Water Quality Technology Conference and Exposition 2015 (WQTC 2015)

The Premier Conference for Water Quality Professionals Around the World

Salt Lake City, Utah, USA
15-19 November 2015

Volume 1 of 3

# TABLE OF CONTENTS

## VOLUME 1

### PST01 WATER TREATMENT, MEMBRANES

<table>
<thead>
<tr>
<th>Title</th>

## VOLUME 2
STS01 CYANOBACTERIAL AND CYANOTOXINS: REVIEWING THE STAT OF CYANOTOXINS AND TREATMENT CHALLENGES THROUGH EXPERIENCES

Occurrence, Analysis, and Control of Nitrosamines and Their Precursors in Drinking Water ................................................................. 143
Ariel Donovan, Danielle M. West, Qihua Wu, Hangen Shi, Hua Jiang, Craig Adams, Todd Eichhold, Yinfu Ma

Evaluation of Available Analytical Methods for Detection and Quantification of Cyanotoxins in Water .................................................... 158
Linda Geddes, Andy Eaton, Ali Haghani

H. Kenneth Huether, Robert Morgan

MON03 CHALLENGES AND SOLUTIONS FOR SMALL SYSTEMS

Water Treatment on Wheels: Implementing a Temporary Membrane Treatment Plant on a Poorly Understood Source ........................................................................................................................................ 180
John Meyer

Field Investigation of Water Treatment Systems for NOM Removal in a Small Community (Shawnigan Lake, BC) .................................. 195
Majid Mohseni, Benoit Barbeau, John Bergese, Edith Laflamme

Impact of Raw Water Quality and Climate on the Variability of Drinking Water Quality in Small Systems ........................................ 209
Anna Schelli, Ianis Delpla, Rehan Sadiq, Manuel Rodriguez

MON04 REGULATIONS, RISK AND DISINFECTION BY-PRODUCTS

Modeling the Relative Health Impacts of Disinfection By-products Using Predictive Drinking Water Treatment Models ................................................................. 219
John Meyer

Assessing DBP Occurrence: Impacts of the Stage 2 DBPR .................................................................................................................................. 231
Carleigh Samson, Chad Seidel, Timothy Bartrand, Steve Via

Temporal Variability of DBPs in Drinking Water Following Rainfall Events ......................................................................................... 248
Ianis Delpla, Manuel Rodriguez

MON05 NEW TECHNOLOGIES/INNOVATION TO OPTIMIZE WATER QUALITY MANAGEMENT

Overview of Partnership for Safe Water ........................................................................................................................................ 256
Barbara Martin

Controlling Pipe Scale/Biofilm Complex: What Is That Stuff and Should We Care? ............................................................................ 258
Melinda Friedman

Finished Water Storage Tanks - To Regulate or Not to Regulate ......................................................................................................... 272
Tyson Ingels

Methodology for a Dynamically Updated Source Water Assessment and Response Tool ........................................................................ 292
Jeffrey Rosen, Timothy Bartrand, Margaret Kearns, Ayhan Ergul, Josh Coefer, Jeffrey McIntyre

PST02 DBPS AND ORGANICS; ALGAE AND INVASIVE SPECIES; LAB METHODS AND MICROBES: SECURITY AND RISK ASSESSMENT

Chlorine Dioxide for Pre-Oxidation and DBP Control .................................................................................................................................. 305
Peter D’Adamo, Barry Parsons

Statistical Investigation of the Effect of Main Environmental Factors on Degradation of Haloacetic Acids Using Iron Powder .................................................................................................................................. 306
Mohsen Behbahani, Youngwoo Seo

Improving Chlorination Systems Through Modeling: The Case of SEDIF ................................................................................................. 307
Alexandre Fleury, Olivier Chesneau, Catherine Elain, Alyssa Biot

Chloramination Process Control: Comparing Monitoring Technologies and Techniques ........................................................................ 308
Vadim Mailon, Chaise Holmgren

The Seasonal Use and Storage of GAC for the Removal of Cyanotoxins ................................................................................................. 313
Victoria Chennette, Sigrid Pelletz, William Anderson, Peter Hack

