## Contents

### Introduction

Rain Gardens/Bioretention

**Impacts of Soil Texture, Structure, and Compaction on Bioinfiltration Device Performance: Results of Lab and Field Investigations** ........................................... 4  
Redahegn Sileshi, Robert Pitt, and Shirley Clark

**Topsoil Development in Bioretention Cells: What are the Implications?** ........... 16  
Emily Mitchell Ayers and Patrick Kangas

**The BMP That Keeps on Giving: Quantifying the Impact of Native Plants on Soil Water Properties** ............................................................... 26  
Scott Dierks

**Effect of Vegetation on the Fate of Petroleum Hydrocarbons in Laboratory-Scale Rain Gardens** ................................................................. 37  
Gregory H. LeFevre, Paige J. Novak, and Raymond M. Hozalski

**Nutrient Retention Performance of Advanced Bioretention Systems Results from Three Years of Mesocosm Studies** .................................................. 43  
William C. Lucas and Margaret Greenway

**Bioretention Performance Findings from the International Stormwater BMP Database** ......................................................................................... 59  
Jane Clary, Marc Leisenring, and Shannon Tillack

### Green Streets and Hardscapes

**Ballard Roadside Rain Gardens, Phase 1–Lessons Learned** .............................. 70  
Shanti Colwell and Tracy Tackett

**A Green Street Retrofit in a Chesapeake Bay Community Using Bioswales**  ..... 81  
Shannon Lucas, Michael Clar, and Jim Gracie

**The City of Richmond’s Green Alleys Program: A Tale of Two Alleys** ............. 91  
Charlene Harper
Green Roofs

Nitrate in Green Roof Runoff
Susan Morgan, Ric Cooper, and William Retzlaff
98

Vegetated Roof Systems: A Review of the Benefits and Design Features of Tray Systems and Built Up Systems
James H. Lenhart and Timothy Nash
113

Design Methods

Estimating Annual Runoff Based on the NRCS Runoff Curve Number
Randell Greer and Stephen Wright
119

Development of Low Impact Development Design Guide
Xiangfei Li, Fayi Zhou, Dan Healy, and Kerri Robinson
128

Modeling to Quantify the Benefits of LID for CSO Reduction
Uzair (Sam) Shamsi
136

A Saturated Seepage Flow Model for Low Impact Development Devices
Yuan Cheng
141

Open Canopy in Urban Streams Induces Seasonal Variation in Transient Storage
Robert J. Ryan, Claire Welty, and Aaron I. Packman
147

Hydrogeologic Testing, Engineering, and Start-Up of a Gravity Drain System
Jim L. Lolcama, Philip E. Gauffreau, Ryan T. Walters, and Paul A. Fry
159

Case Studies and Watershed Restoration

From Gray to Green, Onondaga County’s Green Strategy
Hongbin Gao and Samuel H. Sage
170

The Urban Forest Is Broken: How We Can Enhance 1,000,000 Tree Initiatives to Meet Stormwater Goals
Peter MacDonagh
182

Green Stormwater Retrofits: Objectives and Costing
Diane M. Cameron, Jon T. Zeidler, and Danila S. Sheveiko
194
