122nd American Society for Engineering Education Annual Conference and Exposition 2015

Making Value for Society

Seattle, Washington, USA
14-17 June 2015

Volume 1 of 29

ISBN: 978-1-5108-2178-1
# TABLE OF CONTENTS

## VOLUME 1

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>A Program to Develop Resiliency, Self-confidence, Intrinsic Motivation, and a Sense of Purpose in Young Adults</td>
<td>1</td>
</tr>
<tr>
<td>Sergio William Sedas</td>
<td></td>
</tr>
<tr>
<td>Graduate Women “Lean In”: Building Community and Broadening Understanding</td>
<td>20</td>
</tr>
<tr>
<td>Julie Rijowski, Kat ey Lucchini-Colby</td>
<td></td>
</tr>
<tr>
<td>Application of and Preliminary Results from Implementing the First-Year Introduction to Engineering Course Classification Scheme: Course Foci and Outcome Frequency</td>
<td>35</td>
</tr>
<tr>
<td>David Besping, Kenneth J Reed</td>
<td></td>
</tr>
<tr>
<td>Serendipitous Advantages of a Multi-Disciplinary Senior Seminar Course for Engineering Students</td>
<td>56</td>
</tr>
<tr>
<td>Bijan Sepasghour</td>
<td></td>
</tr>
<tr>
<td>Integrating Entrepreneurship into Capstone Design: An Exploration of Faculty Perceptions and Practices</td>
<td>75</td>
</tr>
<tr>
<td>Victoria Mathew, Thema Monroe-White, Ari Torrentine, Angela Sharrund, Amit Shashikant Jariwala</td>
<td></td>
</tr>
<tr>
<td>Engagement of Practitioners to Produce Balanced and Fundamentally Well Grounded Civil Engineers</td>
<td>105</td>
</tr>
<tr>
<td>Isaac L. Howard</td>
<td></td>
</tr>
<tr>
<td>Sharing the Full Range of Leadership in Student Teams: Developing an Instrument</td>
<td>117</td>
</tr>
<tr>
<td>Brian J. Novoselich, David B Knight</td>
<td></td>
</tr>
<tr>
<td>Spatial Skills Development of Engineering Students: Identifying Instructional Tools to Incorporate into Existing Curricula</td>
<td>138</td>
</tr>
<tr>
<td>Diana Bairaktarova, Matthew Reyes, Noshin Nasr, Dan Thomas Carlton</td>
<td></td>
</tr>
<tr>
<td>The Effectiveness of AR (Augmented Reality) Technology in Acquiring Information on Job-site Task</td>
<td>149</td>
</tr>
<tr>
<td>Yong-Woo Kim, Wonil Lee, Ryan J Eom</td>
<td></td>
</tr>
<tr>
<td>Project Based Learning of Environmental Engineering: A Case Study</td>
<td>164</td>
</tr>
<tr>
<td>M. A. Karin</td>
<td></td>
</tr>
<tr>
<td>A Program for Graduate Women in Engineering Pursuing Academic Careers (IFEAT: Illinois Female Engineers in Academia Training)</td>
<td>176</td>
</tr>
<tr>
<td>Elizabeth Horsman, Danielle Jamie Mai, Yanfen Li, Rohit Bhargava</td>
<td></td>
</tr>
<tr>
<td>Work-in-Progress: High-Frequency Environmental Monitoring Using a Raspberry Pi-Based System</td>
<td>186</td>
</tr>
<tr>
<td>Debabrata Basu, John Stanton Goldstein Purviance, Darren K Maczka, Daniel S Brogan, Vinod K Lohani</td>
<td></td>
</tr>
<tr>
<td>Assessing Effects of Challenge-Based Instruction on Conceptual Understanding In Heat Transfer</td>
<td>203</td>
</tr>
<tr>
<td>Induced Collaborative Engagement for a “Solution-to-Question” Model using Remote Experimental Laboratories as a Tool</td>
<td>216</td>
</tr>
<tr>
<td>Obasegun Tekena Ayodele, Lawrence O Kehinde, Olawale Babatunde Akinwale</td>
<td></td>
</tr>
<tr>
<td>Pilot Study on Applying Natural Language Processing Techniques to Classify Student Responses to Open-Ended Problems to Improve Peer Review Assignments</td>
<td>233</td>
</tr>
<tr>
<td>Matthew J. Verleger</td>
<td></td>
</tr>
<tr>
<td>On-Ramping to Academia: Women’s Experiences of Transitioning from Nonacademic to Academic Careers</td>
<td>243</td>
</tr>
<tr>
<td>Colleen Carrigan, Eve A. Riskin, Kathleen O’Leary, Joyce Yen, Priti N Mody-Pan, Matthew O’Donnell</td>
<td></td>
</tr>
<tr>
<td>The Use of Polleverywhere in Engineering Technology Classes to Student Stimulate Critical Thinking and Motivation</td>
<td>250</td>
</tr>
<tr>
<td>Otilia Popescu, Laura C Chezan, Vukica M. Jovanovic, Orlando M Ayala</td>
<td></td>
</tr>
<tr>
<td>Characterizing Student Music Preference and Engineering Major Choice</td>
<td>262</td>
</tr>
<tr>
<td>Frank Blubaugh, Joyce B. Main</td>
<td></td>
</tr>
<tr>
<td>Development of Motion Analysis software for Dynamics Education</td>
<td>279</td>
</tr>
<tr>
<td>Hirokito Kobayashi</td>
<td></td>
</tr>
<tr>
<td>Real-Time 3D Reconstruction for Facilitating the Development of Game-based Virtual Laboratories</td>
<td>293</td>
</tr>
<tr>
<td>Zhou Zhang, Mingzhao Zhang, Yizhe Chang, Sven K. Esche, Constantin Chassapis</td>
<td></td>
</tr>
<tr>
<td>The Role of ‘Togethering’ in Developing Teamwork Relationships and Shared Meaning</td>
<td>309</td>
</tr>
<tr>
<td>Patricia Kristine Sheridan, Penny Kimnear, Greg Evans, Doug Reeve</td>
<td></td>
</tr>
<tr>
<td>Academic Maker Spaces and Engineering Design</td>
<td>342</td>
</tr>
<tr>
<td>Vincent Wlezynski</td>
<td></td>
</tr>
<tr>
<td>Arguing to Solve Food Engineering Problems</td>
<td>361</td>
</tr>
<tr>
<td>Tamamara Ramirez Apud L., Judith Virginia Gutierrez Cuba, Nelly Ramirez-Corona, Aurelio Lopez-Malo, Enelio Palou</td>
<td></td>
</tr>
<tr>
<td>Efficacy of Various Spatial Visualization Implementation Approaches in a First-Year Engineering Projects Course</td>
<td>378</td>
</tr>
<tr>
<td>Jacob L. Segil, Beth A Myers, Jacqelyn F. Sullivan, Derek T Reamon</td>
<td></td>
</tr>
<tr>
<td>Blending Entrepreneurship and Design in an Immersive Environment</td>
<td>386</td>
</tr>
<tr>
<td>Bryan O’Neil Boulanger, Joe Tranquillo</td>
<td></td>
</tr>
<tr>
<td>A Preliminary Evaluation of Elementary School Teachers Willingness to Gain Certification in Science or Mathematics in an Effort Towards Achieving School-wide STEM Certification (RTF, Strand 3)</td>
<td>399</td>
</tr>
<tr>
<td>Stephanie C. Vereen, Alison D. Vereen</td>
<td></td>
</tr>
<tr>
<td>Peer Instructor or College Faculty - Who is Better for Leading Teacher Professional Development? (Evaluation)</td>
<td>407</td>
</tr>
<tr>
<td>Eugene Rutz, Anant R. Kukreji, Julie Steimle, Catherine Malhie</td>
<td></td>
</tr>
<tr>
<td>What is Global Preparedness? Arriving at Answers in Collaboration with Student Engineers Working with Underserved Communities Globally</td>
<td>421</td>
</tr>
<tr>
<td>Bhavna Haribarun, Sneha Ayyagari, Jonathan Edward Pang, Paul Dwight Watkins II, Arvind Arun</td>
<td></td>
</tr>
</tbody>
</table>
### VOLUME 2

