# TABLE OF CONTENTS

## VOLUME 1

### ABSTRACT PRESENTATION

Model Selection For EHR Laboratory Tests Preserving Healthcare Context and Underlying Physiology .......................................................... 1

David Albers ; Rimma Pivovarov ; J M. Schmidt ; Noemie Elhadad ; George Hripcsak

Analysis and Classification of Patient Safety Reports in Computerized Prescriber Order Entry (CPOE) Systems and Refinement of a New Taxonomy for Classification of CPOE-Related Medication Errors .......................................................... 3

Mary G. Amsio ; Alejandra Salazar ; Thu-Trung Hickman ; Arbor J. Quist ; Lynn A. Volk ; Adam Wright ; Dustin S. McEwony ; Sarah P. Slicht ; David W. Bates ; Gordon Schiff

A Review and Analysis of Rounding and Handoff Document Content in Inpatient Resident Physician Teams .......................................................... 5

Elliott G. Aronniadis ; Rohini Khetri ; Jenna Marquard ; Courtney Moore ; Michael Kim ; Genevieve B. Melton

STEMPOWERMENT: A Prototype Online Intervention to Improve Outcomes in Stem Cell Transplant Survivors .......................................................... 7

Martha Askins ; Jeffery McLoughlin ; Susan Peterson ; Dongshong Zhang

Assessing Variability in Breast Cancer Treatment Paths Using Frequent Sequence Mining .......................................................... 8

Ravi V. Ateya ; Thomas A. Lasko ; Mia A. Levy

Six Important Characteristics for Patient Hand-Off Application in Inpatient Hospital Setting .......................................................... 10

Saleh U. Ayoub ; Alexandra Pelleiter

Capturing Preventive Care Services: Comparing Data Obtained from Manual Chart Review, Automated EHR Extraction, and Insurance Claims .......................................................... 12

Steffani R. Bailey ; Megan Hoopes ; Heather Angier ; Rachel Gold ; John Heintzmann ; Miguel Carvino ; Jean P. O’Malley ; Jennifer E. Devoe

Medication Compliance in Pediatric Inpatients – What Are We Missing? .......................................................... 14

Harsh Bhatia ; Neal Patel ; Catherine H. Ivory ; Phillip Stewart ; Kim M. Unerl ; Christoph U. Lehmann

The Hidden Life of Nurses’ Cognitive Artifacts .......................................................... 16

Jaqwyn W. Blaz ; Alexis K. Dong ; Kristin G. Oates ; Nancy Suggers

Real Time Active Learning Study for Clinical Named Entity Recognition .......................................................... 18

Yukun Chen ; Sungrim Moon ; Thomas A. Lasko ; Qiaozhu Mei ; Jingqi Wang ; Trevor Cohen ; Qingxia Chen ; Joshua C. Denny ; Hu Xu

A Real Time Electronic Registry As a Key Intervention to Reduce Treatment Disparities in Early Stage, Non-small Cell Lung Cancer: Preliminary Results .......................................................... 20

Samuel Cytter ; Paul Walker ; Peggie Dilkworth-Anderson ; Maria Cirino-Marcano ; Lloyd Edwards

Improving Care Team Communication: Early Experience at Implementing a Patient-centered Microblog .......................................................... 22

Anuj K. Dalal ; Jeffrey L. Schnipper ; Anthony F. Massaro ; Kelly McNally ; Patricia C. Dykes ; David W. Bates

Using a Software Program to Support Shared Decision-Making about Participation in Breast Cancer Clinical Trials .......................................................... 24

Prudence Dalrymple ; Lisl Zach ; Michelle L. Rogers ; Amy Leader ; Ronald Myers ; Tiffany Avery ; Anna Quinn ; Anett Petrich ; Massimo Cristianovali ; Russell Schilder

An EHR-Integrated Shared Decision Making Mobile App for Prostate Cancer Screening .......................................................... 26

