Analytical and Finite Element Concrete Material Models: Comparison of Blast Response Analysis of One Way Slabs with Experimental Data

Held at the ACI Fall 2013 Convention
ACI SP 306
Phoenix, Arizona, USA
20-24 October 2013

Editors:

Ganesh Thiagarajan Eric Williamson

ISBN: 978-1-5108-2147-7
# TABLE OF CONTENTS

**SP-306—1**  
Parameters Influencing Finite Element Results for Concrete Structures  
Authors: Joseph M. Magallanes, Youcai Wu, Shengrui Lan, and John E. Crawford

**SP-306—2**  
Numerical Computation of Reinforced Concrete Slabs Subjected to Blast Loading  
Authors: Ran Ganel, Eytan Kochavi, and Gabi Ben-Dor

**SP-306—3**  
Numerical Modelling For Reinforced Concrete Response to Blast Load: Understanding The Demands On Material Models  
Authors: Jiaming Xu and Yong Lu

**SP-306—4**  
Blast Response Simulation of Reinforced Concrete Panels Bridges over State Ave in Kansas City, KS  
Authors: Ravi Mullapudi and Yavuz Mentes

**SP-306—5**  
Modeling The Response of Concrete Slabs Under Blast Loading  
Authors: Pierluigi Olmati, Patrick Trasborg, Clay Naito, Luca Sgambi, and Franco Bontempi

**SP-306—6**  
Simulation of Concrete Slabs Subjected To Blast Using The Cohesive Crack Model  
Authors: G. Morales-Alonso, D.A. Cendón, and V. Sánchez-Gálvez

**SP-306—7**  
SDOF and HYDROCODE Simulation of Blast-Loaded Reinforced Concrete Slabs  
Author: Tarek H Kewaisy

**SP-306—8**  
Blind Simulation of Blast Loaded Slabs Using Rcblast Software  
Authors: Eric Jacques and Murat Saatcioglu

**SP-306—9**  
Finite Element Analysis and Experimental Validation of Reinforced Concrete Single-Mat Slabs Subjected to Blast Loads  
Authors: Gunjan Shetye, Kavya Thadisina, and Ganesh Thiagarajan