Raw Water Cooling Systems: The Battle of the Aquatic Invaders ........................................................................................................... 318
Phyllis Pasy

An Innovative Application of Strainers Provides Additional Tools to Address Algae ........................................................................ 319
Monica Hoyt, Alan Domonoske

Leveraging Mobile Technology to Improve Water Quality Data ........................................................................................................ 336
Joseph Yorke, Jojean Bolton, Melissa Billman, Christine Paszko

Analytical Challenges to Identify and Quantitate P-Chlorobenzene Sulfonic Acid in Wastewater ......................................................... 337
Lee Yoo

American Water’s Environmental Audit Program .................................................................................................................................. 347
Matthew Corson, Thomas Willard, John Eppensteiner, Mark Lechevallier
Influence of Carbon Particle Size

Organic Substance Removal by Combination of Powdered Activated Carbon Adsorption and Microfiltration

Effects of SPAC Milling on Membrane Coating Performance in Microfiltration

Role of Large Hydropower Projects on Water Quality in the Intermountain West

Toxicity Assessments of Frack Flowback Water Pre- and Post-Treatment During Initial Development of a Gas Well

Chemical Characterization of a Hydraulic Fracturing Wastewater Over Time

Comparing Electrocoagulation and Chemical Coagulation as Pretreatment for Hydraulic Fracturing Wastewater

Technologies and 3-D Fluorescence for Early Warning Detection on the Potomac River

Algal Toxin Removal at Ambient and High PH Conditions

Desorption of Trace Inorganic Contaminants from Drinking Water Distribution Systems Solids

Accumulation and Release of Trace Inorganic Contaminants from Biofilm Matrices Produced and Challenged Under Drinking Water Conditions

Main Cleaning Strategies for Removal of Metals-Rich Deposits Comparison of Performance and Costs

How Small Hydropower Projects Influence Water Quality in the Intermountain West

A Reflection on the Toledo, Ohio, Cyanotoxin Incidence

Algal Toxin Removal at Ambient and High PH Conditions - WRF 4526

Cyanotoxins Breakthrough in Eastern Canadian Water Treatment Plants

Multiplex pPCR Probe as a Tool to Develop a Cyanotoxin Early Warning System

Optimizing Conventional Treatment for the Removal of Cyanobacteria and Toxins

Perspective Regarding the Regulation of Cyanotoxins

Adsorption Mechanism of SPAC in Comparison With Conventionally Sized PAC

SPAC for the Removal of Disinfection By-product Precursors and Organic Micropolllutants

Effects of SPAC Milling on Membrane Coating Performance in Microfiltration

Organic Substance Removal by Combination of Powdered Activated Carbon Adsorption and Microfiltration-Influence of Carbon Particle Size
Drinking Water Treatment Using Superfine PAC (SPAC): Design and Successful Operation History in Full-Scale Plant
Shinjiro Kanaya, Yuji Kawase, Satoru Mima

MON07 RESULTS FROM NEW MODELS AND TOOLS TO MANAGE DISINFECTION BY-PRODUCTS

Water Quality Modeling: Comparison of Different Chlorine and THM Reaction Models Under Different Pressure Conditions
Fatemeh Hatam, Marie-Claude Besner, Michele Prevost
A New Post-Processing Technique to Improve the Use of EEMs to Predict DBP Formation Potential
Benjamin Stanford, Justin Irving, Allison Reinert, Benjamin Wright, William Becker
Chloramination Process Control: Comparing Monitoring Technologies and Techniques
Vadim Malkov, Chaise Holmgren

MON08 FULL-SCALE CASE STUDIES FOR DISINFECTION BY-PRODUCTS CONTROL

Sacramento - San Joaquin Delta Water Supply Requires Innovative Treatment Approach to Control DBPs With Free Chlorine Residual
Richard Stratton
Active Control of THMs Levels in Finished Water
Francois Rodigari, Robin Giguerre
Online Methodology for Determining Trihalomethane Formation Potential and Predicted Network TTHM Levels Aids in Water Treatment Operations
Miquel Paraira Faus, Aigues De Barcelona, Michael West