Frank C. Day ; Majid Sarrafzadeh ; Stephanie Smith ; Mohammad Pourhomayoun ; Konstantinos Sideris ; Amogh Param ; Jonathan Ben-Hamou ; Dieder Reevse ; Michael A. Pfeffer ; Douglas S. Bell

Polychromatic X-Ray Absorptiometry to Quantify Breast Density Volume, Ratio and their Associated Breast Cancer Risk in Full-Digital Mammography .......................................................... 28

Characterizing the Frequency of Pharmacogenomic Biomarker-Guided Prescribing for Drugs with Pharmacogenomic Biomarker information in the FDA Labelling: A Pilot Study Using Data from an Electronic Health Record .......................................................... 30

Emily Devine ; Maher Khelfi ; Katelyn Keylou ; Nathaniel Hendrix ; Patrick Mathias ; Christian Bock ; Peter Tarcey-Hornoch

2 Years Later: Follow-up to Analysis of Electronic Medication Orders with Large Overdoses .......................................................... 32

Judith Desheimer ; Eric Kirkendall ; Michal Kosh ; Thomas Minor ; Philip Hagedorn ; Cecilia Mahli ; Stephen A. Spooner

Completeness and Timeliness of Notifiable Disease Surveillance Data Submitted by Providers to Public Health Authorities .......................................................... 34

Brian E. Dixon ; Patrick T. Lai ; Uzay Kirbjustik ; Zuoyi Zhang ; Debra Reveer ; Rebecca A. Hills ; P. Joseph Gibson ; Jennifer L. Williams ; Shaun Granris

Pharmacy Drug Dispensing After Physician Discontinuation (Cancel) Orders .......................................................... 36

Tewodros Engnale ; Aman D. Verma ; Enrique Scaoane-Fazquez ; Rosal Rodriguez-Mongioi ; David W. Bates ; Robyn Tamblyn ; Gordon Schiff

Computer-Mediated Intervention to Improve Medication Literacy in Seniors with Diabetes Results in Better Patient-Reported Outcomes and Glycemic Control .......................................................... 37

Joseph Finkelstein ; McKenzie Bedra

Feature Selection Based LapSVM to Classify Medical Event Reports and Enhance Patient Safety .......................................................... 39

Samah J. Fodeh ; Cynthia Brandt ; Perry Miller ; Michele Koss ; Andrew L. Benin

Developing a Collaborative Evaluation Framework for Utah’s APCD .......................................................... 40

Jennifer H. Garvin ; Kristina M. Doan-Harris ; Jonathan Cardwell ; Charles Hawley ; Wu Xu

Sheila M. Gephart ; Joanna Abraham ; Rebecca Razewski ; Lauren Price ; Karen Dunn Lopez

Reza Sharifi Sedeh; Xianshu Zhu; Yagogang Jia; Joey Liu; Gladimeji Farri; Daniel Elgort

Registries in Accountable Care: Essential Data Management in New Models of Care

John W. Sharp

MedBus: A Service-oriented Architecture for Enabling the Research Data Economy

Amitava Shiee; James Estill; John S. Brussolo

Data Mining to Predict Healthcare Utilization in Managed Care Patients

Lincoln Sheehi; Michael A. Phinney; Sean Lander; Jerry C. Parker; Chi-Ren Shyu

A Continuous Markov Model Approach Using Individual Patient Data to Estimate Mean Sojourn Time of Lung Cancer

Shiwen Shen; Simon X. Han; Panayiotis Petousis; Frank Meng; William Hsu; Alex A. Bui

Identifying Population Characteristics Tables in Full Text Articles

Garrick Sherman; Catherine Blake; JooHo Lee

Performance Comparison of Running Clinical Rules in Drools and Plain Java Implementation

Jian Shi; Erik Smith; Thomas Van Gelder

Implementation of a Mobile Electronic Medical Record System that Uses a Problem-oriented Contiguous Timeline View