**Exploring Implicit Understanding of Engineering Ethics in Student Teams** ................................................................. 844  
Eun Ah Lee, Nicholas Gans, Magdalene G Grobman, Marco Tacca, Matthew J. Brown  

**Developing an Interdisciplinary Healthcare Improvement Workforce** ................................................................. 858  
James Benneyan, Corey Balint  

**Changes in Motivational Beliefs Among First Year Engineering Students: Relations to Academic Achievement and Retention Status** ................................................................. 874  
Yu-Yan Liu, Kate E. Snyder, Patricia A Balston  

**Engaging Engineering Graduate Students in Applied Research at Morgan State University** ....................................... 884  
Guangming Chen, Jomokie Kemi' Ladeji-Osia, Gbekelawuna B. Ogmonteine, Young-Jae Lee  

**Studying the Fidelity of Implementation of an Intrinsic Motivation Course Conversion** ........................................ 899  
Geoffrey L. Herman, Katherine Anne Earl, Dong San Choi  

**Project-based Learning in a High School Pre-engineering Program: Findings on Student Behavior (RTP, Strand 3)** ......................... 914  
Todd France  

**Development and Implementation of an Automated Course and Program Assessment Tool (ACAT)** ................................. 934  
Kevin O'Connor, Frederick A. Peek, Julie Cafarella, Jacquelyn F. Sullivan, Tanya D Emnis, Beth A Myers, Daris A Kooy-Schwarz, Beverly Louie  

**Assessing the Impact of Engineering Outreach Frequency on Middle-school Students' Interest in Engineering** ............... 955  
Joyce Blandino, Jon-Michael Hardin  

**Experiences with an Industrial Engineering Dual Diploma Program** ............................................................................. 969  
Cem Karacal, Hasan Sevim  

