16th International Symposium on  
**AERODYNAMICS, VENTILATION & FIRE IN TUNNELS**  
Seattle, USA: 15–17 September 2015

## CONTENTS

<b>FOREWORD</b>	1
<b>ASSESSMENT AND DESIGN</b>	
Evaluation of the radiative hazard in tunnel fires <i>A Mos, CETU (Centre of Expertise on Tunnels), France</i>	5
Optimization of jet fan deployment and operating conditions in lay-bys and in proximity of tunnel portals <i>R Gertl, J Mütterlein, D Stix, ILF Consulting Engineers Austria GmbH, Austria</i>	21
Review on the configuration of outlet duct for air supply in a tunnel – aiming for safety improvement <i>S Masukura, R Takagi, Central Nippon Expressway Company Limited; A Kobayashi, Central Nippon Highway Engineering Tokyo Company Limited; T Chihara, K Takahashi, FITUT Laboratory Company Limited, Japan</i>	37
Scaled experiments using the helium technique to study the vehicular blockage effect on longitudinal ventilation control in tunnels <i>W U Rojas Alva, G Jomaas, A S Dederichs, Technical University of Denmark, Denmark</i>	49
<b>FIRE</b>	
FFFS for flammable liquid fires in road tunnels <i>K J Harris, J L Harder, WSP   Parsons Brinckerhoff, USA</i>	67
Generic quantification of consequences of road-tunnel fires <i>R Brandt, N Riklin, V Butty, S Frey, HBI Haerter, M Schubert, Matrisk GmbH; N P Høj, HOJ Consulting GmbH; C Gammeter, B Gogniat, Federal Roads Office (FEDRO), Switzerland</i>	81
Impact of fixed fire-fighting system on road tunnel structure <i>Y Li, D Hahm, I Maevski, Jacobs Engineering, USA</i>	97
Managing tunnel emergency and evacuation in most populous Indian city – A case of Delhi MRTS <i>A Gupta, A Singh, R Jain, Delhi Metro Rail Corporation Limited, India</i>	113
Tunnel fire sprinklers – then, now and future <i>G English, City of Seattle, USA</i>	127

Performance of a state-of-the-art low pressure water spray system – results from full scale tunnel fire tests 141  
*M Lakkonen, IFAB - Institute for Applied Fire Safety Research; A Feltmann, D Sprakel, FOGTEC Fire Protection, Germany*

Characterization of electric vehicle fires 157  
*F Colella, N F Ponchaut, H Biteau, K Marr, V Somandepalli, Q C Horn, R T Long, Exponent, Inc., USA*

## **GUIDELINES AND THEIR APPLICATION**

Minimising the height of a vent stack while still complying with EPA requirements 171  
*B Dandie, RRT Pty Ltd; A Bagis, WSP | Parsons Brinckerhoff; C Richardson, Air Noise Environment, Australia*

PIARC and fixed fire-fighting systems: A report on working group activity 185  
*N Harvey, Hatch Mott MacDonald, USA; L Fielding, London Bridge Associates Ltd., UK; B Dandie, RRT Pty Ltd, Australia; R Brandt, HBI Haerter, Switzerland; N Rhodes, WSP | Parsons Brinckerhoff, USA; R Hall, Mott MacDonald, UK; H Ingason, SP Fire Research, Sweden*

Development of new US standards and guidelines for tunnel ventilation 197  
*I Maevski, Y Li, Jacobs Engineering, USA*

## **MAJOR INCIDENTS – DESIGN AND RESPONSE**

The effect of longitudinal ventilation on tenability during egress from passenger trains in tunnels during fire emergencies 211  
*M Winkler, R Carvel, University of Edinburgh, UK*

The mitigation of explosion effects in confined tunnel environments 227  
*C Biotto; E Draper, Mott MacDonald; E J Meyrick, A R Dima, J F Hellander, Imperial College London, UK*

