2014 International Conference on
Service Sciences (ICSS 2014)

Wuxi, Jiangsu, China
22 – 23 May 2014
2014 International Conference on Service Sciences
ICSS 2014
Table of Contents

Message from Conference Co-chairs ................................................................. ix
Conference Organization ...................................................................................... x
Program Committee ............................................................................................ xii
Reviewers ............................................................................................................ xiii

Service Science
A VOP-based Value Analysis and Optimization Method for Service Selection and Composition .......................................................... 1
Chao Ma, Xiaofei Xu, and Zhongjie Wang
A Distributed Service Invocation Approach for Cross-Organizational Data-Intensive Web Services ......................................................... 7
Jun Fang, Yinyan Yu, and Guiling Wang
Architecture Design for Service Network Deployment, Customization and Execution ........................................................................... 13
Meng Yu, Zhongjie Wang, Shaopeng Wang, and Xiaofei Xu
When are Referral Reward Programs Effective: A Perspective of Regulatory Fit Theory ........................................................................... 19
Li Huifan, Zheng Qiuying, and Cao Huarui
Incorporating Context into Web Services Discovery and Composition Process ....................................................................................... 25
Zhichao Zhang, Weiping Li, Wusheng Wang, and Zhonghai Wu
Manage Web Educational Knowledge Based on Knowledge Dimension Model .......................................................................................... 31
Jinyue Peng, Dongxing Jiang, and Xinyu Zhang
The Effect of Consumer's Construal Level on Willingness-to-Pay for Productive Consumption Tools ................................................................................. 37
Zheng Qiuying, Li Huifan, Cao Huarui, and Yao Tang
A Collaborative Filtering Recommendation Algorithm Based on User Preferences on Service Properties ............................................................... 43
Wenzhong Mu, Fanchao Meng, and Dianhui Chu
Software Service

An Optimal Service-Selection Model Based on Capability and Quality of Resource Service .................................................................47
   Xiaodong Zhang, Zhan Dechen, Lanshun Nie, Tianqi Zhao, and Xiao Xiong

Enterprise Service Composition Method Based on Collaboration .................................................................53
   Xue Xiao, Wang Shufang, Liu Zhizhong, and Huang Bijing

Petri Net-Based Context-Aware Service System Modelling: An Overview .........................................................60
   Wang Wusheng, Li Weiping, Wu Zhonghai, and Zhang Zhichao

Research of Electro-Hydraulic Camless Valvetrain System Based on AMESim .................................................................66
   Du Aimin, Chu Chuanchuan, and Zhang Yajie

A Medical Diagnostics Service Chain Optimization Method Based on Stochastic Petri Net .........................................................74
   Lei Wang, Bidou Wang, and Haoran Tian

Seal Extraction Based on Local Thresholding Techniques and Color Analysis .................................................................79
   Chengyun Wang, Zhenhua Guo, and Youbin Chen

Big Data

Context-Aware Trust Aided Recommendation via Ontology and Gaussian Mixture Model in Big Data Environment .................................................................85
   Zukun Yu, Chaochao Chen, Xiaolin Zheng, Weifeng Ding, and Deren Chen

Collaborative Filtering of Web Service Based on MapReduce .................................................................91
   Shihang Huang, Xue Jiang, Nan Zhang, Cheng Zhang, and Depeng Dang

Applying MapReduce Framework to Peer-to-Peer Overlay Network .................................................................96
   Pei Xiao, Xiaolu Zhang, Jin Wang, Jixian Zhang, Qiang Han, and Xuejie Zhang

Fast Modeling of Analytics Workloads for Big Data Services .................................................................101
   Lin Yang, Changsheng Li, Liya Fan, and Jingmin Xu

Large-Scale Web Service Collection for Service Archive Management .................................................................106
   Zhen Zhang, Zhiyong Feng, Shizhan Chen, Liyuan Xin, and Yan Hao