MON09 METHODS TO DETECT ORGANIC CONTAMINANTS

Use of a High-Resolution Accurate Mass Spectrometer to Expand the Scope of EPA Methods for Emerging Contaminants (EPA 539)
Andrew Eaton, Ali Haghani
Early Warning and Detection Methodologiesfor Improved Water Treatment Resiliency
Allison Reinert
Total Nitrosamines in Wastewaters, Surface Waters, and Foodstuffs by TONO and HPLC-TONO
David Hanigan, Teng Zeng, Bill Mitch, Paul Westerhoff
Heated Purge-and-Trap Gas Chromatography/Mass Spectrometry for Rapid and Sensitive 1,4-Dioxane Analysis in Aqueous Matrices
Mei Sun, Catalina Lopez, Detlef Knappe

VOLUME 2

A New Method to Identify and Quantify Natural Organic Matter Using Size Exclusion Chromatography With Charged Aerosol Detector
Licai Hu, Yu Ri Park, Elliott Wright, Graham Gagnon
Direct Comparison of Threshold Odor Number and Total Intensity of Odor for Use in Regulatory Compliance Analysis
Allison Jacobsen-Garcia, Roy Derochers, Melissa Dale

MON10 MEMBRANES: RESOURCE RECOVERY

Application of Electrodialysis for By-products Recovery to Balance Costs of Zero Discharge
Elisabeth Vaudeville
Zero Liquid Discharge Desalination of Brackish Water With Electrodialysis Metathesis (EDM)
Rick Bond
Sustainable Low-Pressure Reverse Osmosis Concentrate Management - Seven Years and Counting
Colin Hobbs, Jorge Arevalo

MON11 MEMBRANES: PRETREATMENT

Effects of Pre-Ozonation on the Reduction in Organic Membrane Fouling
Minhye Park, Taran Anumol, Shane A. Snyder
Consolidated Treatment Processes: UV Oxidation and Ceramic Membrane Filtration
Josh Alvey, Aaron Dotson, Eric Dickenson
Ceramic Microfiltration - Influence Pretreatment on Operational Performance
Gilbert Galjaard, Junmeng Zheng, Holly Shorney-Darby
PST03 DISTRIBUTION SYSTEMS, WATER RESOURCES AND REUSE

An Operation-Engineering Management Strategy to Treat Natural Occurring Calcium Carbonate Precipitate in Surface Water Systems

Impact of Blending Desalinated Seawater With Treated Surface Water on Distribution Water Quality

Ujif Erdal, Jami Lozier, Tim Saydam

Effect of Long-term Disinfectant Exposure on Mechanical and Structural Properties of Biofilms

Yun Shen, Rosa Espinosa-Marzal, Nicholas Ashbolt, Wen-Tao Liu, Thanh Trung Nguyen, Conghui Huang, Guillermo L. Monroy, Nicolas Delron, Eberhard Morgenroth, Stephen A. Biggs

A Long-Term Study of the Microbial Community Structure in a Simulated Chloraminated Drinking Water Distribution System

Randy Reveleta, Stacy Pfafler, Jonathan Pressman, David Wahman, Vicente Gomez-Alvarez

Dynamic Behavior of CSO Discharges in Terms of Normalized Scale Parameters of Events for Source Water Characterization

Milad Taghipour, Annie-Sophie Madoix-Humery, Laurence Auttisier, Samira Gavagnini, Martine Galarneau, Michele Prévoast, Sarah Dornier

Running Out of Water: Permitting an Emergency Recycled Water Supply to Respond to the California Drought

Christopher Park, Evelyn You

Statistical and Artificial Neural Network Models of Remotely Sensed Water Quality

Carly Hansen, Steve Burian, Richard Porter, Gustavious Williams

Contribution of Human Commensal American Crows of Microbial Pathogens to Surface Water

Kevin San, Tuan Ton, Marilia Almeida Soares, Thais Guimares, Phillip Van Valkenburg, Robert Turner

Managing Water Quality Compliance for Drinking Water and Stream Water Discharges From Unique Mine Tunnel Sources in Park City, Utah

