2016 International Workshop on Antenna Technology (iWAT 2016)

Cocoa Beach, Florida, USA
29 February – 2 March 2016
M2: Technical Interactive Session

A Compact Pattern Reconfigurable Antenna Utilizing Multiple Monopoles ............................................. 1
Jerzy Kowalewski (Karlsruhe Institute of Technology)
Jonathan Mayer (Karlsruhe Institute of Technology)
Tobias Mahler (Karlsruhe Institute of Technology)
Thomas Zwick (Karlsruhe Institute of Technology)

A Microfluidically Switched Feed Network for Beam-Scanning Focal Plane Arrays ......................... 5
Enrique González (University of South Florida)
Gokhan Mumcu (University of South Florida)

A Multi-Material 3D Printing Approach for Conformal Microwave Antennas ........................................... 7
D. Hawatmeh (University of South Florida)
E. Rojas-Nastrucci (University of South Florida)
T. Weller (University of South Florida)

Studies on a Fabric Feed Line Sewn to a Flexible Slot Antenna ................................................................. 11
Kazuhiro Fujiwara (Kyoto Institute of Technology)
Hitoshi Shimasaki (Kyoto Institute of Technology)
Kazunari Morimoto (Kyoto Institute of Technology)

Reconfigurable Double Slot-Ring Antenna for Bandwidth Enhancement ................................................. 15
Mahmoud Shirazi (University of Central Florida)
Tianjiao Li (University of Central Florida)
Xun Gong (University of Central Florida)

S-Band Continuously-Tunable Slot-Ring Antennas for Reconfigurable Antenna Array Applications .......................................................... 18
Tianjiao Li (University of Central Florida)
Mahmoud Shirazi (University of Central Florida)
Xun Gong (University of Central Florida)

Tunable Band Rejection in a Tightly-Coupled Array using Varactor Diodes ............................................ 20
Dimitris K. Papantonis (The Ohio State University)
Ersin Yetisir (The Ohio State University)
Nima Ghaliachehian (The Ohio State University)
John L. Volakis (The Ohio State University)

A Compact LTE Antenna Design for Mobile Device with Full Metal Housing ........................................ 23
Peng Chen (Shanghai University)
Ping Wang (Shanghai University)
Yumei Yu (Shanghai University)
Guangli Yang (Shanghai University)
Dual-Band Leaky-Wave Antenna based on a Dual-Layer Frequency Selective Surface for Bi-Directional Satcom-on-the-Move in Ka-Band ................................................................. 25
Alexander Krauss (Technische Universität Ilmenau)
Hendrik Bayer (Technische Universität Ilmenau)
Ralf Stephan (Technische Universität Ilmenau)
Matthias A. Hein (Ilmenau University of Technology)

Radiation Efficiency Optimization of Electrically Small Antennas: Application to 3D Folded Dipole ....................................................................................................................... 29
F. Sarrazin (CEA-Léti)
S. Pflaum (CEA-Léti)
C. Delaveaud (CEA-Léti)

Microwave Doppler Tomography of High Impedance Ground Planes for Aerospace Applications ............................................................................................................................... 33
Kelvin J. Nicholson (Defence Science and Technology Group)
Thomas Baum (RMIT University)
Kamran Ghorbani (RMIT University)
Richard W. Ziolkowski (University of Arizona)

Suspected 60 GHz Phased Array Antenna with High Efficiency ................................................................. 37
Kaveh Keshtkar (The Ohio State University)
Nima Ghalichi (The Ohio State University)

Highly Integrated VO2-Based Antenna for Frequency Tunability at Millimeter-Wave Frequencies ............................................................................................................................ 40
L. Huitema (University of Limoges)
A. Crunteanu (University of Limoges)
H. Wong (City University of Hong Kong)