A Dynamic Weight-Based Dynamic Requests Scheduling Model in Multi-core Web Server .................................................................112
   Guohua You and Ying Zhao

Service Engineering

A Linked Data Based Personal Service Data Collection and Semantics Unification Method .................................................................118
   Yixue Zhao, Zhongjie Wang, Liping Zou, Jiaqiu Wang, and Youqiang Hao

A Location-Based Services Selection Model and Algorithm with QoS Constraints under Mobile Internet Environment .................................................................124
   Mingjin Xin, Manli Lu, and Rui Zhang
# Service Mashup in a Mobile Environment

*Boyang Han, Xinyang Liu, Jing Wang, Chen Liu, and Roland-M. Wagner*

Heterogeneous Business Process Consolidation: A Pattern-Driven Approach

*Guosheng Kang, Zhaoyang Tian, Xiao Zhang, Liang Zhang, Lixin Ma, Xiang Gao, Xianan Zhang, and Zizhe Ding*

Enhancing Book Recommendation with Side Information

*Liu Xin, E. Haihong, Tong Junjie, Song Meina, and Liu Yi*

Privacy-Aware Web Services Selection and Composition

*Tianyang Li and Ting He*

Customer Participation Psychology Mechanisms Based on Self-Efficacy and Emotion Contagion Theories

*Cao Huarui, Zheng Qiuying, and Li Huifan*

Service Selection Based on Dynamic Group Trust in Social Network

*Shouxian Wei, Xiaolin Zheng, and Deren Chen*

## Service Computing & Cloud Computing

High Availability Benchmarking for Cloud Management Infrastructure

*Xiao Xi Liu, Jian Qiu, and Jian Ming Zhang*

Energy Efficient Mobile Cloud Computing and its Applications

*Qiang Fu, Weiwen Zhang, and Baihua Wang*

A Survey and Taxonomy of Cloud Migration

*Zhitao Wan and Ping Wang*

Artificial Bee Colony Optimized Scheduling Framework Based on Resource Service Availability in Cloud Manufacturing

*Jorick Lartigau, Xiaofei Xu, and Dechen Zhan*

A Deployment Scheme of Virtual Machines for Campus Cloud Platform

*Qian Ma, Jing Wang, and Gang Wang*

A Multi-properties Based Description Method of Cloud Manufacturing Services

*Xiaochun Yi, Biqing Huang, and Chenghai Li*

Resources Allocation Method on Cloud Computing

*Wei Ming, Zhang Chunyan, Qiu Feng, Cui Yu, Sui Qiangqiang, and Ding Wanbing*

A Study on Visualizations of New Product Trends on Online Social Networks

*Xiu Li and Hongwei Qin*
Service Application

Fast Human Detection Using LDA via L1-Norm ............................................................... 206
  Xiao Pu, Xiaoshuang Shi, Zhenhua Guo, and Jie Zhou

Improved Post-Processing for Human Detection in Railroad Surveillance ..................... 210
  Xueying Xin, Zhenhua Guo, Bo Yuan, and Jie Zhou

Customers' Perspectives on ISO 9001 QMS Auditors' Personality Traits: A Preliminary Investigation from Taiwan's Certificated Companies ........................................... 215
  Ren-Chieh Liao

The Analysis and Expansion of User Requirements Based on a Novel Information Service Platform .................................................................................................................. 220
  Yu Guo

Product Recalls as Service Failure: Revisiting Consumer Reactions .................................... 226
  Tingting Zhao and Xiucheng Fan

Deviation Methods via Social Review Graph in Evaluation Systems of Online Store ................................................................. 229
  Xiujuan Xu, Xiaowei Zhao, Yu Liu, Zhenzhen Xu, and Zhenlong Xu

Analysis on the Relationships of Stakeholders in Service Design ....................................... 233
  Luo Qi, Yuan Shangxue, and Li Weiping

Author Index ........................................................................................................................ 237