**Constructing “Calculus Readiness”: Struggling for Legitimacy in a Diversity-Promoting Undergraduate Engineering Program** ............................................................................................................. 982  
Kevin O'Connor, Frederick A. Peek, Julie Cafarella, Jacquelyn F. Sullivan, Tanya D Emnis, Beth A Myers, Daris A Kooy-Schwarz, Beverly Louie  

**Implementing Team Based Learning in a First Year Introduction to Engineering Course** ........................................ 999  
Chao Wang, Jennifer Mott  

**Maker: A Practical Approach to Student Use of University Owned Rapid Prototype Machines** ................................. 1013  
Christopher P. Pung, Debbie Morrow  

**Use of a Rube Goldberg Design Project for Engineering Dynamics** .............................................................................. 1017  
Devin R. Berg  

**Helicopter Aerodynamics and Design Course Developed from a Research-Informed Framework** ................................. 1033  
Antonette T. Cummings P. E., William "bill" C. Oakes  

**Student Communication Improvements during an Industry-Sponsored Civil Engineering Senior Design Course** ............. 1061  
Ryan Fries, Brad Cross, Jianpeng Zhou, Chad Verhais  

**A Tale of Two Common Reads: Models for Developing a Successful Common Reading Program for First Year Engineering Students** ............................................................................................................. 1078  
Stacie Edington, Archie L Holmes Jr., Petra Reinke  

**Pre-Engineering Education Collaborative at Four: Approaching the Final Phases** ........................................................ 1091  
Robert V. Pieri, Timothy D Legg, Ann Marie Valtic, Lori Alfson, Joshua Jason Mattes, Michael Maloy Parker, G. Padmanabhan  

**Barriers to Completion of Two-Year Engineering Technology Programs: A Survey** .................................................. 1099  
Kenan Baltaci, Ulan Dukeev, Faruk Tildiz  

**Evaluation of a Dual First Year Student Advising Program** .......................................................................................... 1108  
Jess W. Everett, Maria Perez-Colon  

**Development of Sustained Academia-Industry Partnership - A Successful Model and Two Case Studies** ....................... 1121  
Chuang Shih, Gregory John Kostrzewski, Lin Xiang Sun  

**Work in Progress: Rubric Development for Year-long Civil Engineering Capstone Projects** ...................................... 1133  
Nirmala Gnanapragasam, Nathan E Canney Pe  

**Learning from Senior-Level Engineering & Business Development Professionals to Create Globally Competitive Engineers via On- and Off-Campus Activities** .............................................. 1160  
Jane L. Lehr, Deanne J Denurri, Ailana Christine Smelling, Nhu Y Tran, Lia Marie Applegarth  

**Teaching Statistical Quality Control by Applying Control Charts in the Catapult Shooting Experiments** .......................... 1185  
Wangqing Sun, Yangping Gao  

**Blending a Spatial Skills Intervention into a Mainstream Technology Teacher Education Degree Program** ....................... 1195  
Diarmuid Lane, Sheryl A. Sorby  

**A Flipped Course in Modern Energy Systems: Preparation, Delivery, and Post-mortem** ............................................. 1209  
Matthew Turner  

**A New Program in Sustainable Engineering: A Platform for Integrating Research and Service into the Classroom through Global Engagement** ................................................................. 1221  
Rachel A Brennan  

**The Engineering Education Epistemology of a Science Teacher (RTP, Strand 1)** ........................................................... 1229  
Katherine Levenick Shirey  

**e-Learning Modules for Improving Lifelong Learning Ability** ...................................................................................... 1250  
Michele Miller, Sheryl A. Sorby, James P. De Clerck  

**Technical and Professional Communication for Chemical Engineers** .............................................................................. 1259  
Elia Miskoglou  

