2015 International Conference on Healthcare Informatics (ICHI 2015)

Dallas, Texas, USA
21-23 October 2015
2015 International Conference on Healthcare Informatics

ICHI 2015

Table of Contents

Welcome from the General Co-Chairs ........................................................................................................... xv
Welcome from the Program Committee
Chairs .............................................................................................................................................................. xvii
Conference Organizers ............................................................................................................................... xix
Program Committee ..................................................................................................................................... xxii
Keynote and Invited Speaker Abstracts ......................................................................................................... xxv

Best Paper Candidates Session

Analyzing the Moving Parts of a Large-Scale Multi-label Text Classification Pipeline: Experiences in Indexing Biomedical Articles ......................................................................................................................... 1
  Anthony Rios and Ramakanth Kavuluru

An RCT Simulation Study on Performance and Accuracy of Inexact Matching Algorithms for Patient Identity in Ambulatory Care Settings ............................................................................................................................ 8
  Fieran Mason-Blakley, Jens Weber, Linghong Lu, Morgan Price, and Abdul Roudsari

Patient Centered Identification, Attribution, and Ranking of Adverse Drug Events ..................................... 18
  Ritwik Banerjee, I.V. Ramakrishnan, Mark Henry, and Matthew Perciavalle

Session 1 Processing Medical Information from Text

Text Classification-Based Automatic Recruitment of Patients for Clinical Trials: A Silver Standards-Based Case Study ................................................................................................................................................................. 28
  Bisakha Ray, Yindalon Aphinyanaphongs, and Sean Heffron

Mapping Phenotypic Information in Heterogeneous Textual Sources to a Domain-Specific Terminological Resource ............................................................................................................................................................... 34
  Noha Alnazzawi, Paul Thompson, and Sophia Ananiadou

Context-Aware Experience Extraction from Online Health Forums .................................................................... 42
  Yunzhong Liu, Yi Chen, Jiliang Tang, and Huan Liu
Session 2 Social Media & Home-Based Systems

The Evolution and Diffusion of User Roles in Online Health Communities: A Social Support Perspective ................................................................. Xi Wang, Zhiya Zuo, and Kang Zhao

Dietary Habits of an Expat Nation: Case of Qatar .......................................................... Yelena Mejova, Hamed Haddadi, Sofiane Abbar, Azadeh Ghahghaei, and Ingmar Weber

Object-Centred Recognition of Human Activity ........................................................... Roozbeh Nabie, Manish Parekh, Emilie Jean-Baptiste, Peter Jančovič, and Martin Russell

Introducing Telerehabilitation in Patients with Multiple Sclerosis with Significant Mobility Disability: Pilot Feasibility Study .................................................. In Cheol Jeong and Joseph Finkelstein

Session 3 Drug Adverse Reactions, Risk Prediction, and Clinical Events

A Systematic Prediction of Adverse Drug Reactions Using Pre-clinical Drug Characteristics and Spontaneous Reports .............................................. Che Ngufor, Janusz Wojtusiak, and Jyotishman Pathak

Predicting Adverse Reactions to Blood Transfusion ................................................. Dennis H. Murphree, Leanne Clifford, Yaxiong Lin, Nagesh Madde, Che Ngufor, Sudhindra Upadhyaya, Jyotishman Pathak, and Daryl J. Kor

Automagically Encoding Adverse Drug Reactions in MedDRA ................................ Margherita Zorzi, Carlo Combi, Riccardo Lora, Marco Pagliarini, and Ugo Moretti

A Clinical Decision Support System for Preventing Adverse Reactions to Blood Transfusion ................................................................. Dennis H. Murphree, Leanne Clifford, Yaxiong Lin, Nagesh Madde, Che Ngufor, Sudhindra Upadhyaya, Jyotishman Pathak, and Daryl J. Kor

Session 4 Forecasting and Detection

Flu Caster: A Pervasive Web Application for High Resolution Situation Assessment and Forecasting of Flu Outbreaks ............................................................... Suruchi Deodhar, Jiangzhuo Chen, Mandy Wilson, Manikandan Soundararapandian, Keith Bisset, Bryan Lewis, Chris Barrett, and Madhav Marathe

Fractals for Malignancy Detection in Dermoscopy Images ........................................ Sinan Kockara, Mutlu Mete, Tansel Halic, Nurcan Yuruk, Muhyeddin Ercan, and Ashley Lawrence
Calculating Patient Similarity Based on Respiration Induced Tumor Motion ......................................................... 122  
  Rittika Shamsuddin, Arvind Balasubramanian, Amit Sawant, 
  and Balakrishnan Prabhakaran