## **METRO AND RAIL**

### **Control and Design**

Consequences of a velocity increase of passenger trains for oncoming freight trains – Aerodynamic simulations and measurements for the Gotthard Rail Tunnel 245  
*M Flueckiger, P Reinke, S Nyfeler, HBI Haerter Ltd, Switzerland*

Fire localization and ventilation control system of the Gotthard Base Tunnel 261  
*C Brander, Pöyry Switzerland Ltd, Switzerland*

Mont-Royal Tunnel: The challenges of upgrading a century-old rail tunnel for the 21<sup>st</sup> century 271  
*I Bowman, B Kumar, C Doucette, Hatch Mott MacDonald Ltd; J-P Pelletier, Agence Métropolitaine de Transport, Canada*

## METRO AND RAIL

### Full Scale Testing

Verifying the performance of emergency ventilation systems by cold smoke tests <i>B Ozince, Marmaray BC1 Bosphorus Crossing Project, Turkey; M Tabarra, D Abi-Zadeh, Arup, UK</i>	N/A
Global tests of the Toulouse Metro (France) <i>J Veyet, F Duet, Cofely Axima GDF SUEZ, France</i>	299

## METRO AND RAIL

### Simulation, Modelling and Testing

Coupling ventilation and egress analyses to design a safer station <i>A Louie, S Li, WSP   Parsons Brinckerhoff, USA</i>	315
Cross-City-Link Zurich – Proof of proper functionality of the emergency ventilation system in the case of a fire using smoke tests, measurements and CFD simulation <i>R Yousaf, J Badde, S Wälchli, Pöyry Switzerland Ltd, Switzerland</i>	327
Computational analysis to assess the performance of on-board high pressure water mist systems for rail cars for improving survivability <i>I Ong, Hatch Mott MacDonald; T Eng, G Kildare, Los Angeles County Metropolitan Transportation Authority (Metro), USA</i>	343
The worst fire location in tunnel fires with natural ventilation <i>Z Yuan, B Lei, H Bi, Southwest Jiaotong University, China</i>	359
Smoke/thermal control of a transit terminal: An integrated and optimization design process <i>A X Wang, N Rhodes, WSP   Parsons Brinckerhoff, USA</i>	373

## METRO AND RAIL

### Thermodynamics and Cooling

Acceptability of air velocity from a human thermal comfort and safety perspective <i>M Legg, M Gilbey, WSP   Parsons Brinckerhoff, UK</i>	389
Application of heat recovery to long tunnels <i>J Thompson, M Gilbey, M Legg, WSP   Parsons Brinckerhoff, UK</i>	403
Diesel locomotive operation with steep grade, high ambient temperature, and long consist <i>A Bagis, WSP   Parsons Brinckerhoff; B Dandie, RRT Pty Ltd, Australia</i>	419
Interaction between station openings and environmental control systems <i>C Graham, C Gonzalez Mesa, M Gilbey, WSP   Parsons Brinckerhoff, UK</i>	431

## **PRESSURE TRANSIENTS**

- The behaviour of long entrance hoods for high speed rail tunnels 449  
*A E Vardy, University of Dundee; R Sturt, Arup; C J Baker, D Soper, University of Birmingham, UK*
- Dynamic pressure tightness of very high speed train CRH380D 467  
*M Sima, B Schulz, P Gölz, E Thoss, Bombardier Transportation, Germany*
- Reduction of the pressure gradient in railway tunnels using vented tunnel portals 483  
*D Heine, G Lauenroth, S Huntgeburth, K Ehrenfried, German Aerospace Center DLR Göttingen, Germany*

## **RISK ASSESSMENT**

- Risk assessment of zero-flow ventilation strategy for fires in bidirectional tunnels with longitudinal ventilation 501  
*I Nakahori, T Sakaguchi, Sohatsu Systems Laboratory, Japan; B Kohl, C Forster, ILF Consulting Engineers, Austria; A Vardy, University of Dundee, UK*
- Methodologies for accurate risk modeling in the context of integrated quantitative risk analysis 517  
*C Forster, B Kohl, ILF Consulting Engineers; S Wiesholzer, Austrian Ministry for Transport, Innovation and Technology, Austria*

