Message from PISPIS 2015 Workshop Chair........................................................................................................... xlii
IMIS 2015

Session 1: MANETs and VANETs

Performance Evaluation of Reactive Routing Protocols for VANETs in Urban Scenarios Following Good Simulation Practices

Experimental Results of a CentOS-Based Ad-Hoc Network Testbed Considering LoS Scenario

Tetsuya Oda, Yi Liu, Keita Matsuo, Shinji Sakamoto, Makoto Ikeda, and Leonard Barolli

Performance Evaluation of AODV, OLSR and HWMP Protocols in Ad-Hoc Networks and MANET Scenarios

Keita Matsuo, Tetsuya Oda, Donald Elmazi, Shinji Sakamoto, and Leonard Barolli

Performance Evaluation of a VANET Simulation System Using NS-3 and SUMO Considering Number of Vehicles and Crossroad Scenario

Vladi Kolici, Tetsuya Oda, Yuki Sugihara, Evjola Spaho, Makoto Ikeda, and Leonard Barolli

IEEE802.11 Based Vehicle-to-Vehicle Delay Tolerant Networks for Road Surveillance System in Local Areas

Noriki Uchida, Go Hirakawa, Tomoyuki Ishida, Yoshikazu Arai, and Yoshitaka Shibata
Session 2: Multimedia and Medical Applications

A Visual Analytics Approach for e-Learning Education .................................................................34
Xin Li, Xuehui Zhang, and Xin Liu

An Enhanced Java-Based Mobile Device Theft Response System ..................................................41
Yongwoo Kwon, Inhyeok Jeon, Wooseok Hyun, Jiyoung Lim, Ilsun You, and Hae-Duck J. Jeong

Evaluation of Power Consumption for Smart Devices in Web Applications ..................................47
Ken Nishimura and Kaoru Sugita

Hybrid Recommendation Base on Learning to Rank .................................................................53
Bin Xie, Xinhua Tang, and Feilong Tang

Mobile Application to Support Community Health Workers Using GeneXus Smart Devices ........58
Mauro Marcelo Mattos, Simone Erbs da Costa, Luciana Pereira de Araújo, Shaiane Mafra Casa, and Eric Boeing

Monitoring Patients with Mental Disorders .................................................................................65
Philip Moore, Andrew Thomas, Tarik Qassem, Nik Bessis, and Bin Hu

Session 3: Wireless Sensor Networks

Bio-inspired Routing in Wireless Sensor Networks .................................................................71
Hamza Fahim, Nadeem Javaid, Zahoor Ali Khan, Umar Qasim, Shumaila Javed, Amir Hayat, Zafar Iqbal, and Ghazanfar Rehman

Interference and Bandwidth Aware Depth Based Routing Protocols in Underwater WSNs ..........78
Hamza Fahim, Nadeem Javaid, Umar Qasim, Zahoor Ali Khan, Shumaila Javed, Amir Hayat, Zafar Iqbal, and Ghazanfar Rehman

Hamza Fahim, Nadeem Javaid, Zahoor Ali Khan, Umar Qasim, Shumaila Javed, Danish Mahmood, and Zafar Iqbal

A Multi-node Renewable Algorithm Based on Charging Range in Large-Scale Wireless Sensor Network .................................................................94
Wu Guowei, Chi Lin, Ying Li, Lin Yao, and Ailun Chen

Session 4: Network Protocols and Applications

Reliable Voice-Based Transactions over VoIP Communications .................................................101
Giuseppe Cattaneo, Luigi Catuogno, Fabio Petagna, and Gianluca Roscigno
An Adaptive Routing Protocol Based on Fixed Hubs for Opportunistic Networks ................................................................. 109
Hewerton Enes De Oliveira, João Paulo De Araujo, Tales Heimfarth, and João Carlos Giacomin

Knowledge-Based Framework for the Virtual Communication of Public Art .............................................. 117
Vincenzo Lombardo, Rossana Damiano, and Antonio Lieto

Trustworthiness-Based Broadcast Protocols in Wireless Networks ......................................................... 125
Miyu Sugino, Shigenari Nakamura, Tomoya Enokido, and Makoto Takizawa

Session 5: Location and Context-Aware Computing

Analysis of Node Placement in Wireless Mesh Networks Using Friedman Test: A Comparison Study for Tabu Search and Hill Climbing .................................................................................................................................................. 133
Tetsuya Oda, Donald Elmazi, Algenti Lala, Vladi Kolici, Leonard Barolli, and Fatos Xhafa

