CIRP 25th Design Conference
2015

Innovative Product Creation

Procedia CIRP Volume 36

Haifa, Israel
2 - 4 March 2015

Editors:

Moshe Shpitalni
Anath Fischer

Gila Molcho

# TABLE OF CONTENTS

## DESIGN OPTIMIZATION

<table>
<thead>
<tr>
<th>DESIGN OPTIMIZATION</th>
</tr>
</thead>
<tbody>
<tr>
<td>PRODUCT REQUIREMENT MODELING AND OPTIMIZATION METHOD BASED ON PRODUCT CONFIGURATION DESIGN</td>
</tr>
<tr>
<td>Wei. Wei, Ang Liu, Stephen C.-Y. Lu, Thorsten Wuest</td>
</tr>
<tr>
<td>VALIDATION OF AN EXTENDED APPROACH TO MULTI-ROBOT CELL DESIGN AND MOTION PLANNING</td>
</tr>
<tr>
<td>Stefania Pellegrinelli, Nicola Pedrocchi, Lorenzo Molinari Tosatti, Anath Fischer, Tullio Tolio</td>
</tr>
<tr>
<td>A DIRECT APPROACH OF DESIGN OPTIMIZATION FOR SMALL HORIZONTAL AXIS WIND TURBINE BLADES</td>
</tr>
<tr>
<td>Xinzi Tang, Xuanqing Huang, Baitao Peng, Xiongwei Liu</td>
</tr>
<tr>
<td>GENETIC ALGORITHM SOFTWARE SYSTEM FOR ANALOG CIRCUIT DESIGN</td>
</tr>
<tr>
<td>Miri Weiss Cohen, Michael Aga, Tomer Weinberg</td>
</tr>
</tbody>
</table>

## DESIGN EDUCATION

<table>
<thead>
<tr>
<th>DESIGN EDUCATION</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTEGRATING ANALYSIS AND DESIGN IN MECHANICAL ENGINEERING EDUCATION</td>
</tr>
<tr>
<td>Reuven Katz</td>
</tr>
<tr>
<td>AN INNOVATIVE APPROACH TO TEACHING SUSTAINABLE DESIGN AND MANAGEMENT</td>
</tr>
<tr>
<td>Andreas Riel, Alan Lelah, Guillaume Mandil, Maud Rio, Serge Tichkiewitch, Feng Zhang, Peggy Zwolinski</td>
</tr>
<tr>
<td>NEW APPROACH TO INTRODUCTION OF 3D DIGITAL TECHNOLOGIES IN DESIGN EDUCATION</td>
</tr>
<tr>
<td>Stefan Junk, Rebecca Matt</td>
</tr>
</tbody>
</table>

## DESIGN COMPLEXITY

<table>
<thead>
<tr>
<th>DESIGN COMPLEXITY</th>
</tr>
</thead>
<tbody>
<tr>
<td>EVALUATING COMPLICATEDNESS IN MECHANICAL DESIGN</td>
</tr>
<tr>
<td>Tomer Ben-Yehuda, Avigdor Zonnenshain, Reuven Katz</td>
</tr>
<tr>
<td>USING PROCESS DESIGN TO OVERCOME UNDESIRABLE CONSEQUENCES OF INCREASED PRODUCT COMPLEXITY</td>
</tr>
<tr>
<td>Moshe Eben-Chaime</td>
</tr>
<tr>
<td>A METHOD TO SET UP A COMPLEXITY INDEX TO IMPROVE DECISION-MAKING PERFORMANCE</td>
</tr>
<tr>
<td>Lukas Budde, Oliver Nagler, Thomas Friedli</td>
</tr>
<tr>
<td>MANAGING TECHNOLOGICAL AND ECONOMIC UNCERTAINTIES IN DESIGN OF LONG-TERM INFRASTRUCTURE PROJECTS: AN INFO-GAP APPROACH</td>
</tr>
<tr>
<td>Yakov Ben-Haim, Xavier Irias, Roberts McMullin</td>
</tr>
</tbody>
</table>

