# TABLE OF CONTENTS

## VOLUME 1

### CONCURRENT SESSION TWO: FOCUS ON ROLLER COMPACTED CONCRETE

- An Evaluation of Soil-Cement Slope Protection for Embankments - Stair-Steped vs. Plating .......................................................... 1  
  K. Hansen, J. Rutledge, N. Rutigliano, B. Kirksey

- Molded Into Shape - The Lake Wohlford Replacement Dam .......................................................... 20  
  D. Hogan, G. Zamensky, C. Whitemore

- Design and Construction of the Upstream Geomembrane Facing System For the San Vicente RCC Dam Raise .......................................................... 28  
  J. Wilkes, G. Reed, G. Tarbox, M. Rogers

### CONCURRENT SESSION THREE: SPILLWAYS AND OPEN CHANNEL FLOWS

- Scott Dam Spillway - The Rigor of Training Walls, Gates and Dams .......................................................... 45  
  D. Hinton, B. Hughes, R. White

- Stilling the Waters: Stilling Basin Design for Stepped Chutes .......................................................... 56  
  S. Hunt, K. Kadavy

- Will the Spillway Walls Overtop? 3D CFD Provides the Answer .......................................................... 58  
  D. Gessler, S. Jamieson, D. Lopez

### CONCURRENT SESSION FOUR: TOOLS AND APPLICATIONS FOR BETTER EMERGENCY PLANNING

- Situational Awareness: Key to a Successful Implementation of Dam Safety- Emergency Management Program .......................................................... 74  
  R. Cruz, B. Blevins, C. Karam

- Look then LEAP! Look into your Levee Management Toolbox Then Add a Levee Emergency Action Plan (LEAP) .......................................................... 88  
  F. Brown

- You Never Fail Until You Stop Trying Developing a Dam Emergency Intervention Toolbox .......................................................... 96  
  P. Schweiger, G. Richards, K. Aulenbach, M. Lemieux

### CONCURRENT SESSION FIVE: IMPROVING SEISMIC RESILIENCE: PART ONE

- A Comparison of the Instrumented Becker Penetration Test (iBPT) to Existing Methods for Liquefaction Potential Assessment of Gravelly Soils at a Southern California Dam .......................................................... 108  
  A. Sturm, J. Dejong, M. Ghafghazi, D. Wahl, A. Dinsick, A. Perez, J. Hu

- Seismic Remediation of Frequently Loaded Levees in California Central Valley .......................................................... 118  
  Z. Zafir, J. Kompton, G. Mahnke, B. Lingwall

- Seismic Performance of Levees in the Kanto Plains North of Tokyo during the 2011 Tohoku Earthquake .......................................................... 134  
  D. Pradel, J. Wartman, B. Tiwari

### CONCURRENT SESSION SIX: INSTUMENTATION AND MONITORING GRAB-N-GO

- Remote Detection of Deep Conduit Flow by a Novel Brine-Enhanced Electrical Resistivity Surveying Method .......................................................... 150  
  J. Lolcama, J. Stuby

- How Big is My Rock Toe? A Geophysical Success Story .......................................................... 157  
  C. Winckler, J. France, A. Duvigneaud, B. Bass

- Using Aerial Infrared Thermography to Identify Seeps and Flows in Dam Inspections .......................................................... 169  
  E. Stockton
Using a Downlooker to Accurately Measure Open Channel Flow in Difficult Access Conditions: Avoid Building a Costly Weir ................................................................. 178
  J. Chandler, H. Ting, C. Brown

CONCURRENT SESSION SEVEN: MUDDY WATERS

Two-dimensional Flexible-mesh Modeling for Dam Break and Tailings Dams with Multiple Rheological Formulations .................................................................................................................. 193
Predicting Tailings Dams Breach Release Volumes for Flood Hazard Delineation ................................................................. 207
  J. O'Brien, N. Gonzalez-Ramirez, R. Tocher, K. Chao, D. Overton
Risk Assessment Approach for Coal Ash Impoundments .................................................................................................................. 225
  D. Bowles, L. Anderson, S. Chauhan, E. Luttrell, E. Sossenkina, D. Parker