**Session 5 Prediction and Practice**

Predicting Sequences of Clinical Events by Using a Personalized Temporal 
Latent Embedding Model .......................................................................................................................... 130  
  Cristóbal Esteban, Danilo Schmidt, Denis Krompaß, and Volker Tresp
Improving Risk Prediction of Clostridium Difficile Infection Using Temporal 
Event-Pairs ............................................................................................................................................... 140  
  Mauricio Monsalve, Sriram Pemmaraju, Sarah Johnson, and Philip M. Polgreen
Design and Evaluation of an Interactive Proof-of-Concept Dashboard 
for General Practitioners ........................................................................................................................ 150  
  Robin De Croon, Joris Klerkx, and Erik Duval
The Role of Explanations on Trust and Reliance in Clinical Decision Support 
Systems .................................................................................................................................................... 160  
  Adrian Bussone, Simone Stumpf, and Dympna O'Sullivan

**Session 6 Visualization and Applications**

Visual Analysis of Relationships between Behavioral and Physiological Sensor 
Data .......................................................................................................................................................... 170  
  Jennifer G. Kim, Melinda Snodgrass, Mary Pietrowicz, and Karrie Karahalios
Flow-SNE: A New Approach for Flow Cytometry Clustering and Visualization ........................................ 180  
  M. Baran Pouyan and M. Nourani

**Session 7 Platforms, Devices, and Mobile Apps**

A Mobile Health System to Identify the Onset of Paroxysmal Atrial Fibrillation ............................................. 189  
  Shi Cheng, Lakshman S. Tamil, and Benjamin Levine
Ecosphere Principles for Medical Application Platforms .................................................................................. 193  
  Yu Jin Kim, Sam Procter, John Hatchiff, Venkatesh-Prasad Ranganath, and Robby
Supporting Preliminary Decisions on Patient Requests for Access to Health 
Records: An Integrated Ethical and Legal Framework ................................................................. 199  
  Scott McLachlan, Kudakwashe Dube, Thomas Gallagher, 
  and Jennifer A. Simmonds
A Wearable NFC Wristband to Locate Dementia Patients through 
a Participatory Sensing System .............................................................................................................. 208  
  Johnson Chao-Sheng Huang, Yin-Tzu Lin, Joseph Kwong-Leung Yu, Kan Liu, 
  and Yau-Hwang Kuo
Session 8 Modeling and Learning

A Data-Driven Behavior Modeling and Analysis Framework for Diabetic Patients on Insulin Pumps .................................................................213
Sanjian Chen, Lu Feng, Michael R. Rickels, Amy Peleckis, Oleg Sokolsky, and Insup Lee

The Role of Semantic and Discourse Information in Learning the Structure of Surgical Procedures .................................................................223
Ramon Maldonado, Travis Goodwin, Sanda M. Harabagiu, and Michael A. Skinner

Feedback-Driven Radiology Exam Report Retrieval with Semantics .................................................................233
Sarasi Lalithsena, Luis Tari, Anna von Reden, Benjamin Wilson, Brian J. Kolowitz, John Kalafut, Steven Gustafson, and Amit Sheth

Session 9 Processing Clinical Notes

Simultaneous Prognosis and Exploratory Analysis of Multiple Chronic Conditions Using Clinical Notes .................................................................243
Shalmali Joshi, Oluwasanmi Koyejo, Kristine Resurreccion, and Joydeep Ghosh

A Predictive Chronological Model of Multiple Clinical Observations .................................................................253
Travis Goodwin and Sanda M. Harabiu

Clinico-genomic Data Analytics for Precision Diagnosis and Disease Management .................................................................263
Anuja Kench, Vandana P. Janeja, Yelena Yesha, Naphtali Rishe, Michael A. Grasso, and Amanda Niskar

Posters

Human Factors

Untangling the Complexity of Connected Health Evaluations .................................................................272
Padraig O’leary, Noel Carroll, Paul Clarke, and Ita Richardson

Comparison of Patient Empowerment Frameworks .................................................................282
Aisha Umar Akeel and Darren Mundy

An Easily Adopted Markup Discipline for Annotating Electronic Medical Records with Ontological and Epistemological Qualification: Toward Disciplined Asterisks, Parentheticals, Marginalia, Footnotes, and Hashtags .................................................................287
Ronald P. Loui
Systems