**TUES Type 2 Project: Development and Application of MITS/DATS Courseware: Advancement, Success, Concern, and Weakness** ............................................................................................................. 1270  
Weizhao Zhao
Work in Progress: Redesign of Introductory Bioengineering Course to Increase Student Engagement ................................................................. 1279
Improving Students’ Technical Writing Skills: Abstracts in Introductory Solid Mechanics ................................................................. 1290
Kai Jun Chew, Autumn Turpin
U.S. Construction Management Students Comfort Level With and Knowledge of Mobile Technologies ................................................................. 1313
R. Casey Cline, Kirsten A Davis
The Impact of Personal Interactions on the Experience of African-American Males on Multiracial Student Teams ................................................................. 1323
Kelly J Cross, Marie C Parenti
Design, Development, and Implementation of Instructional Module Development System (IMODS) ................................................................. 1332
Srividya Kona Bunsal, Odessa Osuka Dalrymple, Ashraf Gaffar
Improving Healthcare by Teaming Industrial Engineers with Clinicians ........................................................................................................ 1343
James Benneyan, Corey Balint
Memory Maps: Helping Engineering Students Fashion Words on the Spot in Their Technical Presentations ................................................................. 1361
Michael Alley, Lori B Miraldi, Joanne K. Garner
Engineering, Society and the Environment in the Teaching Goals and Practices of Engineering Instructors ................................................................. 1372
Cinda Heaney, Wade Fagen
Engineering Program Growth with Mesh Network Collaboration ........................................................................................................ 1397
Hank D Voss, Scott Henry Moats, Bill Chapman
Factors Influence Data Management Model Selections: IT Expert Testimonies ........................................................................................................ 1426
Gholam Ali Shaykhian, Mohd Abdelgadir Khairi, Jinan Zadeh
Pushing the Boundaries of Mass and Energy: Sustainability and Social Justice Integration in Core Engineering Science Courses ................................................................. 1437
Donna M Riley
A Compact Device for Inductive Instruction in General Physics ........................................................................................................ 1449
Taylor Sharpe, Geng Qiu, Gerald W. Recktenwald
Sophomore Transfers: Who Are They and What Support Do They Need? ........................................................................................................ 1464
Mary R. Anderson-Rowland, Armando A. Rodriguez
Engineering Economics as a Benchmark Course in the Context of a Sustainable Continuous Improvement Process ................................................................. 1478
Zia A. Yamane, Mojtaba B. Takallou, Robert J. Albright
Using Strengths of First-Year Engineering Students to Enhance Teaching ........................................................................................................ 1490
Shelley Lortimer, Jeffrey A Davis
Measuring the Impact of a Mathematics Intervention on Student Mathematics Self-Efficacy: Development and Application of Revised Measurement Tool ........................................................................................................ 1501
Anthony Bourne, Nathan W. Klingbeil, Frank W. Ciardullo
A Force-Directed Program Graph Visualizer for Teaching White-Box Testing Techniques ........................................................................................................ 1521
Weifeng Xu, Aqeel Raza Syed, Qing Zheng
Quantitative Correlation Between Student Use of Office Hours and Course Performance ........................................................................................................ 1534

Writing, Speaking and Communicating – Building Disciplinary Literacy in Materials Science Undergraduate Students ........................................................................................................ 1543
Nancy Ruczycki
Managing and Exchanging Knowledge Underlying Aerospace Engineering Design Decisions ........................................................................................................ 1555
Elizabeth Scott Fleming, Amy Prichett
Are We Preparing the Next Generation? K-12 Teacher Knowledge and Engagement in Teaching Core STEM Practices ........................................................................................................ 1564
Louis Nadelson, Anne Seifert, J. Kade Hendricks
Lessons Learned from Collaborative Development of Research-Based Course Materials ........................................................................................................ 1586
Devlin Montfort, Shane A. Brown, Charles E. Riley, Luciana R Barroso, David G. Pollock, Jennifer Light, Adam Lenz
Texas Pre-freshman Engineering Program Challenged Based Instruction Curriculum Development and Implementation (RTP, Strand 5) ........................................................................................................ 1594
Stephen W. Crown, Mis Alaim, Jose Luis Chavez Jr, Joel Guadalupe Montemayor, Ricardo Montemayor, Haidy Enid Soto
Travel for a Penny a Mile: An Engineering Design Challenge Inspiring Student Engagement and Sustainable Living .................................................................................................................................................. 1605
Richard M. Goff
Interdisciplinary Design Course Structure: Lessons for Engineering Instructors from a Capstone Design Course ........................................................................................................ 1623
Karl Olsen, Todd Beyreuther, Michael Wolcott, Tamara Lanninga
“And Now for Something Completely Different” – A Faculty Sabbatical in Public Policy ........................................................................................................ 1635
Judy L. Cezeaux
An Online Course and Teacher Resource for Residential Building Codes and Above Code Construction Methods ........................................................................................................ 1644
Tripp Shealy, Audra Don Kiesling, Timothy R. Snail
A Dialectic Data Integration Approach for Mixed Methods Survey Validation ........................................................................................................ 1654
Nicholas D. Fila, Justin L. Hess, Senay Purzer
Probing the Flipped Classroom: A Controlled Study of Teaching and Learning Outcomes in Undergraduate Engineering and Mathematics .................................................................................................................................................. 1672
Nancy K Lape, Rachel Levy, Darrell H Tong, Rebecca M Eddy, Nancy Hankel
PLM Based Digital Design Manufacturing and Process Monitoring of an Impeller Manufacturing- a Senior Project at Virginia State University ........................................... 2131
Zhenhua Wu, Nasser Gharibian

Fostering Spatial Visualization through Augmented Reality in Calculus Learning ................................................................. 2149
Patricia Salinas, Eliu Quintero, Pablo Guillermo Ramirez, Eduardo González Mendivil

Programming a Six Axis Motoman H3PC Robot for Industrial Sorting Application.......................................................... 2161
Hamza Kadir Alumni, Jubaib Hossain, Nirjhar Das Sharma, Suraiya Jannat Khan, Akram Hossain

Qualitative Study of First-Generation Latinas: Understanding Motivation for Choosing and Persisting in Engineering ........................................... 2180
Dina Verdin, Allison Gudrin, Jennifer Lynne Morazes

Analysis And Simulation of Hybrid Electric Energy Storage (HEES) Systems for High Power Applications .......................... 2199
Hassan Moghbeli, Shahab Sabzi

Assessing Graduate Attributes Within a Two-Semester Capstone Design Course ................................................................. 2212
Jacqueline Ann Stagner, Jennifer L Jorden

