2015 2nd IEEE International Conference on Spatial Data Mining and Geographical Knowledge Services (ICSDM 2015)

Fuzhou, China
8-10 July 2015
Table of Contents

Message from the Conference Chairs V
Message from the Program and organizing Chairs VI
Conference Sponsors and Organizers VII
Organizing Committee VIII
Program Committee IX
Selected Keynote Speech Abstract XI

Topic I: Geospatial Data Mining and Knowledge Discovery

Making Knowledge Discovery Services Scalable on Clouds for Big Data Mining ................................................ 1
Domenico Talia

A Binary Granular Algorithm for Spatiotemporal Meteorological Data Mining ...................................................... 5
Hongxia Wang, Jason Yang, Zhiwei Wang, Qiliang Wang

Person Trip Data Browser, Analyzer and Space-Time Visualizer ............................................................................. 12
Ko Ko Lwin, Yuji Murayama

Extracting Map Information from Trajectory and Social Media Data ....................................................................... 18
Jun Li, Huayang Dai, Yuan Zhang, Qiming Qin, Hongbo Jiang

An Agent-based Negotiation Approach for Knowledge Exchange in Cloud Service Platforms ............................ 22
Sameh Abdalla, Bingquan Huang, Tahar Kechadi

Machine Learning Based Social Media Recommendation .......................................................................................... 28
Taiping Lai, Xianghan Zheng

Following Soccer Fans from Geotagged Tweets at FIFA World Cup 2014 .............................................................. 33
Eugenio Cesario, Chiara Congedo, Fabrizio Marozzo, Gianni Riotta, Alessandra Spada, Domenico Talia,
Paolo Trunfio, Carlo Turri

Exploring Time-dependent Traffic Congestion Patterns from Taxi Trajectory Data ................................................... 39
Chengkun Liu, Kun Qin, Chaogui Kang
Application of Trajectory Clustering and Regionalization to Ocean Eddies in the South China Sea............. 45
  Yang Mo, Di Wu, Yunyan Du

Research of Spatial Co-location Pattern Mining Based on Segmentation Threshold Weight for Big Dataset. 49
  Minwei Tang, Zhanquan Wang

A Method Based on Spatial Analyst to Detect Hot Spot of Urban Component Management Events .......... 55
  Peipei Dai, Changfeng Jing, Mingyi Du, Wensheng Zhou

Distributed Clustering Algorithm for Spatial Data Mining.................................................................................. 60
  Malika Bendechache, M-Tahar Kechadi

Global and Collective Outliers Detection on Hotspot Data as Forest Fires Indicators in Riau Province,
  Indonesia............................................................................................................................................................ 66
  Imas Sukaesih Sitanggang, Dhiya Aulia Muhammad Baehaki

Topic II: Geographical Process Modeling and Analysis

Geovisualization and Correlation Analysis between Geotagged Twitter and JMA Rainfall Data: Case of
  Heavy Rain Disaster in Hiroshima .................................................................................................................. 71
  Ko Ko Lwin, Koji Zettsu, Komei Sugiura

Scale Selecting of Building Information Statistical Grids with Spatial Autocorrelation............................ 77
  Jiangping Chen, Lin Ding, Wenzhong Shi

An Analysis of Influence on Nonnavigable Shallow Areas Using Different Methods to Interpolate Depths.... 82
  Tao Wang, Lihua Zhang, Rencan Peng, Shuaidong Jia, Hongbo Cao, Jian Dong

Spatial Patterns of Retail Stores Using POIs Data in Zhengzhou, China .................................................... 88
  Caihui Cui, Zhigang Han

Spatiotemporal Vegetation Dynamic Patterns in a Subtropical Humid Region of China............................... 93
  Bingwen Qiu, Min Feng, Ming Zhong, Zhenghong Tang, Chongcheng Chen

Optimal Allocation of Service Area of Urban Elusion and Dispersion Based on GIS ................................. 99
  Baoyan Shan, Xue-fei Zhu

Potential Sources and Transport Pathways of PM2.5 in Shanghai, China .................................................. 104
  Ming Luo, Chongcheng Chen

Comparing Multilevel Modelling and Artificial Neural Networks in House Price Prediction .................... 108
  Yingyu Feng, Kelvyn Jones

A Novel Method for Spammer Detection in Social Networks ...................................................................... 115
  Xueying Zhang, Xianghan Zheng

Scale-location Specific Analysis of Temporal Vegetation Coverage in China .............................................. 119
  Zhuangzhuang Wang, Bingwen Qiu, Zhanling Fan

An Improved Scheme of Identifying Loops Using Lagrangian Drifters ...................................................... 125
Estimating Quality Indices of a Digital Depth Model for Navigational Safety
Lihua Zhang, Shuaidong Jia, Tao Wang, Hongbo Cao

Topic III: LiDAR Point Cloud Data Analysis and Applications

Toward a New Approach for Massive LiDAR Data Processing

Automatic Registration of Multi-view Terrestrial Laser Scanning Point Clouds in Complex Urban Environments
Bisheng Yang, Zhen Dong, Wenxia Dai, Yuan Liu

Hybrid Filtering of LiDAR Data Based on the Echoes
Yundong Ma, Chuntao Wei, Tao Hu, Rui Wang, Guoqing Zhou

A 3D Individual Tree Modeling Technique Based on Terrestrial LiDAR Point Cloud Data
Hongyu Huang, Liyu Tang, Chongcheng Chen

3D-PatchMatch: An Optimization Algorithm for Point Cloud Completion
Zhipeng Cai, Cheng Wang, Chenglu Wen, Jonathan Li

Extraction 3D Road Boundaries from Mobile Laser Scanning Point Clouds
Lina Fang, Bisheng Yang, Chongcheng Chen

Interactive Simulation of Virtual Trees Spray
Hui Song, Ying Xu, Zhijie Li, Ding Lin

Topic IV: Geocomputation and Service GIS

A Massive Tile Data Organization and Management Strategy Based on File Tree
Fanghong Gao, Ping Jiang, Xiangxiang Li, Hongqiang Wang

An Effective Algorithm for Lines and Polygons Overlay Analysis Using Uniform Spatial Grid Indexing
Shaohua Wang, Ershun Zhong, Hao Lu, Hui Guo, Liang Long

Research and Realization on Integrated Management of Multisource Heterogeneous Satellite Data Based on Spatial Database
Fanghong Gao, Ping Jiang, Xiangxiang Li, Hongqiang Wang

Depth Estimation from a Single Outdoor Image Based on Scene Classification
Dan Liu, Meizhen Wang, Xuejun Liu

Topic V: Remotely Sensed Data Processing and Applications
SAR Image Despeckling with Adaptive Sparse Representation ................................................................. 188
  Zhenchuan Pang, Guanghui Zhao, Guangming Shi, FangFang Shen

Making Full Use of the Landsat7 SLC-off ETM+ Data for Urban Thermal Environment Monitoring ........ 192
  Feng Chen, Song Yang, Kai Yin, Xiaofeng Zhao, Paul Chan

Detecting and Analysis of Coast Changes of Xiamen Island by RS & GIS.............................................. 197
  Fengqin Sun, Lizhong Hua, Hui Li, Yanting Wang, Yaqi Chen

Classifying Forest Stands Based on Multi-Scale Structure Features Using Quickbird Image ................... 202
  Wanli Huang, Hu Li, Guangfa Lin