A Framework for Mining Evolution Rules and Its Application to the Clinical Domain ................................................................. 293

Pietro Sala, Carlo Combi, Matteo Cuccato, Andrea Galvani, and Alberto Sabaini

An HL7 Data Pseudonymization Pipeline ............................................................................................................................... 303

Thusitha Mabotuwana, Christopher S. Hall, Rob van Ommering, Ranjith Tellis, and Merlijn Sevenster

A Prototype of Mobile app/EHR Communication through Standards for Home Treatment of Transcranial Direct Current Stimulation ........................................................................................................ 310

Elena Rossi, Paul Fontelo, Michael J. Ackerman, Giuseppe Pozzi, and Sara Marceglia

Anatomical District Recognition in CT Bio-images .................................................................................................................. 316

Angelo Ostinelli, Giuseppe Pozzi, and Antonio Vassena

Ontology-Based Visualization of Healthcare Data Mined from Online Healthcare Forums ................................................................................................................................. 325

Hariprasad Sampathkumar, Xue-Wen Chen, and Bo Luo

Identifying Documentation of Delirium in Clinical Notes through Topic Modeling ............................................................... 335

Yijun Shao, Charlene Weir, Qing Zeng-Treitler, and Nicolette Estrada

Detection of Episodes of Major Depression in Older Adults through Physiological Markers and Movement Patterns ......................................................................................................................... 341

Almeida C. Edwing, Ferruzca N. Marco, and Guitierrez P. Ivan

BPMN-Based Representation and Comparison of Clinical Pathways for Catheter-Related Bloodstream Infections ...................................................................................................................... 346

Francesca Zerbato, Barbara Oliboni, Carlo Combi, Manuel Campos, and Jose M. Juarez

A Smartwatch Software Architecture for Health Hazard Handling for Elderly People ................................................................................................................................. 356

Rainer Lutze and Klemens Waldhör

LiSE: A Personal Booklet for Health Care Annotation ............................................................................................................. 362

Manuela Macri, Marco Antonio Mastratisi, Domenico Mirarchi, Erika De Francesco, Luigi Granata, Giuseppe Tradigo, Pietro H. Guzzi, and Pierangelo Veltri

Familiar Video Stories as a Means for Children with Autism: An Analytics Approach ........................................................................ 368

Chung-Hao Chen, Jonna Bobzien, Michail Giannakos, Ann Bruhn, Alexis Bruggeman, Shahram Mohrehkesh, Min Zhang, Wei-Wen Hsu, and Nikos P. Chrisochoides
Data Analytics

New Accurate Automated Melanoma Diagnosing Systems .................................................................374
  Nikolay Metodiev Sirakov, Mutlu Mete, Richard Selvaggi, and Marie Luong

Evaluation of Pose Tracking Accuracy in the First and Second Generations of Microsoft Kinect .................................................................................................................................380
  Qifei Wang, Gregorij Kurillo, Ferda Ofli, and Ruzena Bajcsy

Discovering and Validating Breast Cancer Treatment Correlations Using an Associative Memory Model and Statistical Methods ..................................................................................390
  Ashis Gopal Banerjee, Mridul Khan, John Higgins, and Amar K. Das

Energy Saving Using Scenario Based Sensor Selection on Medical Shoes ........................................398
  Teng Xu and Miodrag Potkonjak

An Adaptive Rule-Based Approach to Classifying Activities of Daily Living ..................................404
  Saif Okour, Anthony Maeder, and Jim Basilakis

Temporal Pattern and Association Discovery of Diagnosis Codes Using Deep Learning ..................408
  Saeed Mehrabi, Sunghwan Sohn, Dingheng Li, Joshua J. Pankratz, Terry Therneau, Jennifer L. St. Sauver, Hongfang Liu, and Mathew Palakal

Smartphone Inference of Alcohol Consumption Levels from Gait ...................................................417
  Zachary Arnold, Danielle Larose, and Emmanuel Agu

Elderly Mobility and Daily Routine Analysis Based on Behavior-Aware Flow Graph Modeling ..........................427
  Chen Li, William K. Cheung, and Jiming Liu

Process Mining Applied to Laboratory Workflow: A Comparison between Two Sites ........................437
  Alessandro Sulis, Mauro Del Rio, Francesca Frexia, Paolo Anedda, Giovanni Busonera, Marco Cogoni, and Gianluigi Zanetti

Tutorials

Data Analytics in Healthcare Informatics ..........................................................................................444
  Fei Wang and Gregor Stiglic