Proposal of the Digital Contents Management System Utilizing the AR Technology ......................................................................................................................... 141
Tsubasa Ando, Tomoyuki Ishida, Noriki Uchida, and Yoshitaka Shibata

Supporting First Responders Localization during Crisis Management .................................................................................................................................................. 147
Massimo Ficco, Francesco Palmieri, and Aniello Castiglione

Impact of Location of Road-Side Units Considering Message Suppression
Method for Vehicular-DTN .................................................................................................................................................. 153
Makoto Ikeda, Seiichiro Ishikawa, Taiki Honda, and Leonard Barolli

Session 6: Intelligent Computing

Qualitative Evaluation of Full Body Movements with Gesture Description ........................................ 160
Tomasz Hachaj and Marek R. Ogiela

Efficiency of Cognitive Information Systems Supporting Enterprise Management Tasks .................................................................................................................................................. 166
Lidia Ogiela and Marek R. Ogiela

Friedman Test for Analysing WMNs: A Comparison Study for Genetic Algorithms and Simulated Annealing .................................................................................................................................................. 171
Donald Elmazi, Tetsuya Oda, Shinji Sakamoto, Evjola Spaho, Leonard Barolli, and Fatos Xhafa

Biometric Methods for Advanced Strategic Data Sharing Protocols ................................................................. 179
Marek R. Ogiela, Lidia Ogiela, and Urszula Ogiela
Session 7: Security, Trust and Privacy

Estimating Software System Reliability: An Architecture-Based Approach ..................................................184
   Xiwen Wu, Linpeng Huang, Chen Li, and Luxi Chen

Ensuring Application Integrity: A Survey on Techniques and Tools .................................................................192
   Luigi Catuogno and Clemente Galdi

Secure Authentication for Structured Smart Grid System .............................................................................200
   Inshil Doh, Jiyoung Lim, and Kijoon Chae

The Dark Side of the Interconnection: Security and Privacy in the Web of Things ........................................205
   Luigi Catuogno and Stefano Turchi

Compromising Ad-Hoc Networks by Attacking Weakly Connected Dominating Set ............................................213
   Chi Lin, Guowei Wu, Kangbin Yim, Lin Yao, and Gang Hou

Vulnerability Analysis on the CNG Crypto Library ......................................................................................221
   Kyungroul Lee, Ilsun You, and Kangbin Yim

Session 8: Cloud Computing and P2P

Towards Energy Efficient Scheduling for Online Tasks in Cloud Data Centers Based on DVFS ...............................225
   Weicheng Huai, Wei Huang, Shi Jin, and Zhuzhong Qian

Multi-tenants Data Duplication Secure Storage in SaaS ....................................................................................233
   Lin Li, Yilei Wang, Yanhui Ding, and Yongxin Zhang

Optimal Cloud Broker Method for Cloud Selection in Mobile Inter-cloud Computing ........................................239
   Glaucio H.S. Carvalho, Isaac Woungang, Alagan Anpalagan, Leonard Barolli, and Makoto Takizawa

A Fuzzy-Based Reliability System for JXTA-Overlay P2P Platform Considering Number of Interaction, Security, Packet Loss and Local Score Parameters .................................................................245
   Yi Liu, Shinji Sakamoto, Keita Matsuo, Leonard Barolli, Makoto Ikeda, and Fatos Xhafa

Synchronization of Peers in Peer-to-Peer Publish/Subscribe Systems ...............................................................252
   Hiroki Nakayama, Dilawaer Duolikun, Tomoya Enokido, and Makoto Takizawa

BDITS 2015
Session 1: Network Resource Management and Intrusion Detection

Research on the Collaborative Analysis Technology for Source Code and Binary Executable Based upon the Unified Defect Mode Set .................................................................260
Xiaobing Liang, Baojiang Cui, Yingjie Lv, and Yilun Fu

Passive Storage Based Wireless Network Resource Management for 4G LTE ........................................265
Ran Tao, Wen'an Zhou, Xuhui Yang, and Guanglin Han

A New Framework of Security Vulnerabilities Detection in PHP Web Application .................................................................271
Zhao Jingling and Gong Rulin

Multi-layer Anomaly Detection for Internet Traffic Based on Data Mining ................................................277
Baojiang Cui, Shanshan He, and Haifeng Jin

Session 2: Big Data, Cloud Computing and Security

Security Analysis of Openstack Keystone ..................................................................................................................283
Baojiang Cui and Tao Xi

A Secure Architecture for Data Storage in the Cloud Environments ........................................................................289
Chuan Fu, Jun Yang, Zheli Liu, and Chunfu Jia

