2015 13th International Conference on Frontiers of Information Technology (FIT 2015)

Islamabad, Pakistan
14 – 16 December 2015
# Table of Contents

## Preface

Conference Organization ...........................................................................................................xiii  
Reviewers ........................................................................................................................................xv  

## Computer Graphics, Image Processing and Cryptography

A New Symmetric Key Encryption Algorithm Using Images as Secret Keys .................................................. 1  
*Mazhar Islam, Mohsin Shah, Zakir Khan, Toqeer Mahmood,*  
*and Muhammad Jamil Khan*  

Automatic Vehicle Detection and Driver Identification Framework for Secure Vehicle Parking ........................................................................................................... 6  
*Zahid Mahmood, Tauseef Ali, Shahid Khattak, Samee U. Khan,*  
*and Laurence T. Yang*  

Decision Trees Based Classification of Cardiotocograms Using Bagging Approach ................................................. 12  
*Syed Ahsin Ali Shah, Wajid Aziz, Muhammad Arif,*  
*and Malik Sajjad A. Nadeem*  

Combining Robust Statistical and 1D Laplacian Operators Using Genetic Programming to Detect and Remove Impulse Noise from Images ........................................................................... 18  
*Syed Gibran Javed, Abdul Majid,*  
*and Nabeela Kausar*  

## Industrial Electronics and Smart Grids

Stability Analysis of Coupled Van Der Pol's Oscillator .................................................................................. 24  
*Usman Ahmad, Qaiser Ijaz,*  
*and Anees ul Husnain*  

Study of Gamma Irradiation Induced Conductivity in Dielectric Materials of Coaxial Cables ........................................................................................................... 30  
*Bilawal Hussain, M. Tayyeb Mirza, Azhar H. Malik,*  
*and Aman-ur-Rehman*  

Automatic Generation of a Shared Hardware Design for Multiple Application Circuits .................................................. 35  
*Muhammad Mazher Iqbal*  
*and Husain Parvez*
Semantic Web
Querying Semantically Related Items Using Modified 4-Index Scheme for XML Documents
Imran Ihsan and M. Abdul Qadir

Comparison between SSTC and LINGO Algorithms in Clustered Based Semantic Search for Browsing Scholarships
Ujala Shabbir, Tayyaba Kanwal, Reeha Malik, Sobia Khalid, and Aliya Ashraf Khan

A Framework for Evaluation of OWL Biomedical Ontologies Based on Properties Coverage
Samiullah Khan, Usman Qamar, and Abdul Wahab Muzaffar

Computer Communication & Networking and Cloud Computing
Energy Efficient Resource Scheduling through VM Consolidation in Cloud Computing
Ahmad Fayyaz, Muhammad U.S. Khan, and Samee U. Khan

Implementing Partitioning Detection and Connectivity Restoration in WSAN Using VDM-SL
Hamra Afzaal, Muhammad Imran, and Nazir Ahmad Zafar

Performance Analysis of Advance Optical Modulation Formats for GPON System
Ali Israr, Muhammad Junaid, and Adil Israr

Signal Processing
Signal Degradation for Optical Interconnects in Data Center Networks
Mohsin Fayyaz, Khurram Aziz, and Ghulam Mujtaba

Simulation and Analysis of Adaptive Signal Processing Techniques for Antenna Arrays
Umar Hamid and Syed Ali Abbas

Modeling and Simulation
A Hybrid Training-Less Brain-Machine Interface Using SSVEP and EMG Signal
Muhammad Ahmad Shah, Abdullah Asghar Sheikh, Abdul Moiz Sajjad, and Momin Uppal

Simulation Model for Counter-Measures against Aedes Aegypti
Ali Ayyaz, Urwa Muaz, Shahid Awan, and Muhammad Naeem Ayyaz
Three-Dimensional Stabilized Mixed Galerkin Method for Darcy Flow ....................................................104

Shahab U. Ansari, Masroor Hussain, Suleman Mazhar, Ahmar Rashid, and S.M. Ahmad

Monte-Carlo Study on the Characterization of CsI Scintillator for a CsI Based Compton Camera .................................................................109

