
Gold Coast, Australia
9 – 12 December 2015
2015 20th International Conference on Engineering of Complex Computer Systems

ICECCS 2015

Table of Contents

Preface..................................................................................................................................................viii
Organizing Committee..........................................................................................................................ix
Program Committee...........................................................................................................................x
Doctoral Symposium Program Committee........................................................................................xii
Additional Reviewers..........................................................................................................................xiii
Keynotes..............................................................................................................................................xiv

Session: Software Architecture and Optimisation
Architecture Exploration of Real-Time Systems Based on Multi-objective Optimization ..........................................................1
Rahma Bouaziz, Laurent Lemarchand, Frank Singhoff, Bechir Zalila, and Mohamed Jmaiel
Fitness Landscape Characterisation for Constrained Software Architecture Optimisation ......................................................11
Aldeida Aleti and Irene Moser
Multi-objectives Refinement of AADL Models for the Synthesis Embedded Systems (mu-RAMSES) .................................................................21
Smail Rahmoun, Etienne Borde, and Laurent Pautet

Session: Empirical Methods
A Make/Buy/Reuse Feature Development Framework for Product Line Evolution .................................................................31
Juha Savolainen and Mike Mannion
Combining Software Metrics and Text Features for Vulnerable File Prediction .................................................................40
Yun Zhang, David Lo, Xin Xia, Bowen Xu, Jianling Sun, and Shanping Li
Hardened Flow-Sensitive Trace Formula for Fault Localization ........................................................................50
Si-Mohamed Lamraoui, Shin Nakajima, and Hiroshi Hosobe
Session: Security

All Your Sessions Are Belong to Us: Investigating Authenticator Leakage through Backup Channels on Android .................................................................60
   Guangdong Bai, Jun Sun, Jianliang Wu, Quanqi Ye, Li Li, Jin Song Dong, and Shanqing Guo

Improving Tenants’ Trust in SaaS Applications Using Dynamic Security Monitors ........................................................................................................70
   Mohamed Almorsy Abdelrazek, John Grundy, and Amani S. Ibrahim

Design and Evaluation of Feature Distributed Malware Attacks against the Internet of Things (IoT) ....................................................................................80
   Byungho Min and Vijay Varadharajan

Formal Analysis of a Single Sign-On Protocol Implementation for Android .........................................................90
   Quanqi Ye, Guangdong Bai, Kailong Wang, and Jin Song Dong

Session: Software Verification

GPU Accelerated On-the-Fly Reachability Checking .........................................................................................100
   Zhimin Wu, Yang Liu, Jun Sun, Jianqi Shi, and Shengchao Qin

The Complexity of Deadline Analysis for Workflow Graphs with a Single Resource ........................................................................................................110
   Mirela Botezatu, Hagen Vöelzer, and Lothar Thiele

   David Sanán, Liu Yang, Zhao Yongwang, Xing Zhenchang, and Mike Hinchey

Formal Development of a Real-Time Operating System Memory Manager ..............................................130
   Wen Su, Jean-Raymond Abrial, Geguang Pu, and Bin Fang

Session: Unifying Theories of Programming (UTP)

Towards a Session Logic for Communication Protocols ..................................................................................140
   Florin Craciun, Tibor Kiss, and Andreea Costea

A Formal Framework for Reasoning Emergent Behaviors in Swarm Robotic Systems ..........................................150
   Qin Li, Jinxun Wang, Qiwen Xu, Yanhong Huang, and Huibiao Zhu

Probabilistic Denotational Semantics for an Interrupt Modelling Language ................................................160
   Yanhong Huang, Yongxin Zhao, Shengchao Qin, and Jifeng He

Session: Short Papers

Conversing at Many Layers: Multi-layer System-on-Chip Protocol Conversion ...............................................170
   Roopak Sinha

SeBip: A Symbolic Executor for BIP ..................................................................................................................174
   Wang Qiang and Simon Bliudze
Improved Recovery for Proactive, Distributed Routing .................................................................178
  Mojgan Kamali and Luigia Petre

Sports Strategy Analytics Using Probabilistic Reasoning ..........................................................182
  Jin Song Dong, Ling Shi, Le Vu Nguyen Chuong, Kan Jiang, and Jing Sun

Web Application Architecture Security Evaluation Method Based on AADL ..........................186
  Shaoguang Geng, Xiaohong Li, Zhiyong Feng, and Dazhi Sun

Security Concepts as Add-On for Process Models .................................................................190
  Jacob Geisel, Brahim Hamid, and Jean-Michel Bruel

Semantic Network Model: A Reasoning Engine for Software Requirements ..........................194
  Kushal Ahmed, Lian Wen, Abdul Sattar, and Reza Farid

Requirements-Aided Automatic Test Case Generation for Industrial Cyber-physical Systems
  Roopak Sinha, Cheng Pang, Gerardo Santillán Martínez, Juha Kuronen,
  and Valeriy Vyatkin

Session: Doctoral Symposium

Formal Certification of Non-interferent Android Bytecode (DEX Bytecode) .........................202
  Hendra Gunadi

Comparing Routing Protocols ..................................................................................................206
  Mojgan Kamali and Luigia Petre

Parallel and Distributed Algorithms for Model Checking Problems (Doctoral Consortium) ....210
  Zhimin Wu

Analyzing Security Property of Android Application Implementation Using Formal Method
  Quanqi Ye

An Invariant Inference Framework by Active Learning and SVMs ......................................218
  Li Jiaying

Author Index .................................................................................................................................222