CONCURRENT SESSION EIGHT: REAL WORLD GUIDANCE ON GATE AND OUTLETS

An Innovative Tainter Gate Dewatering System That Could Save Your Lake ................................................................. 257
  M. Boyd, D. Witkowski, L. Bukhair, V. Vasquez
Field Test and Analytical Methods for Safety Assessment of Radial Spillway Gates ................................................................. 270
  B. Commander, K. Gerst, M. Likavec, N. McGowan

CONCURRENT SESSION NINE: DAM SAFETY PROGRAM ISSUES FOR OWNERS AND REGULATORS

Ohio Department of Natural Resources (ODNR's) Statewide Dam Construction Monitoring Plan ................................................................. 283
  C. Davis, G. Harbane, S. Kramer, D. Gregor

CONCURRENT SESSION TEN: SOIL SHEAR STRENGTH SELECTION FOR STABILITY ANALYSIS PRACTICAL GUIDANCE

Soil Shear Strength Selection for Stability Analysis - Practical Guidance .................................................................................................................. 291
  J. France, J. Williams, C. Winckler, T. Adams

CONCURRENT SESSION TWELVE: EXPERT ADVICE ON DAM REMOVAL

The Jump from Pseudo 2D to Full 2D A Look Ahead at HEC-RAS 5.0 .................................................................................................................. 327
  M. Chilson
A Comparison of Results Between 1D, 2D, and Hybrid 1D-2D Dam Breach Outflow Routing ................................................................. 334
  M. Johnson, L. Beshoner
Recent Project Experience on Design of Repositories for Reservoir Sediments for the Carmel River ................................................................. 345
  B. Lingwall, S. Brown, C. Hall, C. Lukkarila, Z. Zafir
Improvements at Upper Kapahi Dam - Evolution of a Dam Safety Project on the Garden Isle ................................................................. 355
  C. Masching, S. Verigin

CONCURRENT SESSION THIRTEEN: IMPROVING SEISMIC RESILIENCE: PART 2

Complex Seismic Analysis at AV Watkins Dam .................................................................................................................. 364
  G. Eddy
Groundwater and Drilling Disturbance Effects on Liquefaction Characterization for an Embankment Dam and Foundation .................................................................................................................. 380
  D. Serafini, J. Schaefer, P. Shaffner
Old Dams, New Faults - Now What? .................................................................................................................. 396
  J. Stoessel, C. Knarr, N. Gersdorf, M. Muto, Z. Duron
CONCURRENT SESSION FOURTEEN: STATE OF THE PRACTICE IN RISK ASSESSMENT:
PART ONE

Misconceptions about Quantitative Risk Assessments of Dams ......................................................... 409
  R. Davidson
Risk Reduction vs. Resiliency - The Intersection of Social, Economic, and Infrastructure Systems ........ 427
  R. Beduhn

CONCURRENT SESSION FIFTEEN: BEACH MODELS! NOW THAT WE HAVE YOUR
ATTENTION WE MEANT BREACH MODELS

Experimental Modeling of Levee Failure Process due to Overtopping ................................................... 435
  A. Tabrizi, E. Eleffy, L. Larocque, M. Chaudhry, J. Imran, I. Kahn
User Guide to WinDAM C Earthen Embankment Soil Inputs ......................................................... 446
  K. Visser

CONCURRENT SESSION SIXTEEN: CASE STUDIES IN DAM CONSTRUCTION

How Many Challenges Can One Dam Have?? and You Want the Repairs Made in How Many Days??
Designing and Constructing Risk Reduction Measures at Beaver Park Dam ......................................... 455
  D. Yadon, G. Glunz, J. Clark, M. Gavin

CONCURRENT SESSION SEVENTEEN: PROFESSORIAL PERSPECTIVES ON RISK

Considering Uncertainty in Consequence Estimates in Risk Analysis for Dams ................................... 480
  M. McCann, G. Paxson

CONCURRENT SESSION EIGHTEEN: HOW CAN DAM OWNERS BUY DOWN THEIR RISK?
PART ONE

Beyond PFMs Incorporating Environmental and Economic Risk into Screening Level Risk Analysis ........ 504
  J. Clark, V. Scharnhorst
A Performance Based Approach to Risk Assessment for Dams .......................................................... 524
  M. Mutto, N. Gersdorff, M. Cruz, J. Yen, Z. Duron