Chad Busch

TUE01 WATER QUALITY ISSUES ASSOCIATED WITH DISTRIBUTION SYSTEMS AND PREMISE PLUMBING

Naegleria Fowleri Occurrence Monitoring Results in Louisian

Chad Seidel, Jonathan Causey, Jennifer Clancy

Impact of Partial Lead Service Line Replacements on Water Quality: Lead Profiling Sampling Results in 6 North-American Utilities

Elise Dhommes, Laurent Laroche, Dominique Deseau, Alicia Bannier, Shokoufeh Nour, Michele Prévost

Two-Year Monitoring of Lead Release Before and After Partial Lead Service Line Replacement in 35 Households

Elise Dhommes, Laurent Laroche, Dominique Deseau, Alicia Bannier, Shokoufeh Nour, Michele Prévost

In-Situ Spatial Chemical Reactions of Copper Pitting Corrosion in a Household Plumbing System

Jared Church, Young Joo Park, Boo Hyoung Lee, David Wahman, Jonathan Pressman

Lessons and Experience on the Management of Lead Service Lines by Utilities and Public Perception

Shokoufeh Nour, Elise Dhommes, Graham Gagnon, Robert Andrews, Michele Prévost

Evaluation of NSF 61 Section 9 Plumbing When Exposed to More Aggressive Water

Kelsey Pupker, Leigh-Anne Krometis, Marc Edwards

TUE02 TREATMENT NEEDS FOR REUSE

Reuse of Wastewater Effluent for Cooling Tower Water: Design Challenges

Robert Ferrari, Raymond Kerolli, Alvin Snyder, Jeanine Plummer

Selective Removal of Sodium and Chloride? Mono-Valent Selective Ion Exchange Membrane for Desalination and Reuse Enhancement

Qun He, Pei Xu, Nirmala Khandan

Running Out of Water: Permitting an Emergency Recycled Water Supply to Respond to the California Drought

Christopher Park

TUE03 INDIRECT POTABLE AND BENEFICIAL REUSE

Assessing Risk of Injection of Reclaimed Water Into the Biscayne Aquifer for Aquifer Recharge Purposes

Frederick Blouetecher, Pollop Phaphornwilai, Whitfield R. Van Cott

Indirect Potable Reuse: A Case Study for Augmenting Your Water Supply Portfolio

Susan Crawford, Tina Petersen, Russell Schreiber

Expanding Tucson’s Recycled Water Program From a Foundation of Past Success

Corin Marron, Jeff Biggs

STS05 LEARNING TO LIVE WITH INVASIVE SPECIES

Strategies to Control Nuisance Organisms in Biological Reactors

Holly McNaught, Eric Wert
Utility Evaluation of a Cupric Ion Solution for Quagga Mussel Control in Arizona .................................................................................................................. 1013
Joe Hernandez, Levi Dillon
Quagga Mussel Inspections and Chemical Control Strategies at SNWA .......................................................................................................................... 1016
Julia Lew, Eric Wert, Todd Tietjen, Alan Sims, Rick Gilmer
Six Years of Testing Coatings for Mussel Control .......................................................................................................................... 1019
Allen Skaja
A Utility Perspective: 7 Years Into the Quagga Mussel Invasion .......................................................................................................................... 1029
Paul Rochelle

TUE04 BIOLOGICAL FILTRATION REMOVES THE GAMUT

Removal of C- and N-DBP Precursors in Biologically Active Filters .......................................................................................................................... 1039
Meric Selbes, Jess Brown, Tanju Karamfil, James Ambrose
Sources of NDMA Precursors and the Impact of Treatment on NDMA Occurrence .................................................................................................. 1056
Stuart Kranzer, Xing Fang, Shannon Leahey, Ruth Marfil-Vega, Yichao Qian, Zia Bakhari
Engineered Biofiltration: An Alternative Method for DBP Precursors Removal and Genotoxicity Control .................................................................................. 1069
Michael McKie, Liz Taylor-Edmonds, Susan Andrews, Robert Andrews
Organic Matter Removal via Biological Drinking Water Filters: Removal Efficacy Based on Quantifiable System Factors .......................................................................................................................... 1084
Biodegradation of 1,4-Dioxane at Drinking Water-Relevant Concentrations .......................................................................................................................... 1092
Amie McElroy, Christy Smith, Michael Hyman, Detlef Knappe
The Importance of Bacteria for Sustainable Manganese Removal.......................................................................................................................... 1096
Jantinus Bruins, Branislav Petrowskii, Yness Slokar, Maria Kennedy