Application-based Learning, a Nuclear Experimental Laboratory in a Field Environment .................................................. 2226
Robert Prins, Bryndal A. Sones, Daniel Schlich

Effect of Extended Use of an Executable Flowchart for Teaching C Language ................................................................. 2231
Choo Sheyong

Software Engineering Learning in HFOSS: A Multi-Institutional Study .................................................................................. 2241
Heidi J. C. Ellis, Gregory W Hislop, Sarah Monisha Pulimood, Becka Morgan, Ben Coleman

The Role of Radio-Controlled Model Airplanes in the Education of Aerospace Engineers ...................................................... 2253
Kathy Schmidt Jackson, Mark D. Maughner, Benjamin T. Pipenberg, Nicholas Jared Grasser, Stephen Van Wert

Usability Evaluation of a Virtual Educational Laboratory Platform .................................................................................. 2264
Yichen Chang, El-Sayed S. Aziz, Minghao Zhang, Sven K. Eiche

An Integrated Approach to Developing Business Expertise in Industrial Engineering Students ................................................................. 2277
Paul C. Lynch, Cynthia Bober, Joseph Wilck

Psychometric Analysis of Residence and MOOC Assessments ................................................................................ 2293
Eric Loken, Zita Oravecz, Conrad Tucker, Frödlin Jakob Linder

Nano-satellites and HARP for Student Learning and Research .................................................................................. 2307
Hank D Foss, Jeff F DAley, William A Bausum, Bill Chapman

Integration of Mathematics for Sustainable Energy Applications ................................................................................ 2339
Seunghyun Chun

The Linear Motion As a Scenario for Addressing Relations Between a Function and Its Derivative .................................................. 2348
Eliu Quintero, Patricia Salinas

Refinement of a Concept Inventory to Assess Conceptual Understanding in Civil Engineering Fluid Mechanics ..................... 2361
Mary Katherine Watson, Amber Renee Mills, Kevin C Bowser, Kenneth Brannan, Michael H. Woo, Ronald W. Welch

A Metric for Assessment of ABET Student Outcome “b” – Experimental Design and Analyzing the Results ................................. 2381
Ali J. Jones

Ta-Da! You’re a Design Thinker! Validating the DesignShop as a Model for Teaching Design Thinking to Non-Designers and Achieving Systemic Re-Design in the Education System ................................................................. 2390
Jessica Axly Artiles, Miss Katherine E Levine

Examining Interruptions in a Student’s Solution Generating Process for Indicators of Conceptual Knowledge .................................................. 2418
Christian Anderson Arbogast, Devlin Montfort, Shane A. Brown

Ethics and Text Recycling ................................................................................................................................. 2431
Marilyn A. Dyer

BYOE: A Portable Table-top Lab for Exploring Crystal Structures ................................................................................ 2444
Isabelle Dutin, Jun Nogami, Scott Ramsay, Scott D Ramsay

Methods for Establishing Validity and Reliability of Observation Protocols ...................................................................... 2457
Robert Matthew Demonbrun, Cynthia J. Finelli, Prateek Shekhar

First-Year Engineering Courses Effect on Retention and Workplace Performance ........................................................ 2467
Gregory Warren Bays, Kathleen A. Otsman, Jeff Kastner, F James Boerio

An Assessment of the Graphic Communications Skills Needed by Construction Management Graduates ................................. 2480
Joseph A Wright

Students’ Perception of Relevance of Physics and Mathematics in Engineering Majors .............................................................. 2493
Genaro Zavala, Angeles Dominguez, Arturo Cristian Millan, Mauricio Gonzalez

Building Diversity in Engineering Competition Teams by Modeling Industry Best-Practice ...................................................... 2515
Rui Pan, Randa L. Shehab, Cindy E Foer, Deborah A. Trettin, Susan E. Walden

A Systematic Review of Undergraduate Engineering Students’ Perception of the Types of Activities Used to Teach Electric Circuits .................................................................................. 2529
Miss Nicole P Petersen, Bank J. Strenweler

Engineering Identity Development of Latina and Latino Members of the Society of Hispanic Professional Engineers ................................. 2550
Renata A Revelo Alonso

VOLUME 4

Foundations for the Mathematical Modeling of the First-Year Introduction to Engineering Course Classification Scheme using Abstract Mathematics ................................................................. 2563
David Reeping, Kenneth J Reid
A Demo Every Day: Bringing Fluid Mechanics to Life

Krista M Hill, Ying Yu

An Integrated, Blended Online Engineering Program of College-level Courses for High School Students Offered by a State-wide Public STEM Magnet School

Michael Andrew Albright, Karen R. Den Braven, Elaine B. Parshall

Teaching Collaborative Skills Through an Interdisciplinary Design Competition

Michele M. Herrmann, Lyndsey N. Miller, Alexis Gregory, J. Suzanne Powney

A “Flipped” Statics Classroom

Mark H Holdhusen

The Power and Politics of STEM Research Design: Saving the "Small N"