CONCURRENT SESSION NINETEEN: SUPER-SOLID GROUTING TECHNIQUES

Unique Use of Grout Column Support of Karst Features below Logan Martin Dam, AL ......................... 531
  R. Findlay, B. Greene, D. Bruce, B. Williams, J. Williams, R. Mickwee

VOLUME 2

Application of Modified GIN-Method for Grouting the Duck River Dam Foundation ......................... 545
  J. Esterhuizen, T. Cotton, R. Riker
Depression at Nesbitt Dam ..................................................................................................................... 572
  C. Beenenga, J. Myers, A. Nokovich

CONCURRENT SESSION TWENTY: CASE STUDIES IN SPILLWAY REHAB

Rehabilitation of Canton Dam with the World's largest Fusegates ..................................................... 585
  H. Kocahan, J. Waldie, D. Morales, N. Mathis
Need to Save Millions on Your Spillway Rehabilitation? Consider Combining Rock Scour Analysis
and CFD Modeling, ............................................................................................................................... 600
  G. Glunz, G. Adams, F. Lan, M. Gustin
CONCURRENT SESSION TWENTY ONE: SOAPBOX: LEVERAGING LIMITED RESOURCES FOR SAFER DAMS

Leveraging Limited Resources for Safer Dams ........................................................................................................ 612
  K. Mills

CONCURRENT SESSION TWENTY TWO: STRUCTURAL ISSUES: WANAPUM DAM

The Wanapum Dam Spillway Incident: Response, Remediation and Lessons Learned ........................................... 620
  D. Mishalanie, G. Rollins, R. Simpson, I. Hunter, D. Thompson
Repairing the Wanapum Spillway Crack ............................................................................................................. 634
  A. Stein, B. Hepworth, A. Hughes, P. Krumm
Wanapum Spillway Crack Development Root Cause Analysis ......................................................................... 646
  A. Jones, K. Snyder, R. Charlwood, K. Marshall, D. Campbell

CONCURRENT TWENTY THREE: MAKING MAJOR PROGRESS IN LEVEE SAFETY: PART ONE

The Levee Vortex: Lessons Learned Dealing With The Force .............................................................................. 663
  D. Fricke, L. Jha
Upcoming Changes for EM 1110-2-1913: Design, Construction and Evaluation of Levees ................................. 666
  S. Shewbridge, M. Navin, N. Schwanz, N. Vroman
Forensic Study of Levee Performance Records in California ........................................................................... 680
  S. Punyamurthula, R. Millet, N. Malyala

CONCURRENT SESSION TWENTY FOUR: BLUE RIBBON PRESENTATIONS ON HYDROLOGY & HYDRAULICS

The Effects of Soil Map Changes on Spillway Design Floods ............................................................................ 686
  A. Hess, W. Kingston
Yes, HEC-ResSim Can Do That ......................................................................................................................... 693
  K. Fagot, K. Shurtz

CONCURRENT SESSION TWENTY FIVE: LEARNING FROM FEDERAL AGENCY INITIATIVES

Rewards and Challenges of Growing the Bureau of Indian Affairs Safety of Dams Program .......................... 709
  C. Goss, J. Byers, R. Tisdale, M. Minihane
It's Live! - National Deployment of the NRCS DamWatch® System to Monitor 11,900 Watershed Dams .............. 725
  N. Gee, S. Foster
Bureau of Reclamation Examination of Inaccessible Features and Case Studies ........................................... 739
  N. Gee, S. Foster

CONCURRENT SESSION TWENTY SIX: SPOTLIGHT ON CONCRETE DAMS

Unraveling the Mystery of Lake Jackson Dam ................................................................................................. 748
  C. Davis, D. Green, M. Aveni, M. Mohan
FEM-analysis of a Concrete Dam in Northern Sweden .................................................................................... 762
  F. Johansson, I. Ekstrom, C. Pi, R. Malm, V. Carlsson