Atkoih Shihbaya; Keisuke Oogawa; Kazunori Matsumoto; Masayuki Hashimoto; Yukihiro Maeda; Yoshiaki Kondo

Improving Failure Mode and Effects Analysis through Electronic Health Record-Assisted Team Identification

Gayle Shier Krickie; Matthew Carson; Young Ji Lee; Nicholas Soulakis

An Enterprise Clinical Data Pipeline for a Cancer Center

Seth G. Goodman; Tony Galicha; Katheryn Egan; Adam Rauh; Croghan; Paul Fear

Electronic Medical Records System Support of Patient Centered Home Medical Requirements for National Committee for Quality Assurance Recognition

Elizabeth R. Silvers; Amanda Von Taube; Catherine L. Liang; Lynn A. Volk

A New, Touch-screen Sensitive Display for Management of Diuretic Therapy of Heart Failure Patients in Critical Care Setting

Joi Sklenar; Jay Parikh; James O. Mudd

Stacey L. Slaiger; Charlene Weir; Heejun Kim; Javed Mostafa; Guillerme Del Fiol

A Novel Anatomical Semantic Ontology for Identification of Anatomically Proximate CTs Using LOINC Codes

Benjamin H. Slovis; Tina Lowry; Bradley Delman; Anton O. Beita; Gilad Kuperman; Charles Dimaggio; Jason S. Shapiro

Leveraging Genetic Findings to Identify High-Risk Chronic Kidney Disease in the Electronic Medical Record

Craig Smail

A Platform for Generating and Validating Breast Risk Models from Clinical Data: Towards Patient-Centered Risk Stratified Screening

Nova F. Smedley; Ngan Chau; Antonia Petruse; Alex A. Bui; Arash Naeim; William Hsu

Systemic Risk Analysis for Use Cases for Safety-Related Usability of EHRs

Michael W. Smith; Daniel B. Murphy; Dean F. Sittig; Elise Russo; Hardeep Singh

Prediction of Colorectal Surgical Site Infections Using Risk Factors

Sanghwan Sohn; Magid Rastogar-Majard; James M. Naussens; Elizabeth B. Habermann; David W. Larson; Honglung Liu

Representing and Validating Cancer Study Metadata Using RDF Shapes Expression Language

Harald B. Solbrig; Eric Prud'Homme; Christopher Chute; Guojian Jiang

PubMed ‘Early Alerts’: A Pilot Study to Support Prospective Detection of Emerging Adverse Drug Events

Alfred Sorbello; Anna Ripple; Olivier Bodenreider

Annotating ADLs and LADLs in Veterans Affairs Clinical Documents

Brett R. South; Danielle Mowery; Lee Christensen; Adi V. Gundlapalli; Melissa Tharp; Marzieh Vali; Marjorie E. Carter; Mike Conway; Salomeh Keyhani; Wendy Chapman

Inexpensive Radio Communications System for Wheelchair Users

James R. Sprague; Dorothy W. Curtis

Machine-to-Machine (M2M) Communication in Home-care

Basile P. Spyropoulos; Aris Tzavaras; Maria Botsivaly

Bringing Context to Data Analytics: A Hybrid Approach to Understanding Clinical Workflow

Bryan Stetz; Kim M. Unertl

Using the Consolidated Framework for Implementation Research (CFIR) to Evaluate EHR Population Health Management Tools

Christina L. Stephan; Lori L. Pogeyos; David R. Mehr; Esmeeul Rahmani; Katie Wilkinson; Eduardo Simoes

Matrix Completion Methods and Imputation for EMR-Based Prediction

Erika Strandberg; Mhsen Bayati

Clinical Efficacy of Virtual Reality Rehabilitation Intervention for Patients with Low-back Pain: A Randomized Controlled Trial

Wen-Chen Su; Shih-Ching Yeh; Si-Huei Lee; Hsiang-Chun Huang

Comparison of Patient Portal Usage between Employees and Non-Employees

Lina Sulcian; Daro Eckerle Mzce; Daniel Fabbri; Trent Rosenblom

Personal Health Information Management Strategies: Experiences of Patients in the US and China