## **ROAD AND RAIL**

### **Flow Challenges**

- On the prediction of pressure losses in complex flow scenarios using CFD 535  
*J Prince, J Peiro, Imperial College; M Tabarra, J Alexander, Arup Ltd, UK*
- Smoke confinement velocity and back-layering distance in tunnel fires 549  
*F Colella, J S Rosen, N F Ponchaut, Exponent, Inc., USA*

## **ROAD TUNNELS**

### **Operation and Management**

- Development and implementation of performance metrics for operations and maintenance: Port of Miami tunnel project, a public private partnership 563  
*D Dirgins, WSP | Parsons Brinckerhoff; D Markt, Q-Free Open Roads, USA*
- An owner's perspective: using practical engineering to retrofit existing roadway tunnels in Seattle with an eye to performance, operability, maintainability, and best value 579  
*D Haight, Z Griffith, A Chepel, Washington State Department of Transportation; P Bennett, Sound Transit, USA*

Ventilator jet fan fault detection method using vibration analysis and future challenges 595  
*H Fukasawa, K Yamamoto, Central Nippon Expressway Company Limited; A Kobayashi, M Yokota, Central Nippon Highway Engineering Tokyo Company Limited; A Iwasaki, Gunma University, Japan*

## ROAD TUNNELS

### Ventilation Control

A long urban road tunnel that has longitudinal and transversal ventilation systems combined in it 607  
*S Kubota, H Saito, Metropolitan Expressway Company Limited; Y Mikame, Shutoko Engineering Company Limited; H Yanagi, Echoplan Company Limited; A Mizuno, Kogakuin University Tokyo, Japan*

Outline of ventilation control strategy for urban tunnel 621  
*S Kume, K Kanazawa, H Hara, Hanshin Expressway Company Limited, Japan*

Ventilation of the E4 Stockholm Bypass 631  
*R Brandt, E Engman, S Lucchini, HBI Haerter, Switzerland; L Elertson, C Berg, Swedish Transport Administration; U Malmros, AF Consulting Engineers, Sweden*

Ventilation simulation of a large and complex road tunnel: A safe journey – E4 the Stockholm bypass project 645  
*L Elertson, Swedish Transport Administration, Sweden*

On effective close-loop control of longitudinal ventilation in road tunnels in case of fire 661  
*P Altenburger, I Riess, R Brandt, HBI Haerter AG, Switzerland*

On transient issues in road-tunnel ventilation design and control 677  
*M Bettelini, S Rigert, Amberg Engineering Ltd, Switzerland*

Coordinating two-tunnels ventilation control for maintaining air pollution at portals facing each other 693  
*I Kon, Nippon Expressway Research Institute Company Ltd; M Yuhara, AMEC Consultants Co., Ltd; A Mitani, Sohatsu Systems Laboratory Inc., Japan*

(In)appropriate control of road tunnel ventilation systems 703  
*A E Vardy, University of Dundee, UK*

Application of air purification system in road tunnel projects 717  
*S K H Lai, WSP | Parsons Brinckerhoff, Hong Kong; W Y M Xie, WSP | Parsons Brinckerhoff, Singapore*

## **SEATTLE**

- Optimization of mechanical ventilation operations for State Route 99 Tunnel 725  
*Y Liu, S Cassidy, HNTB Corporation; S Everett, Washington State Department of Transportation, USA*
- Final testing of fire detection and fire suppression systems at Mount Baker Ridge and First Hill Tunnels in Seattle 745  
*I Maeviski, B Josephson, R Klein, Jacobs Engineering; D Haight, Z Griffith, Washington State Department of Transportation, USA*
- Sizing of extraction ventilation system and air leakage calculations for SR99 tunnel fire scenarios 755  
*Y Liu, S Cassidy, HNTB Corporation, USA*

## **AUTHOR INDEX**