CONCURRENT SESSION TWENTY SEVEN: MAKING MAJOR PROGRESS IN LEVEE SAFETY: PART TWO

Piping from Past Floods Threatening Tomorrow's Future .................................................................................. 770
  G. Sills, L. Harder
CONCURRENT SESSION TWENTY EIGHT: NEW DIMENSIONS IN FLOOD MODELING: PART TWO

Dam Breach Analysis with HEC-RAS 5.0 2D, Improvements to Accuracy, Hazard Data Outputs and Efficiency, Case Examples ......................................................... 789
  K. Weaver, M. Forest, M. Blum

Use of Flood Modeller Pro to Develop Linked, Alternating 1-D and 2-D Models of Overland and in-River Flows for Breach of a Large Off-Channel Ring Dam ........................................ 798
  T. Jantzen, D. McClelland, J. Eichler, N. Gullo

CONCURRENT SESSION TWENTY NINE: DECADE DAM FAILURES PART ONE

ASDSO Decade Dam Failure Series 1915 Failure of Lyman Dam Upstream of St. Johns in Apache County, Arizona ........................................................................................................ 816
  W. Aboshanp, M. Johnson

Failure of Sella Zerbino Secondary Dam in Molare, Italy ........................................ 818
  I. Alvi

CONCURRENT SESSION THIRTY: STATE OF THE PRACTICE IN RISK ASSESSMENT: PART TWO

Instrumentation And Failure Modes -What Do You Really Need To Monitor? .......................................................... 827
  J. Williams, J. Stateler, R. Raeburn, K. Aguillard, J. Nettle

Expanded Abstract Case Study FERC's Potential Failure Modes Analysis .......................................................... 846
  D. Durkee, S. Verigin, C. Buckles, M. Balven, O. Virgadamo, D. Panec

CONCURRENT SESSION THIRTY ONE: WEATHER WISDOM

Updating Virginia Statewide PMP-from Hurricanes to the Stippled Region .......................................................... 851
  B. Kappel, R. Bennet

Using a Stochastic Event Flood Model (SEFM) to Predict Frequency Floods at Friant Dam .......................................................... 864
  J. Wright

CONCURRENT SESSION THIRTY TWO: R & D ON INTERNAL EROSION

Three-dimensional Modeling of Geomorphic Features Within a Levee System .......................................................... 887
  L. Polanco-Boulware, J. Rice

Large-scale Filter Performance Tests ......................................................................................................................... 905
  T. Howard, C. Rudkin, P. Irey

Backward Erosion Piping: A Historical Review and Discussion of Influential Factors .......................................................... 919
  B. Robbins, V. Beek

Timberlake Dam Failure .................................................................................................................................................. 939
  T. Roberts

CONCURRENT SESSION THIRTY THREE: DECADE DAM FAILURES PART TWO

Hadlock Pond Dam Failure - In Court ........................................................................................................................................ 947
  R. Wooten, P. Spangenberg

10th Anniversary of Taum Sauk Upper Dam Failure ........................................................................................................ 960
  R. Clay, W. King

CONCURRENT SESSION THIRTY FOUR: MAKING DAM INSPECTIONS A BREES

What is Your Dam's Score? Using Tablet-based Dam Inspections to Enhance Condition Assessments ................. 976
  M. Johnson, T. Timberlake, T. Scott
Use of Unmanned Aircraft Systems (UAS) for the USDA-Natural Resources Conservation Service in Utah

N. Evenstad, B. Smart

Are We Preventing Dam Failures? Rethinking Surveillance and Monitoring

D. Lord, E. Gross

CONCURRENT SESSION THIRTY FIVE: HOW CAN DAM OWNERS BUY DOWN THEIR RISK?

PART TWO

Maximizing the Insurability of Your Dam

T. Jameson, W. Buckman, A. Darin

POSTER PRESENTATIONS

Assessment of Undocumented Dams

K. Dirocco, M. Quinn, K. Paul, S. Stanton

Dam Safety Challenges in Florida

R. Gooljar

Long-Term Force Monitoring of Pre-stressed Anchors used on Dam Rehabilitation Projects

S. Islam, K. Purinton

A Race Against Mother Nature, Emergency Dam Safety Repairs at 11,000 feet

N. Miller, S. Anselmo

Decade in Dam Failure

T. Roberts