Si Sun; Nicholas J. Belkin
Data-driven Knowledge Base Evaluation: Translating an Adult CDS Tool for Use in Pediatric Care .............................................. 1709
Understanding Why Providers Override Computerized Medication Alerts in the Inpatient and Outpatient Setting .................. 1710
Leveraging a Clinical Data Warehouse to Improve Quality of Data in the French DRG-based System (PMSI) ............................... 1711
Lost in the Fog: Information Needs in the Care of Patients with Delirium .................................................................................. 1712
Developing an Enhanced Electronic Referral Management System .............................................................................................. 1713
Mapping APACHE IV “Reason for Intensive Care Admission” Classification to SNOWMED CT .................................................. 1714
Platform for Engaging Everyone Responsibly (PEER) Validation Study Plan ............................................................................. 1715
A Systems-Based Framework for Informatics Workforce Development to Support Health System Transformation .................. 1716
Lack of Unique Healthcare Identifier in Healthcare Information Exchanges: A Field Study .......................................................... 1717
Integrating an Externally Developed Clinical Decision Support (CDS) System with an Existing Electronic Health Record (EHR) System at VA .......................................................... 1719
Smart Coach: A Problem-Solving Mobile App to Support Weight Loss Management ............................................................... 1720
Researcher Needs for a Patient-Centered Outcomes Research (PCOR) Data Infrastructure ......................................................... 1721
Hospital Participation in Meaningful Use and Rehospitalization of Medicare Beneficiaries ......................................................... 1722
Automating Personal Health Record Mammography Messages to Improve Mammography Screening Rates ...................... 1723
Development of a Concept-based Template Report Editor for Radiological Information System .................................................. 1724
iDECIDE Smartphone App for Personalized Messages for Nutrition and Fitness Goals .............................................................. 1725
Exploring Healthcare Mobility in the US to Improve Quality of Care: Preliminary Results ......................................................... 1727
Automatically Screening Possible Chemoresistance Genes of Bladder Cancer Drugs ................................................................. 1728
Building and Evaluating Predictive Models for Postoperative Ileus Prior to Colorectal Surgery ................................................. 1729
Integrating Analytics and Business Intelligence (BI) into a Health Informatics Curriculum: Pros, Cons and Opportunities ................. 1730
Pediatric Venous Thrombus Embolus (VTE) Screening Tool: the Design, Implementation and Continuous Improvement of a Complex Clinical Decision Support Tool .................................................. 1731
A Method to Automatically Create Titles of Clinical Notes in Electronic Medical Records ......................................................... 1732
Comparative Effectiveness Research ............................................................................................................................................... 1733
Transition of Care from an Academic Cancer Center to Community Providers and Survivorship Care: Would a Patient Care Team Portal Help? .......................................................... 1734
Increasing Patient Enrollment in Clinical Trials Using a Web Based Recruitment Application .................................................... 1735
Augmenting Psychiatric Care: A Participatory Mobile Framework ................................................................................................. 1736
A Centralized Data Collection and Management Tool in the VA: REDCap .................................................................................. 1737
Routine Collection of Patient-Reported Data in Electronic Form in Clinical Settings: An Analysis of Available Technologies ........................................................................................................................................ 1738
Using Informatics Tools to Standardize the Request, Adjudication and Monitoring of Non Formulary Agents at a VA Facility ............................................................... 1739

A BI Tool to Monitor the Intervention Efficiency of Antibiotic Therapy in Leukemia Patients ................................................................. 1740
Cai Wu

Visualizing Clinical Workflow using Time and Motion Data................................................................. 1741
Danny T. Y. Wu; Nikolas Smart; Sang-Jung Han; Maria Majeed; Jing Han; Suanan Li; Fan Zhang; Kai Zheng