## MODERN DESIGN METHODS

<table>
<thead>
<tr>
<th>MODERN DESIGN METHODS</th>
</tr>
</thead>
<tbody>
<tr>
<td>PRODUCT DESIGN FOR MASS-INDIVIDUALIZATION</td>
</tr>
<tr>
<td>Y. Koren, M. Shpitalni, P. Gu, S. J. Hu</td>
</tr>
<tr>
<td>UTILIZATION OF STATE DRIVERS TO SUPPORT DESIGN FOR MANUFACTURING</td>
</tr>
<tr>
<td>Thorsten Wuest, Ang Liu, Wei Wei, Stephen C.-Y. Lu, Klaus-Dieter Thoben</td>
</tr>
<tr>
<td>HYBRID SIMULATORS FOR PRODUCT SERVICE-SYSTEMS – INNOVATION POTENTIAL DEMONSTRATED ON URBAN BIKE MOBILITY</td>
</tr>
<tr>
<td>Boris Beckmann-Dobrev, Simon Kind, Rainer Stark</td>
</tr>
<tr>
<td>MINARGUS: TEST TOOL FOR USER EXPERIENCE MEASUREMENT AND PARAMETER MODIFICATION WITHIN ADAS SIMULATION</td>
</tr>
<tr>
<td>Maik Auricht, Rainer Stark</td>
</tr>
</tbody>
</table>

## KNOWLEDGE MANAGEMENT

<table>
<thead>
<tr>
<th>KNOWLEDGE MANAGEMENT</th>
</tr>
</thead>
<tbody>
<tr>
<td>MIND – SEMANTIC BASED KNOWLEDGE VISUALIZATION</td>
</tr>
<tr>
<td>Gila Molcho, Ronit Schneor</td>
</tr>
</tbody>
</table>
A KNOWLEDGE-ENRICHED PROBLEM SOLVING METHODOLOGY FOR THE DESIGN PHASE OF MANUFACTURING EQUIPMENT ............................................................................................................................................................................. 95
D. Mourtzis, M. Doukas, T. Skrepetos

THE BIC MODEL – TOWARDS BUSINESS ORIENTED INFORMATION CONTEXTS ................................................................. 101
Gunilla Sivard, Lars Lindberg, Navid Shariatzadeh

SIMULATION BASED PLANNING OF THE FUZZY FRONT END STAGE OF A PROJECT .......................................................... 106
Michal Iluz, Avraham Shub

DETAILED DESIGN

MACHINE STIFFNESS RATING: CHARACTERIZATION AND EVALUATION IN DESIGN STAGE ............................................................................................................................................................................. 111
V. T. Portman, V. S. Chapsky, Y. Shneor, E. Ayalon

OPTIMIZATION OF ROUGHNESS AND RESIDUAL STRESSES IN PATH CONTROLLED GRINDING OF CRANKPIN ............................................................................................................................................................................. 117
Manchao Zhang, Zhenqiang Yao, Sheng Xu

KINEMATIC MODELING FOR THE NUTATION DRIVE BASED ON SCREW THEORY ............................................................................................................................................................................. 123
Jinlong Hong, Ligang Yao, Wentao Ji, Zhenping Huang

SYSTEM DESIGN

MODEL BASED SYSTEMS ENGINEERING IN CONSTRUCTION KIT DEVELOPMENT – TWO CASE STUDIES ............................................................................................................................................................................. 129
Albert Albers, Helmut Scherer, Nikola Bursac, Galina Rachenkova

MANUFACTURING SYSTEM DESIGN FOR RESILIENCE ............................................................................................................................................................................. 135
Xi Gu, Xiaoning Jin, Jun Ni, Yoram Koren

QUALITY-ORIENTED DESIGN OF ROTOR ASSEMBLY STRATEGIES FOR ELECTRIC DRIVE PRODUCTION SYSTEMS ............................................................................................................................................................................. 141
Marcello Colledani, Anteneh Yemane, DanielCoupek, Armin Lechler

AN INTEGRATED FRAMEWORK TO DESIGN ARCHITECTURE, CONFIGURATIONS AND PARAMETERS OF ADAPTABLE PRODUCT WITH ROBUST PERFORMANCE ............................................................................................................................................................................. 147
Jian Zhang, Deyi Xue, Peihua Gu

INSPECTION, QUALITY AND RELIABILITY

THE INSCRUTABLE JUNGLE OF QUALITY CRITERIA – HOW TO FORMULATE REQUIREMENTS FOR A SUCCESSFUL PRODUCT DEVELOPMENT ............................................................................................................................................................................. 153
Ilyas Mattmann, Sebastian Gramlich, Hermann Kloberdanz

DESIGN AND INSPECTION OF MULTI-FIXTURING PALLETS FOR MIXED PART TYPES ............................................................................................................................................................................. 159
Stefania Pellegrinelli, Claudio Cenati, Luca Cevasco, Franca Giannini, Katia Lupinetti, Marina Monti, Diego Parazzoli

DEFINING PERCEIVED QUALITY IN THE AUTOMOTIVE INDUSTRY: AN ENGINEERING APPROACH ............................................................................................................................................................................. 165
Konstantinos Stylidis, Casper Wickman, Rikard Söderberg