Robust Medical Monitor Design ........................................................................................................445
  James Weimer, Oleg Sokolsky, and Insup Lee

Ontology and Knowledge Sharing in E-Health ..................................................................................446
  Morcous Massoud Yassa Massoud and Reham Ikram
Non-refereed Abstracts

Personalized Health Plan Ranking - One Application of Cloud Computing to Health Care Data ..................................................................................................................................................447

Peichang Shi and Aryya Gangopadhyay

Finding Difficult-to-Disambiguate Words: Towards an Efficient Workflow to Implement Word Sense Disambiguation ..................................................................................................................................................................448

Manabu Torii, Jung-Wei Fan, and Daniel S. Zisook

Location-Dependent Vocabularies and Speaker Style Personalization for Accurate Mobile Diet Recognition ................................................................................................................................................................449

Xiaochen Huang and Emmanuel Agu

Feasibility Study of a Machine Learning Approach to Predict Dementia Progression ........................................................................................................................................................................................................450

Chih-Lin Chi, Wonsuk Oh, and Soo Borson

Healthcare Collaborative Network Based on Common KADS Methodology .....................................................................................................................................................................................................451

Morcous M.Y. Massoud

Older Adults Technology Assessment, Use, and Needs for Health Applications ..................................................................................................................................................................................................452

Claudia B. Rebola

Exploring Statistical GLCM Texture Features for Classifying Food Images ........................................................................................................................................................................................................453

Qiwen Chen and Emmanuel Agu

Virtual Sleep Laboratory for Population Health .................................................................................................................................................................................................................................454

Trung Pham, Savio Monteiro, Shi Cheng, Maziyar Pouyan, and Lakshman Tamil

Technical Demo Session

Knowledge Management of Controlled Vocabularies for Semantic Interoperability of Healthcare Applications ................................................................................................................................................................455

Joyce Rocha de Matos Nogueira,
Nathália Cristina Laurindo de Oliveira Ahiadzro, Luciana Tricai Cavalini,
and Timothy Wayne Cook

Summit: A Method and Software Application for Analyzing Healthcare Technology Investments ..................................................................................................................................................................................................459

Steven R. Haynes and Mark J. Jermusyk

Providing Full Semantic Interoperability for the Fast Healthcare Interoperability Resources Schemas with Resource Description Framework ................................................................................................................................................................463

Maria Penna Luz, Joyce Rocha de Matos Nogueira, Luciana Tricai Cavalini,
and Timothy Wayne Cook
Doctoral Consortium Papers

How Do Persons with Mild Acquired Cognitive Impairment Use E-Services and Social Media? Results from a Swedish National Survey ................................................................. 467
   "Aboozar Eghdam, Sabine Koch, Aniko Bartfai, and Christian Oldenburg"

Prediction and Tracking Changes in Bio-medical Sensor Data .............................................. 468
   "Rittika Shamsuddin"

Robot-Assisted Rehabilitation for Smart Assessment and Training ........................................ 469
   "Alexandros Lioulemes"

Human Motion Analysis and Vision-Based Articulated Pose Estimation ............................... 470
   "Srujana Gattupalli"

Augmenting Drug Discussions in General Practice ................................................................. 471
   "Robin De Croon"

Information System Hazard Analysis and Mitigation .............................................................. 472
   "Fieran Mason-Blakley"

Applying Lessons Learned from the Birmingham Free Clinic Dispensary to Inform Pharmaceutical Supply Chain Management in Low-Resource Settings ................................... 482
   "Arielle M. Fisher, Harry Hochheiser, and Gerald P. Douglas"

Predicting User Participation and Detecting User Role Diffusion in Online Health Communities ................................................................................................. 483
   "Xi Wang, Zhiya Zuo, Kang Zhao, and Nick Street"

Discovering the Temporal Interactions between Clinical Observations ............................... 484
   "Travis Goodwin"

Toward a Complete Database of Drug Repurposing Candidates Extracted from Social Media, Biomedical Literature, and Genetic Data ......................................................... 494
   "Majid Rastegar-Mojarrad and Rashmi Prasad"

Biomedical Named Entity Recognition with less Supervision ............................................ 495
   "Omid Ghiasvand and Rohit J. Kate"

Learning the Structure of Surgical Procedures from Operative Notes ................................ 496
   "Ramon Maldonado"