BST Thin Film Capacitors Integrated within a Frequency Tunable Antenna ................................................................. 44
M. Rammal (University of Limoges)
L. Huitema (University of Limoges)
A. Crunteanu (University of Limoges)
D. Passerieux (University of Limoges)
D. Cros (University of Limoges)
T. Monediere (University of Limoges)
V. Madrangeas (University of Limoges)
P. Dutheil (University of Limoges)
C. Champeaux (University of Limoges)
F. Dumas-Bouchiat (University of Limoges)
P. Marchet (University of Limoges)
L. Nedelcu (National Institute for Material Physics)
L. Trupina (National Institute for Material Physics)
G. Banciu (National Institute of Materials Physics)
M. Cernea (National Institute for Material Physics)

Permittivity and Dielectric Loss Measurement of Paraffin Films for mmW and THz Applications .......... 48
Behnam Ghassemiparvin (The Ohio State University)
Nima Ghalichi (The Ohio State University)

M3: Small Antennas for Portable Devices
Multiband Film Antenna Comprising Offset Fed Dipole Elements using Inkjet Printer for M2M Applications ................................................................................................................... 51
Makoto Sumi (NTT DOCOMO, Inc.)
Yasunori Suzuki (NTT DOCOMO, Inc.)
M4: Antennas for 5G and mmW

3D Printing Technology: Enabling Innovative and Cost Effective Industrial Antenna Solution .......................... 55
Frederic Gianesello (STMicroelectronics)
Aimeric Bisognin (STMicroelectronics & University Nice Sophia-Antipolis)
Diane Titz (University Nice Sophia-Antipolis)
Cyril Luxey (University Nice Sophia-Antipolis)
Carlos A. Fernandes (Instituto de Telecomunicacoes)
Jorge R. Costa (Instituto Universitário de Lisboa)
Daniel Gloria (STMicroelectronics)

A Cavity-Backed Angled-Dipole Antenna Array for Low Millimeter-Wave Bands ........................................ 57
Son Xuat Ta (Ajou University)
Ikmo Park (Ajou University)

T2: Technical Interactive Session

New Advances in Gain Measurements in Non-Anechoic Sites: Application to Narrow Band Monopoles ......................................................................................................... 60
Razvan D. Tamas (Constanta Maritime University)

Radiation Efficiency Measurement of a Balanced Miniature IFA-Inspired Circular Antenna using a Differential Wheeler Cap Setup ......................................................... 64
F. Sarrazin (CEA-Léti)
S. Pflaum (CEA-Léti)
C. Delaveaud (CEA-Léti)

Effect of Human Body Shadowing on UWB Radio Channel .............................................................................. 68
Eriko Sasaki (University of Kitakyusyu)
Hidenobu Hanaki (TOKAI RIKa Co., Ltd.)
Hiroaki Iwashita (TOKAI RIKa Co., Ltd.)
Kazuki Naiki (TOKAI RIKa Co., Ltd.)
Akihiro Kajiwara (University of Kitakyushu)

Characteristics of Electric Antennas Aboard Scientific Spacecraft ................................................................. 71
Tomohiko Imachi (Kanazawa University)
Koudai Kita (Kanazawa University)
Mistunori Ozaki (Kanazawa University)
Ryoichi Higashi (Ishikawa National Institute of Technology)
Satoshi Yagitani (Kanazawa University)

Parametric Study of the Effect of Annular Slot on the Operating Frequency of Solid Cone Antenna ........................................................................................................ 73
O. Agunlejika (Loughborough University)
J.A. Flint (Loughborough University)
R.D. Seager (Loughborough University)

Compact Line Source Generator for Low Profile Continuous Transverse Stub Array Antenna ....................... 77
Pengfei Zhang (Xidian University)
Raj Mittra (University of Central Florida)
Shuxi Gong (Xidian University)

