2015 International Conference on Information Technology (ICIT 2015)

Bhubaneswar, India
21-23 December 2015
Table of Contents

Message from General Chairs ................................................................................................................... ix
Message from Technical Program Chairs ................................................................................................ xi
Conference Organization .......................................................................................................................... xii
Technical Program Committees ........................................................................................................... xiii
Reviewers ................................................................................................................................................ xvi
Steering Committee ............................................................................................................................... xviii
Keynotes .................................................................................................................................................. xix
Invited Talks ........................................................................................................................................... xxiii

Session 1

Open Neighborhood Locating-Dominating Set in Graphs: Complexity and Algorithms .............................................................. 1
  Arti Pandey

An Optimized HPWL Model for VLSI Analytical Placement .................................................................................. 7
  B.N. Bhramar Ray, S. Das, Kabita Hazra, N. Patra, and Susil Kumar Mohanty

Secure Orchestration Based Federation in Hybrid Cloud Environments .............................................................. 13
  Dinkar Sitaram, Sudheendra Harwalkar, N. Ashwin, and S.K. Ajmal

Global t-Sweep Coverage Problem with Minimum Interference ........................................................................ 20
  B.K. Bhatta and S.K. Jena

Total Power Minimization Using Dual Power Assignment in Wireless Sensor Networks ........................................ 26
  Nitesh Sisodiya and D. Pushparaj Shetty
Session 2
DAPR: Delay-Aware Priority Based Routing Scheme to Alleviate Congestion in Wireless Sensor Networks ..................................................................................................................31
   Shuvajyoti Pal and Indrajit Banerjee
MERA: A Multi-clustered Energy Efficient Routing Algorithm in WSN ........................................................................................................................................37
   Samaleswari P. Nayak, S.C. Rai, and Sateesh K. Pradhan
A Secure Seamless Handover Authentication Technique for Wireless LAN ..................................................................................................................................................43
   Amit Kumar and Hari Om
A Regression Based Spectrum-Sensing Data - Falsification Attack Detection Technique in CWSN .....................................................................................................................................48
   Pinaki Sankar Chatterjee and Monideepa Roy
On the Phase Transition Analysis of k/Q-coverage Problem in Wireless Sensor Networks ........................................................................................................................................54
   S. Mini and Arun K. Pujari

Session 3
Channel Equalization Using Adaptive Zero Forcing Technique in Rayleigh Fading Channel ........................................................................................................................................60
   Jagyanseni Sahoo, Laxmi Prasad Mishra, Sarthak Panda, and Mihir Narayan Mohanty
Performance Analysis of Routing Protocols in Mobile Ad Hoc Network ........................................................................................................................................65
   Gayatree Rana, Bikram Ballav, and Binod Kumar Pattanayak
An Efficient Technique for Energy Consumption in Distributed Cloud Network using Ant Technique ........................................................................................................................................71
   Priya Dubey and Saurabh Jain
Minnaert Topographic Correction of Mars Color Camera Images from Mars Orbiter Mission ........................................................................................................................................76
   Indranil Misra, S. Manthira Moorthi, and Debajyoti Dhar
MM-path Approach for Integration Testing of Aspect-Oriented Programs ........................................................................................................................................82
   Madhusmita Sahu and Durga Prasad Mohapatra

Session 4
Modified Color Brightness Preserving Bi-histogram Equalization with Variable Enhancement Degree for Restoration of Skin Color ........................................................................................................................................88
   Susanta Kumar Rout, Mrutyunjaya Sahani, and Mihir Narayan Mohanty
Efficient Provenance Storage for RDF Dataset in Semantic Web Environment ........................................................................................................................................94
   Kumar Sharma, Ujjal Marjit, and Utpal Biswas
Cryptanalysis of Zheng Et al.’s Pairing-Free Secure IBE Scheme .......................................................... 101

Arijit Karati and G.P. Biswas

Android Software Based Multi-touch Gestures Recognition for Secure Biometric Modality ........................................................................................................... 107