Use of an Electronic Health Record as a Research Tool: Frequency of Exposure to Targeted Medical Conditions and Health Care Providers’ Clinical Proficiency ................................................................. 1742
Lisa Winterbottom; Judy McConnell; Thomas M. Breen; Junji Yang; Brian M. Wexler

PheWAS Network Analysis and Visualization ...................................................................................... 1743
Yaomin Xu; Todd Edwards; Lisa Bastarache; Rebecca N. Jerome; Shilin Zho; Eric Torstenson; Wei-Qi Wei; Jana Shirkey-Rice; Erica A. Botton; Yu Shy; Jil Pulley; Joshua C. Denny

Simplified Spectrographic Display for Bedside Electrographic Seizure Detection in the ICU ........................................................................ 1744
Peter Z. Yan; Zachary M. Grispan

Intelligence in Usability Survey Research (iUsuR): An Online Usability Question Bank for Usability Survey Research .................................................................................................................. 1745
Nam Ye; Daniel Johnson; Richard J. Holden

Annotating Recommendation Sentences in Radiology Reports ................................................................. 1747
Melika Yetisgen; Presscott Klassen; Lucas McCarthy; Thomas Payne; Martin L. Guinn

Anchor Time Extraction for Building Timeline from Korean Clinical Narratives ................................................................. 1748
Wangyi Yi; Seongkeun Park; Jinwuk Choi

Annotation of Disease Characteristics for Cancer Liver Stage Prediction ................................................................. 1749
Wen-Wai Yim; Sharon W. Kwan; Guy Johnson; Melika Yetisgen

Predicting Autonomy for Physical Activity using Data Mining Techniques ................................................................. 1750
Sammo Toon; Nurka M. Suerro-Tejeda; Suzanne Bakken

Using TURF Framework to Improve EHR-CPOE Medication Dosing in Renal Impaired Elderly ........................................................................ 1751
Rafeek A. Yousef; Mandana Solimi; Min Zhu

A Preliminary Study on EHR-Associated Extra Workload Among Physicians ................................................................. 1752
Jing Zhang; Kellie Avery; Yunan Chen; Shazia Asfiaq; Steven R. Rick; Kai Zheng; Naside Weibel; Harry Hochheiser; Charlene Weir; Kristin Bell; Mark Gabuzda; Neil Farber; Bray Pandeley; Alan Calvitti; Lin Liu; Richard Street; Zia Agha

Predicting Future Anxiety and Depression Diagnoses Among College Students Utilizing Electronic Health Data ........................................................................ 1753
Jinghe Zhang; Hao Wu; James Turner; Adrienne Keller; Laura Barnes

Evaluating Efficient Clinician Utilization of Electronic Health Records ................................................................. 1754
Yuehua Zhao; Priya Nambisan

Understanding the Use of Adverse Events Criteria in Radiation Therapy: A Literature Mining Approach ........................................................................ 1756
Yi Zhen; Yuliang Jiang; Q. Jackie Wu; Lulin Yuan; Yaorong Ge

Medication Adherence to Oral Hypoglycemic Agents and Hospitalization Cost in Medicaid Patients with Type 2 Diabetes................................................................................... 1757
Vivienne Zhu; Wanzhu Tu; Marc Rosenman; J. Marc Overhage

Facebook and Depression: How People with Depression Use Facebook to Manage Their Depression ........................................................................ 1758
Maryam Zolnoori; Priya Nambisan; Timothy B. Patrick

Using a Web-based Clinical Pathway and Computerized Order Set to Improve Efficiency of Care for Asthma in a Pediatric Emergency Department ........................................................................ 1759
Joseph J. Zore; Ruth Abaya; Eva Delgado; Richard Scarfone

STUDENT DESIGN CHALLENGE

KaryoViz: Designing A Karyotype Visualization Platform for Clinical Decision Support ................................................................. 1760
Zachary B. Abrams; Satyajeet Raje

The EH Tracker: Using Dynamic Environmental Health Data for Improved Personal Health Decision-Making ........................................................................ 1765
Juandalyn L. Burke; Ryan C. James; Dae Hyun Lee

