12th International Conference on
PRESSURE SURGES
Dublin, Ireland: 18–20 November 2015

CONTENTS

FOREWORD	1
VICTOR L STREETER – OBITUARY	3
ACCIDENTS AND INCIDENTS	
KEYNOTE PAPER:	
The 2007 New York City steam explosion: post-accident analysis <i>R S Vecchio, S K Sinha, P M Bruck, T C Esselman, G Zysk, LPI, Inc.; D Somrah, Consolidated Edison Co. of New York, Inc., USA</i>	7
AEROSPACE INDUSTRY	
KEYNOTE PAPER:	
Multi-phase fluid-hammer in aerospace applications <i>J Steelant, ESA-ESTEC, The Netherlands</i>	21
Effect of the dissolved pressurizing gas on the pressure surge during the filling process of spacecraft feedlines <i>C Bombardieri, T Traudt, C Manfretti, DLR Lampoldshausen, Germany</i>	33
High speed imaging of water hammer with column separation <i>T Traudt, C Bombardieri, C Manfretti, DLR Lampoldshausen, Germany</i>	47
Aircraft refuel rig pressure surge modelling and test verification <i>D Morrison, R Illidge, Airbus Operations Ltd, UK</i>	59
CFD AND UNSTEADY FRICTION	
Computation of steam-water transients using a two-fluid seven-equation model <i>H Lochon, EDF R&D, IMSIA and 12M; F Daude, EDF R&D and IMSIA; P Galon, IMSIA and CEA; J-M Hérard, EDF R&D and 12M, France</i>	69
Wall shear stress in unsteady flow analysis using CFD <i>N M C Martins, H M Ramos, D I C Covas, Universidade de Lisboa, Portugal; A K Soares, Federal University of Goiás, Brasil</i>	83
Direct numerical investigation of unsteady turbulent pipe flow <i>Y M Chung, Z Wang, University of Warwick, UK</i>	99
Simple modelling of unsteady friction factor <i>K Urbanowicz, West Pomeranian University of Technology, Poland</i>	113

CODES AND DATABASES

- Proposal for an improved approach for the simplified force calculation procedure after rapid valve closure in the European standard EN 13480-3
T Neuhaus, TUEV NORD SysTec GmbH & Co. KG, Germany 133
- Water hammer software performance analysis and validation via a web-database
S van der Zwan, A Heinsbroek, M Tukker, Deltares, The Netherlands; B Karney, University of Toronto, Canada; A Bergant, Litostroj Power d.o.o., Slovenia 149

ENTRAPPED AIR

- Modeling trapped air pockets in a combined sewage storage tunnel
P Klaver, J Wolfe, LimnoTech, USA; D Crawford, Thames Tideway Tunnel Delivery Team, UK; J G Vasconcelos, Auburn University, USA 159
- Effective de-aeration of pipelines and the use of captured air to mitigate dynamic pressures
S J van Vuuren, University of Pretoria, South Africa 171
- Rapid filling of an open-ended pipeline with entrapped air
L Zhou, D Liu, H Wang, Hohai University, China; B Karney, A Malekpour, University of Toronto, Canada 185
- Exploring how air valves change transient responses of pipe systems during rapid filling
A Malekpour, HydraTek & Associate Inc.; B Karney, University of Toronto, Canada 199
- Lagrangian modelling of fluid transients in pipelines with entrapped air
D Q Hou, S Wang, Tianjin University, China; A C H Kruisbrink, University of Nottingham, UK; A S Tijsseling, Eindhoven University of Technology, The Netherlands 215
- Entrapped air pocket analysis using CFD
N M C Martins, H M Ramos, D I C Covas, Universidade de Lisboa, Portugal; A K Soares, Federal University of Goias, Brazil 229
- Physical explanation of the effect of pipe and liquid elasticity on the transient pressures following rapid pressurization of pipelines with entrapped air
A Malekpour, HydraTek & Associates; B Karney, University of Toronto, Canada 239

FLUID-STRUCTURE INTERACTION AND TURBIDITY

- Hydraulic transients in straight and coil pipe rigs
D Ferras, Universidade de Lisboa, Portugal and École Polytechnique Fédérale de Lausanne, Switzerland; P A Manso, A J Schleiss, École Polytechnique Fédérale de Lausanne, Switzerland; D I C Covas, Universidade de Lisboa, Portugal 257
- Interaction between hydraulic transient events and structure vibration
M Simão, H M Ramos, University of Lisbon, Portugal; J Mora-Rodriguez, Universidad de Guanajuato, Mexico 273

FSI study on the human veins 287
*M Simão, J M Ferreira, H M Ramos, University of Lisbon, Portugal;
J Mora-Rodriguez, Universidad de Guanajuato, Mexico*

Do transients contribute to turbidity failures of water distribution systems? 297
S Jones, R Collins, J Boxall, University of Sheffield, UK

FUNDAMENTALS

Work and life of Piotr Szymański 311
*K Urbanowicz, West Pomeranian University of Technology, Poland;
A S Tijsseling, Eindhoven University of Technology, The Netherlands*

Method of characteristics: (Why) is it so good? 327
*A E Vardy, University of Dundee, UK; A S Tijsseling, Eindhoven University
of Technology, The Netherlands*

What is wave speed? 343
*A S Tijsseling, Eindhoven University of Technology, The Netherlands;
A E Vardy, University of Dundee, UK*

On the behaviour of high frequency acoustic waves in pressurized inviscid
fluid in a conduit 361
*M Louati, M S Ghidaoui, The Hong Kong University of Science and
Technology, Hong Kong*

HYDROPOWER INDUSTRY

Modelling a transient event at an hydroelectric scheme 379
P J Purcell, University College Dublin, Eire

