTC and WebSocket Based on Battery Status of Portable Devices ..................................................345
    Saqib Rasool and Hamid Mukhtar
Quran-on-Chip (QoC): An Embedded System Framework and Design for Electronic Quran Dissemination for Internet-Enabled Devices ........................................352
    Omar Tayan, Muhammad N. Kabir, and Yasser M. Alginahi

Cloud Computing for Quran Sciences Resources
Grid-Based Information Retrieval Architecture for Quran Tafseer Sources ..........................356
    Muhammad Shafie A. Latiff, Mohammed Bakri Bashir, and Yahaya Coulibaly
Concepts and Architecture of a Dedicated Virtual Learning Environment for Quran and Its Sciences .................................................................362
    Mohamed Menacer, Amar Arbaoui, and Ali Al Mogbel
Arabic Islamic Manuscripts Digitization Based on Hybrid K-NN/SVM Approach and Cloud Computing Technologies ..........................................................366
    Hamdi Hassen and Maher Khemakhem
Resource Management Based on Agent Technology in Cloud Computing ..........................372
    Taha Chaabouni and Maher Khemakhem

Knowledge Base for Quran Sciences
Towards a Knowledge-Based Quran Translation: A Conceptual Model .............................376
    Abdullah Kammani and Rahmath Safeena
Rules and Natural Language Pattern in Extracting Quranic Knowledge ............................381
    Saidah Saad, S. Azman Mohd Noah, Naomie Salim, and Hakim Zainal
Design Concepts of a KnowledgeBase System for Research and Studies in Quran and Its Science .................................................................387
    Amar Arbaoui and Mohamed Menacer
Quranic Knowledge Extraction: A Statistical Approach .................................................................391
   Razieh Haghighati, Adnan Hassan, Nahid Abbasi, and Ola Maali

Quality and Standards of the Holy Quran Sciences Resources I

Cyber Issues with Respect to Quran and Sunnah ........................................................................396
   Mohammad Ahsan Chishti, Shaima Qureshi, and Ajaz Hussain Mir

Requirements Assessment for Organizations, Users, Software Developers, and Funders for the Propagation of the Holy Quran and Its Sciences .........................................................402
   Hafidh Alsamarrai, Omar Tayan, Maysam Abbod, and Yasser M. Alginahi

Voice Recognition I

Arabic Phonemes Transcription Using Learning Vector Quantization: “Towards the Development of Fast Quranic Text Transcription” ...............................................................407
   Khalid M.O. Nahar, Wasfi G. Al-Khatib, Moustafa Elshefei, Husni Al-Muhtaseb, and Mansour M. Alghamdi

Voice Search in the Holy Quran .......................................................................................................413
   Guezouli Larbi

Towards the Identification of Quran Reciters ...............................................................................419
   Mohammad Alshayeb, Albara Hakami, Abdullah Altokhais, Abdulrahman Almousa, Mohammed Albarrak, and Omar Alessa

Towards Automating the Evaluation of Holy Quran Recitations: A Pattern Recognition Perspective .........................................................................................................................424
   Nur Ramizah Ramino Rashid, Ibrahim Venkat, Faten Damanhoori, Norlia Mustaffa, Wahidah Husain, and Ahmad Tajudin Khader

Learning Technologies for the Holy Quran and Its Sciences II

The Role of e-Learning Software in Teaching Quran Recitation ................................................429
   Ahmed Ragheb Ahmed Mahmoud

Virtual Learning Environment in the Service of the Holy Quran and Its Sciences ...........................................441
   Sultan Musfer Mubark Saadi

The Use of e-Learning Methods in Teaching Tajweed of Holy Quran ..............................................448
   Yasir Mohammed Saeed Abdul-Majid

Proposal for Developing a Virtual Environment for Teaching and Learning the Holy Quran and Its Sciences .....................................................................................................................459
   Ali Najem
Interactive Program for the Quran Science Course at the Open University of Sudan .................................................................470
Abed Elbasit Mohammed Sharif Mohammed, Abu Elhaytham Elshaik, and Mohamed Hamadn Alla Ramli