EFFICIENCY AND USE OF AOP FOR ORGANICS REMOVAL

Enhancing Efficiency of UV/AOP Processes Via Iron Addition .......................................................................................................................... 1111
Sydney Ulitman, Karl Linden
Vacuum-UV Treatment for the Removal of Micropolllutants in Small Water Systems .............................................................................................. 1118
Adrian Servano, Majid Mohseni
Transformation of Polyfluorinated Compounds by Advanced Oxidation Processes .......................................................................................... 1131
Taran Anumol, Shane Snyder
Low Pressure UV/H2O2 Degradation of the Pesticides Metaldehyde, Clopyralid and Mecoprop-Kinetics, and Reaction Product Formation .......................................................................................................................... 1151
Sofia Semitsoglou-Tsipan, Michael Templeton, Nigel Graham, Bram Martijn, Lucia Hernandez Lead, Joop Kruithof, Alan Royce
Stephanie Gora, Susan Andrews
Cincinnati’s UV/C12 AOP Experience for Degrading Taste and Odor Compounds .............................................................................................. 1155
Ramesh Kashinkunti, James Springer, Ying Hong, Bruce Whiteberry, Jeff Swortfeger

STS06 SHOWCASE OF UTAH’S BEST PROJECTS AND INITIATIVES

Multi-Agency Approach to Water Quality Enhancement .......................................................................................................................... 1168
Eva Nieminski, Laura Briefer, Gerard Yates, Marie Owens, Michael Rau, Michelle De Haan
Planning for an Uncertain Future: Climate Change Sensitivity Assessment Toward Adaptation Planning for Public Water Supply .......................................................................................................................... 1169
Laura Briefer, Tim Barsdley, Andrew Wood, Mike Hobson, Steve Burian, Tracie Kirkham, Jeff Niermeyer
How to Protect Your Watershed When It’s Outside Your Jurisdiction .......................................................................................................................... 1195
Gerard Yates, Marie Owens, Alane Boyd
Turning Contaminated Groundwater Into a Drinking Water Source .......................................................................................................................... 1197
Marie Owens, Jon Hilbert
Use of Zeta Potential to Optimize Chemical Injection Strategy and Filter Performance .......................................................................................................................... 1205
Michael Rau

STS07 STRONTIUM HEALTH EFFECTS, OCCURRENCE AND TREATMENT

Summary of USEPA’s Regulatory Determination: Why Are We Here? .......................................................................................................................... 1207
J. Alan Roberson
Removal of Strontium From Drinking Water: Pilot- and Full-Scale Studies .......................................................................................................................... 1212
Darren Lytle, Hannah Chait, Kevin Vu, Alissa J. O’Donnell
Treatment Alternatives for Control of Strontium .......................................................................................................................................................................................... 1225
Sean Chaparro
TUE06 OPTIONS FOR CONTROLLING IRON AND MANGANESE

Optimizing Ozone Treatment and Biologically Active Carbon Filtration for Removal of Manganese Spikes ........................................ 1243
Mustafa Sabelland, Bill Gase, Ann Lawson
Comparison of Pyrolusite Fluidized and Fixed-Bed Operations for Iron/Manganese Control in Groundwater ............................. 1260
Seyedeh Lalash Dastkhban Kenari, Benoit Barbeau
Manganese Monitoring in North Texas ............................................................... 1271
Gail Charles, Ashley Evans, Ben Kuhnlen, Caroline Russell

