Session 2

Session 2A: Cloud System and Security I

An Intelligent Surveillance Video Analysis Service in Cloud Environment

Tse-Shih Chen, Ming-Fen Lin, Tzi-Cker Chiueh, Cheng-Hsin Chang and Wei-Heng Tai ............. 1

An Adaptive Network Intrusion Detection Approach for the Cloud Environment

Hui-Hao Chou and Sheng-De Wang ................. 7

Secure Logging Framework Integrating with Cloud Database

Chung-Yi Lin, Ming-Che Chang, Hua-Chou Chiu and Keh-Hwa Shyu................................. 13

Comparative Legislation, Corporate Policy, and Citizen Concerns: Legal Solutions for Privacy Protection in Cloud Computing

Charles Wharton and Kang-I Lin...................... 19

Session 2B: Sensing and Detection Technology

A First Exploratory Study on the Relevance of Everyday Object Knowledge and Training for Increasing Efficiency in Airport Security X-ray Screening

Nicole Hättenschwiler, Stefan Michel, Milena Kuhn, Sandrina Ritzmann and Adrian Schwaninger................................................. 25

User Acceptance of Planar Semiconductor Fingerprint Sensors

Ramón Blanco-Gonzalo, Raul Sanchez-Reillo, Rodrigo Ros-Gomez and Belen Fernandez-Saavedra ....................... 31
Data Protection based on Multifunction Digital Watermark in Wireless Sensor Network

Yong-Jun Ren, Ya-Ping Cheng, Jin Wang and Li-Ming Fang ........................................ 37

Novel Method for Early Bearing Fault Detection based on Dynamic Stability Measure

Moises Diaz, Patricia Henríquez, Miguel A. Ferrer, Jesùs B. Alonso, Giuseppe Pirlo and Donato Impedovo .......... 43

Session 3

Session 3A: Selected Topics I

Providing Online Operational Support for Distributed, Security Sensitive Electronic Business

Maurizio Talamo, Armanas Povilionis, Franco Arcieri and Christian H. Schunck ......... 49

A First Simulation on Optimizing EDS for Cabin Baggage Screening Regarding Throughput

Yanik Sterchi and Adrian Schwaninger .......... 55

The Causal Model Analysis of Resident’s Evaluation of Closed Circuit TV and Security Perception

Hsiang-Te Liu and Yun-Ming Tang ............... 61

Information Password Recovery with GPU

Kun-Chi Lui, Addison Y.S. Su, Angus F.M. Huang, Ting-Jou Ding and Chiu-Nan Su ..................... 67

Latent Dirichlet Allocation Based Blog Analysis for Criminal Intention Detection System

Sih-Huei Chen, Andri Santoso, Yuan-Shan Lee and Jia-Ching Wang ................................. 73
Session 3B: Network and Cyber Security I

Techniques for the Dynamic Randomization of Network Attributes

Adrian Chavez, William M.S. Stout and Sean Peisert ...................................................... 77

Fabio Garzia, Lorenzo Nesbitt and Roberto Cusani .......................................................... 83

Cyber-Security Analysis and Evaluation for Smart Home Management Solutions

Giovanni Agosta, Alessio Antonini, Alessandro Barenghi, Dario Galeri and Gerardo Pelosi .................................................. 89

Comparative Analysis of Governmental Countermeasures to Cyber Attacks

Heon-Soo Lee ........................................................................................................ 95

Computer Network Deception as a Moving Target Defense

Vincent E. Urias, William M.S. Stout and Caleb Loverro ............................................. 101

Session 4

Session 4A: Cloud System and Security II

Security Considerations in ITRI Cloud OS

Tzi-Cker Chiueh, EJ Chang, Robert Huang, Hogan Lee, Vernon Sung and MH Chiang .... 107

Reliable Access Control for Multi-authority in Cloud Storage

Yong-Jun Ren, Zhen-Qi Yang, Jin Wang and Li-Ming Fang ........................................... 113
Virtual Machines of High Availability Using Hardware-Assisted Failure Detection

Wei-Jen Wang, Hung-Lin Huang, Shan-Hao Chuang, Shao-Jui Chen, Chia-Hung Kao and Deron Liang .............. 117

A Goal-Driven Approach to Modeling Security Concerns in Network Management System

Chia-Ling Wu ...................................................... 123

Outsourced Data Taging via Authority and Delegable Auditing for Cloud Storage

Yong-Jun Ren, Jian Shen, Jin Wang and Li-Ming Fang ................................................. 131

Session 4B: Network and Cyber Security II

A Study of Android Malware Detection Technology Evolution

Wan-Chen Hsieh, Chuan-Chi Wu and Yung-Wei Kao .................................................. 135

Implementation of SDN Based Network Intrusion Detection and Prevention System

Pin-Jui Chen and Yen-Wen Chen ...................... 141

Distributed Multistage Alert Correlation Architecture based on Hadoop

James Rees .......................................................... 147

Cyber Security Risk Assessment Using an Interpretable Evolutionary Fuzzy Scoring System