Employing Modern Technology in Teaching the Holy Quran to Deaf Students ........................................489
Zakaria Ibrahim Saleh Azzamilli and Hasan N. K.Bazazoo

Web, Mobile, and Game Applications for Quran II
Web Based Multimedia Adaptive e-Learning System for Teach Miracles of the Holy Quran .................................................................525
Abdul Hamid M Ragab, Amin Yousef Noaman, and Hassan Samir Al-Najjar

Using Mobile Application in Teaching Correct Recitation of the Holy Quran ..................................................535
Mahmoud Elsayess and Salwa Elsayed Hamada

A Comprehensive Electronic Encyclopaedia Prototype for the Holy Quran and Its Sciences ..........................................................552
Mohamed Ben Jemaa

Role of IT for the Service of the Holy Quran
Use of Information Technology in the Teaching of Quran Recitation (Qira’at) - Electronic Miqrah as a Model ..........................................................................................593
Ahmad Adnan Yassin AlZoubi

Quality of Video and Translation of Quranic Stories and Their Technical Applications between Dawa’a Values and Risk of Belief Violations ........................................622
Mohamed Abdeddayam Ali Sulaiman Algendy

The Duration of Madd and Ghonna in Recitation of Quran ..................................................................................634
Basem Hamdan H Allehyani

The Role of Computers in the Language of Qur’an: A Case Study of Maqsurah Ibn Duraid Book .........................................................639
Atotileto Aminu Abdussalam, Mohammed Najib Jafar, and AlHajj Ahmed Algazali

Natural Language Processing for Quran and Its Sciences II
KSUCCA the Corner Stone for Studying the Meanings of the Holy Quran Words in the Light of Distributional Semantic Models .................................................................652
Maha Sulaiman Alrabiah, AbdulMalik Al-Salman, and Eric Atwell

Design and Optimization of an XML-based Grammatical Structure of the Holy Quran .................................................................660
Ayoub Kadim, Azzeddine Lazrek, and Ould Mohamed Elhadj Yahya
Capturing the Common Syntactical Rules for the Holy Quran: A Data Mining Approach ............................................................670
  *Dia Eddin Mohammad Asad AbuZeina and Mahmoud Hasan Alsaheb*

Advanced Search Feature in Noble Quran ..........................................................681
  *Assem Chelli, Amar Balla, and Taha Zerrouki*

**Quality and Standards of the Holy Quran Sciences Resources**

Electronic Management of Quran Sites ........................................................................700
  *Rokeia Boussenan*

The Use of Indexing Information and Virtual Online Reading in the Digitization of the Holy Quran’s Manuscripts – Case Study Moroccan National Library ............................................724
  *Lahcen Taouchikht B. Youssef*

A Proposed Quality Measure Standards for IT Based Systems Serving the Holy Quran Domain ..........................................................................................................................774
  *Khaled Mostafa Elsayed Elsayed*

The Evaluation of Educational and Technical Standards for Quran Teaching and Learning Sites ..................................................................................................................780
  *Aisha Blehsh Mohamed Alomary and Fayza Abu Bakr Mohammed Fallata*

Exploiting Computing Technologies in the Follow-Up of Quran Projects ................799
  *Abdelali Haouati*

Matrix Quality Standards and Accreditation Methodology for Software Tools Related to Quranic Sciences Studies .........................................................................................809
  *Mohammed Sulaiman Elhassan*

Correcting the Translations of the Holy Qur’an and its Needs of Information Technology: A Case Study ........................................................................................................847
  *Zubaidah M. Kheir Hasan Ereksoussi*

**Voice Recognition II**

Electronic Memorizer ....................................................................................................863
  *Halya Saleh Hussein Al Hanash and Sameha Ahmed Ali Alshagsy*

Author Index .....................................................................................................................871
