Electrical Transmission and Substation Structures 2015

Technical Challenges and Innovative Solutions in Grid Modernization

Proceedings of the 2015 Electrical Transmission and Substation Structures Conference

Branson, Missouri, USA
27 September – 1 October 2015

Editor:

Otto J. Lynch

Some format issues inherent in the e-media version may also appear in this print version.
Contents

Case Studies

Winfall-to-Trowbridge Transmission Line Foundation Design............................. 1
Jason R. Truckenbrod, Steven S. Miller, Bruce L. Roth, and Robert Smith

Taft–Lakeland 230 kV Transmission Line............................................................. 11
Charles (Chuck) H. Easterling, Curtis W. Smith, and Hrishikesh (Rishi) P. Moghe

Jack Rabbit–Big Sky 161 kV National Forest Canyon Construction .................. 23
Anders Fiske and Heather Dell

Micropile Design and Construction in a Limited Access Wetland Habitat ........ 35
Steven A. Davidow and David G. Carr

Construction Challenges

CapX2020 Brookings County–Hampton 345 kV River Crossing Foundation
Challenges.................................................................................................................. 46
I. Lucas D. Karels

Fall Protection Efforts for Lattice Transmission Towers ..................................... 58
David E. O’Clare and David M. Hesse

Design and Construction Challenges from One Utility’s CREZ
Transmission Lines................................................................................................... 70
Don Cannon, David Hancock, and Neal Chapman

Foundations

Foundation Designs for a 345 kV Transmission Line Constructed in the
Lakebed of Glacial Lake Agassiz ............................................................................ 83
David W. Wedell, Gerald V. Chezik, and Bret R. Anderson

Deep Foundations—Combining Construction Methods, Engineering,
Inspection, and Testing .......................................................................................... 102
Shane C. Watson and Bruce J. LaMeres
Ameren Transmission Company’s Illinois Rivers Transmission Line River Crossings Foundation Design
Kasey Woods, Darren Ratliff, Terry Barnett, Danielle Mullendore, and Daniel Whalen

Recommendations for Steel Pole and Drilled Shaft Deflection Criteria Based on a Parametric Study of a 138kV Double Circuit Transmission Line

Line Design

Dynamic Loading of Transmission Lines A Qualitative Comparison of Full-Scale Tests and Computer Simulations
Bryan Williams, Erik Ruggeri, and Jason Pfaff

Updating ASCE Manual No. 74: Guidelines for Electrical Transmission Line Structural Loading
T. G. Mara and R. H. Behncke

Compilation of Damaging Ice Storms in the United States
K. F. Jones and R. Bates

Best Practices for the Design of 115KV to 230KV Overhead Transmission Lines
L. Kempner Jr. and A. Haldar

Managing Aging Infrastructure

Generation Drone: The Future of Utility O&M
Grant T. Leaverton

Celanese–Peters Mountain 138kV Line: A Case Study of One of American Electric Power’s Oldest Weathering Steel Pole Lines

Best Practices for Transmission Line Inspections and Recommended Inspection Techniques
Andrew Stewart, Robert Nelson, Matthew Sinclair, and Alex Mogilevsky

Rerating and Upgrading

Thinking Outside the Box: Tennessee Valley Authority Uses the ACCR Conductor on a 500-kV Transmission Line
Jeffery Phillips, Mark Ryan, and Doyle Glass

© ASCE
Southern Reinforcement Project—Squeezing 21st Century Demand into 20th Century Right-of-Way .......................................................... 237
Bill Rusciolelli and Sean Crandall

Raising Transmission Line Steel Towers ........................................... 249
Ashley Dupree, Fang Liu, Jonathon Rumble, and Ricardo Ortegon

Special Design Considerations

EIS Project Survival Guide: How to Keep Engineering Choices Alive and Emerge from the NEPA Process with Your Project (Mostly) Intact .......... 261
Ronald Carrington

Aesthetics Transmission Line Structures: Past, Present, and Future ........ 275
M. Khavari and K. L. Sharpless

Design of Fibre-Reinforced Polymer (FRP) Structures for BC Hydro’s Transmission System ................................................................. 289
A. Gilpin-Jackson, M. L. Lu, G. Mathew, and G. Fecht

Developing a Structure for BOLD—Challenges from a Simple Aesthetic Structure Design ................................................................. 306
Nancy (Meihuan) Fulk, T. David Parrish, Anthony J. Hansen, and Jeff Steele

Structural Analysis I

Validation and Testing of Tubular Steel Pole Designs for Southern California Edison’s Tehachapi Renewable Transmission Project .......... 322
Clinton Y. Char, Tony Cunha, and Jerry Lembke

Design and Testing of 500kV Double Circuit Monopoles for the Heartland Transmission Project in Edmonton, Alberta .......................... 337
Kishor Kumar and Jason Dwyer

Innovative Structure Designs for Large Spans .................................... 351
Jaron T. Reay and Abe J. Dilworth

Slip Joints Connections—How Do These Things Work? .................... 363
Richard Slocum and Mark Fairbairn

Structural Analysis II

The Effect of Eccentricity on the Design of Towers for Transmission Lines—A Case Study with the Finite Elements Approach .................... 375
Angelo Fabri
Considerations in the Development of a Lattice Tower Structure Family

Jondy Britton and Travis Bouslog

Graphical Analysis: Obsolete Method or a Compliment to Modern Design Techniques?

Philip Joel Bryant

Substation Design Issues

Seismic Base Isolation of a High Voltage Transformer

R. S. Cochran

NERC CIP-014-01: Physical Security—Regulatory Compliance and Real World Implementation

Katherine Bentley and Jeffrey Boucher

Innovative Analysis and Seismic Retrofit of 500kV Flexible Bus Substation Support Structures

Scott Howard, Craig Riker, Brian Knight, and Sarah Knoles

Poster Program

Transmission Pier Foundation QC/QA

Gina Beim, Robert Kluge, Matthew Lohry, and Daniel Belardo

Updated Gust Response Factors for Transmission Line Loading

T. G. Mara

Repair of Corrosion-Damaged Substation Structures

Mo Ehsani and Gannon McGhee

Structural Performance of Bolted Connectors in Retrofitted Transmission Tower Leg Members

Chenghao Lu, Xing Ma, and Julie E. Mills

Design and Construction Challenges for a Transmission Line and Structures Crossing a River for Bridge Relocation

Rengaswamy Shanmugasundaram, W. Greg Ford, and Rodger Calvert

Modification of Single-Circuit 765 kV Lattice Steel Towers for a Double-Circuit 345 kV Application

Todd Edwards and Joe Pattison

Examination of Yawed Wind Loading on Transmission Towers

T. G. Mara and R. H. Behncke
New Approach for Upgrading an Existing 115 kV Transmission Line ..........538
Karen Callery and Ibrahim Hathout

Impact of Extreme Weather on Transmission Line Structures ..................550
Ibrahim Hathout and Karen Callery

Highland City Repurposing of an Existing Substation Property for
Upgrade to New Substation Facilities .......................................................565
David R. Thornton

Study of Electric Transmission Line Deep Foundation Design.......................577
P. M. Kandaris and S. Davidow
