2015 International Symposium on Theoretical Aspects of Software Engineering

TASE 2015

Table of Contents

Message from the Program Committee Chairs ...........................................................vii
TASE 2015 Committees ................................................................................................viii
List of Additional Reviewers ........................................................................................x

Invited Talks

Modeling and Reasoning about Software Systems Containing Uncertainty
and Variability ......................................................................................................................1

Marsha Chechik

On Various Abstract Understandings of Abstract Interpretation ......................................2

Patrick Cousot

Event and Strategy Analytics ..........................................................................................4

Jin Song Dong, Jun Sun, Yang Liu, Yuan Fang Li, Jing Sun, and Ling Shi

Regular Papers

A Bottom-Up Approach to Check the Correctness of Interorganisational Workflows ........7

Kais Klai and Hanen Ochi

A Framework for Off-Line Conformance Testing of Timed Connectors ..........................15

Shaodong Li, Xiaohong Chen, Yiwu Wang, and Meng Sun

A SAT-Based Analysis of a Calculus for Wireless Sensor Networks ............................23

Xi Wu, Hanne Riis Nielson, and Huibiao Zhu

An Effective Approach to Measuring and Assessing the Risk of Android Application ....31

Huikang Hao, Zhoujun Li, and Haibo Yu

An Open Framework for Semantic Code Queries on Heterogeneous Repositories ..........39

Tian Zhang, Minxue Pan, Jizhou Zhao, Yijun Yu, and Xuandong Li

Evaluating Initial Inputs for Concolic Testing ..............................................................47

Weiguang Wang and Qingkai Zeng
Formal Analysis of MAC in IEEE 802.11p with Probabilistic Model Checking ...........................................55
   Conghua Zhou, Yong Wang, Meiling Cao, Jianqi Shi, and Yang Liu

Formal Semantics of Runtime Monitoring, Verification, Enforcement and Control .................................63
   Zhe Chen, Ou Wei, Zhiqiu Huang, and Hongwei Xi

Formal Verification of PKMv3 Protocol Using DT-Spin .............................................................................71
   Xiaoran Zhu, Yuanmin Xu, Jian Guo, Xi Wu, Huibiao Zhu, and Weikai Miao

Formal Verification of Plastic User Interfaces Exploiting Domain Ontologies .........................................79
   Abdelkrim Chebieb and Yamine Ait Ameur

Formally Modeling and Analyzing the Reliability of Composite Service Evolution .....................................87
   Guisheng Fan, Liqiong Chen, Huiqun Yu, and Dongmei Liu

Polychronous Automata ..................................................................................................................................95
   Paul Le Guernic, Thierry Gautier, Jean-Pierre Talpin, and Loïc Besnard

QaSten: Integrating Quantitative Verification with Safety Analysis for AADL Model ................................103
   Xiaomin Wei, Yunwei Dong, and Hong Ye

Software Reliability Forecasting: Singular Spectrum Analysis and ARIMA Hybrid Model .......................111
   Guoqiang Liu, Deping Zhang, and Tingting Zhang

Verifying Interaction between Methods in Classes .......................................................................................119
   Tingting Hu, Shuling Wang, and Zongyan Qiu

**Short Papers**

A Tool for Supporting Requirements Formalization Based on Specification Pattern Knowledge ........................127
   Weikai Miao, Xi Wang, and Shaoying Liu

Modeling and Verification of Space-Air-Ground Integrated Networks on Requirement Level Using STeC .................................................................131
   Zhihua Yang, Bo Xiao, and Yixiang Chen

Probabilistic Model Checking of Pipe protocol .........................................................................................135
   Kangli He, Min Zhang, Jia He, and Yixiang Chen

Transferable Optimal-size Fair E-cash with Optimal Anonymity ..............................................................139
   Jiangxiao Zhang, Lina Huo, Xia Liu, Chunrong Sui, Zhoujun Li, and Jinxin Ma

**Author Index** ..............................................................................................................................................143