Amy E Staton, Alice L. Pawley

How Engineering Students Study: Alone, Together, or Start Alone, End Together

Denise Wilson, Cheryl Allendoerfer, Rebecca A Bates, Tamara Floyd Smith, Melani I. Plett, Nanette M Veilleux

Interconnected Laboratory Modules in Metrology, Quality Control and Prototyping area Courses: Lessons Learned and Laboratory Modules Assessment

 implemented

Irina Nicola Ciobanescu Husuau, Yalcin Ertelkin, Radian G Belu

Race, Inclusion, and Science: Things That Really Do Go Together

Jennifer B Amos, Carla D Hunter, Kathryn B. H. Clancy, Ayesha Sherita Tilman

Incorporating Engineering in the Biology Classroom (Curriculum Exchange)

Wendy A Niel, Siddhika Selen Gazy, Tamara J Moore

Using a Creative Fiction Assignment to Teach Ethics in a First Year Introduction to Engineering Course

Sara J. Atwood, Brenda Redd- Daily

A First-Year Attrition Survey: Why Do They Say They Are Still Leaving?

Jeff Johnson, Alan D. Niami

A Female Oriented Capstone Experience: Generations of Engineers Passing the Torch

John T Tocco

Hex-Oid Habitat Design Challenge: Teaching Engineering Design in a Multidisciplinary Role-Play Scenario

Robert H. Mayer Jr., Cmangela Schedel

NSF ATE Regional Center CREATE

Kathleen Alfano

Undergraduate Students’ Recognition and Development as Researchers

Courtney June Faber, Lisa Benson

If the Engineering Literature Fits, Use It! Student Application of Grey Literature and Engineering Standards

Chelsea Leachman, Jacob William Leachman

Comparing Organizational Structures: Two Case Studies of Engineering Companies

Carlye Anne Lauf, Daria A Kotsys-Schwartz, Kevin OConnor, Mark Reitschel

K-12 Teachers as Curriculum Designers in Engineering Professional Development

Kara Berry, Don. Teresa B. Jackson

Making the Funds of Knowledge of Low Income, First Generation (LIFG) Students Visible and Relevant to Engineering Education

Jessica Mary Smith, Juan C. Lucena

Visualizing Soil Deformation in the Undergraduate Classroom Using Digital Image Correlation (DIC)

Michael Patrick McGuire, Jeffrey David Helm

Broadening Participation through Engagement in the Maker Space Movement

Ethics in Engineering Students’ Design Considerations: Case Studies of Electric Power Systems for the "Developing World"

Ryan C. Campbell, Ken Yasuhara, Denise Wilson

The Impact of Supplemental Instruction on the Performance of Male and Female Engineers in a Freshmen Chemistry Course

Emily Olena Wisniewski, Rachel Lauren Shapiro, Emma Kaeli, Kristen Barbara Coletti, Paul A. Dimilla, Rachelle Reissberg

Industrial Engineering Technology Curriculum Remapping

Ali Ahmad

Continuous Improvement in an NSF S-STEM Program

Bob Henry Kinzel, Deborah K. Nykanen, Rebecca A Bates, Winston Sealy, Rachel E Cohen, Jennifer Yeltsos

Educating the Whole Engineer: Transforming an Introductory Engineering Survey Course

Juliann De Vernon, Lorelle A Meadows, Stacie Edington

Engineering Supplemental Instruction: Impact on Sophomore Level Engineering Courses

Charles Algus Wilson Jr., Adrienne Steele, Warren N. Waggoner-Puck Jr., Wei-Huang Wang, Linda Lee Ramsey

Design and Fabrication of Electric Go-kart Using 3D Printing

Kee M Park

Exploring Contemporary Issues in Sustainable Energy

Paul Gannon, Ryan Anderson, Justin W Spengler, Carolyn Plumb

Design, Implementation and Evaluation of an Online Team- and Activity-Based Introduction to Engineering Course

Emory Mertz, Haolin Zhu, Chao Wang

Presenting Test Benches and Device Characteristics of Programmable Logic In An Introductory Logic Circuits Course

Krista M Hill, Ying Yu
Experiential Learning Framework for Design and Development of Environmental Data Acquisition System
Enhances Student Learning in Undergraduate Engineering Courses ................................................................. 3016
Xavier Shastri, Dominique Henry, Lei Zhang, Abhijit Nagchaudhuri, Madhumita Mitra, Christopher E Hartman, Christopher Alan Toney II, Ayokunle Akevemi Akange

Social Justice in Control Systems Engineering ................................................................................................ 3027
Kathryn Johnson, Jon A. Leydens, Barbara M. Moskal, Deborah Silva, Justin Stephen Fantasky

Efficacy of Using Grade Point Average to Predict Students’ Cognitive Ability ................................................... 3047
James Warnock

Enhancing Retention and Academic Success of Undergraduate Engineering Students ........................................... 3059
Anant R. Kakrete, Temesgen Wondims Aure

Taking an Engineering Spatial Visualization Course to Pre-Dental Students ....................................................... 3082
Olga Maria Stavridis, Lisa Abrams, Sheryl A. Sorby, Darryl T Hamamoto, Ken Sigler