A Dynamic Self-Adaptive Algorithm for Uploading Deferrable Big Data to the Cloud Cost-Effectively ..................................................292
Baojiang Cui, Peilin Shi, and Haifeng Jin

Research on the Performance of Mining Packets of Educational Network for Malware Detection between PM and VM .................................................................296
Jun Yang, Jiangdong Deng, Baojiang Cui, and Haifeng Jin

esIoT 2015

Session 1: Networking, Security and IPv6 for the IoT

A Novel Privacy and Security Framework for the Cloud Network Services ........................................................301
Irish Singh, K.N. Mishra, Antonio Alberti, Dhananjay Singh, and Antonio Jara

JSON Sensor Signatures (JSS): End-to-End Integrity Protection from Constrained Device to IoT Application .................................................................306
Henrich C. Pöhls

Certificateless and Privacy-Enhancing Group Sharing Mechanism for the Future Internet .................................................................313
José L. Hernández Ramos, Jorge Bernal Bernabe, Salvador Perez Franco, and Antonio F. Skarmeta
Towards a Human Centric Intelligent Society: Using Cloud and the Web of Everything to Facilitate New Social Infrastructures .................................................................319
Ian Thoma, Lou Fedon, Antonio Jara, and Yann Bocchi

Session 2: Adaptive IoT

Service Platform for Automated IoT Service Provisioning .................................................................325
Timo Niemirepo, Markus Sihvonen, Vesa Jordan, and Juhani Heinilä

Diego Gachet, Manuel de Buenaga, Enrique Puertas, and María T. Villalva

A Semantic Engine for Internet of Things: Cloud, Mobile Devices and Gateways ..........................................................336
Amelie Gyrard, Soumya Kanti Datta, Christian Bonnet, and Karima Boudaoud

SDN Based Architecture for Clustered WSN ..................................................................................342
Flauzac Olivier, Gonzalez Carlos, and Nolot Florent

Dynamic Transmission Mode Selection and Resource Sharing Schemes for M2M Communications in Cellular Networks ..................................................................................348
Xi Luan, Jianjun Wu, Yuxin Cheng, and Haige Xiang

Session 3: IoT Solutions

Solar Production Prediction Based on Non-linear Meteo Source Adaptation ..................................................353
Mariam Barque, Luc Dufour, Dominique Genoud, Arnaud Zufferey, Bruno Ladevie, and Jean-Jacques Bezian

Scalable Approaches to Integration in Heterogeneous IoT and M2M Scenarios ..............................................358
Alex C. Olivieri and Gialuca Rizzo

Using 5G Technologies in the Internet of Things Handovers, Problems and Challenges ..........................................................364
Borja Bordel Sánchez, Álvaro Sánchez-Picot, and Diego Sánchez De Rivera

Experiences with RFID Technology to Manage Information during Natural Disasters ..........................................................370
Miguel A. Wister, Pablo Pancardo, Francisco D. Acosta, J.A. Hernández-Nolasco, and Eddy Sánchez-Delacruz

ITAUC 2015
Session 1: Intelligent Techniques and Algorithms for Ubiquitous Computing

Context-Aware Applications in Mobile Sink of Wireless Sensor Networks .................................................. 376
  Chia-Hsin Cheng, Yeong-Long Shiue, Wei-Chia Lo, and Hsing-Chung Chen

The Impact of Use of Information Technology Teaching for Kindergarten Education ........................................ 380
  Yen-Tsung Lin, Hsing-Chung Chun, and Shu-Hui Chuang

Double K-Folds in SVM .......................................................................................................................... 384
  Fengming Chang, Hsing-Chung Chen, and Hsiang-Chuan Liu

A New Uighur Automatic Summarization Method .................................................................................. 388
  Xiaodong Yan

A Patient-Driven Mobile Medical Information System Applying to Physician Clinical Care ......................... 394
  Ching-Kan Lo, Ye-Chi Wu, Cheng-Hung Chuang, and Hsing-Chung Chen

A Mobile Nursing App Applying to the Wound Care and Drug Administration of Patients ......................... 399
  Ching-Kan Lo, Sin-Sen Chang, Cheng-Hung Chuang, and Hsing-Chung Chen

MCNCS 2015

Session 1: Security, Wireless Sensor Network and e-Commerce

An AP Selection with RSS Standard Deviation for Indoor Positioning in Wi-Fi ........................................... 403
  Fong-Mao Jhuang, Chi-Fu Hung, Chiu-Ching Tuan, Yi-Chao Wu, and Fang-Yie Leu