Azhar H. Malik

Software Engineering and Database Applications

From Black-Box to Transparent Computational Intelligence Models: A Pharmaceutical Case Study .................................................................114

Mohammad Hassan Khalid, Paweł Konrad Tuszyński, Jakub Szłęk, Renata Jachowicz, and Aleksander Mendyk

On Effectiveness of Fault-Seeding Using Interaction Patterns .................................................................119

Tamim Ahmed Khan, Muhammad Muzammal, and Anas Ijaz

First-Aid Application for Illiterates and Its Usability Evaluation .................................................................125

Null Value Conflict: Formal Definition and Resolution .................................................................132

Ghulam Ali Mirza

Computer Communication and Networking

Customizable Transceiver Design of a Visible Light Communication System .....................................................138

Asad Ali, Amna Sehar, Sana Najaf, and Hafiz Muhammad Asif

Stable Topology Based Energy Efficient Protocol for Distributed Network for Heterogeneous Wireless Sensor Applications .................................................................144

Fahad Khan, Farrukh Shahid, Syed Bilal Hassan, and Abdur Rashid

Social Networks and Emergence of Segregation Despite Extremely Intolerant Behaviors .................................................................150

Uzair Ahmad and Sadia Malik

An Architecture for Real Time Monitoring Aerial Adhoc Network .................................................................154

Sameer Qazi, Arsalan Alvi, Adil Mazhar Qureshi, Bilal A. Khawaja, and Muhammad Mustaqim

Simulation, Modeling and Internet of Things

CHOKe with Recent Drop History .................................................................160

Zawar Hussain, Ghulam Abbas, and Usman Raza

Modeling for a Greener Internet of Things: Carbon Footprint Planning and Allocation: A Tutorial Approach Using Monte Carlo Simulation .................................................................166

Samreen Laghari and Muaz A. Niazi
Stability Analysis in Networked Control System Using Input Feedback Concept .............................................172
Farhat Rashid and Athar Hanif
Augmenting Autonomous Vehicular Communication Using the Appreciation Emotion: A Mamdani Fuzzy Inference System Model ...........................................................................................................178
Faisal Riaz, Rehana Asif, Hina Sajid, and Muaz A. Niazi

Embedded and Control Systems
Distributed Robust Adaptive Observer-Based Controller for Distributed Control Systems with Lipschitz Nonlinearities and Time Delays .........................................................................................................................185
Haseeb Fayyaz Abbasi, Naeem Iqbal, and Muhammad Rehan
Liquid Level Control of Coupled Tanks System Using Fuzzy Model Predictive Control .........................................................................................................................................................................................193
Hamid Saeed Khan and Muhammad Bilal Kadri
Adaptive Feedback Linearization Control for Power Oscillations Damping in AC/DC Power System ..................................................................................................................................................................................................................199
Saghir Ahmad and Laq Khan
Designing Human Machine Interface for Vehicle's EFI Engine Using Siemen's PLC and SCADA System ...............................................................................................................................................................................205
Umair Younas, Sajjad Durrani, and Yasir Mehmood

Video Compression and Watermarking
An Efficient Scheme for Intra Prediction Block Size and Mode Selection in Advanced Video Coding ..................................................................................................................................................................................................................211
Muhammad Asif, Imtiaz A. Taj, S.M. Ziauddin, Maaz Bin Ahmad, and Muhammad Tahir
Performance Analysis of H.265/HEVC (High-Efficiency Video Coding) with Reference to Other Codecs ....................................................................................................................................................................................................216
N. Minallah, S. Gul, and M.M. Bokhari
Smart Phone Based Online Medicine Authentication Using Print-Cam Robust Watermarking ..................................................................................................................................................................................................................222
Qadeer Ahmed, Summuyya Munib, Muhammad Talhah Mirza, and Asifullah Khan

Computer Graphics, Image Processing and Pattern Recognition
Real-Time Vehicle Recognition and Improved Traffic Congestion Resolution ..................................................................................................................................................................................................................228
Diverse and Discriminate Features Based Breast Cancer Detection Using Digital Mammography ..................................................................................................................................................................................................................234
Awais Ur Rehman, Naveed Chouhan, and Asifullah Khan
Automated Colon Cancer Detection Using Structural and Morphological Features ..................................................................................................................240
  Madeeha Naiyar, Yousra Asim, and Aqsa Shahid

