Contents

Preface
C. Velasco, G. Weber, J. Barroso, Y. Mohamad, H. Paredes ................................................................. 1

Automatic Description of SVG Images for the Visually Impaired: A Gestaltic Approach
V. Carvalho, D. Freitas .......................................................................................................................... 2

Multi-sensory Storytelling to Support Learning for People with Intellectual Disability: An Exploratory Didactic Study
A. Matos, T. Rocha, L. Cabral, M. Bessa .......................................................................................... 12

Social Accessibility Action to Improve Quality of OER User-generated Video-classes and Associated Resources
C. Rodrigo, A. García-Serrano ............................................................................................................ 19

Mobile Instant Messaging for the Elderly
B. W. Kiat, W. Chen ............................................................................................................................ 28

Open-Source Indoor Navigation System Adapted to Users with Motor Disabilities
C. Pereira, A. Sousa, V. Filipe .......................................................................................................... 38

Participation is Blind: Involving Low Vision Lead Users in Product Development
P.D. Conradie, L. De Mare, J. Saldien ............................................................................................... 48

A Study of Universal Design in Everyday Life of Elderly Adults
M.M. Mustaquim .................................................................................................................................. 57

A Proposal for the Inclusion of Accessibility Criteria in the Publishing Workflow of Images in Biomedical Academic Articles
B. Splendiani, M. Ribera ..................................................................................................................... 67

Preliminary Web Accessibility Evaluation Method through the Identification of Critical Items with the Participation of Visually Impaired Users
L.S. Pereira, S.B.L. Ferreira, D. Archambault .................................................................................. 77

An Interactive Color Picker that Ensures WCAG2.0 Compliant Color Contrast Levels
F.E. Sandnes, A. Zhao ....................................................................................................................... 87

A Model-driven Development for Creating Accessible Web Menus
H.L. Antonelli, E.A.N. da Silva, R.P.M. Fortes .................................................................................. 95

Reflective Text Entry: A Simple Low Effort Predictive Input Method Based on Flexible Abbreviations
F.E. Sandnes ........................................................................................................................................ 105

Using Motion Sensors to Support Seating and Positioning Assessments of Individuals with Neurological Disorders
Yu. Iwasaki, T. Hirotomi ................................................................................................................... 113

Hand Anthropometry of Colombian Caribbean College Students Using Software Based Method
M. Massiris, R. Peña-Baena, Ó. Oviedo-Trespalacios, M. Maestre-Meyer ........................................ 123

Definition and Validation of the ICF – Usability Scale
A.I. Martins, A.F. Rosa, A. Queirós, A. Silva, N.P. Rocha .................................................................. 132

Recommendations for the Development of Web Interfaces on Tablets/IPads with Emphasis on Elderly Users
R.X.E. de Almeida, S.B.L. Ferreira, H.P. Soares .............................................................................. 140

WebHelpDyslexia: A Browser Extension to Adapt Web Content for People with Dyslexia
L.O. de Avelar, G.C. Rezende, A.P. Freire ......................................................................................... 150

Interaction Evaluation Using the Mac-g in Sloodle
A. Dantas, V. Guimaraes, D. Lima, M. Ardaia, W. Barreto, T. Castro ............................................... 160

Exploring Web Attributes Related to Image Accessibility and their Impact on Search Engine Indexing
R. Ferraz .............................................................................................................................................. 171

What Predicts the Frequencies of Activities on Social Networking Sites among the D/deaf and Hard of Hearing?
I. Kožuh, M. Hintermair, S. Hauptman, M. Debeve ....................................................................... 185

Development of Tests to Evaluate the Sensory Abilities of Children with Autism Spectrum Disorder
E. Söchting, J. Hartl, M. Riederer, C. Schönauer, H. Kaufmann, C. Lamm .................................... 193

Feedback and the Speed of Answer of Pupils with Dyslexia in Digital Activities
M.N. Kazakou, S. Soulis ...................................................................................................................... 204

Development of Cognitive Maps by Individuals with Blindness Using a Multisensory Application
P. Koukourikos, K. Papadopoulos .................................................................................................... 213

Audio-Haptic Map: An Orientation and Mobility Aid for Individuals with Blindness
P. Konstantinos, K. Panagiotis, K. Eleni, M. Marina, V. Asimis, E. Valari .................................... 223