Simultaneous Prognosis of Multiple Chronic Conditions from Heterogeneous EHR Data ................................................................. 497
   "Shalmali Joshi, Oluwasanmi Koyejo, and Joydeep Ghosh"

Implicit Information Extraction from Clinical Notes ............................................................. 498
   "Sujan Perera and Amit Sheth"

Strategies for Handling Missing Data in Detecting Postoperative Surgical Site Infections ................................................................. 499
   "Zhen Hu, Genevieve B. Melton, and Gyorgy J. Simon"
Articulating a Framework for Patient Empowerment to Support Greater E-Health Integration ..................................................................................................................................500

Aisha Umar Akeel and Darren Mundy

Industry Track Papers
A Web-Based Application for Visualizing the CMS Referral Network .................................................................501

Yugang Jia, Xin Wang, Reza Sharifi Sedeh, Qingxin Wu, and Nathan Cohen

Design and Implementation of a Privacy Aware Framework for Sharing Electronic Health Records ..................................................................................................................................504

Cheng-Yi Yang, Chien-Tsai Liu, and Tzu-Wei Tseng

A Middleware to Support HL7 Standards for the Integration between Healthcare Applications ..................................................................................................................................509

Thamer M. Alenazi and Ahmad A. Alhamed

Data Analytics Challenge Finalists
Did You Know? A Rule-Based Approach to Finding Similar Questions on Online Health Forums ..................................................................................................................................513

Jianglei Han, Naveen Nandan, and Aixin Sun

Healthcare Data Analytics Challenge ..................................................................................................................................515

Zhiguo Yu, Byron C. Wallace, and Todd R. Johnson

Retrieval of Semantically Similar Healthcare Questions in Healthcare Forums ..................................................................................................................................517

Yanshan Wang, Saeed Mehrabi, Majid Rastegar Mojarad, Dingcheng Li, and Hongfang Liu

Golden Retriever: Question Retrieval System ..................................................................................................................................519

Hamman W. Samuel, Mi-Young Kim, Sankalp Prabhakar, Mohomed Shazan, and Mohomed Jabbar

Similarity in Patient Support Forums Using TF-IDF and Cosine Similarity Metrics ..................................................................................................................................521

Mohammad Alodadi and Vandana P. Janeja

IEEE ICHI Healthcare Data Analytics Challenge ..................................................................................................................................523

Bisakha Ray

Smart and Connected Health Workshop Papers
In-Situ Measurement and Prediction of Hearing Aid Outcomes Using Mobile Phones ..................................................................................................................................525

Syed Shabih Hasan, Ryan Brummet, Octav Chipara, Yu-Hsiang Wu, and Tianbao Yang
Extraction of Clinical Phenotypic Information from Online Heterogeneous Healthcare Networks ..........................................................535
Christopher C. Yang and Mengnan Zhao

Design, Development, Deployment of a Telemedicine System in a Developing Country: Dealing with Organizational and Social Issues ...........................................................................................................545
Carlo Combi, Gabriele Pozzani, and Giuseppe Pozzi

Spare Me: Towards an Empathetic Tool for Helping Adolescents & Teenagers Cope with Sickle Cell ........................................................................................................................................................................555
Gloria Washington, Jasmine Ward, and Michelle Kameka

Automated Detection of Sleep Disorder-Related Events from Polysomnographic Data ..................................................................................................................562
Hugo Espiritu and Vangelis Metsis

mHealth Platform for Breast Cancer Risk Assessment .................................................................................................................................570
M. Ghaderi, G. Gupta, L. Tamil, M. Abdallah, and K. Qaraq

Modeling Disease Spread at Global Mass Gatherings: Hajj as a Case Study ..................................................................................................................574
Sultanah M. Alshammari and Armin R. Mikler

Information Technology Challenges for Mobile Integrated Healthcare ..................................................................................................................578
Steven R. Haynes, Maria G. Barbone, and Mark J. Jermusyk

360-degree Quantified Self ........................................................................................................................................................................587
Hamed Haddadi, Ferda Ofli, Yelena Mejova, Ingmar Weber, and Jaideep Srivastava

Health Information Quality Workshop Papers

What's to Learn from Unvalidated Sources of Health Information? ..................................................................................................................593
Shawn Ogunseye and Sherrie X.Y. Komiak

The Impact of Senior-Friendliness Guidelines on Seniors' Use of Personal Health Records ..................................................................................................597
Shawn Ogunseye, Sherrie X.Y. Komiak, and Paul Komiak

Author Index ..........................................................................................................................................................................................603
