Geomodel 2015 – 17th Scientific-Practical Conference on Oil and Gas Geological Exploration and Development

Gelendzhik, Russia
7-10 September 2015

ISBN: 978-1-5108-1413-4
# TABLE OF CONTENTS

Russian Oil and Gas Industry in the Context of Low Oil Prices: Problems and Prospects ......................................................... 1  
Y. Ampilov

Substantiation of Boundary of Abalak-Bazhenov Deposits Based on Research of New Core Data .................................................. 6  
I. Panchenko, V. Nemova

The Callovian-Turonian Reservoirs in the Western Yenisei-Khatanga Regional Trough ................................................................. 11  
D. Lezhnin

Analysis of the Hydrocarbon Resource Base Formation and Regional Characteristics of Hydrocarbon Potential of Bathonian Bathonian Reservoir in the West Siberian Basin ...................................................... 16  
V. Kazanenkov, M. Shaporina

Oil and Gas Potential of Frolovskaya Suite for Krasnoleninsk Arch .................................................................................. 21  
S. Belousov

Geological Structure of Pimskogo Seismostratigraphic Complex (the Case of Central - Gydan area) .............................................. 26  
T. Koropova, V. Scherbanenkov, T. Chernishova

Heuristic Method for Assessing the Resources and Oil Reserves of the West Siberian Oil and Gas Province (Frolovskaya structure, Nizhnevartovsk and Surgut) ................................................................. 31  
L. Gaysina, R. Kuramshin

The Geological Structure and Formation Conditions of Lower Cretaceous Deposits of the Festival Oilfield ................................................................. 36  
M. Solovev, A. Kalinin

The Magmatic Complexes and Geodynamic Evolution of the Pre-Yenisey Sedimentary Basin (South-East Of Western Siberia) ............... 41  
Y. Filippov, S. Sursen

Tectonic Processes' Influence on the Traps Formation of the Alexandrov Arch ........................................................................ 46  
A. Kalinin, M. Solovev

Priob Zone YNAO Prejurassic Basement Top Structure Predicted by Gravimetry and the Petroleum Potential Assessmen........................................ 51  
N. Yaitskiy

Fluid-Dynamic Anomalies of Seismic Data in the Fields of Western and Eastern Siberia ...................................................... 56  
Y. Zagorovskiy

High Resistive Anomalies Beneath Permafrost Layer as New Hydrocarbon Prospecting Indicator .................................................. 60  
D. Yakovlev, A. Afanasenkov, R. Volkov

3D Scale-based Geostatistical Simulation of Porosity Heterogeneity in Sandstone Formation ...................................................... 65  
W. Al-Mudhafar, M. Bondarenko

3D Pixel-Based Stochastic Lithofacies Modeling in a Tidal Sandstone Reservoir .............................................................. 70  
W. Al-Mudhafar, M. Bondarenko

Application of Frequency-Dependent Analysis for Prediction of the Relative Changes in the Permeability of the Reservoir .................. 75  
A. Rozhkov, G. Goloshubin, A. Korolev

Effective Use of Seismic Interpretation for the Tasks of Geological Modeling .............................................................. 80  
Y. Dyakonova, D. Machukaev, Y. Biryukova

Viscosified Oil-Displacing Composition NINKA-Z: From Lab to Field. .............................................................................. 85  
I. Kushinov, L. Stasyeva, V. Kozlov

The Forecast of Change Field and Operational Wells According to the History and Research of Field ........................................... 90  
M. Bondarenko

Geological Prospects for The Searching of Missed Productive Reservoir Intervals on Samotlorskoe Field .................................................. 95  
P. Utkin, T. Abramova, S. Shipichkin, E. Efremova

Physicochemical and Integrated Technologies for Enhanced Oil Recovery From Deposits With Difficult-to-Recover Reserves ................ 101  
L. Frontina, V. Kushinov, I. Kushinov

Enhanced Oil Recovery on the Basis of Invert-Emulsion Solution with Simultaneous Use of Acid Composition ............................................. 106  
V. Sergeyev

New Perspectives of High Productive Wells Drilling in Low Permeable Reservoirs in West Siberia .............................................. 111  
O. Boldina, E. Tyagunova, E. Samukova, Y. Ionskoff

