2015 Agile Conference
(AGILE 2015)

National Harbor, Maryland, USA
3-7 August 2015
## Table of Contents

Welcome Message from the Chairs.......................................................................................................................vii  
Program Committee and Reviewers....................................................................................................................viii  

### Research Papers

**Session 1**  
Synthesizing Continuous Deployment Practices Used in Software Development ..................................................1  
*Akond Ashfaque Ur Rahman, Eric Helms, Laurie Williams, and Chris Parnin*  
Stakeholder Perceptions of the Adoption of Continuous Integration—A Case Study .............................................11  
*Eero Laukkanen, Maria Paasivaara, and Teemu Arvonen*  

**Session 2**  
Understanding Digital Cardwall Usage ..................................................................................................................21  
*Stevenson Gossage, Judith M. Brown, and Robert Biddle*  
Visual Management and Blind Software Developers ............................................................................................31  
*Avelino Ferreira Gomes Filho and Rodrigo de Toledo*  

**Session 3**  
The Prevalence of UX Design in Agile Development Processes in Industry .......................................................40  
*Tina Øvad and Lars Bo Larsen*  
Managing Technical Debt in Software Projects Using Scrum: An Action Research ............................................50  
*Frederico Oliveira, Alfredo Goldman, and Viviane Santos*  

**Session 4**  
Explaining Agility with a Process Theory of Change ............................................................................................60  
*Michael Wufka and Paul Ralph*
Lean CMMI: An Iterative and Incremental Approach to CMMI-Based Process Improvement ..........................................................65
   Amr Noaman Abdel-Hamid and Alaa El-deen Hamouda

Session 5

Agile Communicators: Cognitive Apprenticeship to Prepare Students for Communication-Intensive Software Development ..........................................................71
   Shreya Kumar, Leo C. Ureel II, and Charles Wallace

Predicting Release Time for Open Source Software Based on the Generalized Software Reliability Model ..........................................................76
   Hironori Washizaki, Kiyoshi Honda, and Yoshiaki Fukazawa

Short Papers

Symbolic Innovation in Agile Transformations ..........................................................82
   Doug Rose

The Impact of Human Factors on Agile Projects ..........................................................87
   Aline Chagas, Melquizedequi Santos, Célio Santana, and Alexandre Vasconcelos

Is Agile Portfolio Management Following the Principles of Large-Scale Agile?
Case Study in Finnish Broadcasting Company Yle ..........................................................92
   Maarit Laanti and Mirette Kangas

Development of Complex Software with Agile Method ................................................97
   Alan Braz, Cecília Mary Fisher Rubira, and Marco Vieira

   Abdul Rauf and Mohammad AlGhafees

A Lean Design Methodology for Business Models and Its Application to IoT Business Model Development ..........................................................107
   Masahiro Ide, Yukio Amagai, Mikio Aoyama, and Yasuhiro Kikushima

Author Index ..................................................................................................................112