Improving User Engagement and Insight Through Contextualized Quantified Self ........................................................................ 1784
Tiffany J. Callahan; Tal Lorberbaum; Alexandre Yahi

Take a Breather: Empowering Adherence & Patient Centered Research Through Interactive Data Visualization, Social Engagement, & Gamification in Patients with Sleep Apnea ........................................................................ 1789
Ashley Choi; Benjamin Corder; Prerna Das; Jason ChLi

I-SMILE: Similarity Based Just-in-time Recommendation System for Public Health ........................................................................ 1796
Edward Choi; Jina J. Deraz; Sihe Lin; Kelly Ryder; Aasha B. Singh; Hong Su

Learning from the Data: Exploring a Hepatocellular Carcinoma Registry Using Visual Analytics to Improve Multidisciplinary Clinical Decision-Making ........................................................................ 1801
Michelle Hirbar; Deborah V. Woodcock; Lazarro N. Sanchez-Pinto; Kate Fultz Hollis; Gene Ren

Accelerating Biomedical Informatics Research with Interactive Multidimensional Data Fusion Platforms ........................................................................ 1806
Satyajeet Raje
STUDENT PAPER

Three-Dimensional Content-Based Cardiac Image Retrieval Using Global and Local Descriptors .................................................. 1811
Leila C. C. Bergamasco ; Fátima L. Nunes

Analyzing Self-Help Forums with Ontology-Based Text Mining: An Exploration in Kidney Space ................................................. 1821
Philippe Burckhardt ; Rema Padman

Dynamic Estimation of the Probability of Patient Readmission to the ICU using Electronic Medical Records .............................. 1831
Karla Caballero ; Ram Akella

Modelling Risk of Cardio-Respiratory Instability as a Heterogeneous Process ................................................................. 1841
Lajie Chen ; Aru Ray Dabrowiński ; Marilyn Hravnak ; Gilles Clermont ; Michael Pinsky

Combining Human Disease Genetics and Mouse Model Phenotypes Towards Drug Repositioning for Parkinson's Disease .................. 1851
Yang Chen ; Xiaoshu Cai ; Rong Xu

Automated Classification of Consumer Health Information Needs in Patient Portal Messages .................................................. 1861
Robert M. Cronin ; Daniel Fabbri ; Joshua C. Denny ; Gretchen P. Jackson

Health Literacy, Education Levels, and Patient Portal Usage During Hospitalizations .......................................................... 1871
Sharon A. Davis ; Chandrakar Y. Osborn ; Suresh Kripalani ; Kathryn Goggins ; Gretchen P. Jackson

Using High-Fidelity Simulation and Eye Tracking to Characterize Workflow Patterns among Hospital Physicians .................... 1881
Julie W. Doberne ; Ze He ; Vishnu Mohan ; Jeffrey A. Gold ; Jenna Marquard ; Michael F. Chung

Learning a Severity Score for Sepsis: A Novel Approach based on Clinical Comparisons .................................................. 1890
Kirill Dyagilev ; Suchi Saria

Automated Grading of Gliomas Using Deep Learning in Digital Pathology Images: A Modular Approach with Ensemble of Convolutional Neural Networks .................................................. 1899
Mehmet Günhan Ertosun ; Daniel Rubin

Secondary Use of EHR Timestamp Data: Validation and Application for Workflow Optimization .................................................. 1909
Michelle R. Hribar ; Sarah Read-Brown ; Leigh G. Reznick ; Lorinna Lombardi ; Mansi Parikh ; Thomas R. Yackel ; Michael F. Chung

Longitudinal Analysis of Computerized Alerts for Laboratory Monitoring of Post-liver Transplant Immunosuppressive Care ............. 1918
Jason Jacobs ; Scott P. Narus ; Scott Evans ; Catherine J. Shae