A Miniaturized, Circularly Polarized Log Periodic Dipole Array ........................................................................ 80
Joshua Haney (Georgia Southern University)
Sungkyun Lim (Georgia Southern University)
Broadband Hybrid Water Antenna for ISM-Band Ingestible Capsule Endoscope Systems .................. 82
Yunnan Jin (Hanyang University)
Jinpil Tak (Hanyang University)
Jaehoon Choi (Hanyang University)

Multi-Layer Substrate Loaded 10:1 (900MHz-9GHz) Ultrawideband Tightly Coupled Antenna Array ................................................................. N/A
Hao Huang (National University of Defense and Technology)
Ke Xiao (National University of Defense and Technology)
Shengshui Wang (National University of Defense and Technology)
Shunlian Chai (National University of Defense and Technology)

Misalignment Sensitivity and Human Body Effects on Wearable Conformal SCMR System ............... 89
Pablo J. Gonzalez (Florida International University)
Karina A. Quintana (Florida International University)
Stavros V. Georgakopoulos (Florida International University)

On the Bandwidth of Convex Conformal Reflectarray Antennas ....................................................... 92
Michele Beccaria (Politecnico di Torino)
Paola Pirinoli (Politecnico di Torino)
Mario Orefice (Politecnico di Torino)

An Electrically Small Loop Antenna with Usefully Isotropic Radiation and Common Mode Feed ............................................................... 95
Francis E. Parsche (Harris Corporation)

Technique for Realizing Specific Radiation Patterns of Antennas Operating in Mobile Phones and Topside Environments .......................................................... 99
Chao Li (University of Central Florida)
Raj Mittra (University of Central Florida)

UWB Radar for indoor Detection and Ranging of Moving Objects: An Experimental Study ............... 102
Wahab Khawaja (Florida International University)
Kory Sasaoka (Florida International University)
Ismail Güvenç (Florida International University)

A 2.45 GHz Novel Electrically Small Planar Dipole Antenna ............................................................. 106
Mina Wahib (Royal Military College of Canada)
Sebastien Clauzier (Royal Military College of Canada)
Said Mikki (Royal Military College of Canada)
Yahia Antar (Royal Military College of Canada)

An Omni-Directional Electrically Small Helical Antenna with High Radiation Efficiency .................. 110
Lidong Huang (University of Electronic Science and Technology of China)
Jiang Xiong (University of Electronic Science and Technology of China)
Bing-Zhong Wang (University of Electronic Science and Technology of China)

Performance Improvement of Stepped Frequency UWB Sensor for Frequency Interference ............... 113
Shizuka Kuboyama (University of Kitakyushu)
Nobuyasu Keya (University of Kitakyushu)
Akihiro Kajiwara (University of Kitakyushu)

Deployable Small Satellite Antenna: Quadrifilar Helical Antenna .................................................. 116
Greg O’Neill (Helical Communication Technologies)
A Combination of Alamouti Code and Beamforming Technologies via Dual-Polarized Antenna Array Systems
Xin Su (Hohai University)
Xiaofeng Liu (Hohai University)
Xiaochun Lu (Hohai University)
Chengming Luo (Hohai University)

T3: Materials and 3D Printing for Antennas
Multi-Material Additive Manufacturing of Antennas
Mark S. Mirotznik (University of Delaware)
Zachary Larimore (University of Delaware)
Peter Pa (University of Delaware)
Paul Parsons (University of Delaware)
Matt Mills (University of Delaware)

T4: Wearable and Implanted Antennas
A Printed UWB Antenna with Full Ground Plane for WBAN Applications
Roy B.V.B. Simorangkir (Macquarie University)
Syed Muzahir Abbas (Macquarie University)
Karu P. Esselle (Macquarie University)

Electrically-Small Wearable Antennas for Emergency Services Applications
Mario Orefice (Politecnico di Torino)
Paola Pirinoli (Politecnico di Torino)
Gianluca Dassano (Politecnico di Torino)

Metal-Based Materials for the Development of Implanted Bio-Devices
Ildiko Peter (Politecnico di Torino)
Ladislau Matekovits (Politecnico di Torino)
Karu P. Esselle (Macquarie University)