TUE07 CONTROLLING LEAD RELEASE IN DISTRIBUTION SYSTEMS

Pipe Loop Studies of Orthophosphate Addition for Control of Lead Release in High-pH, Low-DIC Waters ........................................ 1282
Gregory Welter, Michael Schock, Stephanie Miller, Richard Razza, Daniel Giammar
Lead Release in Partial and Full LSLs: Impact of Higher orthophosphate Dosage and the Addition of Cl₂ ........................................ 1295
Evelyne Dorié, Elise Deshommes, Shokoufeh Yousef, Michele Prevost, Laurent Larroche
Effect of High Chloride Concentrations on Iron Corrosion and Release in Cast-Iron Systems ..................................................... 1310
Masoumeh Sharafigoussiloo, Jennie Rand, Margaret Walsh
Efficiency of Orthophosphoric Acid on Lead Dissolution: An Experiment Conducted by the SEDIF ............................................. 1320
Sylvie Thibert, Veronique Heim, Francois Vabre, Caroline Lecarpentier
No-Lead Brass Service Valve Performance in Colorado River Water ......................................................................................... 1334
Holly McNicoll, Rebecca Trenholme, Dale Clasen, Charles Scott, Brett Vanderford, David Rexing, Eric Wert
A 21st Century Perspective on Calcium Carbonate Formation in Water Systems ................................................................. 1335
Colin Richards, Fei Wang, William Becker, Marc Edwards

TUE08 DIRECT POTABLE REUSE: TREATMENT EFFECTIVENESS AND FUTURE POTENTIAL

Testing the Comparative Benefits of Ozone as Membrane Pretreatment in Direct Potable Reuse ................................................ 1346
Brent Atsasch, Corin Marron, Fernando Rico
Quantifying the Water Quality Impacts of Multi-Barrier Processes in Direct Potable Reuse ....................................................... 1351
Benjamin Stanford, Troy Walker, Stuart Khan, Shane Snyder, Cedric Robilott
DPR Makes the Best Coffee: Evaluating Water Quality From the Membrane and AOP Systems in Big Spring, Texas ...................... 1366
Colin Richards, Fei Wang, William Becker, Marc Edwards
DBP Formation and Control in a Direct Potable Reuse Treatment Plant .................................................................................. 1378
Caroline Russell, Aide Zamarron, Corin Marron, Chelsea Francis
Source Water Control Options and Impact of Selected Treatment Strategies on Direct Potable Reuse ........................................ 1391
Bob Hulsey, Jeff Neumann, Alan Rimer
Has the Time Come for Direct Potable Reuse in Colorado? .............................................................................................. 1392
Philip Brandhuber

TUE09 HOW DO I TREAT FOR MICROCYSTINS?

From Microcystis Removal to Just-in-Time Treatment Capacity - Case Studies in DAF Pilot Testing ........................................ 1399
David Calhoun, Douglas Wagner, Laurie Ashmore
Chloramination of Microcystins in Drinking Water ............................................................................................................ 1411
Yingbo Guo, Stuart Krasner, Matthew Prescott
Destruction of Microcystin-LR by Ozone ....................................................................................................................... 1424
Gemma Charlebois, Monica Emelko, Maria Mesquita, Judy Westrick, Leigh McDermott

TUE10 NOVEL TASTE & ODOR FROM SOURCE THROUGH FILTRATION

The Seasonal Use and Storage of GAC for the Removal of Cyanotoxins ..................................................................................... 1432
Victoria Chennette, S. Peledzes, W. B. Anderson, P. M. Huck
A Bench-Scale Study of the Effect of Pre-Ozonation on Geosmin Removal and NOM From Raw Surface Water in Atlantic Canada .......................................................... 1437
Dallys Serracin-Pitti, Graham Gagnon
Estimating Remaining GAC Capacity for Geosmin and MIB Removal .......................................................................................... 1441
Yi Li, Ronald Hofmann, Anwar Sadmani