An Introduction to Engineering Supplemental Course for Students Underprepared to Enter Calculus ................. 3091
Denise H Bauer

Theodore J. Bruton, Kevin L. Devine

Preparation of Biology Review and Virtual Experiment/Training Videos to Enhance Learning in Biochemical Engineering Courses ........................................................................................................................................... 3115
Jacob James Elmer, Noelle K Comollii, Zygi Huang

Using Personal Case Studies to Raise Construction Safety Awareness among Construction Management Students ............................................................................................................................... 3125
Carla Lopez Del Puerto, Rodolfo Valdes-Vasquez, Maryellen C Nobe

A Plan to Diffuse Mobile Hands-On Teaching and Learning in Puerto Rico ................................................................ 3134
Mary Margaret Simon, Abby Hayman, Melissa Ruiz, Yader Marte, Yosbel Cintron

Incorporating Research and Design in a Community College Engineering Program ............................................. 3141
April K. Andreas, Paulina Zamiga Sidwell

Using Design Process Timelines to Teach Design: Implementing Research Results ............................................. 3150
Cynthia J. Atman, Janet McDonnell, Ryan C. Campbell, Jim L Borgford-Parnell, Jennifer A Turns

Designing Effective Project-based Learning Experience using Participatory Design Approach ............................... 3181
Jianyu Dong, Pearl Chen, Anthony Hernandez

Examining the Integration and Motivational Impact of Hands on Made4Me: Hands-on Machining, Analysis and Design Experiences for Mechanical Engineers ................................................................................. 3193
Jeremy John Vaillant, Christopher J Hansen, Jonathan D. Stolk, Stephen Johnston, Sammy G. Shina, David Joe Willis

Exploring the Relationship Between Empathy and Innovation Amongst Engineering Students ........................... 3209
Justin J. Hess, Nicholas D. Fila, Senay Parzer, Johannes Strobel

Curriculum Innovation in Industrial Engineering: Developing a New Degree Program ........................................ 3211
Mary J. Moeller, Nebil Buyurgen, Corey Kassat

Women Advancing in Technology .......................................................................................................................... 3231
Evelyn D. Stewart, Nicholas D. Fila, Senay Parzer, Kim A. Rice

Edward J. Berger, Edward A Pan

Learning to Integrate Mathematical and Design Thinking in Engineering .............................................................. 3268
Delean Tolbert, Monica E Cardella

Students and Engineering Educators’ Feedback on Design .................................................................................. 3280
Araceli Martinez Ortiz, Bahram Asiabanpour, Somenjana Aslam, Jesus Alejandro Garcia, Yoojae Kim, Hassan Salamy

Stereoscopic Visualization for Improving Student Spatial Skills in Construction Engineering and Management Education ........................................................................................................................................................................ 3290
Namhun Lee, Sangho Park

Understanding Youth Collaboration: How Learners Experience the Design Process in a Collaborative Context (Fundamental) ............................................................................................................................................. 3301
Michelle E Jordan, Tonatiuh Mengual-Hillioneva

Improving the Understanding of BIM Concepts Through a Flipped Learning Lab Environment: A Work in Progress .................................................................................................................................................. 3310
Christopher Monson, Hoda Homayouni, Carrie S Dossick, Anne K Anderson

Lessons Learned from Team-Teaching a PBL Robotics Course with Multi-Disciplinary Instructors and Students ............................................................................................................................................. 3326
Jose M Garcia, Rick Homkes, Mark T Carnes, Kevin D. Taylor

Engaging Students in Sustainability Education and Awareness of Green Engineering Design and Careers through a Pre-Engineering Program ........................................................................................................... 3335
Jill K Nelson, Margret Hjalmarson

Faculty Development Groups for Interactive Teaching .......................................................................................... 3351
David A. Rogers, Orlando R. Baiocchi, Paulo F Ribeiro

Technology Education in Primary School in Sweden: A Study of Teachers Views on Teaching Strategies and Subject Content .................................................................................................................................................. 3372
Veseli Fabjan, Lena B. Gammelius, Per G. Norström

Using LEGO MINDSTORMS in a Control Systems Lab to Impact Next Generation Engineers (Works in Progress) ................................................................................................................................................. 3387
Charlotte De Vries, Yi Wu, Mrs. Melanie R. Ford, Oladipo Onipede Jr.
Visual Communication Learning through Peer Design Critiques: Engineering Communication Across Divisions ........................................3397
Alexa Catherine Taylor, Stephanie Palford

Internalizing the Symbolic World: Using Low-Cost Shake Tables to Convey Earthquake Engineering Concepts to Secondary School Students (K-12 Division: Curriculum Exchange) .................................................................3410
Eric Kjolsing, Yael Van Den Einde

Redesign of Lab Experiences for a Senior Level Course in Dynamic Systems with Controls ..............................................................3413
Diane L. Peters, Richard Stanley, Craig J. Hoff, John Casci

VOLUME 5

Evolution of a First-Year Engineering Course ..................................................................................................................................................................................3422
Noah Saltzman, Janet Callahan, Gary Leroy Hunt, Carol Sevier, Amy J Moll