Intensification of Oil Production Under Vibration Impact on the Producing Formation ...................................................... 116  
E. Marfin, Y. Kravtsov, A. Abdashitov, I. Metelev
The Estimation of Accuracy of the OBN's Positions Calculation ................................................................. 121
E. Zhemchuzhnikov, D. Popov
Seismic Recording Systems at the Fifth Technological Level of Land Seismic ............................................... 126
A. Cherepovskiy
The Particularities of 3D Seismic Data Processing for Compensation of Influence of Sedimentary Cover of Target Horizons .............................................................................................................. 131
V. Klykova
Application of Robust Surface-Consistent Deconvolution ............................................................................. 136
N. Zhuravsko, Y. Laptev, O. Adamovich, A. Timakin
Azimuth-Based Classification of Surveying Systems ..................................................................................... 141
S. Gorbachov
Marine Seismic Data Processing With Slanted Receivers Line ...................................................................... 146
M. Ryabinitskii, D. Finkov
Marine Data Processing Results Reliability Increasing ............................................................................... 151
B. Esinov
3D Seismic Data Processing Technology for Near Surface Effects Compensation Using Surface Waves Frequency Dispersion Curves ........................................................................................................ 156
O. Adamovich, Y. Laptev
Technology Features Wide-Azimuth Seismic Data Processing on Example Jurassic-Cretaceous Deposits of Western Siberia ................................................................................................................................ 161
R. Boyarkin, I. Kerosov, L. Popova, A. Barantcev, A. Inozemtsev
Applying Full-Azimuth Seismic Surveys for Details of the Terrigenous and Carbonate Reservoirs at One Oil Field in Eastern Siberia ................................................................................................ 166
A. Sorokin, A. Inozemtsev, E. Lubimov
Method for Resolving the Influence of Near Surface Heterogeneities During Velocity Depth Model Building .................................................................................................................................................................................. 171
E. Svistova, B. Esinov, I. Radionov, A. Korolev
Influence of Local Velocity Heterogeneities on the Seismic Wave Field and Their Integration into the Depth - Velocity Model ...................................................................................................................... 176
E. Rossiyaskaya, A. Korolev, E. Fomicheva
Full-Azimuth Seismic Data Processing to Study Anisotropic Properties in the Timano-Pechora Region ................................................................. 181
O. Litvyukhova, E. Voronovichka, A. Korolev, S. Pletsov
Nonlinearity of Geological Environment in Case of Broadband Impact. Signal Spectrum Enhancement to Higher Frequencies ................................................................................................................................. 186
A. Arkhipov
Advantages of the PSR-method for Eastern Siberia Seismic Data Processing (Yakutia) ................................ 191
V. Kondrashkov, A. Glagolev
Aspects of Petrophysical Justification of Volumetric Parameters of Turonian Productive Reservoirs in Western Siberia ........................................................................................................................................ 197
A. Tegloukhov, A. Malishkov
Determination of Reservoir Properties with Control of Saturation by Method of NMR ................................. 202
E. Borisova, K. Vyatkina, V. Gileva, R. Shulga, I. Shakhmatov
Increase the Efficiency of the Forecast of Oil and Gas TRAPS Tight Oil (Hadumskaya Suite Ciscaucasia) ............................................................................................................................................... 207
I. Lyukshina, G. Shilov, R. Mustaev, K. Odintsova
Generation and Conditions Formation of Hydrocarbon Deposits in Kyulong Basin by Simulation Results Hydrocarbon Systems ........................................................................................................................................ 212
R. Mustaev, W. Hai, V. Kerimov, E. Leonova
The Influence of Lunar and Tidal Forces on the Gas Composition of Subsoil Geosphere ..................................... 217
O. Navnrotsiy, A. Zatov, A. Dotsenko, M. Bogdanov
Correlation of Anomalies of the Mid-Frequency Microseisms With Gas Field .................................................. 221
E. Hogoev, T. Chichinina
Application of Anisotropic Joint Total Variation to Inversion of Seismic and Magnetotelluric Data ................ 226
D. Molodtsov, V. Troyan, N. Bobrov, D. Popov
Quick Assessment of 3D Distribution of Geophysical Parameters to Predict Porosity and Permeability Properties of Rostashi-Konnovkoye Field .................................................................................. 231
E. Lukyanov
Analysis of Experience of Actual Competencies Formation in Russian Petroleum Sector ................................ 235
K. Fedorov, L. Prohoda-Shumsky
Perform a Pilot Studying Result for Testing of Enhanced Diversity Stack .................................................... 240
D. Litvichenko, A. Sorokin, A. Korotkov