Chih-Hung Hsieh, Chao-Wen Li, Wei-Chieh Chao and Pei-Wen Liu ................................. 153

An Event-based SDN Architecture for Network Security Analysis

Po-Ching Lin, Jyun-Chen Liu and Pin-Ren Chiou ....................................................... 159
Session 5

Session 5A: Selected Topics II

Security System and Actual Operation Benefit of Data Transmission on Heterogeneous Network

Ching-Wei Huang ........................................... 165

Browser Fuzzing by Scheduled Mutation and Generation of Document Object

Ying-Dar Lin, Feng-Ze Liao, Shih-Kun Huang
and Yuan-Cheng Lai ......................................... 169

The Design of Battle Field Correlation Tracks

Shaw-Shiun Deng, Hui-Zhen Gu and
Chen-Wei Ku .................................................. 175

The Computational Rules Extractor in the Detection of Tax Evasion

Yi-Zeng Hsieh, Mu-Chun Su, Addison Y.S. Su,
Wu-Rong Shih, Jen-Chih Yu and
Chien-Yeh Huang ............................................. 181

A Composite Guidance for Dual Range AAM with Side Jet Control

Der-Ren Taur and Chung-Hsin Cheng ............ 185

Session 5B: Information Forensics- Security, Encryption, Privacy I

Smartphone Continuous Authentication based on Keystroke and Gesture Profiling

Jain-Shing Wu, Chih-Ta Lin, Wan-Ching Lin
and Te-En Wei .................................................. 191

An End-to-End Encrypted Domain Proximity Recommendation System Using Secret Sharing Homomorphic Cryptography

Jyh-Ren Shieh ................................................. 199
A Motion Detection Technique Utilizing the Size of Encoded Frame
Hayato Teduka .................................................... 205

An Audio Secret Sharing System Based on Fractal Encoding
   Jing-Zhong Wang, Tian-Xi Wu and
   Tsung-Ying Sun .................................................. 211

A Digital Triage Forensics Framework of Window Malware Forensic Toolkit Based on ISO/IEC 27037:2012
   Dayu Kao and Guan-Jie Wu ................................. 217

Session 6

Session 6A: Biometrics Technology I

Score Normalization for Keystroke Dynamics Biometrics
   Aythami Morales, Elena Luna-Garcia,
   Julian Fierrez and Javier Ortega-Garcia ...... 223

Increasing the Robustness of Biometric Templates for Dynamic Signature Biometric Systems
   Ruben Tolosana, Ruben Vera-Rodriguez,
   Javier Ortega-Garcia and Julian Fierrez ...... 229

Movement Based Biometric Authentication with Smartphones
   Antoniu L. Fantana, Selvakumar Ramachandran,
   Christian H. Schunck and Maurizio Talamo.. 235

Improving Face Classification with Multiple-Clustering Induced Feature Reduction
   Natthakan Iam-On and Tossapon Boongoen . 241

Emotion Recognition from Speech under Environmental Noise Conditions using Wavelet Decomposition
   J.C. Vásquez-Correa, N. García,
   J.R. Orozco-Arroyave, J.D. Arias-Londoño,
   J.F. Vargas-Bonilla and Elmar Nöth .......... 247
Earprint Recognition based on an Ensemble of Global and Local Features

Aythami Morales, Moises Diaz, Gloria Llinas-Sanchez and Miguel A. Ferrer 253

Session 6B: Information Forensics- Security, Encryption, Privacy II

The Scrambling Cryptography Implemented with Chaotic Sequence Trigger Optical Switch Algorithm in WDM Passive Optical Network

Yao-Tang Chang and Yih-Chuan Lin ............ 259

The Bilateral Communication-based Dynamic Extensible Honeypot

Chun-Yi Wang, Ya-Lyue Jhao, Shih-Jen Chen, Chuan-Sheng Wang, Fu-Hau Hsu and Yao-Hsin Chen ........................................... 263

Privacy-Preserving Proof of Storage in Large Group

Yong-Jun Ren, Jin Han, Jin Wang and Li-Ming Fang ............................................ 269

Benefit of Construct Information Security Environment Based on Lightweight Virtualization Technology

Jen-Chieh Wang, Wei-Fun Cheng, Han-Chiang Chen and Hung-Li Chien ........... 273

Nuclear Forensics and Nuclear Crime Scene Management Problem in Taiwan

Cheng-Lung Lee, Ming-Fong Tai, Chun-Chih Lin and Chi-Chang Liu................. 277

Atomizing Apparatus For Development Of Latent Fingerprints

Chih Julie Wang, Ming-Chih Wang, Arvin Huang-Te Li and Cheng-Lung Lee....... 281
Session 7

Session 7A: Threat Identification and Modeling

AD²: Anomaly Detection on Active Directory Log Data for Insider Threat Monitoring
Chih-Hung Hsieh, Chia-Min Lai, Ching-Hao Mao, Tien-Cheu Kao and Kuo-Chen Lee ............. 287

