5th International Conference on Logistics and Supply Chain Management 2015

Changsha, China
28 – 30 November 2015

Editors:

Hanjiang Zhang
Yan Pang
Henry Zhang

ISBN: 978-1-5108-1807-1
# CONTENTS

## Part I  Logistics Engineering

Comparison between palletized ground stacking and shuttle AS/RS system used in processed grain warehouse ................................................................. Shu-yi HOU, Yu-kun LIU, Xiao-guang ZHOU  3  
Study on the international logistics service capacity evaluation system construction under cross-border E-commerce environment .............................................. Yan PANG, Wei TIAN  11  
Prediction on bulk grain logistics demand in Fujian based on BP neural network .................................................................................................................. Chong YE, Meng-ting HUANG  19  
Research on collaborative development path of E-commerce logistics local distribution and urban public transport system ...................................................... Zheng-jun LI  26  
Analysis of collaborative distribution path of terminal logistics based on IOT technology ............................................................................................... Geng ZHU, Zhan-feng ZHU, Jing ZHAO, Yi-qing ZHU  33  
Design of smart sensor label based on RFID .................................................. Shou-chen CHAI, Sheng ZHOU  46  
Research on cooperative development of the cross border E-commerce and international logistics .................................................................................. Yan PANG, Man-si LUO  52  
Research on the evaluation of cold chain logistics distribution center location ..................................................................................................... Yi-hong CHENG, San-yuan ZHOU  57  
Evaluation of business models of rural supermarket based on entropy weight TOPSIS and balanced score card ................................................................. Yan-Bo YANG, Xu ZHANG  65  
Development of a remote monitoring system applied in digital oilfield ................................................................................................................................. Su-zhou TANG, Han-yue ZHANG, Shi-juan YANG  72  
Empirical research on the coordinated development between cross-border E-business and logistics against the background of Big Data .............................. Yan JIA  78  
System dynamic analysis of Big Data patterns in fresh fruit 020 application ........................................................................................................................... Zhi-ping DU, Ming-bao WANG  86
The analysis of agricultural products logistics in E-commerce environment
Cheng-wei ZHANG, Yi-tang ZENG, Yi-man DU 94

Upstream Yangtze River economical belt harbor group source of goods structure analysis
Ping LI 100

Feasibility analysis and design optimization of the campus express parcel self-pickup center
Xia LIU, Ting-ting LONG, Ying LI 106

The construction of the agricultural product logistics information analyzing platform based on cloud mining
Yi-tang ZENG, Yu-feng ZHANG, Cheng-wei ZHANG 112

Research for logistics outsourcing based on value chain promotion
Xiao-juan BAI, Pei-xian XU 117

Application of decision tree based on data mining in the employment management of college logistics engineering graduates
San-yuan ZHOU, Xiao-juan YANG, Yi-hong CHENG 123

Part II Supply Chain Management

Modeling and simulation of closed-loop military supply chain network planning under uncertain environment
Fei ZHANG, Da-rong LING, Shao-cen CAO 133

Empirical analysis of bullwhip effect in the FMCG supply chain—from a big supermarket data
Xiao-hong YUN, Cheng-hua LI 146

A multi-product batch ordering EOQ model with storage capacity constraint: an application of soft computing in inventory management
Yong-mei LIU, Bo KUANG 152

Extended warranty, pricing and coordination in a closed-loop supply chain model
Qing-ming ZOU, Meng-ya LIU 162

Supply chain optimization of fast moving consumer goods in revenue-sharing contract based on option theory
Zi-lin WU, Hua-jun TANG, Mei-na HUA 173

Bertrand price competition between public firm and private company
Hua-ying YU, Han-jiang ZHANG 180

The study on pricing and coordination of closed-loop supply chain under low-carbon constraint
Shao-ying NING, Xiao-feng WANG, You-rong FAN 186
An research on the impact of relationship strength and knowledge integration capability on supply chain knowledge transfer .................................................................Wen-an PAN, Wei-jie YANG 195

Research on skip-level supplier selection in the automotive industry based on DEA .........................................................................................................................Qiu-yue YU, San-yuan ZHOU 206

Regional selection evaluation system construction of international SPA enterprises to enter the Chinese market .................................................................Chong YE, Meng-yu WANG 212

Research on coordination mechanisms of closed-loop supply chain considering risk aversion and price competition .........................................................Hao ZOU, Peng YANG 221

Part III  Low-carbon Economy and Energy Saving

A review on the system energy management of Energy Internet ..................................................Tao ZHANG, Fu-xing ZHANG, Rui WANG, Yan ZHANG, Xiao-yu ZHANG 229

Modeling and analysis of energy local area network based on system dynamics simulation .................................................................................................................Fu-xing ZHANG, Tao ZHANG, Rui WANG, Yan ZHANG 242

Research on investment decision of demand-creation emission reduction R & D about supply chain based on uncertain effect ............................................................Han-jiang ZHANG, Jia-yu ZHANG 257

The security of natural gas strategic reserves in China based on multi objective programming ........................................................................................................Qian-wen SUN, Jia-qing SUN, Zhi-hong JIN, Ting-yu ZHANG 266

The competitiveness evaluation of regional tourism industry responding to low-carbon economy: a case from western Hunan, China ........................................Yao-qing YUAN 272

Research of logistics mode of domestic waste in eco-city construction .........................................................Guo-cheng SHE, Yan PANG 280

Two echelon trade credit financing for deteriorating items of expiration date with price and credit period sensitive demand involving default risk ............................................Juan-juan QIN 286

The plan of the selected location of dynamic alliance distribution center and the example analysis ........................................................................................................Zhi-mei ZHOU, Peng HONG 293

Financial aggregation, FDI technology spillover and regional industrial structure adjustment .........................................................................................................Guan-feng WANG 299
SWOT-PEST analysis about the development of cross-border E-commerce in China

Xiao-ping WANG, Shan-shan DU, Shen-feng ZHANG 312

DEA model for evaluating business performance of listed security company

Zi-jun ZHU 319