Applying Web Crawlers to Develop a Sale Management System for Online Malls ...................................... 408
  Yu-Jen Chang, Fang-Yie Leu, Shih-Chieh Chen, and Hei-Lam Wong

  Sen-Tarng Lai and Fang-Yie Leu

Constructing Military Smartphone Usage Criterion of Cloud-DEFSOP for Mobile Security ........................ 420
  Tien-Sheng Lin, I. Long Lin, and Fang-Yie Leu
PISPIS 2015

Session 1: Security Issues in Public Internet Services

Soliciting Unexpected Traffic Flows into VoLTE .................................................................426
  Junyoung Park, Taeyoung Jung, Jaein Kim, and Kangbin Yim

Precise Exposure Control for Efficient Eye Tracking .........................................................431
  Junghoon Park, Taeyoung Jung, and Kangbin Yim

The Behavior-Based Analysis Techniques for HTML5 Malicious Features .......................436
  Hyun Lock Choo, Sanghwan Oh, Jonghun Jung, and Hwankuk Kim

Session 2: Privacy and Social Issues in Public Internet Services

NTFS Directory Index Analysis for Computer Forensics ................................................441
  Gyu-Sang Cho

Simplified 3D Hologram Heart Activity Monitoring Using a Smartphone .........................447
  Tharoeun Thap, Yunyoung Nam, Hee-Won Chung, and Jinseok Lee

Analysis of Statistical Methods for Automatic Detection of Congestive Heart Failure and Atrial Fibrillation with Short RR Interval Time Series ........................................452
  Kwon Ha Yoon, Tharoeun Thap, Chang Won Jeong, Nam Ho Kim, Seung Noh, Yunyoung Nam, and Jinseok Lee

A Real-Time Sleep Monitoring System with a Smartphone .............................................458
  Tae-Yang Han, Se-Dong Min, and Yunyoung Nam

SMEUCE 2015

Session 1: Sustainability Management of e-Business and Information Management

A Case Study of Valuation and Value Drivers in the Edible Oil and Fats Industry: TTET Union Corporation .................................................................462
  Kuei-Yuan Wang and Shu-E Chung

Professional Network Structure and Relationship Quality Effects on Member Knowledge Acquisition, Well-Being, and Performance .........................................................467
  Mei Hua Huang

Examining the Direct and Moderating Effects of Relational Exchange and Innovation Characteristics on New Product Adoption .................................................474
  Mei Hua Huang

How to Enhance Market Value? A Balanced Scorecard Perspective ................................480
  Ying-Li Lin
How Do Political Relations Affect State-Owned Bank Loans? ................................................................. 485
Ying-Li Lin

**Session 2: Ubiquitous Commerce Engineering and Operation Management**

The Relationship of Companies Social Connection and SEOs ................................................................. 489
Mei-Hua Liao, Li-Wen Chen, and Saburo Horimoto

Study of e-Business Strategy in Japanese Family Business and Long-Established Companies ................................................. 493
Hidekazu Sone and Mei-Hua Liao

An Exploratory Study on Mongolian Women Consumer Behavior toward Purchasing Luxury Fashion Brands ................................................................. 496
Ya-Wen Yu, Shao-Chun Chiu, Chen-Yu Chen, and Bolortuya Odser

Explore the Development of Social Enterprises in Taiwan from the Dynamic Capabilities Approach ................................................................. 502
Yen-Tsung Lin, Hsing-Chung Chun, and Shu-Hui Chuang

**WAIS 2015**

**Session 1: Privacy and Security**

Consideration of the XOR-operation Based Secure Multiparty Computation ................................................................. 506
Yuji Suga

Automated Detection of Drive-By Download Attack ............................................................................. 511
Hiroaki Kikuchi, Hiroaki Matsumoto, and Hiroshi Ishii

General Construction for the Resources Information Library of Shaanxi Folk Culture and Art ............................................................................. 516
Shuhua Zhang, Changsong Yang, and Tao Jiang

A Survey of Hardware Features in Modern Browsers: 2015 Edition ............................................................................. 520
Ko Takasu, Takamichi Saito, Tomotaka Yamada, and Takayuki Ishikawa

Study on Diffusion of Protection/Mitigation against Memory Corruption Attack in Linux Distributions ............................................................................. 525
Takamichi Saito, Hiroyuki Miyazaki, Takaaki Baba, Yoshifumi Sumida, and Yosuke Hori

**Author Index** ............................................................................................................................................. 531