W1: Metamaterials and Metamaterial-based Antennas
Metamaterial Magneto Inductive Lens for Magnetic Resonance Imaging
Siew Bee Yeap (Institute for Infocomm Research)
Xianming Qing (Institute for Infocomm Research)
Zhi Ning Chen (Institute for Infocomm Research & National University of Singapore)

Linearly and Circularly Polarized Radiation from Metaline Antennas
Hisamatsu Nakano (Hosei University)
Kazutoshi Sakata (Hosei University)
Junji Yamauchi (Hosei University)

Multi-Functional Composite Metamaterial-Inspired EEAD Antenna for Structural Applications
Thomas C. Baum (RMIT University)
Kelvin J. Nicholson (Defence Science and Technology Group)
Amir Galehdar (Defence Science and Technology Group)
Kamran Ghorbani (RMIT University)
Richard W. Ziolkowski (University of Arizona)
Small Microfluidically Tunable Top Loaded Monopole ................................................................. 148
Abhishek Dey (University of South Florida)
Gokhan Mumcu (University of South Florida)

Design of Polarization Reconfigurable Microstrip Antenna with Frequency Tuning .................. 150
A. Bharathi (Osmania University)
Lakshminarayana Merugu (Kshatriya College of Engineering)
P.V.D. Somasekhar Rao (JNTU Hydrabad)

Frequency-Reconfigurable Single-Layer Design of Microstrip Patch Electrically-Steerable Parasitic Array Radiator (ESPAR) ................................................................. 154
Wei Ouyang (University of Central Florida)
Xun Gong (University of Central Florida)

Ryohei Hayashi (Kanazawa University)
Ryohei Kanaura (Kanazawa University)
Satoshi Yagitani (Kanazawa University)
Tomohiko Imachi (Kanazawa University)
Mitsunori Ozaki (Kanazawa University)
Yoshiyuki Yoshimura (Industrial Research Institute of Ishikawa)
Hirokazu Sugiura (Industrial Research Institute of Ishikawa)

Array Antenna with High Isolation based on EBG Structures for ETC Applications ....................... 161
Ying Liu (Xidian University)
Bo Shen (Xidian University)
Yunxue Xv (Xidian University)
Ho-Jun Lee (Korea Electronics Technology Institute)
Se-Hwan Choi (Korea Electronics Technology Institute)

Logo Antenna for 5.8 GHz Wireless Communications ............................................................... 165
Kasper Lüthje Jørgensen (Technical University of Denmark)
Kaj Bjarne Jakobsen (Technical University of Denmark)

Condition Number Variability of Ultra Wideband MIMO on Body Channels .............................. 167
Qammer H. Abbasi (Texas A&M University at Qatar)
Hassan El Sallabi (Texas A&M University at Qatar)
Ercin Serpedin (Texas A&M University)
Khalid Qaraqe (Texas A&M University at Qatar)
Akram Alomainy (Queen Mary University of London)

Electromagnetic Fields at the Surface of Human-Body Cylinders ............................................. 170
Nikolaj P.B. Kammersgaard (Technical University of Denmark)
Søren H. Kvist (GN ReSound A/S)
Jesper Thaysen (GN ReSound A/S)
Kaj B. Jakobsen (Technical University of Denmark)

A Low Profile Penta-Band Antenna for Portable Devices .......................................................... 174
Usama Shameem (University of Bedfordshire)
Masood Ur-Rehman (University of Bedfordshire)
Qummer Hussain Abbasi (Texas A&M University at Qatar)
Khalid Qaraqe (Texas A&M University at Qatar)

Millimeter-Wave Automotive Radar with PLL-Generated Ramps Modelling by using SystemVue and MATLAB ............................................................................. 178
Libo Huang (Tongji University)
Jie Bai (Tongji University)
Huanlei Chen ()