Application of Web Published Virtual Instruments in Delivering Engineering Instructions and Performing Experimental Research ..........................................................................................................................3443
Shahnam Navaei

Implementation of ORION and its Effect on Student Learning .................................................................................................................................3455

Raising the Bar for Engineering: Why ABET is Necessary but not Sufficient ......................................................................................... 24556
Stephen J. Ressler, Thomas A. Lenox

Revitalizing the Chemical Engineering Senior Design Experience: Empowerment, Entrepreneurship, and a Flipped Classroom Experience ......................................................................................... 24565
Andrew Tadd, Elaine Wisniewski, Leena N Lalwani

Implementation and Assessment of Process Oriented Guided Inquiry Learning (POGIL) in Large Format Classrooms for Introduction to Materials ................................................................. 24580
Richard E Elkel

Fostering Innovative Skills within the Classroom: A Qualitative Analysis from Interviews with 60 Innovators ................................................................. 24590

Interactive Mathematica Simulations for Chemical Engineering ......................................................................................... 24606
John L. Falconer, Garrett Nixodemus

Identity and Design Process in Adult, Non-traditional, Engineering Students: Phase I: Training for Extending Prior Studies ......................................................................................... 24611
Maria-Isabel Carnasciali, Shannon Ciston, Christina A. Foy, Pedro S. H. Kim, Emi Okada Okada, Audrianna F Rodriguez

Engineering Pathways of Nontraditional Students - An Update on NSF Award 1361058 ................................................................. 24621
Jacqueline McNeil, Matthew W. Ohland, Russell Andrew Long

Recruiting and Retaining Women Engineers: An Analysis of a Successful College Program ................................................................. 24630
Andrea L Welker, Kathleen Louise Nazar, Paul Bonfanti

Continuing Education and Training of Academic (Teaching) Staff and (Teaching) Change Agents for Engineering Education: Concept and Program for Developing Teaching and Improving Learning at University (name) ......................................................................................... 24644
Monika Rummel. Petra Nikol

Global Navigation Satellite Systems GNSS as an Effective Tool for Engineering Education ......................................................................................... 24658
Wayne A Scales, J Michael Raubonieni, Geoff Crowley

How Did We End Up Together? Evaluating Success Levels of Student-formed vs. Instructor-formed Capstone Teams ......................................................................................... 24668

Evaluation of a Nine Year Summer Undergraduate Research Program in Biomedical Engineering ......................................................................................... 24680
Eric M Brey, Megan F. Campanile, Normun G Lederman

An Examination of ME449 Redesign and Prototype Fabrication: A New Senior/Grad Design and Fabrication Course at the University of Wisconsin – Madison ......................................................................................... 24699
Kim J Manner, Frank E Pfefferkorn

Educating and Training the Next Generation of Industrial Engineers to Work in Manufacturing ......................................................................................... 24719
Paul C. Lynch, Cynthia Bober, Joseph Wick

Assessing the Learning Gains of Manufacturing Students in an Integrated Hands-on Curriculum ......................................................................................... 24733
Mukasa E. Suamakula, Gene Yeau-Jian Liao, Shlomo S. Sawilowsky

Impact of Problem Contexts on the Diversity of Design Solutions: an Exploratory Case Study ......................................................................................... 24742
Seda Yilmaz, Meisha Nicole Berg, Shanna R. Daly, Kathryn W. Jablukow, Eli M. Silk, Wesley Teerlink

Service Learning As a Philanthropy Effort of a Student Organization ......................................................................................... 24754
Mallini Natajaranthan

Feedback in Complex, Authentic, Industrially Situated Engineering Projects using Episodes as a Discourse Analysis Framework – Year 3 ......................................................................................... 24763
Milo Koretsky, Audra Briggs Champagne, Laura Hirshfield, Erick Jacob Nefcy

Idea Generation Through Empathy: Reimagining the ‘Cognitive Walkthrough’ ......................................................................................... 24772
Colin M. Gray, Seda Yilmaz, Shanna R. Daly, Colleen M. Seifert, Richard Gonzalez

Career Advancement Through Academic Commercialization: Acknowledging and Reducing Barriers for Women Engineering Faculty ......................................................................................... 24801
Anton Turrentine

Putting the Emerging Commercial Sub-orbital Industry to Work for Engineering Education ......................................................................................... 24820
Steven H. Collicott

5th Year Master’s Degree Program for Engineers: Preparing the Next Generation of K-12 Technology, Engineering and Design Education Teachers (Work in Progress) ......................................................................................... 24833
Tameshia S. Ballard, Vincent William Deluca, Aaron C. Clark

Instructor Concerns and Use of Resources in the Development of Course Materials ......................................................................................... 24841
Grace Panther, Devlin Montfort, Shane A. Brown

Does Motivation Matter for Conceptual Change: Developing Effective Qualitative Research Approaches ......................................................................................... 24851
Holly M Mansovitch, Rachel E McCord, Cheryl Carrico, Danielle Almertia Smalls, Philip Reid Brown

Case Study Based Educational Tools for Teaching Software V&V Course at Undergraduate Level ......................................................................................... 24861