DESIGN EDUCATION

USER-BASED APPROACH TO TEACHING AND LEARNING PRODUCT DESIGN ............................................................................................................................................................................. 171
Daniel Raviv

TEACHING MECHANICAL DESIGN PRACTICE IN ACADEMIA ............................................................................................................................................................................. 177
Kfir Cohen, Reuven Katz

DIGITAL DESIGN AND 3D PRINTING IN TECHNOLOGY TEACHER EDUCATION ............................................................................................................................................................................. 182
Igor Verner, Amir Merksamer

ADDITIVE MANUFACTURING

DESIGN FOR METALLIC ADDITIVE MANUFACTURING MACHINE WITH CAPABILITY FOR “CERTIFY AS YOU BUILD” ............................................................................................................................................................................. 187
Jyoti Mazumder

REDESIGN OPTIMIZATION FOR MANUFACTURING USING ADDITIVE LAYER TECHNIQUES ............................................................................................................................................................................. 193
Konstantinos Salonitis, Saeed Al Zarban
ADDITIVE MANUFACTURING OF CUSTOM ORTHOSES AND PROSTHESES – A REVIEW .......................... 199
Yu-An Jin, Jeff Plott, Roland Chen, Jeffrey Wensman, Albert Shih

SMART PRODUCT ENGINEERING

USABILITY EVALUATION OF CADCAM: STATE OF THE ART ......................................................... 205
Yujiang Li, Mikael Hedlind, Torsten Kjellberg

SMART³ – SMART MATERIALS FOR SMART APPLICATIONS ......................................................... 211
W.-G. Drossel, H. Kunze, A. Bucht, L. Weisheit, K. Pagel

ADDITIVE MANUFACTURING

FUNCTIONALITY-BASED PART ORIENTATION FOR ADDITIVE MANUFACTURING .......................... 217
Giovanni Moroni, Wahyudin P. Syam, Stefano Petrou

SINGLE CAMERA PHOTOGRAMMETRY FOR REVERSE ENGINEERING AND
FABRICATION OF ANCIENT AND MODERN ARTIFACTS ................................................................. 223
John Kaufman, Allan Ew Rennie, Morag Clement

DESIGN STRATEGIES FOR THE PROCESS OF ADDITIVE MANUFACTURING ................................. 230
Christoph Klahn, Bastian Leutenecker, Mirko Meboldt

KNOWLEDGE ENHANCED DESIGN

INCREASING THE POWER DENSITY OF E-MOTORS BY INNOVATIVE WINDING DESIGN ................. 236
Martin Stöck, Quentin Lohmeyer, Mirko Meboldt

SOURCES AND CHARACTERISTICS OF INFORMATION ABOUT PRODUCT USE .......................... 242
Stefan Wellsandt, Karl Hribernik, Klaus-Dieter Thoben

CONCEPTUALIZING IDEATION WORKSHOPS FOR SMES ................................................................. 248
Johannes Heck, Martin Steinert, Mirko Meboldt

ENHANCING CONCEPTUAL DESIGN

EXTENSION OF THE PAHL & BEITZ SYSTEMATIC METHOD FOR CONCEPTUAL DESIGN
OF A NEW PRODUCT ........................................................................................................................... 254
Menachem P. Weiss, Amihud Hari

MODEL-BASED SUPPORT OF THE CONCEPTUAL DESIGN IN DISTRIBUTED PRODUCT
DEVELOPMENT ............................................................................................................................... 261
Timo Richter, Tobias Huth, Thomas Victor

IMPROVEMENT OF USER INVOLVEMENT IN PRODUCT DESIGN .................................................. 267
Zhenyu Zhang, Qingjin Peng, Peihua Gu

BIO MEDICAL DESIGN

FEASIBILITY ANALYSIS AND DESIGN OF A NOVEL VENTRICULAR ASSIST MINISCULE
NUTATION PUMP ............................................................................................................................... 273
Jiaying He, Ligang Yao, Hewen Shen, Rongye Zheng

DESIGN OF POROUS MICRO-STRUCTURES USING CURVATURE ANALYSIS FOR
ADDITIVE-MANUFACTURING ........................................................................................................... 279
Yizhak Ben Shabat, Anath Fischer

FOSTERING ANALOGICAL REASONING AND DESIGN SKILLS THROUGH CREATING BIO-INSPRIED ROBOTIC MODELS .............................................................................................................. 285
Dan Cuperman, Igor Verner

Author Index