Kalyani Devidas Deshmane and S.A. Ghodake

Investigating the Effect of Black Hole Attack on Zone Based Energy Efficient Routing Protocol for Mobile Sensor Networks .......................................................... 113

Bikram Ballav, Gayatree Rana, and Binod Kumar Pattanayak

Session 5

Internet of Vulnerable Things (IoVT): Detecting Vulnerable SOHO Routers ............................................. 119

Prabaharan Poornachandran, R. Sreeram, Manu R. Krishnan, Soumajit Pal, A.U. Prem Sankar, and Aravind Ashok

Analysis and Prevention of Account Hijacking Based INCIDENTS in Cloud Environment .......................................................... 124

Sreenivas Sremath Tirumala, Hira Sathu, and Vijay Naidu

Topic Modelling for Songs .......................................................................................................................... 130

Nishma Laitonjam, Vineet Padmanabhan, Arun K. Pujari, and Rajendra Prasad Lal

Student Learning Achievement Using Multi-media Tools: A Technology Based Intervention .................................................. 136

Subrata Sarkar, Jayaraman Sundarakrishnan, and Sanjay Mohapatra

GP-SVM: Tree Structured Multiclass SVM with Greedy Partitioning .......................................................... 142

Sandeep Kumar Sahu, Arun K. Pujari, Venkateswara Rao Kagita, Vikas Kumar, and Vineet Padmanabhan

Session 6

Group Recommender Systems: Combining User-User and Item-Item Collaborative Filtering Techniques .......................................................... 148

Abinash Pujahari and Vineet Padmanabhan

A Novel Social-Choice Strategy for Group Modeling in Recommender Systems ............................................. 153

Venkateswara Rao Kagita, Krishna Charan Meka, and Vineet Padmanabhan

Feature Subset Selection for Clustering Using Binary Particle Swarm Optimization .......................................................... 159

Surjodoy Ghosh Dastider, Himanshu Kashyap, Shashwata Mandal, Abhinandan Ghosh, and Saptarsi Goswami

Learning in Real-Time Strategy Games .................................................................................................. 165

Vineet Padmanabhan, Pranay Goud, Arun K. Pujari, and Harshit Sethy
Comparative Analysis of Support Vector Machine: Employing Various Optimization Algorithms ................................................................. 171
M.A.R. Khalid, Majid Alwaqdani, and M.A.H. Farquad

Session 7
Algorithm for Back-Up and Recovery of Data Stored on Cloud along with Authentication of the User .............................................................. 175
Manali Raje and Debajyoti Mukhopadhyay
Single Gateway Negotiation for Cloud Service during Service Level Agreement ................................................................. 181
Lissy Ashok and Debajyoti Mukhopadhyay
Validation and Verification of Joint-Actions in Multi-agent Planning ................................................................. 187
Amar Nath and Rajdeep Niyogi
Quality Assurance Model for "Bhulekh": An e-Governance Application ................................................................. 193
Pabitrananda Patnaik, Susanta Kumar Panda, and Manas Ranjan Patra
A Novel Efficient Design of Intelligent Street Lighting Monitoring System Using ZigBee Network of Devices and Sensors on Embedded Internet Technology ................................................................. 200
Bidhan Chandra Mishra, Avipsa S. Panda, N.K. Rout, and Sumant Kumar Mohapatra

Session 8
Homomorphic Encryption for Data Security in Cloud Computing ................................................................. 206
Kamal Kumar Chauhan, Amit K.S. Sanger, and Ajai Verma
Decision Points in Application of Genetic Algorithm ................................................................. 210
Biplab Mahapatra and Sanjay Mohapatra
Framework for Web Services in Education Management ................................................................. 215
Ruchika Thukral and Anita Goel
Virtual Classroom for Effective Learning in IT Industry ................................................................. 221
Swati Das

Author Index ............................................................................................................................................ 227