Scalable Command and Control Detection in Log Data through UF-ICF Analysis
Kai-Fong Hong, Chien-Chih Chen, Yu-Ting Chiu and Kuo-Sen Chou .................................. 293

Efficient Spear-phishing Threat Detection Using Hypervisor Monitor
Chih-Hung Lin, Chin-Wei Tien, Chi-Wei Chen, Chia-Wei Tien and Hsing-Kuo Pao ............... 299

A Resistant Digital Image Watermarking Scheme Based on Masking Model
Didi Rosiyadi and Nova Hadi Lestriandok .... 305

Session 7B: Biometrics Technology II

Speaker Identification Experiments Under Gender De-Identification
Marcos Faundez-Zanuy, Enric Sesa-Nogueras and Stefano Marinozzi .................................. 309

Lip-Based Visual Speech Recognition System
Aufaclav Zatu Kusuma Frisky, Chien-Yao Wang, Andri Santoso and Jia-Ching Wang ........... 315

Testing of Biometric Systems Integrated in Mobile Devices
Belen Fernandez-Saavedra, Raul Sanchez-Reillo, Carlos Sanchez-Redondo and Ramon Blanco-Gonzalo ....................... 321
Discovering Identity in Intelligence Data using Weighted Link Based Similarities: A Case Study of Thailand

Tossapon Boongoen and Natthakan Iam-On . 327

Making Stronger Identity for EU Citizens

Judith Liu-Jimenez, Raul Sanchez-Reillo, Ramon Blanco-Gonzalo and Belen Fernandez-Saavedra ......................... 333

Session 8

Session 8A: Geospatial Information and Image Processing

Off-line Signature Stability by Optical Flow: Feasibility Study of Predicting the Verifier Performance

Moises Diaz, Miguel A. Ferrer, Giuseppe Pirlo, Giuliano Giannico, Patricia Henriquez and Donato Impedovo ........................................... 341

Risk-based Optimization Design for Checkpoints in Airports

Liang Huang................................................... 347

Self-authentication Watermark by Digital Halftoning

Chao-Ting Su and Hsi-Chun Wang................. 353

Research of Liquid CT Image De-noising based on Improved NL-Means Algorithm

Liang Huang................................................... 359

Applying Lidar-Based Obstacle Detection and Wireless Image Transmission System for Improving Safety at Level Crossings

Ho-Hsing Hsieh, Chi-Yao Hsu, Po-Yu Ke, Guang-Sheen Liu and Chih-Ping Lin .......... 363
An Information Sharing Scheme in Halftone Images Based on Multi-Scale Error Diffusion

Tzung-Fu Tsai and Po-Chyi Su .................. 369

Session 8B: Biometrics Technology III

Evaluation of Strengths and Weaknesses of Dynamic Handwritten Signature Recognition Against Forgeries

Raul Sanchez-Reillo, Helga C. Quiros-Sandoval, Judith Liu-Jimenez and Ines Goicoechea-Telleria ....................... 373

A Verification Protocol of Mobile Payment Based on Signature Recognition

Hau-Ming Chang, Shu-Chiung Lin, Patrick S. Chen and Yu-Hsuan Hung .......... 379

The Dynamic Biometric Signature – is the Biometric Data in the Created Signature Constant?

Vladimír Smejkal, Jindřich Kodl, Ladislav Sieger, Daniel Novák and Jakub Schneid .................. 385

Personal Re-identification Using Rank-based Manifold Ranking

Cheng-Ta Hsieh, Chin-Chuan Han and Kuo-Chin Fan ......................... 391

Rapidly Mutating Y-STRs Population Data in Taiwan and Haplotype Probability Estimation for Forensic Purposes

Meng-Yi Chen, Chang-En Pu, Fang-Chin Wu, Huei-Yu Lai and Chin-Wen Ho .................. 395

Study on STR Markers of DNA for Improving the Power of Identification on Cases in Taiwan

Fang-Chin Wu, Meng-Yi Chen, Chi-Hsiang Chao and Chang-En Pu .................. 403
Session 9

Session 9A: Unconventional Security

TACSA: A Web-service based System for Coastal Surveillance and Situational Awareness

Yi-Ming Dai and Keh-Shiou Liu ...................... 409

From Safety to Security - Pattern and Anomaly Detections in Maritime Trajectories

Shwu-Jing Chang, Kuan-Hung Yeh, Guan-Dun Peng, Shih-Ming Chang and Chung-Hao Huang .......................... 415

Efficient Detection Algorithm for Non-Coherent High-Resolution Radar in Sea Clutter

Cristina Carmona-Duarte, Jaime Calvo-Gallego, B. Pablo Dorta-Naranjo and Miguel A. Ferrer .............................. 421

Stochastic Delineation of Well Capture Zones in Aquifers of Choushui River Alluvial Fan in Central Taiwan

Chi-Ping Lin, Chuen-Fa Ni, I-Hsian Li and Chih-Heng Lu .................................................. 427