Examining the Distribution, Modularity, and Community Structure in Article Networks for Systematic Reviews .......................... 1927
Mollie McKillop ; Fernanda Polubriaginof ; Chunhua Weng

A Data Quality Ontology for the Secondary Use of EHR Data ........................................................................................... 1937
Steven G. Johnson ; Stuart Speedie ; Gyorgy Simon ; Vinip Kumar ; Bonnie L. Westra

Evaluating Consumer m-Health Services for Promoting Healthy Eating: A Randomized Field Experiment .................................. 1947
Yi-Chin Kato-Lin ; Rema Padman ; Julie Downs ; Vibhanshu Abhishek

Making Background Work Visible: Opportunities to Address Patient Information Needs in the Hospital ...................................... 1957
Logan Kendall ; Sonali B. Mishra ; Ari Pollack ; Barry Karson ; Wanda Prat

Development and Preliminary Evaluation of a Prototype of a Learning Electronic Medical Record System .................................. 1967
Andrew J. King ; Gregory F. Cooper ; Harry Hochheiser ; Gilles Clermont ; Shyam Viswanathan

A Multidimensional Data Warehouse for Community Health Centers ........................................................................... 1976
Kislaya Kunjan ; Tammy Toscos ; Ayten Turkan ; Bradley N. Doehbeling

Creating Shareable Clinical Decision Support Rules for a Pharmacogenomics Clinical Guideline Using Structured Knowledge Representation ........................................................................................................... 1985
Margaret K. Linan ; Davide Sottara ; Robert R. Freimuth

Analysis of Merging Clinical and Viral Genetic Data for Influenza Surveillance ........................................................................ 1995
Daniel Meger ; Rachel Beard ; Matthew Scotch

Exploration of Temporal ICD Coding Bias Related to Acute Diabetic Conditions ................................................................. 2005
Mollie McKillop ; Fernanda Polubriaginof ; Chunhua Weng

Classification of Clinically Useful Sentences in MEDLINE ........................................................................................................ 2015
Mohammad Amin Morid ; Siddhartha R. Jonnalagadda ; Marcelo Fitzman ; Kalpana Raja ; Guilherme Del Fiol

Desiderata for Major Eligibility Criteria in Breast Cancer Clinical Trials ........................................................................... 2025
Matthew L. Paulson ; Chunhua Weng

An Assessment of Family History Information Captured in an Electronic Health Record .......................................................... 2035
Fernanda Pohslibrignorf ; Nicholas P. Tatonetti ; David Vawdrey

Computational Methods for Unraveling Temporal Brain Connectivity Data ........................................................................... 2043
Bisakha Ray ; Constantin Aliferis ; Alexander Statinikov

Variability in Electronic Health Record Usage and Perceptions among Specialty vs. Primary Care Physicians ......................... 2053
Travis K. Redd ; Julie W. Doberne ; Daniel Lattin ; Thomas R. Yackel ; Carl O. Eriksson ; Vishnu Mohan ; Jeffrey A. Gold ; Joan S. Ark ; Michael F. Chung

Predicting Health Care Utilization After Behavioral Health Referral Using Natural Language Processing and Machine Learning ....... 2063
Nathaniel Roysden ; Adam Wright

Translational Meta-analytical Methods to Localize the Regulatory Patterns of Neurological Disorders in the Human Brain ......................... 2073
Vanessa Sochat ; Maude David ; Dennis Wall

Automated Detection of Benzodiazepine Dosage in ICU Patients through a Computational Analysis of Electrocardiographic Data .................................................................................................................... 2083
Maxwell T. Spadafore ; Zeeshan Syed ; Ilan Rubinfeld
COBE: A Conjunctive Ontology Browser and Explorer for Visualizing SNOMED CT Fragments ................................................................. 2092
Mengmeng Sun; Wei Zhu; Shiqiang Tao; Licong Cai; Guo-Qiang Zhang