Large and rapid set-point adjustment of hydro power plants using embedded
transient hydraulic simulations of the plant as a model predictive method 391
*B Svingen, Rainpower Norway AS / NTNU; H H Francke, Flow Design
Bureau AS, Norway*

Numerical study prior to a turbine commissioning test 405
F Sadeque, J Taylor, BC Hydro, Canada

Case study: Damaging effects of increasing the installed capacity in an
existing hydropower plant 417
*K Vereide, B Svingen, Norwegian University of Science and Technology;
R Guddal, Sira-Kvina Power Company, Norway*

Effect of pressure relief valves on the fluid transients in the penstocks of a
small run-of-river plant 425
S Dursun, Z Bozkuş, A E Dinçer, METU, Turkey

INDUSTRIAL CASE STUDIES

KEYNOTE PAPER:

Analysis and control of hydraulic transients: practical aspects and
considerations 439
M H Chaudhry, University of South Carolina, USA

Surge alleviation at Wilmslow water treatment works high lift pumping station <i>S Massey, C Robinson, MMI Engineering Ltd; M Bingham, MWH Treatment Ltd; T Dempsey, United Utilities Group PLC, UK</i>	453
Case studies of the design and performance of one-way surge tanks in pumped water and wastewater pipelines <i>B Madin, BSE; R Austin, Innovyze, Australia</i>	463
Controlling pressure transients in large diameter transmission mains with little allowance for surge <i>D H Axworthy, Northwest Hydraulic Consultants Inc., USA</i>	477
Full scale ambient water flow tests of a 10-inch emergency release coupling for LNG transfer <i>J van der Putte, E van Bokhorst, TNO Technical Sciences, The Netherlands; T Webber, C Revell, KLAW LNG, UK</i>	493
Use of pressure surge for unblocking hydrocarbon pipelines <i>H Mackenzie, R Campbell, Paradigm Flow Services; A E Vardy, University of Dundee, UK</i>	509
Air valves/vacuum breakers; a modelling nightmare <i>P Glover, Peter Glover Consulting Ltd, UK</i>	523
Anatomy of surge analysis for industrial firewater systems — “we never have problems with firewater systems!” <i>L C Ireland, F A Locher, Bechtel NS&E; J D O’Sullivan, S Koirala, Bechtel Oil Gas & Chemicals, USA</i>	537
Pressure surges with “zero flow” in a fire fighting reticulation system <i>A Heinsbroek, Deltares, The Netherlands; B Karney, University of Toronto, Canada</i>	549
Integration of emergency control systems in the anti-surge design of large transmission schemes <i>S van der Zwan, Deltares; A Alidai, I W M Pothof, Deltares and Delft University of Technology, The Netherlands; P H Leruth, Abu Dhabi Transmission & Despatch Company (TRANSCO), UAE</i>	557
Efficient assessment of transmission mains and control systems by means of numerical modelling <i>L Mecksenaar, S H Balkema, Royal HaskoningDHV; E Arpadzic, E Vermaas, Evides Water Company, The Netherlands</i>	567
LEAK DETECTION, MONITORING AND EXPERIMENTS	
The use of the cross-correlation of two signals as a transient leak detection method <i>N Motazed, S B M Beck, University of Sheffield, UK</i>	581
Field study on pipeline parameter identification using fluid transient waves with time-domain analysis <i>J Gong, Y Kim, M Lambert, A Simpson, A Zecchin, The University of Adelaide; H Fandrich, East Gippsland Water, Australia</i>	595

A method to characterise transients from pressure signals recorded in real water distribution networks <i>D Starczewska, R Collins, J Boxall, University of Sheffield, UK</i>	609
Experimental and analytical study of the air-water interface kinematics during filling and emptying of a horizontal pipeline <i>J Laanearu, Tallinn University of Technology, Estonia; D Q Hou, Tianjin University, China; A S Tijsseling, Eindhoven University of Technology, The Netherlands</i>	625
Developments in valve-induced water-hammer experimentation in a small-scale pipeline apparatus <i>A Bergant, Litostraj Power d.o.o., Slovenia; U Karadžić, University of Montenegro, Montenegro</i>	639

MULTI-PHASE TRANSIENTS

KEYNOTE PAPER:

State-of-the-art modelling of multi-phase transients <i>I Tiselj, Jožef Stefan Institute, Slovenia</i>	655
---	-----

KEYNOTE PAPER:

Surges associated with rapid filling of stormwater tunnels and transmission mains – An overview of the existing research <i>J G Vasconcelos, Auburn University, USA</i>	681
--	-----

PUMPS, VALVES AND VESSELS

<i>In Situ</i> Determination of polar moment of inertia of pump-motor assembly <i>C S Martin, Georgia Institute of Technology, USA</i>	703
Thermodynamics of surge vessels <i>S van der Zwan, Deltares; M Toussaint, Delft University of Technology; A Alidai, I W M Pothof, Deltares and Delft University of Technology, The Netherlands; P H Leruth, Abu Dhabi Transmission & Despatch Company (TRANSCO), UAE</i>	713
Theoretical and experimental analysis of pressure surge in a two-phase compressed air vessel <i>M Besharat, Islamic Azad University, Iran and Universidade de Lisboa, Portugal; H M Ramos, Universidade de Lisboa, Portugal</i>	729
Hydraulic design and modelling of large surge tanks <i>W Richter, G Zenz, Graz University of Technology, Austria; K Vereide, Norwegian University of Science and Technology, Norway</i>	745
The crucial role of air vacuum valve vertical position on producing secondary transient pressures <i>L Ramezani, B Karney, University of Toronto, Canada</i>	761
Transient flow inside vortex chamber diodes <i>F Haakh, Zweckverband Landeswasserversorgung, Germany</i>	775