TUE11 LEARN HOW TO EFFECTIVELY IMPLEMENT BIOLOGICAL TREATMENT

State and Provincial Perspective on the Use and Regulations of Biological Filtration ................................................................. 1444
Eva Nieminski
Biofiltration: Optimizing Design and Operational Parameters .................................................................................................. 1455
William Becker, Erik Rosenfeld, James Dewolfe, Mark Bishop
Optimization of Microbiology on BAC Filters in the Presence of Ozone .................................................................................. 1475
Peta Thiel, Kathy Northcott, Ben Freidman, Kathryn Mumford
Optimizing Biological Filtration Performance With Innovative Capping Material Designs and Nutrient Amendments ................................................................. 1476
Andrew Wong, Monica Emelho, Tim Walton
Development of a Near Real-Time Tool to Evaluate Biological Filter Performance ......................................................... 1484
Sun Liang, Joyce Lehman, Connie Chou
Direct Biofiltration as a Pretreatment for Ceramic Membranes in Drinking Water Treatment ............................................. 1499
Jangchuk Tashi, Sigrid Peldzus, Peter Huck

TUE12 CONTROLLING ORGANICS AND DPBS

Transformation of Iodine During Chlorination of Iodide-Containing Waters in the Presence of Copper Oxide: Periodate Formation ........................................................................ 1505
Chao Liu, Elisabeth Salhi, Jean-Philippe Croux, Urs Von Gunten
Contamination and Management of Hypochlorite Solutions in Small Drinking Water Systems ........................................................................................................ 1517
Louis Coulombe, Christelle Legay, Anouka Bolduc, Nathalie Dassylyva, Jean-Baptiste Serodes, Manuel Rodriguez
An Innovative Suspended Ion Exchange, In-Line Coagulation and Ceramic Microfiltration Process for Disinfection By-product Control ......................................................... 1524
David Metcalfe
TOC Reduction Through Optimized Coagulation and Impact on GAC Reactivation and Costs ..................................................... 1535
Ramesh Kashikantoni, Ying Hong, Maria Meyer, Jeff Soverjegger, Bruce Whiteberry, Kevin Reynolds, James Springer
Monitoring Impacts on Natural Organic Matter Using Fluorescence Spectroscopy ................................................................................. 1550
Nicolas Pelaezto, Michael McKie, Robert Andrews, Raymond Legge
Evaluation of the OPALIX: A Novel Process for Natural Organic Matter Removal From Surface Waters ............................................. 1553
Benoit Barbeau, Isabelle Papineau, Mireille Blais, Edith Lauflamme

VOLUME 3

TUE13 METHOD IMPROVEMENTS AND PITFALLS

Climbing the Learning Curve With USEPA Method 1615 .............................................................................................................. 1563
Paul Rochelle
Measurement of Legionella Survival via Direct Microscopy of a GFP-Expressing Strain ............................................ 1574
Oito Schwake, Abiar Alam, Moreaza Abbaatadegan
Improving Matrix Spike Recoveries for the Analysis of Cryptosporidium and Giardia in Treated Potable Water .......... 1582
William Kuhne, Lisa McDonald
Rapid and Accurate UPLC/MS/MS Analysis of Microcystins and Nodularin Using Isotopically Labeled Microcystin Analogs .................................................................................. 1595
Yongtao Li, Joshua Whitaker
Use of Fluorometric Probes to Estimate the Risk of Cyanobacteria Breakthrough in a Bank Filtration .................. 1610
Pirooz Pazouki, Natasha McQuaid, Michele Prievost, Sarah Dorner
Real-Time Management of Cyanobacterial Blooms: Advantages and Limitations of In Vivo Fluorescence Probes .......... 1621
Arash Zamyadi, Richard Staeht, Gayle Newcombe, Sarah Dorner, Michele Prievost, Rita Henderson

TUE14 CHROMIUM VI

The Oxidation of Chromium in Drinking Water Systems .......................................................................................... 1633
Nate Rogers, Laurie McNeil, Joan McLean
Removal of Cr(VI) From Groundwater by Adsorptive Filtration - Simple, Effective, and Cheap ................................ 1646
Yness Slokar, B. Petreaukevski
Pilot-Testing Reduction Coagulation Oxidation Filtration for Simultaneous Cr(VI), Fe, and Mn Removal .................... 1663
Craig Gorman, Robert Thompson, Rehka Ippagunta, Chad Seidel, Eli Townsend