Improving Guideline Concordance in Multidisciplinary Teams: Preliminary Results of a Cluster-randomized Trial Evaluating the Effect of a Web-based Audit and Feedback Intervention with Outreach Visits ................................................................. 201
Mariette M. Van Engen-Verheul; Wouter Gude; Sabine Van Der Veer; Harald Kemps; Monique Jaspers; Nicolette F. De Keizer; Niels Peek

Biological Model Development as an Opportunity to Provide Content Auditing for the Foundational Model of Anatomy Ontology ................................................................................................................................. 211
Lucy L. Wang; Eli Grunblatt; Hyunggu Jung; Ira Kalet; Mark Whipple

Automated Extraction of Substance Use Information from Clinical Texts ........................................................................................................ 212
Yan Wang; Elizabeth S. Chen; Serguei V. Pakhomov; Elliot G. Arsoniadis; Elizabeth W. Carter; Elizabeth Lindemann; Indra N. Sarkar; Genevieve B. Melton

SYSTEMS DEMONSTRATION

Conversational Agents for Automated Inpatient and Outpatient Health Counseling .................................................................................... 213
Timothy Bickmore

Navigating between Drug Classes and RxNorm Drugs with RxClass .............................................................................................................. 212
Olivier Bodenreider; Lee Peters; Thang Nguyen

SEMCARE - Semantic Data Platform for Healthcare ................................................................................................................................. 213
Philipp Daumke; Claudia Riede; Thomas Fassbender; Angel Honrado; Markus Kreuzthaler; Pablo Lopez-Garcia; Stefan Schulz; Erik M. Van Mulligen; Herman Van Haagen; Jan Kors; Hanney Gonna; Xinkai Wang; Elijah Behr

Leveraging Health Information Exchange to Create Neighborhood Health Records for Public Health Agencies ........................................................................... 214
Brian E. Dixon; P. Joseph Githin; Karen F. Conner; Jian Zou; Jennifer L. Williams; Marc Rosenman

OHDSI: An Open-Source Platform for Observational Data Analytics and Collaborative Research .................................................................................. 215
Alistair Erskine; Marcy Stoots; David Mccallie

Towards an Open EHR Platform: Porting a Complex Application using SMART on FHIR ................................................................. 216
Alistair Erskine; Marcy Stoots; David McCallie

RapTAT: A Tool for Assisted Annotation and Reviewer Training via Online Machine Learning ........................................................................ 217
Glenn T. Gobbel; Ruth M. Reeves; Brett R South; Wendy Chapman; Jay Jarman; Steven Lay; Michael E. Matheny

The Scalable Collaborative Infrastructure for a Learning Health System: Facilitating Agile Comparative Effectiveness Research ................................................................................. 218
Jeffrey G. Klann; Marc Natter; Douglas Macfadden; Sarah R. Weller; Kenneth Mandl; Shayon N. Murphy

Electronic Health Management Platform (eHMP): The Next Phase of VA’s EHR .......................................................................................... 219
Jonathan B. Nebecker; Walter P. Nichol; Shane McNamee; Jessica Murphy; James L. Hellewell; Reese Omizo; Krystian Johnson; Margaret McDonald; Kensaku Kawamoto; Guilherme Del Fiol; Emory Fry; Elaine Hunolt; Theresa Cullen; Scott D. Wood; Jennifer Herout; Charlene Weir

PhEMA: Phenotype Modeling, Sharing and Execution Architecture ........................................................................................................ 220
Jyotsnahan Pathak; Joshua C. Denny; William K. Thompson; Luke Rasmussen

ePAD: Leveraging Image Data in Learning Healthcare Systems .................................................................................................................. 221
Daniel L. Rubin; Dev Gude; Cavit Altindag; Hakan Bulu; Debra Willrett

The SDIDS System for Integrating Global Health Surveillance Data: An Example Application to Malaria Surveillance in Uganda .............................................................................................................. 222
Kate Zinszer; Anya Okhmatovskaia; Arash Shaban-Nejad; Lauren N. Carroll; Neil F. Abernethy; David Buckeridge
