# Table of Contents

*A Simple Surface Realization Engine for Telugu*
Sasi Raja Sekhar Dokkara, Suresh Verma Penumathsa and Somayajulu Gowri Sripada ............. 1

*Input Seed Features for Guiding the Generation Process: A Statistical Approach for Spanish*
Cristina Barros and Elena Lloret ................................................................. 9

*A Domain Agnostic Approach to Verbalizing n-ary Events without Parallel Corpora*
Bikash Gyawali, Claire Gardent and Christophe Cerisara ................................... 18

*Inducing Clause-Combining Rules: A Case Study with the SPaRKy Restaurant Corpus*
Michael White and David M. Howcroft ......................................................... 28

*Reading Times Predict the Quality of Generated Text Above and Beyond Human Ratings*
Sina Zarrieß, Sebastian Loth and David Schlangen ........................................ 38

*Moving Targets: Human References to Unstable Landmarks*
Adriana Baltaretu, Emiel Krahmer and Alfons Maes ...................................... 48

*A Framework for the Generation of Computer System Diagnostics in Natural Language using Finite State Methods*
Rachel Farrell, Gordon Pace and M Rosner .................................................. 52

*A Snapshot of NLG Evaluation Practices 2005 - 2014*
Dimitra Gkatzia and Saad Mahamood ......................................................... 57

*Japanese Word Reordering Executed Concurrently with Dependency Parsing and Its Evaluation*
Tomohiro Ohno, Kazushi Yoshida, Yoshihide Kato and Shigeki Matsubara .......... 61

*Sentence Ordering in Electronic Navigational Chart Companion Text Generation*
Julie Sauvage-Vincent, Yannis Haralambous and John Puentes .......................... 66

*Natural Language Generation from Pictographs*
Leen Sevens, Vincent Vandeghinste, Ineke Schuurman and Frank Van Eynde ........ 71

*Translating Italian to LIS in the Rail Stations*
Alessandro Mazzei ......................................................................................... 76

*Response Generation in Dialogue Using a Tailored PCFG Parser*
Caixia Yuan, Xiaojie Wang and Qianhui He .................................................. 81

*Generating Récit from Sensor Data: Evaluation of a Task Model for Story Planning and Preliminary Experiments with GPS Data*
Belén A. Baez Miranda, Sybille Caffiau, Catherine Garbay and François Portet ........ 86

*Generating and Evaluating Landmark-Based Navigation Instructions in Virtual Environments*
Amanda Cercas Curry, Dimitra Gkatzia and Verena Rieser .............................. 90

*Summarising Unreliable Data*
Stephanie Inglis ............................................................................................. 95

*Generating Descriptions of Spatial Relations between Objects in Images*
Adrian Muscat and Anja Belz ........................................................................ 100
Towards Flexible, Small-Domain Surface Generation: Combining Data-Driven and Grammatical Approaches
Andrea Fischer, Vera Demberg and Dietrich Klakow ...................................................... 105

JSrealB: A Bilingual Text Realizer for Web Programming
Paul Molins and Guy Lapalme ......................................................................................... 109

A Game-Based Setup for Data Collection and Task-Based Evaluation of Uncertain Information Presentation
Dimitra Gkatzia, Amanda Cercas Curry, Verena Rieser and Oliver Lemon ...................... 112

Generating Referential Descriptions Involving Relations by a Best-First Searching Procedure – A System Demo
Florin Haque and Helmut Horacek ................................................................................. 114

Generating Image Descriptions with Gold Standard Visual Inputs: Motivation, Evaluation and Baselines
Josiah Wang and Robert Gaizauskas ............................................................................ 117

Designing an Algorithm for Generating Named Spatial References
Rodrigo de Oliveira, Yaji Sripada and Ehud Reiter ..................................................... 127

Narrative Generation from Extracted Associations
Pierre-Luc Vaudry and Guy Lapalme ............................................................................. 136

Topic Transition Strategies for an Information-Giving Agent
Nadine Glas and Catherine Pelachaud .......................................................................... 146

Creating Textual Driver Feedback from Telemetric Data
Daniel Braun, Ehud Reiter and Advaith Siddharthan .................................................. 156

A Personal Storytelling about Your Favorite Data
Cyril Labbé, Claudia Roncancio and Damien Bras ..................................................... 166