TUE15 NOVEL APPLICATIONS FOR CONTAMINANT CONTROL USING THE HYDROXYL RADICAL

Mechanistic Elucidation and Modeling of Enhanced Microbial Inactivation During Solar Photolysis of Chlorine to ROS and Ozone ........................................................................ 1675
Petran Zhou, Michael Dodd, George Di Giovanni, John Meschke
Chemical Free Oxidation of Biological Contaminants in Water ....................................................................................... 1686
Krsta Carlson, Mano Misra, Swomitra Mohanty
Assessment of UV-LED/TiO2 Photocatalytic Membrane Treatment or Organic Micropollutants using Chemical and Biological Analyses ........................................................................ 1692
Maricor Arelas, Melissa Hatam-Fraile, Robert Liang, Susan Andrews, Mark Servos, Y. Norman Zhou

STS08 LEAD AND COPPER RULE COMPLIANCE

Opportunities and Challenges in Redrafting the LCR: A Utility Perspective ................................................................. 1697
Matthew Corsun

WED11 INNOVATIVE ACTIVATED CARBON APPLICATIONS

Effects of Bead Milling on Activated Carbon Characteristics: Trends in Superfine PAC ................................................................. 2237
   Erin Partlan, Kathleen Davis, Yiran Ren, Onur Apul, Olin Mefford, Tanju Karanfil, David Ladner

Performance Evaluation of Biological Magnetic Powdered Activated Carbon ................................................................. 2243
   Kim Lompe, David Menard, Benoit Barbeau

The Role of Biological Activated Carbon Filtration in Advanced Surface Water Treatment .................................................... 2252
   Bram Martijn, Peter Schaap, John Boogaard, Joop Kruithof, Wim Hoogenboezem

GAC Treatment for Microcystin Removal: Design and Operational Considerations ................................................................. 2275
   Kirk Nowack, Marnie Bell

BAC Aging Profiles - When Does My Carbon Need Replacement? ................................................................. 2287
   Peta Thiel

In Situ Regeneration of Granular Activated Carbon Saturated With Natural Organic Matter and Micropollutants ................................................................. 2298
   Natalia Fischer, P. Westerhoff, K. Nowack, K. Hristovski

WED12 IMPROVEMENTS IN UNDERSTANDING AND APPLYING DISINFECTION

Proposed Chlorine CT Values for Giardia Inactivation at pH Greater than 9.0 ................................................................. 2304
   Issam Najm, Susan Teefy

The Efficacy of Potassium Ferrate as a Chemical Disinfectant on E. coli, Vibrio cholera, Human Adenovirus, and Giardia lamblia ........................................................................................................... 2313
   Laura Boczek, Jill Hoelle, Michael Ware, Michael Elovitz, Mark Rodgers, Hodon Ryu

Application of the Segregated Flow Analysis (SFA) Method for Calculating Disinfection Across a Contractor ................................................................. 2322
   Issam Najm, Ryan Cheswick

The Usefulness of Flow Cytometry for Assessing Disinfection Performance ................................................................. 2332

AOPs for Drinking Water: Micropollutant Removal and Disinfection-By-product Formation Potential ................................................................. 2343
   Irene Carra, Bruce Jefferson, Peter Jarvis

Assessing Physiochemical Properties of Unmodified Carbon Nanotubes for Disinfection By-product Precursor Adsorption ........................................................................................................... 2351
   Erin M. Needham, Julian L. Fairey

STS09 OPPORTUNISTIC PATHOGENS IN DISTRIBUTION SYSTEMS AND PREMISE PLUMBING

Overview of Opportunistic Pathogens in Premise Plumbing (OPPPs) ................................................................. 2361
   Amy Pruden

Control of OPPPs Through Drinking Water Treatment ................................................................. 2374
   Timothy Bartrand

Methods for Detecting Naegleria fowleri and Other Opportunistic Premise Plumbing Pathogens ................................................................. 2375
   Vincent Hill

Where Do We Go From Here? The Role of Water Suppliers in Communicating Risk to Their Customers ................................................................. 2387
   J. Alan Roberson