Computer Communication and Networking
Single Frequency Network Based Distributed Cooperative Routing with CSMA MAC ........................................................................................................................................246
  Sidra Muneer, Magnus Eriksson, and Khurram Shahzad
Impact of Mobility on Energy and Performance of Clustering-Based Power-Controlled Routing Protocols ..................................................................................252
  Atta ur Rehman Khan, Abdul Nasir Khan, Saad Mustafa, and S. Khaliq uz Zaman
LED-based Visible Light Communication System for Low Data Rate Point-and-Grab Applications ..................................................................................................................258
  Bilal Siddiqui, Muhammad Adeel Pasha, Aqsa Naeem, Naveed Ul Hassan, and Tariq Jadoon
Spectrum Mobility in Cognitive Radio-Based Vehicular Cyber Physical Networks: A Fuzzy Emotion-Inspired Scheme ..............................................................................264
  Faisal Riaz and Muaz A. Niazi

Green Computing and Internet of Things
Survey Based Analysis of Internet of Things Based Architectural Framework for Hospital Management System ..................................................................................................................271
  Amna Pir Muhammad, M. Usman Akram, and Muazzam A. Khan
Clever Steady Strategy Algorithm: A Simple and Efficient Approximation Algorithm for Minimum Vertex Cover Problem ..................................................................................................................277
  Muhammad Fayaz and Shakeel Arshad
FPGA Based Implementation Scenarios of TEA Block Cipher ..................................................................................................................................................283
  Muhammad Awais Hussain and Rabiah Badar

Image Processing and Computer Vision
Study of Radiation Detection Properties of a Pixellated CsI Gamma Imaging Module ..................................................................................................................................................287
  Hira Sharif and Azhar H. Malik
Modified POCS Based Reconstruction for Compressed Sensing in MRI ..................................................................................................................................................291
  Zoonia Javed, Hassan Shahzad, Hammad Omer, and Hassan Shahzad
Multi-view Human Action Recognition Using Histograms of Oriented Gradients (HOG) Description of Motion History Images (MHIs) ..................................................................................................................297
  Fiza Murtaza, Muhammad Haroon Yousaf, and Sergio A. Velastin
Data Mining, Operating System and Networking

Finding the Different Patterns in Buildings Data Using Bag of Words Representation with Clustering ................................................................. 303

Usman Habib and Gerhard Zucker

Content Centric Networking Approach in Cognitive Radio Ad Hoc Networks .......................................................... 309

Rana Asif Rehman and Byung-Seo Kim

Prioritized Fair Round Robin Algorithm with Variable Time Quantum .............................................................. 314

Arfa Yasin, Ahmed Faraz, and Saad Rehman

Modified Leakage Based User Selection for MU-MIMO Systems ........................................................................ 320

Muddasar Naeem, Muhammad Usman Khan, Sajid Bashir, and Aqeel A. Syed

Computer Graphics, Image Processing and Pattern Recognition

A Test-Bed Based Evaluation of Pervasive Fall Detection Schemes .......................................................... 324

Tayyaba Zaheer, Ashher Alam, and Majid I. Khan

Random Value Impulse Noise Removal Based on Most Similar Neighbors .............................................................. 329

Muhammad Habib, Saqib Rasheed, Ayyaz Hussain, and Mubashir Ali

Printed Urdu Nastalique Script Recognition Using Analytical Approach .............................................................. 334

Sabahat Mir, Safdar Zaman, and Muhammad Waqas Anwar

Control Systems and Simulation

Gate Automation for Closed Loop Control of Distributary Irrigation Canals in the Indus Basin .............................................................. 341

Shibal Ibrahim, Muhammad Soban, Farwa Akhtar, and Abubakr Muhammad

Real Time Modeling of Interlocking Control System of Rawalpindi Cantt Train Yard ........................................................................ 347

Umar Khan, Jamil Ahmad, Tariq Saeed, and Sikandar Hayat

Author Index ............................................................................................................................................. 353
